Subject: Re: Collection of Cell Site Location Data

b6
b7C
b7E

Thanks for the info. The question from the field stems from a disparity between the ELSUR guide produced by OEO and analysis. It appears that an SA got hold of both these, noticed the differing opinions, and pointed that out to the CDC I don't know if it was related to a specific case or not.

B-5 b5

I'll find out if there is a specific case which requires appropriate advisement, or whether this was just a question raised for interesting conversation between a SA and CDC. That will help to determine the priority for this.

Thanks.

Operating a Cell Site Simulator, or "WITT"Gear, to Locate a Cell Phone

Operation of a Cell Site Simulator (CSS), or "WITT" gear, requires different court orders under different circumstances. In order to determine which court order(s) is/are needed in a particular case, a "Cell Phone Location Quick Reference Guide" is attached as Appendix C. To the extent that a pen register order, or Rule 41 warrant is required, the emergency provisions for each are discussed above, as are the consent exceptions.

execute such an order at one central point and not require the "use" of the device outside of the court's jurisdiction.

II. Collection of Cell Phone Location Information Directly by Law Enforcement

Law enforcement possesses electronic devices that allow agents to determine the location of certain cellular phones by the electronic signals that they broadcast. This equipment includes an antenna, an electronic device that processes the signals transmitted on cell phone frequencies, and a laptop computer that analyzes the signals and allows the agent to configure the collection of information. Working together, these devices allow the agent to identify the direction (on a 360 degree display) and signal strength of a particular cellular phone while the user is making a call. By shifting the location of the device, the operator can determine the phone's location more precisely using triangulation.

In order to use such a device the investigator generally must know the target phone's telephone number (also known as a Mobile Identification Number or MIN). After the operator enters this information into the tracking device, it scans the surrounding airwaves. When the user of that phone places or receives a call, the phone transmits its unique identifying information to the provider's local cell tower. The provider's system then automatically assigns the phone a particular frequency and transmits other information that will allow the phone properly to transmit the user's voice to the cell tower. By gathering this information, the tracking device determines which call (out of the potentially thousands of nearby users) on which to home in. While the user remains on the phone, the tracking device can then register the direction and signal strength (and therefore the approximate distance) of the target phone.

A. Use of Law Enforcement Cell Phone Tracking Devices Prior to the USA PATRIOT Act of 2001

In 1994, the Office of Enforcement Operations opined that investigators did not need to obtain any legal process in order to use cell phone tracking devices so long as they did not capture

the numbers dialed or other information "traditionally" collected using a pen/trap device. This analysis concluded that the "signaling information" automatically transmitted between a cell phone and the provider's tower does not implicate either the Fourth Amendment or the wiretap statute because it does not constitute the "contents" of a communication. Moreover, the analysis reasoned – prior to the 2001 amendments – that the pen/trap statute did not apply to the collection of such information because of the narrow definitions of "pen register" and "trap and trace device." Therefore, the guidance concluded, since neither the constitution nor any statute regulated their use, such devices did not require any legal authorization to operate.

B. The Pen/Trap Statute, As Amended By The USA PATRIOT Act of 2001

Although the analysis remains unchanged with respect to the Fourth Amendment and the wiretap statute, substantial amendments to the definitions of "pen register" and "trap and trace device" in the USA PATRIOT Act alter the applicability of the pen/trap statute. The new definitions, on their face, strongly suggest that the statute now governs the use of such devices. Where the old definition of "pen register" applied only to "numbers dialed or otherwise transmitted," "pen register" now means

> a device or process which records or decodes dialing, routing, addressing, and signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted....

18 U.S.C. § 3127(3). "Signaling information" is a broader term that encompasses other kinds of non-content information used by a communication system to process communications. This definition appears to encompass all of the non-content information passed between a cell phone and the provider's tower.

Similarly, the USA PATRIOT Act broadened the definition of "trap and trace device." Where before the definition included only "the originating number of an instrument or device," the new definition covers "the originating number or other dialing, routing, addressing, and signaling information reasonably likely to identify the source of a wire or electronic communication...." 18 U.S.C. § 3127(4). Like the definition of "pen register," this broader definition appears to include

such information as the transmission of a MIN, which identifies the source of a communication.

Moreover, the scant legislative history that accompanied passage of the Act suggests Congress intended that the new definitions apply to all communications media, instead of focusing solely on traditional telephone calls. Although the House Report cannot definitively state the intent of both houses of Congress when passing the final bill, it does strongly suggest that Congress intended that the statute would apply to all technologies:

> This section updates the language of the statute to clarify that the pen/register [sic] authority applies to modern communication technologies. Current statutory references to the target "line," for example, are revised to encompass a "line or other facility." Such a facility includes: *a cellular telephone number*; *a specific cellular telephone identified by its electronic serial number (ESN)*; an Internet user account or e-mail address; or an Internet Protocol (IP) address, port number, or similar computer network address or range of addresses. In addition, because the statute takes into account a wide variety of such facilities, section 3123(b)(1)(C) allows applicants for pen register or trap and trace orders to submit a description of the communications to be traced using any of these or other identifiers.
>
> Moreover, the section clarifies that orders for the installation of pen register and trap and trace devices may obtain *any* non-content information – "dialing, routing, addressing, and signaling information" – utilized in the processing and transmitting of wire or electronic communications....
>
> This concept, that the information properly obtained by using a pen register or trap and trace device is non-content information, *applies across the board to all communications media* ... ([and includes] packets that merely request a telnet connection in the Internet context).

H.R. Rept 107-236, at 52-53 (emphasis added). Indeed, this last reference to a packet requesting a telnet session – a piece of information passing between machines in order to establish a communication session for the human user – provides a close analogy to the information passing between a cell phone and the nearest tower in the initial stages of a cell phone call.

Finally, the House Report recognizes that pen registers and trap and trace devices could include devices that collect information remotely. The Report states:

> Further, *because the pen register or trap and trace 'device' is often incapable of being physically 'attached' to the target facility due to the nature of modern communication technology*, section 101 makes two other related changes.

> First, in recognition of the fact that such functions are commonly performed today by software instead of physical mechanisms, the section allows the pen register or trap and trace device to be 'attached or applied' to the target facility [such as an ESN]. Likewise, the definitions of 'pen register' and 'trap and trace device' in section 3127 are revised to include an intangible 'process' (such as a software routine) which collects the same information as a physical device.

H.R. Rept 107-236, at 53 (emphasis added). Thus, the statutory text and legislative history strongly suggest that the pen/trap statute governs the collection of cell phone location information directly by law enforcement authorities.

C. The Inapplicability of CALEA's Prohibition on Collection Using Pen/Trap Authority

In passing CALEA in 1994, Congress required providers to isolate and provide to the government certain information relating to telephone communications. At the same time that it created these obligations, it created an exception: carriers shall not provide law enforcement with "any information that may disclose the physical location of the subscriber" in response to a pen/trap order. (A fuller quotation of the language appears, above, in Section I.B.). By its very terms, this prohibition applies only to information collected by a provider and not to information collected directly by law enforcement authorities. Thus, CALEA does not bar the use of pen/trap orders to authorize the use of cell phone tracking devices used to locate targeted cell phones.

D. Conclusion

The amended text of the pen/trap statute and the limited legislative history accompanying the 2001 amendments strongly suggest that the non-content information that passes between a cellular phone and the provider's tower falls into the definition of "dialing, routing, addressing, and signaling information" for purposes of the definitions of "pen register" and "trap and trace device." A pen/trap authorization is therefore the safest method of allowing law enforcement to collect such transmissions directly using its own devices.

WITT

Wireless Intercept and Tracking Team

Cellular Tracking Legal Issues

March 3, 2005

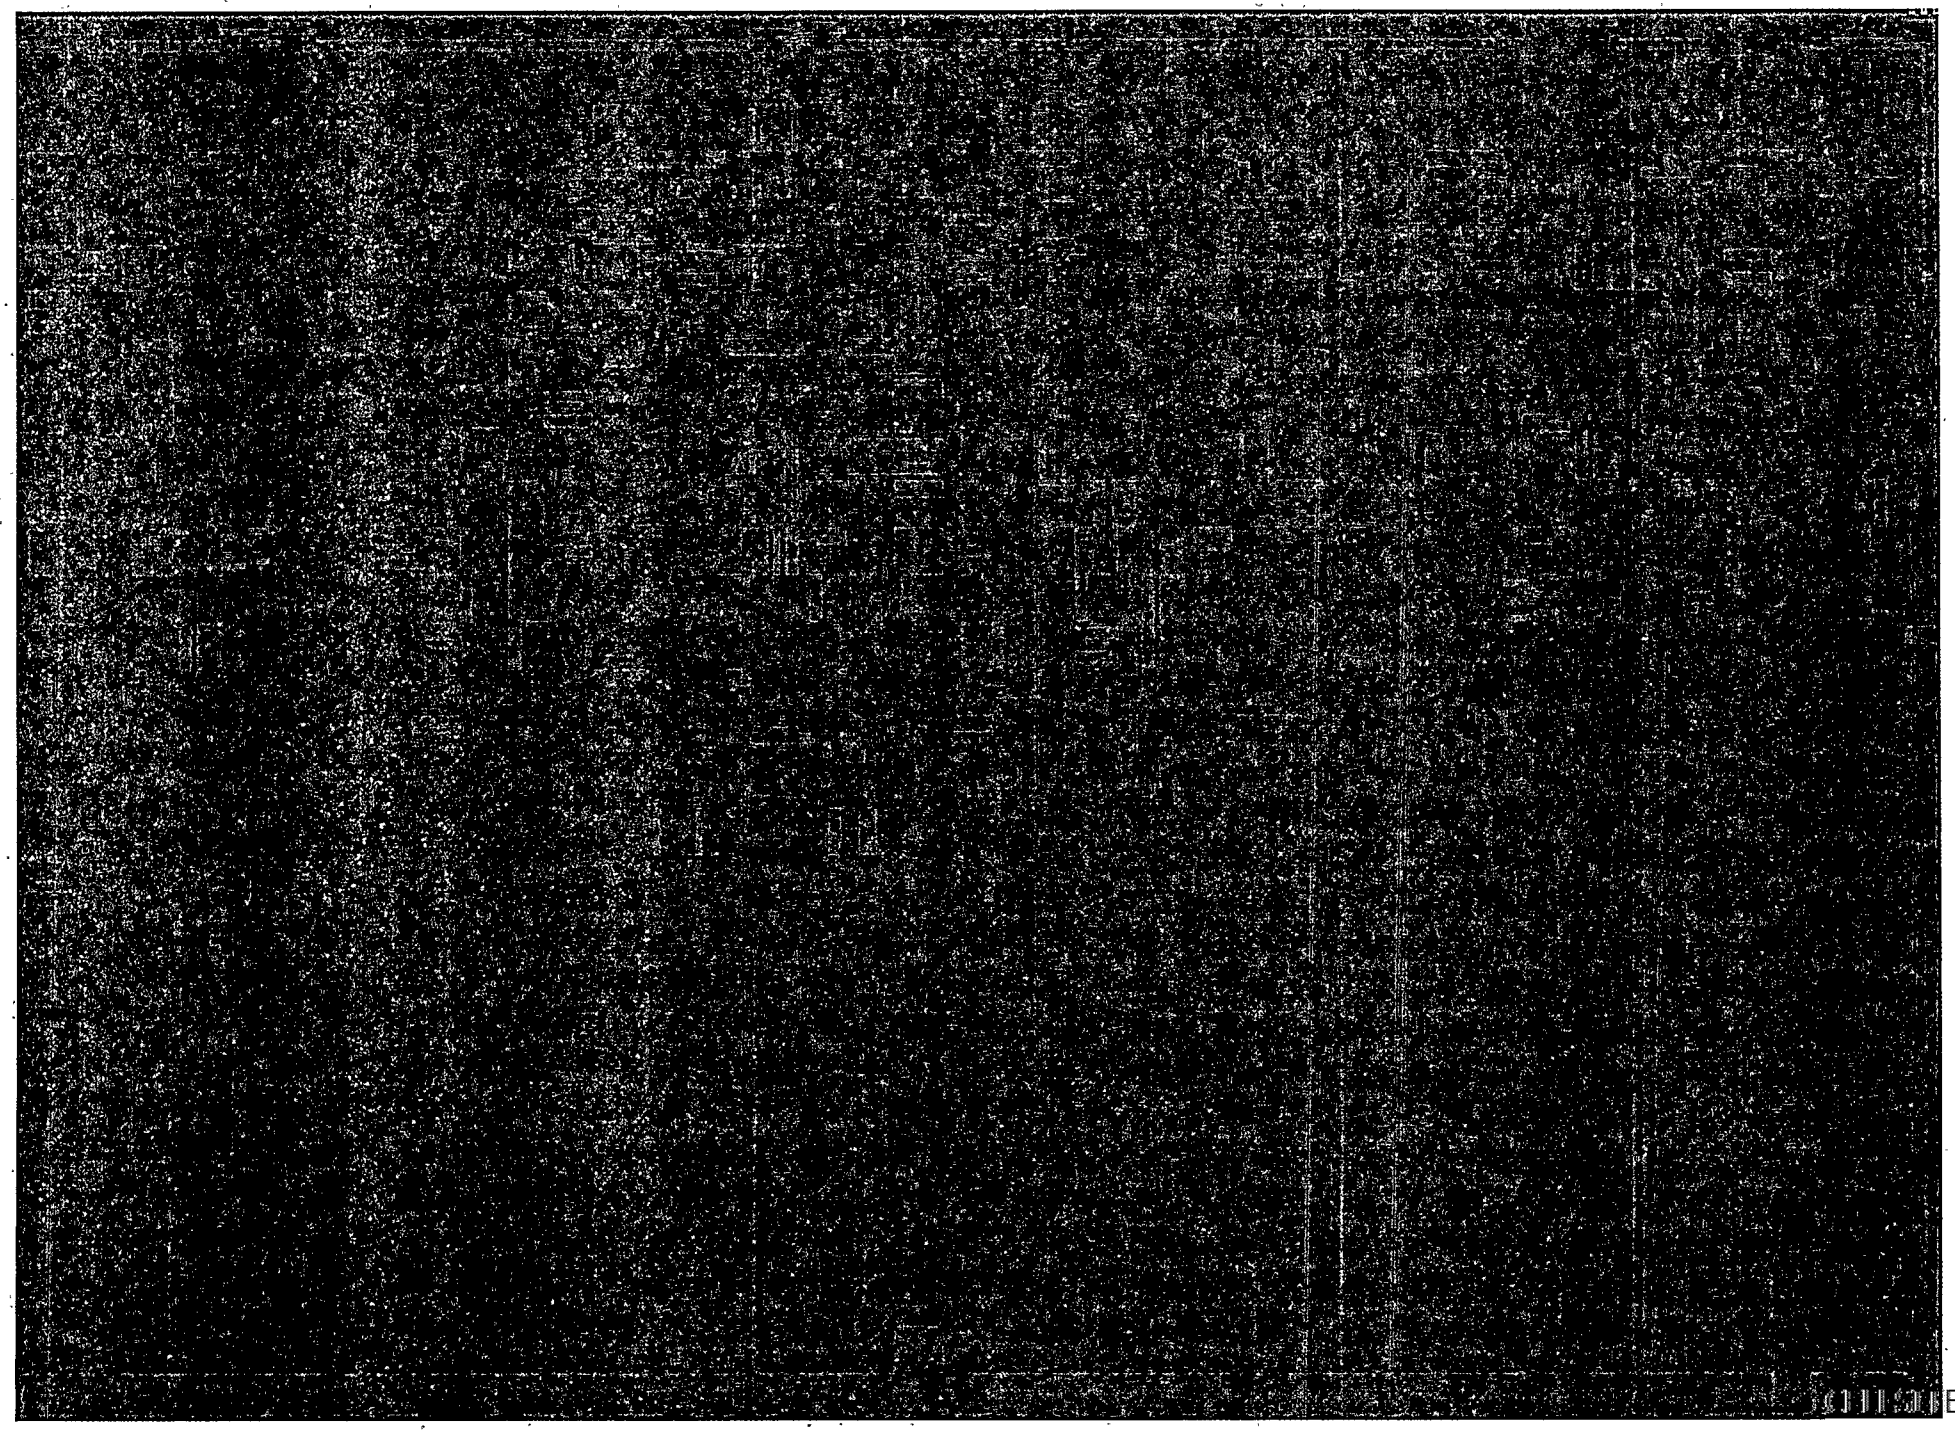
WITT

Wireless Intercept and Tracking Team

Overview

- Pen Register Device (18 U.S.C. § 3127(3))
  - Old Law vs. New Law
  - Non-Target users (Privacy Interest)
  - Potential Interference
- Sample app & order
- Protecting Technique
  - Use as evidence
  - Qualified Privilege

CELLSITE-2276



E-2277

OLD Policy

- **Prior Policy**
  - DOJ view: autonomous registration data not "dialed number" [redacted] and .
  - Not content, so [redacted]

b5
b7E

CELLSITE-2279

Pen Register Device: 18 USC 3127(3)

Old Definition

- "pen register" means a device which records or decodes electronic or other impulses which **identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached….**

New Definition

- "pen register" means a device ***or process*** which records or decodes ***dialing, routing, addressing, or*** **signaling** ***information*** **transmitted by an instrument or facility from which a wire or electronic communication is transmitted,** ***provided, however, that such information shall not include the contents of any communication***….

CELLSITE-2280

WITT
Wireless Intercept and Tracking Team

New Law: USA Patriot Act

b5
b7E

- **§ 3127 Pen Register device or process:**
  - "records or decodes dialing, routing, addressing, or signaling information
  - transmitted by an instrument or facility from which a wire or electronic communication is transmitted"

DOJ:

CELLSITE-2281

WiTT
Wireless Intercept and Tracking Team

The Debate:

[redacted]

b5
b7E

Statutory language: [redacted]

- data "utilized in the processing" of a communication see 3121(c) since 1994 LE obligated to restrict recording to "dialing and signaling information utilized in call processing"
- at the time of the call--i.e., occurring in real-time
  - "***from which a wire or electronic communication is transmitted***" not may be transmitted see 3127(3)
- [redacted]

CELLSITE-2283

WITT
Wireless Intercept and Tracking Team

Debate Cont.

- IF Signaling Information:
  - –Implied Consent? – 18 U.S.C. § 3121(b)(3)

b5
b7E

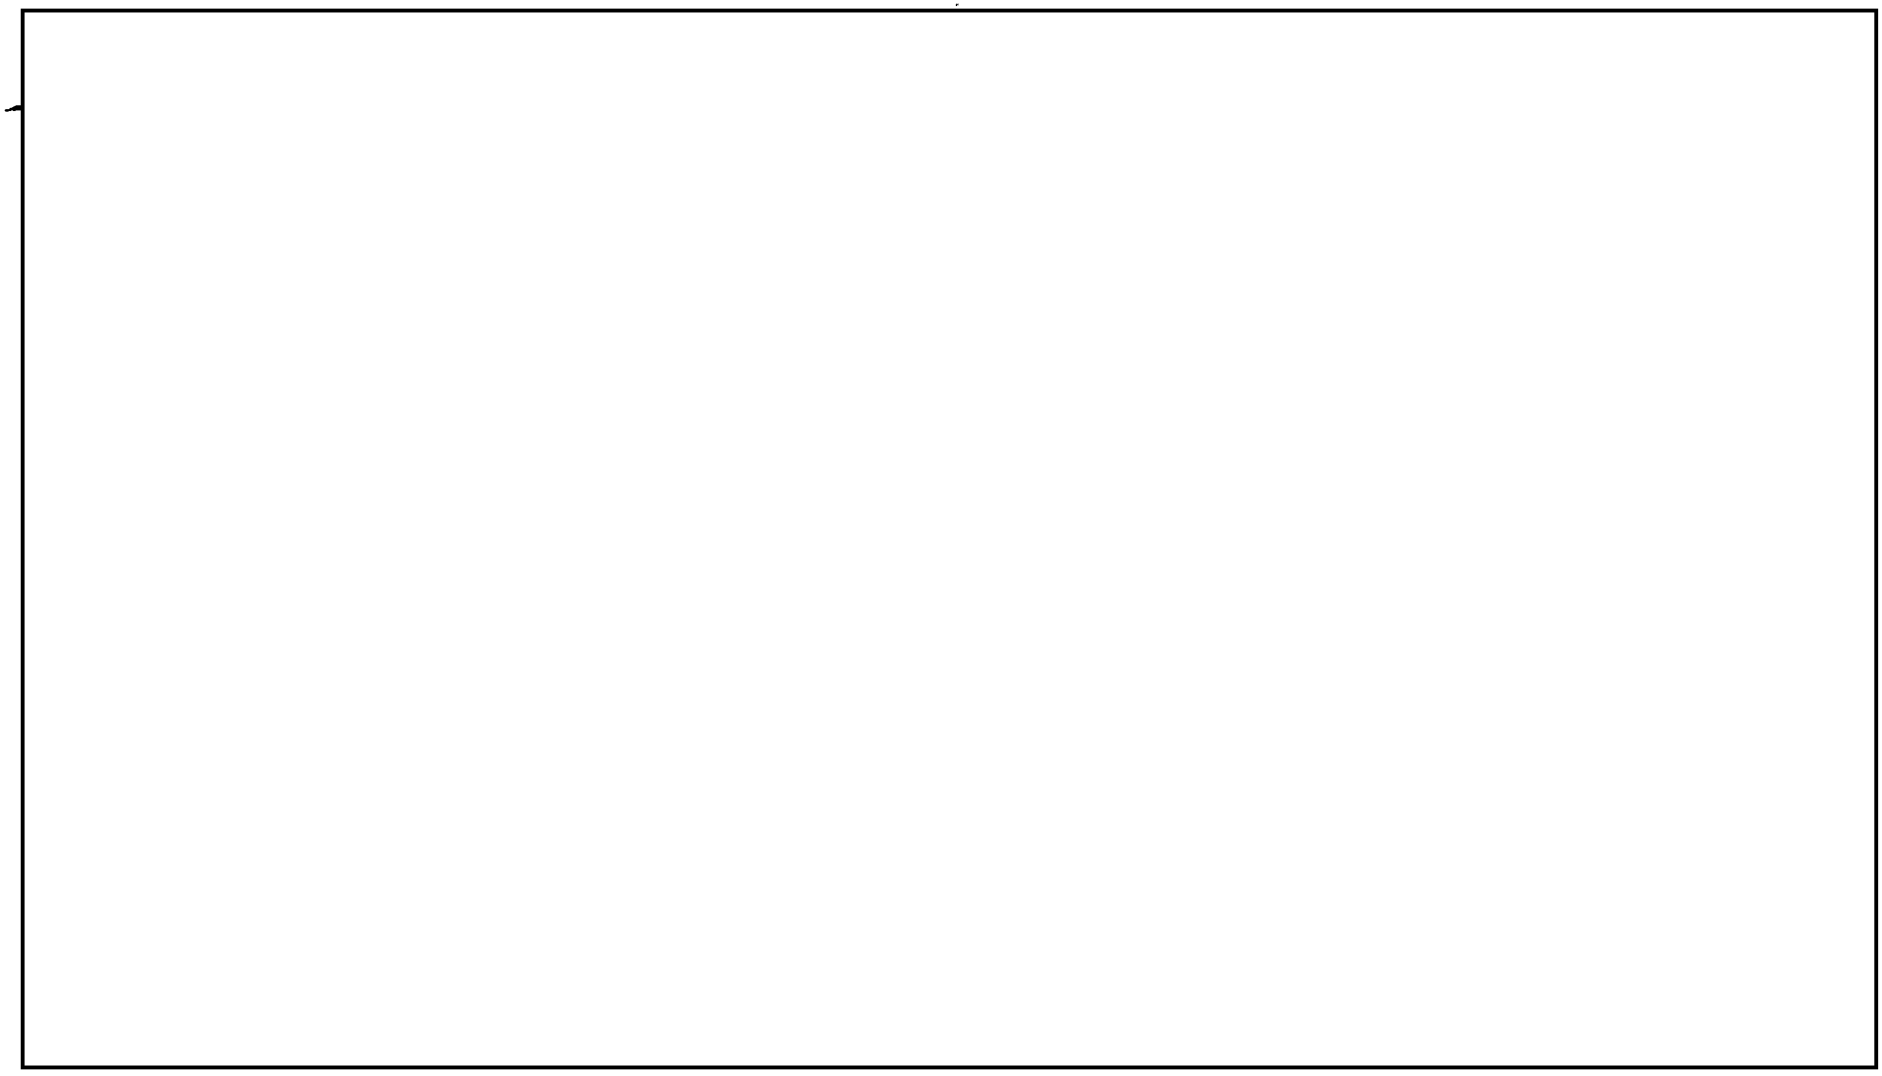
    - adequate **Notice** of monitoring by cellular provider to show ACTUAL knowledge
    - Misplaced trust

CELLSITE-2284

WITT
Wireless Intercept and Tracking Team

Debate Cont.

The dilemma:



b5

WITT
Wireless Intercept and Tracking Team

Emergency Provision

§ 3125(a)(1)

[redacted]

- [redacted]
  - DOJ command Center
  - OEO (business hours)
- Emergencies involving:
  - Immediate danger of death or serious injury

b5
b7E

CDMA Glossary A-Z

Access Attempt
: A sequence of one or more access probe sequences on the Access Channel containing the same message. See also access probe and access probe sequence.

Access Channel
: A Reverse CDMA Channel used by mobile stations for communicating to base stations . The Access Channel is used for short signaling message exchanges such as call originations, responses to pages, and registrations.

Access Channel Message
: The information part of an access probe conssiteing of the message body, length field, and CRC.

Access Channel Preamble
: A sequence of all-zero frames sent at the 4800 bps rate preceeding an Access Channel message. It aids the base station receiver in detecting and syncronizing the Access Probe.

Access Channel Request Message
: An Access Channel message that is autonomously generated by a mobile station.

Access Channel Response Message
: An Access Channel message that is generated to reply to a message received from a base station.

Access Channel Slot
: The assigned time interval for an access probe. An access channel slot consists of an integer number of frames. The transmission of an access probe is performed within the boundaries of an Access Channel slot.

Access Probe
: One Access Channel transmission consisting of a preamble and a message. The transmission is an integer number of frames in length and carries one Access Channel message.

Access Probe Sequence
: A sequence of one or more access probes. The transmitted power escalates during an access probe sequence from a prescribed minimum power until acknowledged by the base station, or until a presribed maxixum power is reached. One or more repetitions of an access probe sequence constitute an access attempt.

Acknowledgement
: A link layer response by a mobile station or a base station confirming that a signaling message was received correctly.

Action time
: The time at which an action implied by a signaling message should take place.

Active set
: The set of pilots associated with the CDMA Channels containing Forward Traffic Channels assigned to a particular mobile station.

Aging
: A mechanism through which the mobile station maintains in its Neighbor Set the pilots that have been recently sent to it from the base station and the pilots whose drop timers have recently expired.

A-key
: A concealed 64-bit pattern stored in the mobile station. It is used to generate and update the mobile station's shared secret data, which is used for authentication. See also authentication and shared secret data.

Analog Paging Channel

A forward analog control channel that is used to page mobile stations and send orders.

Analog Voice Channel
A channel on which a voice conversation occurs and on which brief digital messages may be sent from a base station to a mobile station or from a mobile station to a base station.

Application Layer
The application layer of the IS-95 air interface provides control of the cellular telephone system. Signaling messages originate and terminate at the application layer. See also Layering, Physical layer and Link layer.

Area Propatation Model
A propagation model in which median transmission loss calculations are based on generalized characteristics of the area surrounding the transmitter and receiver, as well as the intervening area. Features such as local environment, terrain roughness, building density are used to modify a median transmission loss equation in order to adopt it to the service area.

Authentication
A procedure used by base stations to validate a mobile station identity at system access and other times, and by mobile stations to validate a base station identity when ordered to update the shared secret data.

Autonomous Registration
A method of registration in which the mobile station registers without an explicit command from the base station.

Base Station
A fixed station used for communicating with mobile stations. Depending upon the context, the term base station may refer to a cell, a sector within a cell, an MSC, or other part of the cellular system. It is sometimes used loosely in the standards to mean any land side functionality. See also Mobile Switching Center.

BCH Code
See Bose-Chaudhuri-Hocquenghem Code.

BER
See bit error rate.

Bose-Chaudhuri-Hocquenghem Code (BCH Code)
A large class of error-correcting cyclic codes. For any positive integers m, $m > 3$, and $t < 2^{m-1}$, there is a binary BCH code with a block length n equal to $2^m - 1$ and $n - k < mt$ parity check bits, where k is the number of information bits. The BCH code has a minimum distance of at least $2t + 1$.

Bit Error Rate (BER)
Numerically equal to the number of errored bits divided by the total number of bits. Care should be taken when reporting or interpreting "bit error rate" in systems that use encapsulated data or otherwise add overhead to the payload bits. It is normally not meaningful in the CDMA context because whole frames are erased, or not, according to the result of the frame quality check. See Frame Error Rate and Message Error Rate.

Blank and burst
The pre-emption of an entire Traffic Channel frame's primary traffic by signaling traffic or secondary traffic.

Blocking
Failure of a telecommunication system to provide service in response to a call attempt. Blocking in a CDMA system can be due to hard causes, such as lack of a necessary resource, or to soft causes, such as excessive interference in an air interface.

bps
Bits per second.

Calling rate
The number of originations per unit time in a designated service area. See also Erlang load.

Candidate set
The set of pilots that have been received by the mobile station with sufficient strength to be successfully demodulated, but have not been placed in the Active Set by the Base station. See also Active Set, Neighbor Set, and Remaining Set.

CDMA
See Code Division Multiple Access.

CDMA Channel
The set of channels transmitted between the base station and the mobile stations within a given CDMA frequency assignment. See also Forward CDMA Channel and Reverse CDMA Channel.

CDMA Channel Number
An 11-bit number identifying the center of the CDMA frequency assignment.

CDMA Frequency Assignment
A 1.23 MHz segment of spectrum centered at a discrete frequency identified by the CDMA channel number. The allowable channels are centered on one of the 30 kHz channels of the AMPS system.

Cell
Loosely, one or more collocated base stations. They can service different angular sectors, different frequencies, or both.

Cell Site
The physical location of a cell's radio equipment and supporting systems. This term is also used to refer to the equipment located at the cell site.

CELP
See Code Excited Linear Prediction

Chip
Informal term used to refer to either a binary element of a spreading sequence, or to the time interval that it occupies, or 1/1.2288 MHz = 813.8 ns, or, at the speed of light, a distance of c/f = (0.3 m/ns)/1.2288 MHz = 244.1 meters.

Channel Coder
A device that adds redundancy to digital data before transmission for the purpose of reducing the end-to-end error rate. See also Convolutional Coder.

Channel Decoder
A device that performs error correction on coded data by exploiting the redundancy introduced by the channel coder. See also Viterbi Decoder.

Clone
A fraudulent subscriber station created by copying a MIN-ESN pair from a legitimate subscriber's over-the-air transactions.

Code Channel
One of the orthogonal subchannels of a CDMA Forward CDMA Channel. Code channel zero is the pilot channel. Code channels 1 through 7 may be assigned to either Paging Channels or Traffic Channels. Code channel 32 may be assigned to either the Sync Channel or to Traffic Channels.

Code Division Multiple Access
A technique for spread-spectrum multiple access digital communication that creates channels through the use of noise-like carrier waves.

Code Excited Linear Prediction (CELP)

A technique of voice coding that makes use of linear prediction filters excited by a stimulus looked up from a pre-stored table, based on its similarity to the residue from the LPC filter solution.

Code Symbol
: A symbol from a finite alphabet that is the output of an error-correcting-code encoder. Information bits enter the encoder and code symbols leave the encoder. The alphabet may be binary, or may have larger dimensionality.

Codec
: A combination of encoder and decoder, frequently used in the context of speech codec, meaning both components of the speech coding and decoding process, operating in full duplex mode.

Convolutional Code
: An error-correcting code that is generated by finite-field division of the data sequence, regarded as a polynomial over a finite field, by a generator polynomial. Such a division resembles a discrete convolution.

Coverage Area
: A geographical area in which a mobile will receive satisfactory signal-to-noise ratio (E_b/N_0) in both forward and reverse links. Evaluation of coverage for a CDMA system must take into account the effects of soft handoff and multipath, as well as signal strength.

CRC
: See Cyclic Redundancy Code.

Cyclic Redundancy Code (CRC)
: A class of linear error detecting codes that generate a parity check bits as the remainder of a polynomial division of the data, regarded as a polynomial, by a generator polynomial. They are often based on a BCH code, used only for its error detection capability.

Data Burst Randomization
: The pseudo-random process that determines which power control groups are transmitted by a mobile station when its transmitted bit rate is less than full rate.

dBc
: The ratio, in dB, of the sideband power of a signal, measured in a given bandwidth at a given frequency offset from the same signal, to the total power of the signal. For a CDMA signal, the signal power is measured in a 1.23 MHz bandwidth.

dBm
: Power measured in dB relative to one milliwatt.

dBW
: Power measured in dB relative to one Watt.

Deinterleaving
: The process of unpermuting the symbols that were permuted by an interleaver.

Dim-and-Burst
: The process by which primary rate traffic is forced to a lower-than-maximum rate and transmitted together with signaling or secondary traffic in the same frame.

Distance-Based Registration
: An autonomous registration method in which the mobile station registers whenever it enters a cell whose distance from the cell in which the mobile station last registered exceeds a given threshold.

Ducting
: Guiding of electromagnetic radiation by refraction due to index gradients in the atmosphere.

E_b
: The energy of an information bit. E_b is measured in Joules, or equivalently in Watts per Hertz.

Effective Antenna Elevation (Base Station)

The height of the radiation center of the base station antenna above the average elevation of the ground midway between the base station and the mobile. Particular ranges of distance are invoked by the Federal Communications Commission to define height above average terrain (HAAT) for various services.

Effective Antenna Elevation (Mobile Station)

The height of the radiation center of the mobile station antenna above the ground.

Effective Isotropic Radiated Power (EIRP)

The transmitted power multiplied by the antenna gain referenced to an ideal isotropic radiator. EIRP is larger that ERP in the same direction by the gain of an ideal dipole relative to an isotropic radiator, which is 2.1 dB.

Effective Radiated Power (ERP)

The transmitted power multiplied by the antenna gain referenced to a half-wave dipole.

EIRP

See Effective Isotropic Radiated Power.

Electronic Serial Number (ESN)

A 32-bit number assigned by the mobile station equipment manufacturer, uniquely identifying the mobile station equipment.

Encoder Tail Bits

Fixed value bits appended to a block of data in order to flush a convolutional encoder so that it is left in a known state. Leaving the encoder in a known state aids the decoding.

Erlang

A dimensionless unit of telephone traffic intensity. It is numerically equal to the calling rate times the average holding time. It is named for the Norwegian telephone engineer who first popularized the concept.

Erlang B

Also called *Lost Calls Cleared* model. A mathematical model of telephone traffic blocking in which blocked calls are not queued. The Erlang B blocking probability for N resources, calling intensity y Erlangs, is

$$P = \frac{y^N/N!}{\sum_{k=0}^{N} y^k/k!}$$

Cf. Erlang C Model and Poisson Blocking Model.

Erlang C

Also called *Lost Calls Delayed* model. A mathematical model of telephone traffic blocking in which blocked calls are queued. It is similar to the Poisson Blocking Model, with which it is sometimes confused. The Erlang C blocking probability for N resources, calling intensity y Erlangs, is

(Need to figure out Erlang C Formula!)

ERP

See Effective Radiated Power.

ESN

See Electronic Serial Number.

Fade Timer

A timer kept by the mobile station as a measure of Forward Traffic Channel continuity. If the fade timer expires, the mobile station drops the call.

CELLSITE 6388002

FEC

See Forward Error Correction

FER

See Frame Error Rate

Flash

An indication sent on a CDMA Traffic Channel indicating that the user directed the mobile station to invoke special processing.

Flat Fading

Radio signal fading characteristic of a multipath environment where the delay spread is less than the reciprocal bandwidth of the signal. Under these circumstances the fading is uniform across the bandwidth of the signal, and thus is essentially just an amplitude change. Also known as frequency-independent fading. Cf. Frequency Selective Fading, Rayleigh Fading, Ricean Fading.

Foreign NID Roamer

A mobile station operating in the same system (SID) but a different network (NID) from the one in which service was subscribed. See also Foreign SID roamer.

Foreign SID Roamer

A mobile station operating in a system (SID) other than the one in which service was subscribed. See also Foreign NID roamer.

Forward CDMA Channel

A CDMA Channel from a base station to mobile stations. The Forward CDMA Channel comprises one or more code channels that are transmitted on a CDMA frequency assignment using a particular pilot PN offset. The code channels are associated with the Pilot Channel, Sync Channel, Paging Channels, and Traffic Channels. The Forward CDMA Channel always includes a Pilot Channel and may include a Sync Channel, up to seven Paging Channels, and up to 63 Traffic Channels. The total number of code channels, including the Pilot Channel, cannot exceed 64.

Forward Error Correction (FEC)

A technique for improving performance of a digital communication channel that applies an error-correcting code in the transmitter and performs correction in the receiver without feedback to the transmitter. "Forward" here refers to the lack of feedback, not the transmission direction.

Forward Traffic Channel

A code channel used to transport service option (usually voice) and signaling traffic from the base station to the mobile station.

Frame

A basic timing interval in a CDMA system. For the Access Channel, Paging Channel, and Traffic Channels, a frame is 20 ms in duration. For the Sync Channel a frame is 80/3 = 26.666 ms in duration.

Frame Category

A classification of a received Traffic Channel frame based upon transmission data rate, the frame contents (primary traffic, secondary traffic, or signaling traffic), and whether there are detected errors in the frame.

Frame Erasure Rate

Ratio of erased frames to total frames. Care should be used to distinguish between frame erasure rate and frame error rate. They are similar, but not identical. Erased frames usually are counted as errored frames, but not all errored frames are erased, that is, some may be undetected by the receiver.

Frame Error Rate (FER)

Ratio of errored frames to total frames. For purposes of this calculation, erased frames count as errored.

Frame Offset

A time skewing of Traffic Channel frames from System Time in integer multiples of 1.25 ms. The maximum frame offset is 18.75 ms.

Frame Quality Indicator

The CRC check applied to 9600 bps and 4800 bps Traffic Channel frames.

Frequency Selective Fading

Radio signal fading characteristic of a multipath environment where the delay spread is greater than the reciprocal bandwidth of the signal. Under these circumstances the fading is non-uniform across the bandwidth of the signal. The multipath produces deep notches in the spectrum, and thus strong distortion of the time-domain signal shape. Cf. Flat Fading, Rayleigh Fading, Ricean Fading.

Fresnel Radius

The radius r of the circle formed by the intersection of the first Fresnel zone with a plane perpendicular to the line of sight between the transmitting and receiving antennas. In meters it is given by

$$r = 548\sqrt{\frac{d_1 d_2}{f(d_1 + d_2)}}, \; d_1, \; d_2 \text{ in km and } f \text{ in MHz}$$

Fresnel Zone

1. The region in space between successive ellipsoids of revolution whose foci are the transmitting and receiving antennas. The ellipsoids are defined as the locus of points such that the sum of distances to the transmitting and receiving antennas differs from the line-of-sight distance by an interger number of half-wavelengths.

2. The area formed by the intersection of the regions of definition 1 with a plane perpendicular to the line of sight between the transmitting and receiving antennas.

CDMA Glossary G-M

Global Challenge Procedure

An exchange of information between a mobile station and a base station for the purpose of authenticating the mobile station identity. The base station broadcasts a challenge and each mobile station responds with its unique response when performing a system access. Cf. Unique Challenge-Response Procedure.

Global Positioning System (GPS)

A US government satellite system that provides location and time information to users. See Navstar GPS Space Segment / Navigation User Interfaces ICD-GPS-200 for specifications.

GPS

See Global Positioning System.

Handoff

The act of transferring control of a mobile station from one base station to another. See also Soft Handoff, Hard Handoff.

Handover

Synonym for Handoff.

Hard Handoff

A handoff characterized by a temporary disconnection of the Traffic Channel. Hard handoffs occur when the mobile station is transferred between disjoint Active Sets, the CDMA frequency assignment changes, the frame offset changes, or the mobile station is directed from a CDMA Traffic Channel to an analog voice channel. Cf. Soft Handoff.

Hash Function

A mathematical function used by the mobile station to select one out of N available resources. The hash function ensures statistically uniform use of the resources.

Height Above Average Terrain (height AAT)
See Effective antenna elevation.

HLR
See Home Location Register.

Home Location Register (HLR)
The database in a wireless communication network that contains registration and user profile information for the system subscribers.

Home System
The system which is transmitting a system identification (SID) which is recognized by the mobile station as its Home SID, normally the system in which service was subscribed (see System Identification).

Idle Handoff
The act of transferring reception of the Paging Channel from one base station to another, when the mobile station is in the Mobile Station Idle State.

Implicit Registration
A registration achieved by a successful transmission of an origination or page response on the Access Channel.

IMSI
See International Mobile Subscriber Station Identity.

Interleaving
The process of reordering code symbols for transmission. Interleaving decorrelates channel fading between adjacent symbols as they enter the decoder, thereby improving the effectiveness of the code.

International Mobile Subscriber Station Identity (IMSI)
A method of identifying stations in the land mobile service as specifed in ITU-T Recommendation E.212.

kHz
Kilohertz (10^3 Hertz).

ksps
Kilosymbols per second (10^3 symbols per second).

Layering
A conceptual structuring of communication protocols. A layer is defined in terms of its communnication protocol to a peer layer in another entity, and the services it provides to the next higher layer in its own entity.

Layer 1
See Physical layer.

Layer 2
See Link layer.

Layer 3
See Application layer.

LFSR
See Linear Feedback Shift Register

Linear FeedbackShift Register (LFSR)

A logic circuit that produces pseudo-random binary sequences. They are used to produce the Short Code and Long Code that are used for spreading and for other purposes in the CDMA system. See the LFSR page for more details.

Linear Predictive Coding

A low bit rate coding technique for analog signal sources, usually speech, that models the production process by a filter whose parameters change slowly with time. It is a component of CELP coders. See Code Excited Linear Prediction.

Link Layer

The link layer of the IS-95 air interface provides for the reliable transmission and reception of signaling messages, including error detection, partial duplicate detection and loss. See also Layering, Physical layer, and Application layer.

Log Normal Distribution

The distribution of a random variable whose logarithm follows a normal distribution. A log-normal distribution is characterized by two parameter: its median and its standard deviation. The logarithm radix is often taken as 10, so that both the median and the standard deviaion are conveniently measured in decibel values, *m* and *s*. The density function of such a log-normal variable *X* is then:

$$p_X(x) = \frac{10}{\sqrt{2\pi}\ln(10)\sigma x}\exp\left\{-\frac{[10\log(x)-m]^2}{2\sigma^2}\right\}$$

In the dB measure this is

$$p_Y(y) = \frac{1}{\sqrt{2\pi}\sigma}\exp\left\{-\frac{(y-m)^2}{2\sigma^2}\right\}$$

where $Y = 10 \log X$.

Long Code

A maximal length sequence with period 2^{42}-1. A unique phase of the long code identifies each mobile station. It is used for data scrambling on the Forward CDMA Channel, spreading on the Reverse CDMA Channel, and other purposes. See also Maximal length sequence.

Long Code Mask

A 42-bit binary number that creates the unique long code phase. See also public long code, private long code, public long code mask, and private long code mask.

LPC

See Linear Predictive Coding.

LSB

Least significant bit.

Maximal Length Sequence (m-sequence)

A periodic binary sequence of period 2^n-1, *n* a positive integer, with no internal periodicities and other curious mathematical properties [Golomb]. A maximal length sequence can be generated by either of two equivalent linear feedback shift register configurations (see LFSR).

Mcps

Megachips per second (10^6 chips per second).

MER

See Message Error Rate

Message

In IS-95, a data structure consisting of a length field, message body (or *payload*), and CRC for detection of errors.

Message Error Rate

Ratio of errored messages to total messages. This is a concept having limited value because an errored message may be incorrectly fragmented or coalesced with a neighboring message by the receiver, making the message counts incorrect.

MHz

Megahertz (10^6 Hertz).

MIN

See Mobile Identification Number.

Mobile Assisted Handoff (MAHO)

A means of initiating handoff based on signal quality measurements performed by the mobile station and reported to the base station.

Mobile Identification Number (MIN)

The 34-bit number that is a digital representation of the 10-digit directory number assigned to a mobile station.

Mobile Station

A subscriber station in the Domestic Public Cellular Radio Telecommunications Service, normally intended to be used while in motion or during halts at unspecified points. The category my include both true mobile stations, handheld portable stations, fixed stations, and other devices.

Mobile Station Class

A code that defines mobile station maximum transmitter power, slotted operation capability, and dual-mode CDMA/AMPS capability.

Mobile Station Identification Number (MSIN)

A part of the E.212 IMSI identifying the mobile station within its home network. See ITU-T Recommendation E.212.

Mobile Switching Center (MSC)

A configuration of equipment designed to provide interconnection services among wireless subscriber stations, and between wireless subscriber stations and the public switched telephone network via one or more base stations under its control.

Mobile Telephone Switching Office (MTSO)

An out-of-fashion synonym for Mobile Switching Center.

Modulation Symbol

A symbol from a discrete alphabet that identifies a unit of modulation. In the Forward CDMA Channel, the modulation symbols are binary, each one representing one interleaved binary symbol from the rate 1/2 convolutional encoder. In the Reverse CDMA Channel the modulation symbols are six-bit entities comprised of interleaved bits from the rate 1/3 encoder; the six bits select one of the 64-Walsh functions for transmission.

MOS Mean Opinion Score

The result of a subjective voice quality test, often used to compare speech codec algorithms, where listeners associate a one to five quality score to speech samples. The arithmetic mean for a large number of samples is the resulting MOS number. Care must be used when comparing MOS scores taken in different tests, as the results for any particular cohort depend very much on the mix of algorithms under test.

ms

Millisecond (10^{-3} second).

MSB

Most significant bit.

MSC

See Mobile Switching Center

MSIN

See Mobile Station Identification Number.

MTSO

See Mobile Telephone Switching Office.

Multiplex Option

One of the alternative designs of the multiplex sublayer. Multiplex options permit tailoring such characteristics as the data rate set, frame structure, frame partitioning rules, and rate decision rules for special applications.

Multiplex Sublayer

One of the conceptual layers of the system that multiplexes and demultiplexes primary traffic, secondary traffic, and signaling. The multiplex sublayer resides between the physical layer and the link layer in the conceptual protocol stack.

CDMA Glossary N-S

NAM

See Number assignment module.

Neighbor Set

The set of pilots associated with the CDMA Channels that are probable candidates for handoff. Normally the Neighbor Set consists of the pilots associated with CDMA Channels that cover geographical areas near the mobile station. See also Active Set, Candidate Set, and Remaining Set.

Network

A network is a logical subset of the base stations in a cellular system, as identified by a SID. The network is identified by a unique (SID, NID) pair. A network can be as small or as large as needed, but must be totally contained within a single system.

Non-Autonomous Registration

A registration method in which the base station initiates registration. See also Autonomous Registration.

Non-Slotted Mode

An operation mode of the mobile station in which the mobile station continuously monitors the Paging Channel.

ns

Nanosecond (10^{-9} second).

Null Traffic Channel Data

One or more frames of 16 '1's followed bu eight '0's sent at the 1200 bps rate. Null traffic channel data is sent when no service option is active and no signaling message is being sent. Null traffic channel data serves to maintain the connectivity between the mobile station and the base station.

Number Assignment Module

A set of MIN-related parameters stored in the mobile station. The NAM encapsulate the mobile station's network identity. Multiple NAMs are sometimes provided in a mobile stations so that, for example, the mobile can have local identities in adjoining service areas. Use of the NAM is not specified in IS-95, beyond identifying those semi-permanent station numeric indicators that should be stored in it [IS-95, Appendix F].

OLC

See Overload class.

CELL/QTD 002610
CELLSITE-6394

Ordered Registration
A registration method in which the base station orders the mobile station to send registration related parameters.

Overhead Message
A message sent by the base station on the Paging Channel to communicate base-station-specific and system-wide information to mobile stations.

Overload Class (OLC)
The means used to control system access by mobile stations, typically in emergency or other overloaded conditions. Mobile stations are assigned one (or more) of sixteen overload classes. Access to the CDMA system can then be controlled on a per class basis by persistence values transmitted by the base station.

Overload Control
A means to restrict reverse analog control channel accesses by mobile stations. Mobile stations are assigned one (or more) of sixteen control levels. Access is selectively restricted by a base station setting one or more OLC bits in the Overload Control Global Action Message.

Paging
The act of seeking a mobile station in order to deliver an incoming call.

Paging Channel
A forward communication channel used by a base station to communication to a mobile station when it is not assigned to a traffic channel.

Parameter-Change Registration
A registration method in which the mobile station registers when certain of its stored parameters change.

Parity Check Bits
Bits added to a sequence of information bits to provide error detection, correction, or both.

Persistence
A probability measure used by the mobile station to determine if it should transmit in a given Access Channel Slot.

Physical Layer
The part of the communication protocol between the mobile station and thebase station that is responsible for the transmission and reception of data. The physical layer in the transmitting station is presented a frame by the multiplex sublayer and transforms it into an over-the-air waveform. The physical layer in the receiving station transforms the waveform back into a frame and presents it to the multiplex sublayer above it.

Pilot Channel
An unmodulated, direct-sequence spread spectrum signal transmitted continuously by each CDMA base station. The Pilot Channel allows a mobile station to acquire the timing of the Forward CDMA Channel, provides a phase reference for coherent demodulation, and provides a means for signal strength comparisons between base stations for determining when to handoff.

Pilot PN Sequence
A pair of modified maximal length PN sequences with period 2^{15} used to spread the Forward CDMA Channel and the Reverse CDMA Channel. Different base stations are identified by different pilot PN sequence offsets.

Pilot PN Sequence Offset Index
The PN offset in units of 64 PN chips of a pilot, relative to the zero offset pilot PN sequence.

Pilot Strength
The ratio of received pilot energy to overall received energy. See also E_c/I_0.

PN Sequence.

Pseudonoise sequence. A periodic binary sequence approximating, in some sense, a Bernoulli (coin tossing) process with equiprobable outcomes.

Point to Point Propagation Model

A propagation model in which median transmission loss calculations are based on specific characteristics and terrain profile of the path along the great circle between the transmitter and receiver.

Poisson Blocking Model

Also called *Lost Calls Held* or *Molina* model. A mathematical model of telephone traffic blocking in which blocked calls persist for their normal holding time, even though unserviced. It is similar to the Erlang C blocking model, with which it is sometimes confused. The Poisson blocking probability for N resources, callinsity y Erlangs, is

$$P = e^{-y} \sum_{k=N+1}^{\infty} y^k / k!$$

Power Control Bit

A bit sent in every 1.25 ms interval on the Forward Traffic Channel to signal the mobile station to increase or decrease its transmit power.

Power Control Group

A 1.25 ms interval on the Forward Traffic Channel and the Reverse Traffic Channel. See also Power Control Bit.

Power-Down Registration

An autonomous registration method in which the mobile station registers on power-down.

Power-Up Registration

An autonomous registration method in which the mobile station registers on power-up.

Privacy

Protection of traffic by means of encryption or other means specifically applied for that purpose.

Propagation Loss

The total reduction in radiant power density between the transmitting antenna and the receiving antenna. Propagation loss includes both spreading (free space diffraction) loss and attenuation loss. For non-line of sight situations it also includes diffraction loss around obstacles. It does not include antenna gain or feeder loss. Sometimes called *isotropic* propagation loss.

Rayleigh Distribution

The single-parameter probability distribution given by

$$F_R(r) = 1 - \exp\left(-\frac{r^2}{2\sigma^2}\right)$$

or the equivalent density

$$p_R(r) = \frac{r}{2\sigma^2}\exp\left(-\frac{r^2}{2\sigma^2}\right)$$

Rayleigh Fading

The deep fading process characteristic of narrowband radio signals in a severe multipath propagation environment. The probability distribution of complex amplitude tends toward a bandlimited Gaussian, which has a Rayleigh distribution of amplitude. Cf. Flat Fading, Frequency Selective Fading, Ricean Fading.

Receive Objective Loudness Rating (ROLR)

A perceptually weighted transducer gain of telephone receivers relating electrical excitation from a reference generator to sound pressure at the earphone. The receive objective loudness rating is

normally specified in dB relative to one Pascal per millivolt. See IEEE Standard 269-1992, IEEE Standard 661-1979, ITU-T Recommendations P.76 and P.79.

Registration
: The process by which a mobile station makes its presence known to a base station to facilitate call delivery.

Registration Zone
: A collection of one or more base stations treated as a unit when determining whether a mobile station should perform zone-based registration.

Release
: A process that the mobile station and base station use to inform each other of call disconnect.

Reverse CDMA Channel
: The CDMA Channel from the mobile station to the base station. From the base station's perspective, the Reverse CDMA Channel is the sum of all mobile station transmissions on a CDMA frequency assignment.

Reverse Traffic Channel
: A Reverse CDMA Channel used to transport user and signaling traffic from a single mobile station to one or more base stations.

Rice (or Rician) Distribution
: The probability distribution of the amplitude of a signal composed of a steady component plus independent IID quadrature Gaussian processes. It is applicable when a signal arrives at a receiver by both a line of sight path and by multiple indirect paths. This two-parameter distribution can be represented as

$$p_R(r) = \frac{r}{\sigma^2}\exp\left[-\frac{(r^2+a^2)}{2\sigma^2}\right]I_0\left(\frac{ra}{\sigma^2}\right)$$

: where I_0 is the modified Bessel function of the first kind and order zero and a is the amplitude of the steady component. Note that this reduces to a Rayleigh distribution for $a = 0$.

Rician Fading
: The fading process characteristic of radio signals when there is a strong line-of-sight signal path and multiple non-direct signal paths. The probability distribution of complex amplitude tends toward a bandlimited Gaussian with a nonzero mean, which has a Rician distribution of amplitude. Cf. Rayleigh Fading, Flat Fading, Frequency Selective Fading.

Roamer
: A mobile station that is operating in a cellular system other than its home system.

ROLR
: See Receive Objective Loudness Rating.

Sector
: Normally one angular segment of the coverage area of a cell, served by one base station. Also used to denote any non-traditional partitioning of the service area, such one strand of a cable-based delivery system.

Service Option
: A specific type of user traffic supported by a cellular system. The major service options are speech codecs, facsimile, and various types of data. Service options may be negotiated between base and mobile stations during call setup.

Serving MSC
: The MSC which currently has the mobile station obtaining service at one of its cell sites within its coverage area.

Shared Secret Data (SSD)
: A bit pattern stored in the mobile station and known by the base station. SSD is used to support the authentication procedures and voice privacy. Shared Secret Data is maintained during power off.

Signal-to-Noise Ratio (SNR)
: The dimensionless ratio $E_b/(N_0+I_0)$, or energy per bit divided by the noise-plus-interference power spectral density. It is usually stated in dB.

Signaling
: The information exchanged between the mobile station and the network, or within the network, for the purposes of service provision (e.g., connection establishment).

Slot Cycle
: A periodic interval at which a mobile station operating in the slotted mode monitors the Paging Channel.

Slotted Mode
: An operation mode of the mobile station in which the mobile station monitors only selected time slots on the Paging Channel when in the Mobile Station Idle State. The primary purpose of slotted mode is power conservation.

SNR
: See Signal to Noise Ratio.

Soft Handoff
: A handoff occurring while the mobile station is in the Mobile Station Control on the Traffic Channel State. This handoff is characterized by commencing communications with a new base station on the same CDMA frequency assignment before terminating communications with the old base station. Cf. Hard Handoff.

Symbol
: See Code Symbol.

System Identification (SID)
: A number uniquely identifying a cellular system

CDMA Glossary T-Z

Timer-Based Registration
: A registration method in which the mobile station registers whenever a counter reaches a predetermined value. The counter is incremented an average of once per 80 ms period.

Time Reference
: A reference established by the mobile station that is synchronous with the earliest arriving multipath component used for demodulation.

TOLR
: See Transmit Objective Loudness Rating.

Traffic Channel
: A communication path between a mobile station and a base station used for user and signaling traffic. The term Traffic Channel implies a Forward Traffic Channel and Reverse Traffic Channel pair. See also Forward Traffic Channel and Reverse Traffic Channel.

Transmit Objective Loudness Rating (TOLR)
: A perceptually weighted transducer gain of telephone transmitters relating sound pressure at the microphone to voltage at a reference electrical termination. It is normally specified in dB relative to

one millivolt per Pascal. See IEEE Standard 269-1992, IEEE Standard 661-1979, ITU-T Recommendations P.76 and P.79.

Transcoder
A device that transforms signals from one type of digital representation to another.

Unique Challenge-Response Procedure
An exchange of information between a mobile station and a base station for the purpose of authenticating the mobile station identity. The procedure is initiated by the base station and is characterized by the use of a challenge-specific random number. Cf. Global Challenge Procedure.

Visited System
The cellular system that is providing service to a roaming mobile station.

Visitor Location Register (VLR)
The database used by a visited system to maintain information about recently-served roaming subscribers.

Voice Privacy
The process by which user voice transmitted over a traffic channel is afforded a modest degree of cryptographic protection against air-interface eavesdropping.

Walsh Function, or Walsh Code
One of a set of orthogonal waveforms, based on the Walsh-Hadamard matrices. Walsh functions are used for two purposes in CDMA. In the forward link they are used as orthogonal cover to create independent transmission channels. In the reverse link they are use as orthogonal modulation.

Zone-Based Registration
An autonomous registration method in which the mobile station registers whenever it enters a zone that is not in the mobile station's zone list.

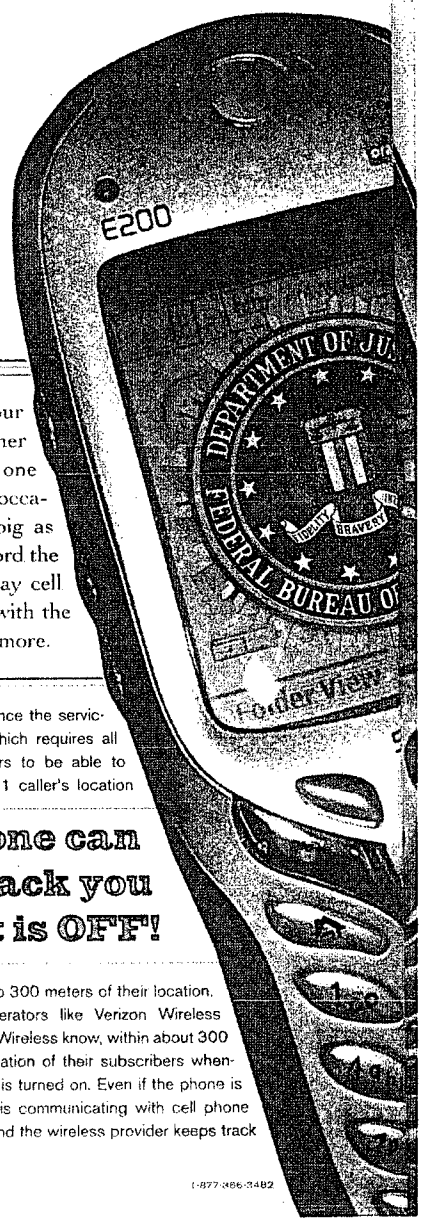
2006

CELLULAR SURVEILLANCE!

The Feds know where you are right now!



In 2006 carrying a cell phone is as common as carrying your ID. When cell phones were first introduced to the consumer market in 1983, the only people you would see carrying one were professionals like doctors and lawyers and of course your occasional drug dealer- this was back when cell phones were as big as bricks. At this time these people were the only ones who could afford the $3,995 to buy the phone and the inevitable $1000 cell bill. Today cell phones themselves are cheap and the bills are even cheaper and with the advent of prepaid cell phones you don't even need good credit anymore.

Why have cell phones become so easily accessible in our society? Is it really all about corporate competition bringing down the prices of cell phone plans, that are making cell phones so convenient and easy for everyone to get their hands on? If you believe in the idea of Conspiracy Theory then you are more likely to believe that cell phones have been made more readily available to ANYONE because it benefits big brother.

Most Americans carry cell phones, but many may not know that government agencies can track a persons movements through the signals that emanate from their cell phone.

Beginning in October of 2001, the Federal Communications Commission required cellular carriers to make cell phones Global Positioning System* (GPS) enabled. (GPS- A system of satellites, computers, and receivers that is able to determine the latitude and longitude of a receiver on Earth by calculating the time difference for signals from different satellites to reach the receiver. Basically some shit that track exactly where you are on earth.) This was done in an effort to enhance the services of 911, which requires all cellular carriers to be able to pinpoint a 911 caller's location to within 50 to 300 meters of their location.

Your cell phone can be used to track you even when it is OFF!

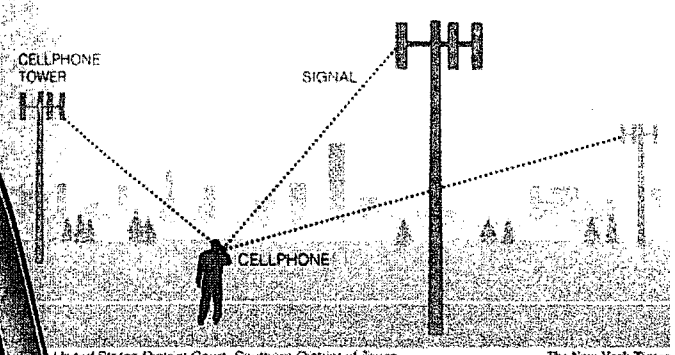
Cellular operators like Verizon Wireless and Cingular Wireless know, within about 300 yards, the location of their subscribers whenever a phone is turned on. Even if the phone is not in use it is communicating with cell phone tower sites, and the wireless provider keeps track

1-877-486-3482

CELLSITE-6450

Tracking a Cellphone

Cellphones act like low-power radio transmitters. By using multiple cell towers to measure a signal transmitted by the phone, providers can determine the location of that phone with an accuracy of about 300 yards.



United States District Court, Southern District of Texas — The New York Times

of the phone's position as it travels. The operators have said that they turn over location information when presented with a court order to do so.

Prosecutors argue that having such information is crucial to finding suspects, corroborating their whereabouts with witness accounts, or helping build a case for a wiretap on the phone.

The government has routinely used records of cellphone calls and caller locations to show where a suspect was at a particular time, with access to those records obtainable under a lower legal standard. (Wireless operators keep cellphone location records for varying lengths of time, from several months to years.)

But it is unclear how often prosecutors have asked courts for the right to obtain cell-tracking data as a suspect is moving. And the government is not required to report publicly when it makes such requests.

Legal experts say that such live tracking has tended to happen in drug-trafficking cases. In a 2003 Ohio case, for example, federal drug agents used cell tracking data to arrest and convict two men on drug charges.

In recent months there have been four requests from the U.S. Department of Justice to track people through their cell phones with not showing probable cause.* (Probable Cause- Reasonable grounds for belief that an accused person may be subject to arrest or the issuance of a warrant.)

Of the four such motions made, judges in New York, Texas and Maryland denied the Department of Justice's requests, stating that the government lacked statutorial authority to track cell phone location without a warrant.

In the New York and Texas cases, the courts approved FBI requests for other information from the wireless carriers, including logs of numbers a cell phone user called and received calls from. Court orders for that information require law enforcement agencies to show only that the information is relevant to an ongoing investigation.

But the FBI also sought cell-site locations, which the courts said amounted to the ability to monitor someone's movements. The judges ruled that such information requires law enforcement to show "probable cause" that a crime has been or is being committed.

But most recently, on Dec. 20, 2005 a fourth judge, in New York, ruled in the government's favor, finding that the USA Patriot Act and federal wiretapping laws allow police to track cell phone signals without showing probable cause.

What does this all mean to you? The bottom line is this. The technology in your cell phone makes it possible for the government to track your whereabouts in real time. If they have the technology it would be in your best interest to assume that they are using. Whether it is legal and constitutional is of no consequence- do you really have the money or time to test it. Not only do you need to watch what you say on the cell phone you need to be mindful of where you take it! You've been warned.

GPS Ain't All Bad!

The basic concept behind GPS is a great thing. The technology makes it possible for you to remotely track your children in the event they are abducted or get lost. There are dozens of devices popping up using GPS technology that can be purchased for as little as $50 that may save the life of your child. GPS also allows 911 operators to locate you in an emergency when you call them from your cell phone. Companies like On-Star use GPS to track vehicles' whereabouts and allows motorists to summon emergency help or to ask directions. So the Technology used as it was intended is beneficial to all of us- its the misuse and invasion of privacy that we must concern ourselves with.

1 INTRODUCTION

This document serves as the instrument for the Mobile Computing Security Program to identify requirements and assess risk, with the objective of providing an approval-to-operate. The information required for this assessment includes, but is not limited to, a complete scope of need, justification, concept of operations, technical specifications, configuration management and residual risk relative to the device being placed into service. Once completed, and if residual risk is deemed acceptable, an official EC will be generated granting a Security Management Plan (SMP) for those device(s) described within, in the manner set forth in the concept of operations. Attachments 1 and 2 are "living" documents. That is they are updated each time there is a change in the configuration, or when new devices are fielded under this SMP. Attachment 1 is the Configuration Management control document that lists the specific applications in use under this SMP. Attachment 2 is a complete listing of all devices fielded under this SMP.

2 MISSION BACKGROUND

The WITT provides

8 POINTS OF CONTACT

The ISSM has approval authority for the [redacted] and is responsible for the life cycle system security. Significant changes in configuration or usage will be submitted to the ISSM by the ISSO for approval.

Information Systems Security Manager: [redacted]

The ISSO is responsible for day-to-day oversight of the [redacted] He is responsible for engineering, development, configuration management and ensuring that the program security requirements are met. The ISSO also maintains an up-to-date inventory of all [redacted] contained within this OP plan and to report any:

- Loss
- Changes in configuration or usage
- Incremental/decremental changes to the baseline to the PSO and ISSM.

WITT [redacted] Information Systems Security Officer(s): [redacted]

Note: In the event that an ISSM is not assigned, ISSM duties are the responsibility of the assigned security officer.

b6
b7C
b7E

9 CONFIGURATION MANAGEMENT

Configuration management is a process that controls and manages changes (i.e., new applications, peripherals, changes in configuration, etc.) to a device or system. By controlling changes made to a system's hardware, software, firmware, and/or documentation, throughout the system/device life cycle, configuration management is a mandatory, integral part of this overall risk management solution. The ISSM and ISSO are responsible for managing this process.

9.1 Incremental Changes

Incremental changes to the baseline may be vetted and approved by the ISSM. Minor changes such as the revision number of an application do not require ISSM approval but are to be tracked by the ISSO in the configuration information periodically provided to the ISSM in the configuration management document illustrated in Attachment 1.

9.2 Security Architecture and Usage Changes

Any changes affecting the security architecture including the manner in which the [redacted] are used or the type of data stored on them may require a renegotiated Security Management Plan (SMP).

CELL/OTD 001555

10 RULES OF BEHAVIOR

The PEDs known as [redacted] covered under this SMP are granted deviations from the standard security settings based on operational need. These deviations have corresponding expected rules of behavior with respect to how they are used, stored, and maintained. These include:

10.1 [redacted] *Protection*

[redacted]

10.2 *Data Protection*

STATEMENT OF WORK

1 INTRODUCTION

(S) [redacted]

(S) [redacted]

b1
b3

2 OBJECTIVE

(S) [redacted]

(S) [redacted]

(S) [redacted]

(S) [redacted]

(S) [redacted]

(S) [redacted]

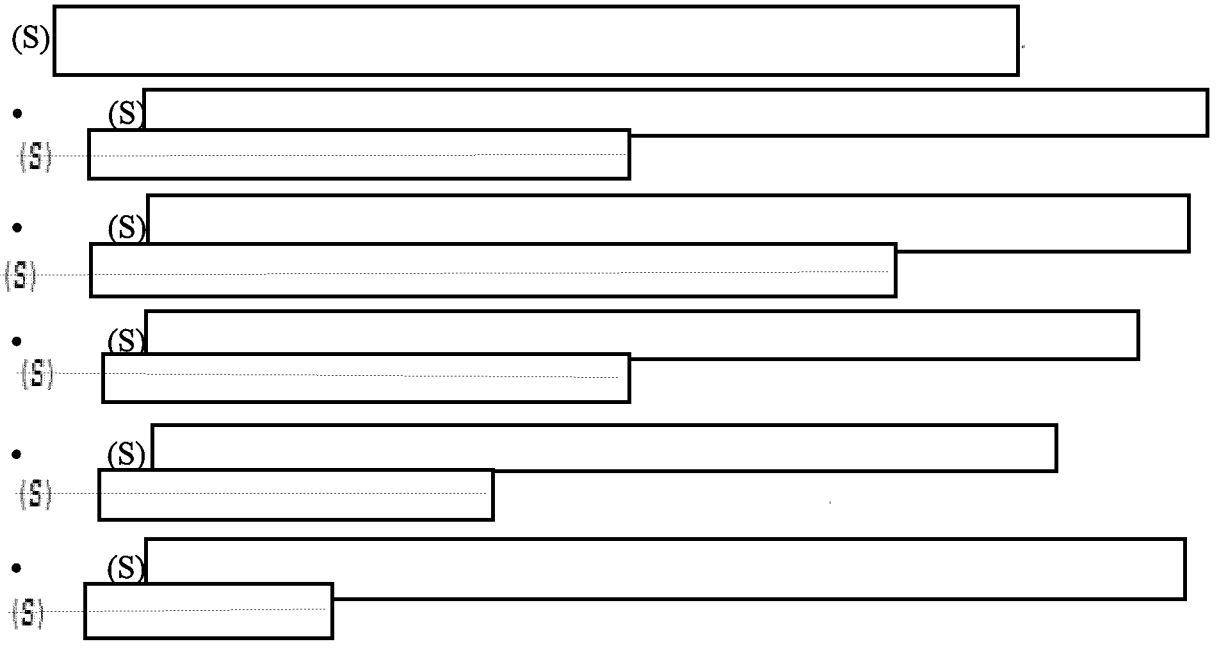
3 TASK DESCRIPTION

(U) After the award of the contract, the FBI will provide task assignments in writing to the contractor. The contractor will submit, in writing, a best estimate for the technical approach, cost, and amount of time needed to perform the task as well as a description of the task milestones and deliverables. Written approval from the FBI Contracting Officer will be required before the contractor will be authorized to proceed with the task order. The price quote for each task order shall include all items to be procured by the contractor for use in the task assignment.

4 SCOPE



b1
b3

5 REQUIREMENTS

(U) Once a contract is established, the following events will occur on a task assignment basis:

- Task Assignment: (U) The FBI will provide a task assignment in writing to the contractor. The contractor will submit, in writing, a best estimate for the technical approach, cost, and amount of time needed to perform the task as well as a description of the task milestones and deliverables. Written approval from the FBI Contracting Officer will be required before the contractor will be authorized to proceed with the task order. The price quote for each task order shall include all items to be procured by the contractor for use in the task assignment.

- Technical Review Meetings: (U) The contractor shall conduct technical review meeting(s) to give the FBI a technical description of the proposed effort. Meeting(s) will also be conducted to provide the FBI with an on going status of the task effort. Meeting schedules and locations will be determined at a later date.

- Acceptance Testing: (U) Once a demonstration device is constructed for a task, the contractor shall conduct an Acceptance Test to demonstrate compliance with technical requirements. An FBI representative shall participate and witness the Acceptance Test. Within thirty days of the completion of the Acceptance Test, the FBI shall provide written description of the device's technical deficiencies to the contractor.

- Product Delivery: (U) Once the contractor has demonstrated that the developed product (device, system, or study) complies with the FBI requirements, the contractor shall deliver the product to the FBI in the quantity specified in the task assignment.

6 Security

(U) The work described in this Statement of Work is considered sensitive. Release of any information related to this work may compromise the FBI's mission and is prohibited without prior written consent from the FBI.

FYI, the basic SOP for requesting cell tracking is obtaining a Title 18, Section 2703(d) pen order.

[redacted]

The best way to offer up our services to the locals is have them call you, then you give them [redacted] or my cell numbers, and we will talk them through the process.

~~SECRET~~

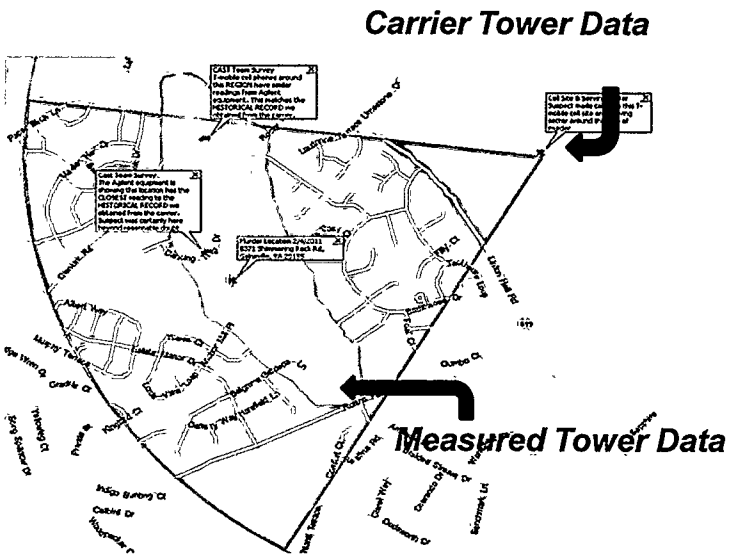
Criminal Investigative Division
Cellular Analysis and Survey Teams (CAST)



FBI CID formed the Cellular Analysis and Survey Team (CAST) by CID late 2009.

The FBI used cell phone tracking to gather evidence which lead to a conviction for a rogue New York City cop. According to an article by Peter J. Sampson, The Record (Hackensack N.J.), the FBI used a computer mapping program and "call detail" logs obtained from Sprint Nextel to track the activities of Kelvin L. Jones, suspected of a $1 Million perfume heist. The FBI was able to track Jones' movement on the day of the Carlstadt robbery using cell phone records, which proved to be highly incriminating along with other evidence. Because of his experience and training as a police officer, Jones knew how to cover his tracks, even using a prepaid anonymous cell phone. However, because of the cell phone tracking evidence, Jones was convicted last month

http://www.cellplaza.org/blog/2129/fbi-using-cell-phones-to-track-criminals/

Use Case 1: Prove a subject was at the scene of a crime (historical)
**Generate Evidence

Use Case 2: Provide pattern of life vs. historical known subject locations/POI
**Locate subjects by purely investigative means and service provider data

Utilize Commercial (Non-Sensitive) Measurement Equipment and Commercial Mapping Software due to Exposure and used in Criminal Prosecutions.

Subject: Delegation of Authority and guidelines for use of WITT Equipment

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

Greetings,

In addition to the EC I forwarded to you yesterday, attached is a EC (with guidelines) delgating authority for use of WITT to UC level.

Previously a SC had to approve.

The guidelines establish the authority levels for various scenarios. This is as important if not more so that the delegation to the UC level instead of SC level.

wittdeligationofauthority.wpd

Please forward to users and management as you deem appropriate.

DATE 09-21-2012 BY 65179 DMH/STW

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION IN ACCORDANCE WITH TITLE 41, U.S.C. 253 (c)(6)

(1) AGENCY AND THE CONTRACTING ACTIVITY & IDENTIFICATION OF DOCUMENT:

In a response to a requirement from the Wireless Intercept and Tracking Team (WITT), [redacted] Investigative Technology Division (ITD), Federal Bureau of Investigation (FBI), the Engineering Contracts Unit (ECU) has prepared this Justification for other than full and open competition for the renewal of a Maintenance and Service Agreement (MSA) with [redacted]

b3
b7E

(2) NATURE AND/OR DESCRIPTION OF ACTION BEING APPROVED:

The WITT has a requirement for the renewal of a Maintenance and Service Agreement (MSA) for the acquisition of [redacted]

b3
b7E

(3) DESCRIPTION OF SUPPLIES AND SERVICES (INCLUDING THE ESTIMATED VALUE):

The WITT has a continuing requirement for manufacturer provided maintenance and service, to [redacted]

b3
b7E

[redacted]

(4) STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AN OPEN COMPETITION:

This contract action is authorized by 41 U.S.C. 253(c)(6), as set forth in the Federal Acquisition Regulation (FAR) 6.302-6. – don't think this one is right!!!!!!!!!!

????? not sure if this is right.....should it be 6.302-1(2), (ii),(i),(2) Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements???

This acquisition is in accordance with the authority FAR 6.302 as only one responsible source, i.e. Harris Corporation, can support th[redacted] b3 b7E

(2) When the supplies or services required by the agency are available from only one responsible source, or, for DoD, NASA and the Coast Guard, from only one or a limited number of responsible sources, and no other types of supplies or services will satisfy agency requirements, full and open competition need not be provided for;

(ii) Supplies may be deemed to be available only from the original source in the case of a follow-on contract for the continued development or production of a major system or highly specialized equipment, including major components thereof, when it is likely that the award to any other source would result in – (A) substantial duplication of cost to the Government that is not expected to be recovered through competition.

(i) unique supplies or services available from only one source or only one supplier with unique capabilities;

(2) The existence of limited rights in data, patent rights, copyrights, or secret processes;

(5) DEMONSTRATION THAT THE NATURE OF THE ACQUISITION JUSTIFIES THE USE OF THE AUTHORITY CITED.

??? this section dealt with non-advertising....not sure what you want here :o(

(6) EFFORTS MADE TO ENSURE OFFERS ARE SOLICITED FROM AS MANY POTENTIAL SOURCES AS PRACTICABLE, INCLUDING COMPLIANCE WITH SUBPART 5.2 AND, IF NOT WHICH EXCEPTION UNDER 5.202 APPLIES:

This procurement was advertised in the FEDBIZOPS.....Not sure what you want in here?

(7) DETERMINATION THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE:

A cost analysis will be performed as part of the evaluation process which will ensure that the government will pay a fair and reasonable price for the maintenance, services and upgrades.

(8) MARKET SURVEY

WITT has determined that based on the existing need of the FBI it is in the best interest of the FBI to limit competition to the [redacted] acknowledges that other vendors may possess comparable levels of general [redacted] similar to that required to perform the necessary maintenance, services and upgrades required as part of this procurement. However, [redacted] b3 b7E

WITT conducts ongoing, extensive market research by speaking with employees in telecommunication roles from other law enforcement and intelligence agencies, and by attending technical meetings and conferences in an attempt to gather facts regarding maintenance, service and upgrade the systems and equipment. Based on the above it has been determined that [redacted] is the only viable source capable of meeting the minimum requirements of this acquisition.

(9) ANY OTHER FACTORS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION:

The [redacted] requiring support under the continuation of the requested Maintenance and Service Agreement (MSA) are vital components in the FBI's [redacted] b7E

[redacted]

(10) LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION:

This requirement was advertised in the FedBizOps as required by Part 5 of the Federal Acquisition Regulation (FAR) and received no sources expressed interest……

(11) A STATEMENT OF ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED:

b7E

The [redacted] will continue to monitor the market, the telecommunications community and industry, both public and private, as well as other government agencies, both intelligence and law enforcement, in an effort to determine if any other vendors possess the technical capabilities required to provide maintenance and service [redacted]

This contract action is authorized by 41 U.S.C. 253(c)(6), as set forth in the Federal Acquisition Regulation (FAR) 6.302-6. – don't think this one is right!!!!!!!!!!!

????? not sure if this is right.....should it be 6.302-1(2), (ii),(i),(2) Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements???

This acquisition is in accordance with the authority FAR 6.302 as only one responsible source, i.e. Harris Corporation, can support the [redacted] b3 b7E

(2) When the supplies or services required by the agency are available from only one responsible source, or, for DoD, NASA and the Coast Guard, from only one or a limited number of responsible sources, and no other types of supplies or services will satisfy agency requirements, full and open competition need not be provided for;

(ii) Supplies may be deemed to be available only from the original source in the case of a follow-on contract for the continued development or production of a major system or highly specialized equipment, including major components thereof, when it is likely that the award to any other source would result in – (A) substantial duplication of cost to the Government that is not expected to be recovered through competition.

(i) unique supplies or services available from only one source or only one supplier with unique capabilities;

(2) The existence of limited rights in data, patent rights, copyrights, or secret processes;

(5) DEMONSTRATION THAT THE NATURE OF THE ACQUISITION JUSTIFIES THE USE OF THE AUTHORITY CITED.

??? this section dealt with non-advertising....not sure what you want here :o(

(6) EFFORTS MADE TO ENSURE OFFERS ARE SOLICITED FROM AS MANY POTENTIAL SOURCES AS PRACTICABLE, INCLUDING COMPLIANCE WITH SUBPART 5.2 AND, IF NOT WHICH EXCEPTION UNDER 5.202 APPLIES:

This procurement was advertised in the FEDBIZOPS.....Not sure what you want in here?

(7) DETERMINATION THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE:

A cost analysis will be performed as part of the evaluation process which will ensure that the government will pay a fair and reasonable price for the maintenance, services and upgrades.

(8) MARKET SURVEY

WITT has determined that based on the existing need of the FBI it is in the best interest of the FBI to limit competition to the [redacted] acknowledges that other vendors may possess comparable levels of general [redacted] similar to that required to perform the necessary maintenance, services and upgrades required as part of this procurement. However, [redacted] b3 b7E

WITT conducts ongoing, extensive market research by speaking with employees in telecommunication roles from other law enforcement and intelligence agencies, and by attending technical meetings and conferences in an attempt to gather facts regarding maintenance, service and upgrade the systems and equipment. Based on the above it has been determined that [redacted] is the only viable source capable of meeting the minimum requirements of this acquisition.

(9) ANY OTHER FACTORS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION:

Th[redacted] requiring support under the continuation of the requested Maintenance and Service Agreement (MSA) are vital components in the FBI's [redacted] b7E

[redacted]

(10) LISTING OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION:

This requirement was advertised in the FedBizOps as required by Part 5 of the Federal Acquisition Regulation (FAR) and received no sources expressed interest……

(11) A STATEMENT OF ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT

CELLSITE-1913

ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED:

b7E

[redacted] will continue to monitor the market, the telecommunications community and industry, both public and private, as well as other government agencies, both intelligence and law enforcement, in an effort to determine if any other vendors possess the technical capabilities required to provide maintenance and service [redacted]

STATEMENT OF WORK

1 INTRODUCTION

[redacted]

b7E

2 OBJECTIVE

This Statement of Work defines the Engineering Services required to support the customer's mission. The goal of this Engineering Services Contract (ESC) is to have an established contract vehicle for the development of [redacted] systems. Developments will involve [redacted] if necessary. [redacted]

3 TASK DESCRIPTION

After the award of the contract, the customer will provide task assignments in writing to the contractor. The contractor will submit, in writing, a best estimate for the technical approach, cost, and amount of time needed to perform the task as well as a description of the task milestones and deliverables. Written approval from the customer's Contracting Officer (CO) will be required before the contractor will be authorized to proceed with the task order. The price quote for each task order shall include all items to be procured by the contractor for use in the task assignment.

4 SCOPE

The contractor shall, on a task assignment basis, provide the following:

- [redacted]

b7E

CELL/OTD

000498

5 REQUIREMENTS

Once a contract is established, the following events will occur on a task assignment basis:

- Task Assignment: The customer (i.e. Contracting Officer/CO) will provide a task assignment in writing to the contractor. The contractor will submit, in writing, a best estimate for the technical approach, cost, and amount of time needed to perform the task as well as a description of the task milestones and deliverables. Written approval from the CO will be required before the contractor will be authorized to proceed with the task order. The price quote for each task order shall include all items to be procured by the contractor for use in the task assignment.

- Technical Review Meetings: The contractor shall conduct technical review meeting(s) (conference call/briefings) to give the customer a technical description of the proposed effort. Meeting(s) will also be conducted to provide the customer with an on going status of the task effort. Meeting schedules and locations will be determined at a later date.

- Acceptance Testing: Once a demonstration device is constructed for a task, the contractor shall conduct an Acceptance Test to demonstrate compliance with technical requirements. The customer, or customer representative, shall participate and witness the Acceptance Test. Within thirty days of the completion of the Acceptance Test, the customer shall provide written description of the device's technical deficiencies to the contractor.

- Product Delivery: Once the contractor has demonstrated that the developed product (device, system, or study) complies with the customer's requirements, the contractor shall deliver the product to the customer in the quantity specified in the task assignment.

6 Security

The work described in this Statement of Work is considered sensitive. Release of any information related to this work is prohibited without prior written consent from the customer.

See answers embedded below.

[redacted] As evident from the below questions, there is still a need to get policy guidance out to the field on requesting disclosure of information from providers in exigent circumstances under 18 USC 2702. That was the objective of the draft EC on voluntary disclosure under exigent circumstances. What is the status of that EC--attached below.

Subject: Delegation of Authority and guidelines for use of WITT Equipment

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

Greetings,

In addition to the EC I forwarded to you yesterday, attached is a EC (with guidelines) delgating authority for use of WITT to UC level.

Previously a SC had to approve.

The guidelines establish the authority levels for various scenarios. This is as important if not more so that the delegation to the UC level instead of SC level.

wittdeligationofauthority.wpd

Please forward to users and management as you deem appropriate.

SENSITIVE BUT UNCLASSIFIED

DATE 09-24-2012 BY 65179 DMH/STW

(Rev. 01-31-2003)

FEDERAL BUREAU OF INVESTIGATION

Precedence: ROUTINE **Date:** 06/18/2007

To: Operational Technology **Attn:** SC Anthony P. DiClemente
UC [redacted]

From: Operational Technology Division,
[redacted]
Tracking Technology Unit (TTU)
Contact: UC [redacted]

Approved By: AD Thomas Marcus C
SC DiClemente Anthony P
UC [redacted]

b3
b6
b7C
b7E

Drafted By: [redacted]

Case ID #: 268-HQ-1068430 (Pending)

Title: WIRELESS INTERCEPT TRACKING TEAM (WITT);
DELEGATION OF AUTHORITY

Synopsis: To document the delegation of authority to approve the [redacted] - Wireless Intercept Tracking Team (WITT)" from the Operational Technology Division (OTD), [redacted] Section Chief (SC) to the Unit Chief (UC), Tracking Technology Unit (TTU), [redacted] OTD.

b3
b7E

Details: [redacted]

In an effort to streamline both routine and after hours approval of exigent WITT operations, lend further clarity to authority levels, and enhance documentation for WITT endeavors in [redacted] the required FBIHQ approval has been delegated from SC, [redacted] to the UC, [redacted] with responsibility for the WITT Program. The UC for WITT Program will insure that [redacted] WITT [redacted] WITT [redacted] status prior to approval. The requesting division will be responsible for

CELL/OTD 000547

documenting the request to OTD in an EC. The OTD will document its decision as well as any resulting action in an EC. In accordance with the above, the TTU Chief will be responsible for adhering to and applying the below MIOG provisions as well as the legal authorities as identified below in reviewing and approving requests for [redacted] Any request which requires a deviation from the MIOG provisions or legal authorities as identified below must be referred to the [redacted] SC for approval. No change is being requested to the policy for the [redacted]

b3
b7E

[redacted]

CELLWTD 00548

CELLSITE-15374

[redacted]

The MIOG policy for [redacted] doesn't specify the form by which the HQ approval must be obtained; it requires that it be obtained and states only that the enumerated information "is to be provided by appropriate communication... " So, verbally, telephonically, by email, etc.…would arguably satisfy the policy, the concern should be with documenting approval so as to be able to demonstrate compliance. b3 b7E

Below is a summary outline of the legal authorities:

[redacted] WITT [redacted] AUTHORITIES

A. FEDERAL CASE

1. Federal Court Order:
   i. Pen Register/Trap & Trace (18 USC 3121 et seq.)
      1. WITT equipment functions as a Pen Register device as that is defined in 18 U.S.C. 3127 because [redacted]

CELL-DTD 000553

CELLSITE-15379

Accordingly, authorization pursuant to the PR/TT statute is required to use WITT [redacted]

2. The same Pen Register/Trap and Trace Order may be used both to [redacted] WITT [redacted]. DOJ has recommended that for WITT authorization, the below items be addressed.

3. Operative PR/TT Language :

[redacted]

b3
b7E

4. [redacted]

ii. Search Warrant to [redacted]

1. Rule 41 & 28 U.S.C. 1651(a)-All Writs Act: When WITT [redacted] is used to [redacted]

SECRET

CELLSITE-15380

To: Operational Technology From: Operational Technology
Re: 268-HQ-1068430, 06/18/2007

LEAD(s):

Set Lead 1: (Action)

OPERATIONAL TECHNOLOGY

AT QUANTICO, VIRGINIA

Review and if appropriate approve delegation of authority from OTD, [redacted], Section Chief level to Unit Chief, Program Manager, WITT operations. b3 b7E

Police cooperation case, is as I understand, [redacted] b5

Domestic Police Cooperation authority is [redacted]

62-3.3 Policy

(1) Upon receipt of requests for investigation from local or state law enforcement agencies involving matters in which there is no FBI jurisdictional interest, the FBI's cooperative role will be limited to the acquisition of records or information from the criminal files of local or state law enforcement agencies or records of nongovernmental organizations and concerns and other governmental agencies.

(a) Records or information are defined as material normally available to law enforcement agencies which can be obtained without a court order.
(b) When obtaining material outlined above, dissemination authority must be obtained from that agency providing the records/information, when appropriate.
(2) In addition to record gathering and dissemination noted above, the FBI can act in a liaison capacity between local and state law enforcement agencies to facilitate one agency handling the investigative requests of another.
(3) The FBI, on behalf of a local or state law enforcement agency, may verify the location of an individual. No interviews with subjects, suspects, or witnesses should be conducted by Bureau personnel. No extensive efforts are to be expended to locate individuals for interviews. FBI personnel are to merely verify their whereabouts, such as at a residence address or employment, etc.
(4) Domestic Police Cooperation matters received in the field should be opened on an individual case basis, the subject of the record indexed to the general indices, resulting disclosures recorded in accordance with Privacy Act requirements and maintained in accordance with existing instructions pertaining to the destruction of field office files and records, MAOP, Part II, 2-4.5.
(5) SACs may approve use of FBI resources on behalf of local and state agencies providing such action falls within the above guidelines. No communication need be forwarded to FBIHQ advising of the initiation of a Domestic Police Cooperation investigation.

(6) Name check requests for a review of pertinent information contained in our central records system received by FBIHQ from authorized state and local criminal justice agencies will be | processed by the|Executive Agencies Dissemination|Unit, Information|Management Division, in accordance with MAOP, Part II,9-3. Completed responses will be returned to the respective field office which covers the territory of the submitting agency for appropriate dissemination.
(7) Domestic Police Cooperation cases are not to be opened in the field for the purpose of conducting foreign inquiries through Interpol. All state and local law enforcement agencies in the United States have direct access to the United States

National Central Bureau (USNCB), Interpol, by mail or via the National Law Enforcement Telecommunications System (NLETS). The USNCB mailing address is:Interpol, U.S. Department of Justice, Washington, D.C. 20530. The NLETS ORI is "DCINTER0/0/."

This authority appears to also be codified by Regulation at 28 CFR 0.85(j)

See also Part I, Section 184-1 Investigative Authority

2) Under DOJ guidelines, the FBI's role in Domestic Police Cooperation, see this manual, Part 1, Section 62, entitled "Domestic Police Cooperation," is [redacted]

(1) Upon receipt of requests for investigation from local or state law enforcement agencies involving matters in which there is no FBI jurisdictional interest, the FBI's cooperative role will be limited to the acquisition of records or information from the criminal files of local or state law enforcement agencies or records of nongovernmental organizations and concerns and other governmental agencies.

(a) Records or information are defined as material normally available to law enforcement agencies which can be obtained without a court order.
(b) When obtaining material outlined above, dissemination authority must be obtained from that agency providing the records/information, when appropriate.
(2) In addition to record gathering and dissemination noted above, the FBI can act in a liaison capacity between local and state law enforcement agencies to facilitate one agency handling the investigative requests of another.
(3) The FBI, on behalf of a local or state law enforcement agency, may verify the location of an individual. No interviews with subjects, suspects, or witnesses should be conducted by Bureau personnel. No extensive efforts are to be expended to locate individuals for interviews. FBI personnel are to merely verify their whereabouts, such as at a residence address or employment, etc.
(4) Domestic Police Cooperation matters received in the field should be opened on an individual case basis, the subject of the record indexed to the general indices, resulting disclosures recorded in accordance with Privacy Act requirements and maintained in accordance with existing instructions pertaining to the destruction of field office files and records, MAOP, Part II, 2-4.5.
(5) SACs may approve use of FBI resources on behalf of local and state agencies providing such action falls within the above guidelines. No communication need be forwarded to FBIHQ advising of the initiation of a Domestic Police Cooperation investigation.

(6) Name check requests for a review of pertinent information contained in our central records system received by FBIHQ from authorized state and local criminal justice agencies will be | processed by the|Executive Agencies Dissemination|Unit, Information|Management Division, in accordance with MAOP, Part II,9-3. Completed responses will be returned to the respective field office which covers the territory of the submitting agency for appropriate dissemination.
(7) Domestic Police Cooperation cases are not to be opened in the field for the purpose of conducting foreign inquiries through Interpol. All state and local law enforcement agencies in the United States have direct access to the United States National Central Bureau (USNCB), Interpol, by mail or via the National Law Enforcement Telecommunications System (NLETS). The USNCB mailing address is:Interpol, U.S. Department of Justice, Washington, D.C. 20530. The NLETS ORI is "DCINTER0/0/."

This authority appears to also be codified by Regulation at 28 CFR 0.85(j)

See also Part I, Section 184-1 Investigative Authority

2) Under DOJ guidelines, the FBI's role in Domestic Police Cooperation, see this manual, Part 1, Section 62, entitled "Domestic Police Cooperation," is [redacted]

Hey

I hope all is well. I previously provided with your pony Pen/2703D Order for utilizing (WITT) to determine if The AUSA apparently does not feel comfortable with this order and has suggested a search warrant. Would you mind speaking to the AUSA directly, so that we can I would think we could use a "search" or "seizure" warrant as long as we were careful on our verbage. I'll get the AUSA's contact info if you like.

Thanks,

WITT

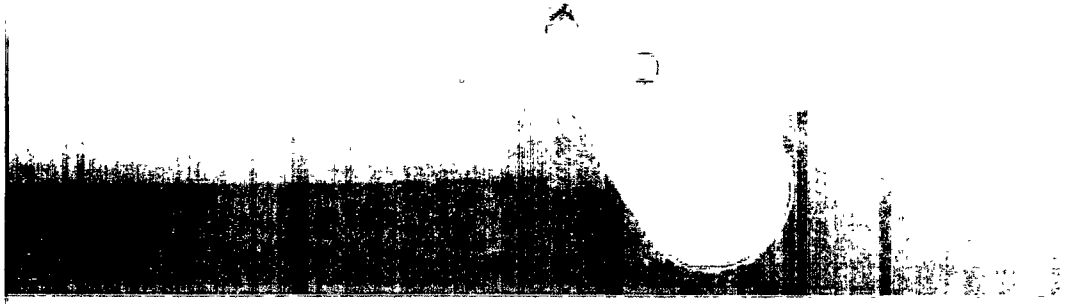
Wireless Intercept and Tracking Team



Cellular Tracking Legal Issues

March 23, 2006

WITT
Wireless Intercept and Tracking Team

Overview

- DOJ's Policy on Cellsite Simulators: **Pen Register Device** (18 U.S.C. § 3127(3))
  - Old Law vs. New Law
  - Non-Target users (Privacy Interest)
  - Potential Interference
  - Liability
- Recent Court Decisions on cellsite location data
  - distinguish
- Emergency Pen Register Authority
  - Federal v. State Orders
  - Voluntary Disclosures
- Loan of ELSUR Policy
  - liability
- Protecting Sensitive Techniques
  - Use as evidence
  - Qualified Privilege

CELL/OTD 001109

WiTT
Wireless Intercept and Tracking Team

New DOJ Opinion:

b3
b5
b7E

DOJ/CCIPS: Pen/Trap **order** [redacted] to use its own equipment to obtain any "signaling information" transmitted from a cellular telephone to:

1) Identify a target phone **or**
2) Locate a phone

DOJ: **"signaling information"** is any non-content information "transmitted by" a telephone instrument

CELL/OTD 001112

CALEA: technical standard for location parameters (J-STD-025)

- **Origination** (of an outgoing call from target phone)
- **Answer** (at answer of a call terminating to the target phone)
- **Release** (at the end of the call for both incoming and outgoing calls)

- (http://www.tiaonline.org/standards/search_results2.cfm?document_no= J-STD-025-A www.tiaonline.org)

CELL/OTD 001115

- Recent Court Decisions
  - CALEA prohibits collecting location information "solely pursuant" to a PR/TT
  - SCA 18 USC 2703(d)
    -
    -

CELL/OTD 001117
b3

I am on [redacted] and my boss has talked with you about stingray (see below). We used your affidavit and sent it to our AUSA in [redacted] They have been looking at it and I was told that I may be missing some statutory references. Have you guys ever gotten one of these through [redacted] If yes, do you recall the AUSA's name? If they haven't, I am going to give them [redacted] name and number so we can figure this thing out.

Thanks

United States District Court,
S.D. New York.
In re APPLICATION OF THE UNITED STATES OF AMERICA FOR AN ORDER FOR DISCLOSURE OF TELECOMMUNICATIONS RECORDS AND AUTHORIZING THE USE OF A PEN REGISTER AND TRAP AND TRACE
No. 05 MAG.1763.

Dec. 20, 2005.

OPINION AND ORDER

GORENSTEIN, Magistrate J.

*1 On October 19, 2005, the Court granted an *ex parte* application from the Government seeking an order requiring a provider of cellular telephone service to produce, *inter alia,* information pertaining to the location of cell site towers receiving a signal from a particular cellular telephone for a period of 60 days. The Court's Order expired on December 18, 2005. Because at least three other district courts have concluded that the Government lacks statutory authority for applications relating to certain types of cell site data, the Court is setting forth the reasons it granted the application in this case. Subsequent to the issuance of the Order, the Court sought additional information and briefing from the Government regarding the application. In addition, the Court asked the Federal Defenders of New York, Inc. to appear as *amicus curiae.* The Court has greatly benefitted from the briefing provided by both sides.

I. *BACKGROUND*

Cellular telephones communicate by means of signals to cellular telephone towers, which are operated by the various commercial carriers that provide cellular telephone service. As a cell phone user moves from place to place, the cell phone automatically switches to the tower that provides the best reception. In this case, the Government's application sought information on a prospective basis regarding cell towers being signaled by a specifically identified cellular telephone. The application, which remains under seal, furnishes detailed information indicating that the user of the target cellular telephone is engaged in ongoing criminal activity involving the illegal sale of contraband and that a warrant for the arrest of this person is outstanding. An order was previously granted by another Magistrate Judge in this District for cell site information with respect to the same target telephone.

The relevant portions of the application seek, for a period of 60 days, "cell site activations" for the telephone. The application also seeks a directive that the provider of the service furnish a map showing cellular tower "locations/addresses, sectors and orientations" as well as "the physical address/location of all cellular towers in the specified market." In a portion of the application not relevant to the instant opinion, the application seeks numbers dialed, incoming numbers, call durations, and other information relating to the subscriber of the target cellular telephone. The application contains additional provisions requiring that the provider furnish certain assistance to the federal law enforcement agents necessary to comply with the requested court order.

While the application uses the term "cell-site activations," the Government has specified that it seeks "cell-site information concerning the physical location of the antenna towers associated with the beginning and termination of calls to and from a particular cellphone." *See* Letter to the Court from Thomas A.G. Brown, dated November 22, 2005 ("Gov't Letter"), at 10. This phrasing corresponds roughly to the information that in fact has been obtained by the Government in this District in the past with respect to cell site information. Under prior orders issued in this District, the Government has been able to obtain a list of each call made by the subject cell phone, along with a date, start time and end time. With respect to the beginning or end of the call (and possibly sometimes in between), there is a listing of a three-digit number assigned to a cellphone tower or base station. At least one cellular provider will give, in addition to the number of the tower, a digit ("1," "2" or "3") indicating a 120 degree "face" of the tower towards which the cell phone is signaling.

*2 In suburban or rural areas, towers can be many miles apart. The Court has examined a map of cellular towers of a provider in lower Manhattan, which is one of the areas more densely populated by towers. In this area, the towers may be anywhere from several hundred feet to as many as 2000 feet or more apart.

The Court is aware of three cases that have considered the availability of cell site data: *In re Application for Pen Register and Trap/Trace Device with Cell Site Location Authority,* 396 F.Supp.2d 747 (S.D.Tex.2005) ("Texas Decision"); *In the Matter of an Application of the United States for an Order (1) Authorizing the Use of a Pen Register and a Trap and Trace Device and (2) Authorizing Release of Subscriber Information and/or Cell Site Information,* 396 F.Supp.2d 294 (E.D.N.Y.2005) ("EDNY Decision); and *In re Application of the United States for an Order Authorizing the Installation and Use of*

a Pen Register and a Caller Identification System on Telephone Numbers (Sealed) and Production of Real Time Cell Site Information, 2005 WL 3160860 (D.Md. Nov. 29, 2005) ("Maryland Decision"). These cases appear to involve requests for cell site information that go beyond both what has been sought in this case and what has actually been received by the Government pursuant to any cell site application in this District. First, the cell site information provided in this District is tied only to telephone calls actually made or received by the telephone user. Thus, no data is provided as to the location of the cell phone when no call is in progress. Second, at any given moment, data is provided only as to a single cell tower with which the cell phone is communicating. Thus, no data is provided that could be "triangulated" to permit the precise location of the cell phone user. Third, the data is not obtained by the Government directly but is instead transmitted from the provider digitally to a computer maintained by the Government. That is, the provider transmits to the Government the cell site data that is stored in the provider's system. The Government then uses a software program to translate that data into a usable spreadsheet.

II. *DISCUSSION*

The Government's application cites to two enactments: the statutes governing the installation of pen registers and trap and trace devices, 18 U.S.C. §§ 3121-27 ("the Pen Register Statute"), and a provision of the Stored Wire and Electronic Communications and Transactional Records Access Act codified at 18 U.S.C. § 2703. We begin our discussion with the text of these statutes inasmuch as "[e]very exercise in statutory construction must begin with the words of the text." *Saks v. Franklin Covey Co.,* 316 F.3d 337, 345 (2d Cir.2003). "The plainness or ambiguity of statutory language is determined by reference to the language itself, the specific context in which that language is used, and the broader context of the statute as a whole." *Robinson v. Shell Oil Co.,* 519 U.S. 337, 341 (1997) (citations omitted). In general, if the statutory language is not ambiguous, the statute is construed according to the plain meaning of the words. *See, e.g., Greenery Rehab. Group, Inc. v. Hammon,* 150 F.3d 226, 231 (2d Cir.1998) (citing *Rubin v. United States,* 449 U.S. 424, 430 (1981)). We look to the legislative history and other tools of statutory construction only if the statutory terms are ambiguous. *Id.* (citing *Aslanidis v. United States Lines, Inc.,* 7 F.3d 1067, 1073 (2d Cir.1993)).

A. *Pen Register Statute*

***3** The Pen Register Statute is the statute used to obtain information on an ongoing or prospective basis regarding outgoing calls from a particular telephone (captured by a "pen register") and incoming calls (captured by a "trap and trace" device). These devices are more fully defined in 18 U.S.C. § 3127(3), (4). [FN1] A "pen register" is defined as a device that provides not merely the telephone number of a telephone call dialed from the subject telephone--the most common use of the term "pen register"--but also "signaling information" transmitted by the subject telephone itself or the "facility from which a wire or electronic communication is transmitted," 18 U.S.C. § 3127(3). The term "signaling information" was added by the USA PATRIOT Act in 2001. *See* Pub.L. No. 107-56, § 216(c)(2), 115 Stat. 272, 290 (2001). Prior to the enactment of the USA PATRIOT act, the District of Columbia Circuit had held in connection with its interpretation of a related statute, 47 U.S.C. § 1001(2), that because a cell phone sends "signals" to cellphone towers in order to operate, the term "signaling information" includes information on the location of cell site towers used by a cellular telephone. *See United States Telecom. Ass'n v. FCC,* 227 F.3d 450, 458, 463-64 (D.C.Cir.2000). [FN2] While one cell site decision notes an absence of legislative history indicating that Congress intended cell site data to be included in this term when it enacted the USA PATRIOT Act, *see* Texas Decision, 396 F.Supp.2d at 761, the language enacted is not so limited. Indeed, the legislative history reflects that the language regarding "signaling information" would apply "across the board to all communications media." H.R.Rep. No. 107-236(I), 107th Cong., 1st Sess., *available at* 2001 WL 1205861, at *53 (Oct. 11, 2001). Accordingly, we will interpret this provision in accordance with its most obvious meaning and the one that naturally would have been available to Congress, through the *United States Telecom* case, when the statutory language was enacted in 2001. *See Lorillard v. Pons,* 434 U.S. 575, 581 (1978) ("Where ... Congress adopts a new law incorporating sections of a prior law, Congress normally can be presumed to have had knowledge of the interpretation given to the incorporated law, at least insofar as it affects the new statute.").

> FN1. At one time, a "pen register" referred perforce to a physical device that recorded information regarding outgoing telephone calls. In this District at least, law enforcement agencies do not in all instances need to install a physical device on a telephone line to obtain information regarding these calls. Instead, information that was heretofore captured by a pen register can now be transmitted digitally by the telephone service provider. The Government has properly assumed that, despite this change in technology, it is bound to follow the Pen Register Statute to obtain information otherwise covered by the statute.

> FN2. Because the location information is "transmitted" by the cell phone, a pen register (not a trap and trace device) identifies location information for both incoming and outgoing calls. *See* 18 U.S.C. § 3127(3).
> On a separate point, *amicus* contends that the "signaling information" available under the Pen Register Statute is only the "signaling information" that is transmitted during a particular telephone call. *See* Letter to the Court from Yuanchung Lee, dated October 27, 2005

("*Amicus* Letter") at 16. The statute is ambiguous on this point, however. It says only that a pen register records the "signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted." 18 U.S.C. § 3127(3). The term "is transmitted" is susceptible of two meanings: it could refer either to a particular communication or to an ongoing transmission. It is not necessary to reach this issue, however, because here the Government has sought only cell-site information tied to telephone calls.

In addition, construing the pen register definition as covering the capture of cell site data is the only way to make sense of a separate statute: 47 U.S.C. § 1002. As described in the next section, that statute specifically assumes that cell site data is available under the Pen Register Statute.

Notably, the showing required to install a pen register is a low one: the Government need only identify the law enforcement agency conducting the investigation and certify that the information likely to be obtained is "relevant to an ongoing criminal investigation" being conducted by the agency. 18 U.S.C. § 3122(b)(1), (2). Orders requiring the installation of a pen register may not exceed 60 days, though they may be extended for additional 60- day periods if the required showing is made. 18 U.S.C. § 3123(c). In certain emergency situations, a pen register may be installed even in the absence of a court order. 18 U.S.C. § 3125. The Pen Register Statute explicitly excludes from its definition "the contents of any communication"--an exclusion not relevant to the instant application as there is no effort to obtain the contents of any telephone calls. *See* 18 U.S.C. § 3127(3).

*4 The Government has certified that the cell site information it seeks here is "relevant and material to an ongoing investigation." Thus, the Pen Register Statute would by itself provide authority for the order being sought by the Government were it not for a provision codified elsewhere in the United States Code. That provision occurs in an "exception" clause within 47 U.S.C. § 1002, which is entitled "Assistance capability requirements."

B. *47 U.S.C. § 1002*

Section 1002 was enacted as part of the Communications Assistance for Law Enforcement Act of 1994. It requires telecommunications carriers to ensure that their equipment is capable of providing a law enforcement agency with information to which it may be entitled under statutes relating to electronic surveillance. Section 1002 provides, in pertinent part, as follows:

> a telecommunications carrier shall ensure that its equipment, facilities, or services that provide a customer or subscriber with the ability to originate, terminate, or direct communications are capable of--
>
> * * *
>
> (2) expeditiously isolating and enabling the government, pursuant to a court order or other lawful authorization, to access call-identifying information that is reasonably available to the carrier--
>
> (A) before, during, or immediately after the transmission of a wire or electronic communication (or at such later time as may be acceptable to the government); and
>
> (B) in a manner that allows it to be associated with the communication to which it pertains,
>
> *except that, with regard to information acquired solely pursuant to the authority for pen registers and trap and trace devices (as defined in section 3127 of Title 18), such call-identifying information shall not include any information that may disclose the physical location of the subscriber (except to the extent that the location may be determined from the telephone number);*

47 U.S.C. § 1002(a)(2) (emphasis added).

The phrase "information that may disclose the physical location of the subscriber" in the exception clause can reasonably be interpreted to encompass the prospective cell site information being sought by the Government here, although, as already discussed, the information the Government obtains in this District "disclose[s] the physical location" of the subscriber in only the roughest manner. [FN3]

> FN3. A literal reading of this exception clause might lead one to question whether it is of any relevance at all to the Government's application inasmuch as the clause is framed only as an exception to the sort of "capab[ilities]" a carrier is obligated to "ensure" that it possesses. Under this reading, the exception clause merely states that a carrier is not obligated to ensure that it possesses the capability to disclose physical location information. The clause says nothing about whether the carrier should or should not disclose such information. Nor does it say anything about whether the Government may obtain an order for such information. As is described below, however, the legislative history relevant to this provision reflects that a literal reading of this kind would be at odds with the intention of Congress.

The effect of the exception clause is not obvious at first glance. But the clause plainly reflects an underlying assumption that physical location data *would* have been obtainable under the Pen Register Statute in the absence of the exception clause. Otherwise, it would have been unnecessary to add the exception clause at all. Indeed, the legislative history of section 1002 states as much. *See* H. Rep. 103-827(I), reprinted in 1994 U.S.C.C.A.N. 3489, 3497, 1994 WL 557197, at *17 (Oct. 4, 1994) ("Currently, in some cellular systems, transactional data that could be obtained by a pen register may include location information."); S. Rep. 103-402, *available at* 1994 WL

562252, at *18 (Oct. 6, 1994) (same). [FN4]

> FN4. In fact, the definition of a "pen register" in effect at the time of the exception clause's passage did not seem to include cell site or location information, inasmuch as the term "pen register," prior to the USA PATRIOT Act amendment in 2001, had been defined as a device that identified "the number dialed or otherwise transmitted." *See* Pub.L. No. 99-508, § 301, 100 Stat 1848 (Oct. 21, 1986). Nonetheless, Congress obviously thought such information was available under the Pen Register Statute when the exception clause was enacted in 1994.

*5 But if the exception clause of 47 U.S.C. § 1002(a)(2) is read to mean that a pen register may not be used at all to deliver cell site information to the Government, then the Government may not acquire cell site information by *any* mechanism. This is because the Pen Register Statute is clear that the device that captures cell site information--that is, a "pen register"--may be installed only pursuant to the Pen Register Statute itself. As noted, the Pen Register Statute defines a pen register as a device that provides "signaling information" (*e.g.*, cell site information). *See* 18 U.S.C. § 3127(3). At the same time, the Pen Register Statute states unequivocally (with exceptions not relevant here) that "no person may install or use a pen register ... without first obtaining a court order under section 3123"--that is, pursuant to a court order issued under the Pen Register Statute itself. *See* 18 U.S.C. § 3121(a). Taken together, the two sections require that prospective cell site information may be obtained *only* pursuant to the Pen Register Statute. If the exception clause in 47 U.S.C. § 1002(a)(2) is read to mean that the Pen Register Statute may not be used in any form to obtain cell site information, as is urged by *amicus* and the other cell site cases, the exception clause in combination with section 3121(a) would constitute a directive that cell site information was not obtainable by any mechanism at all.

Amicus and the other cell site cases do not address this question and simply assume that 47 U.S.C. § 1002(a)(2) means that some mechanism other than the Pen Register Statute may be used to obtain cell site information as long as this mechanism stands on its own--that is, as an independent ground authorizing the collection of cell site data. The cell site cases believe a search warrant under Fed.R.Crim.P. 41 is the appropriate mechanism, *see, e .g.*, Texas Decision, 396 F.Supp.2d at 757, and *amicus* asserts that it is the Title III wiretap statute, *see* Letter to the Court dated December 6, 2005 from Yuanchung Lee, at 5-6. But, again, this reading fails to give effect to the explicit directives contained in the Pen Register Statute that a pen register--which is defined to include a device providing cell site information--can be installed only pursuant to "a court order under section 3123 of [Title 18]." 18 U.S.C. § 3121(a). In other words, Fed.R.Crim.P. 41 or Title III cannot by themselves provide authority for the Government's application because any warrant or order issued pursuant to those mechanisms must necessarily authorize the installation of a "pen register."

If the cell site cases and *amicus* were correct in their interpretation of the exception clause--that is, that it constitutes a simple direction that no cell site information may be obtained pursuant to the Pen Register Statute--this Court might conclude that Congress intended that the Government could not obtain cell site information by any means. However, the exception clause in fact does not contain a direction that no cell site information may be obtained "pursuant" to the Pen Register Statute. Instead, it states that cell site information may not be obtained *"solely* pursuant" to the Pen Register Statute. 47 U.S.C. § 1002(a)(2). The phrase "solely pursuant" is an unusual one--so unusual that the only time it appears in the United States Code is in 47 U.S.C. § 1002(a)(2). [FN5]

> FN5. The phrase "only pursuant" appears several dozen times in the United States Code. But in each instance the phrase is used to direct affirmatively how an act is to be done--for example, to direct that judicial review of an order may be obtained "only pursuant" to a particular statutory provision. 49 U.S.C. § 46301(d)(7)(D)(iii). Here, however, the exception clause authorizes something to be done as long as it is *not* done "solely pursuant" to a particular statutory provision. Thus, the statutes using "only pursuant" provide no assistance in our interpretation.

*6 The use of the word "solely" is significant. "Solely" means "without another" or "to the exclusion of all else." *See Merriam-Webster's Collegiate Dictionary* (10th ed.2000), at 1114. If we are told that an act is not done "solely" pursuant to some authority, it can only mean that the act is done pursuant to that authority *"with* [ ] another" authority. *Id.* As a result, the use of the word "solely" in section 1002 necessarily implies that "another" mechanism may be combined--albeit in some unspecified way--with the Pen Register Statute to authorize disclosure of cell site information.

As just noted, *amicus* and the other cell-site cases read the exception clause as a direction to the Government to rely exclusively on some other mechanism to obtain the cell-site information and to rely on that other mechanism alone. We have already pointed out one problem with this reading--that it results in a contradiction in the terms of the Pen Register Statute and 47 U .S.C. § 1002. But there is a second problem, which is reflected in section 1002 itself. If section 1002 means that the Pen Register Statute cannot be relied on whatsoever to obtain cell site information, it would have been sufficient for the statute's drafters to use the word "pursuant" rather than the phrase "solely pursuant." In other words, the use of the word "pursuant" would have been enough by itself to give a clear direction

that cell-site information cannot be obtained under the Pen Register Statute. Given the doctrine that "we must, if possible, construe a statute to give every word some operative effect," *Cooper Industries, Inc. v. Aviall Services, Inc.,* 125 S.Ct. 577, 584 (2004), the word "solely" must be given semantic content if it is possible to do so. The most reasonable reading of the word "solely" is that if cell-site information is not being obtained "solely" pursuant to the statute, it is being obtained pursuant to the opposite of "solely": that is, not "alone" but in combination with some other mechanism.

While we have extracted some semantic content out of the word "solely," it has hardly been a satisfying exercise inasmuch as we are left with the conclusion that Congress has given a direction that cell site information may be obtained through some unexplained combination of the Pen Register Statute with some other unspecified mechanism. As unsatisfying as this result is, the only alternative is either (1) to ignore the plain dictate of 18 U.S.C. § 3121(a) by assuming that 47 U.S.C. § 1002 means that some other mechanism may be used to intercept "physical location" information if it can do so on an independent basis, or (2) to ignore Congress's inclusion of the otherwise unnecessary word "solely" and conclude that ongoing cell site data is not obtainable at all.

We reject the first choice as it requires us to ignore a clear statutory command. Nor can we accept the second choice because it requires us to conclude that Congress intended that ongoing cell site location information could not be obtained by any means at all. Congress, however, plainly manifested its intention to the contrary. First, as noted, any such interpretation necessarily reads the word "solely" out of the exception clause. If Congress had intended that no prospective cell site data be obtainable, it would have simply said in the exception clause that physical location information could not be obtained "pursuant" to the Pen Register Statute.

*7 Second, the only legislative history that directly bears on the meaning of the exception clause--consisting of a prepared statement of former Federal Bureau of Investigation ("FBI") director Louis Freeh--reflects that the § 1002 exception was put in at the suggestion of the FBI itself, as a way of assuring Congress that the FBI would rely on mechanisms--referred to as "court orders and subpoenas"--other than the Pen Register Statute to obtain physical location information, including cell site data. *See Police Access to Advanced Communication Systems: Before the Subcommittee on Technology and the Law of the Committee on the Judiciary United States Senate and the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary House of Representatives* (1994) (statement of FBI Director Louis J. Freeh) ("Freeh Statement"), *available at* 1994 WL 223962 ("Even when such generalized location information, or any other type of 'transactional' information, is obtained from communications service providers, court orders or subpoenas are required and are obtained."). Thus, it would not make sense for Congress to have taken Director Freeh up on his proposal by barring law enforcement agencies from obtaining cell site information entirely.

Third, the District of Columbia Circuit, in considering the "solely pursuant" exception in the context of a Federal Communications Commission's rule-making proceeding, approved of the FCC's decision that section 1002 "simply imposes upon law enforcement an authorization requirement different from that minimally necessary for use of pen registers and trap and trace devices." *United States Telecom Ass'n,* 227 F.3d at 463 (citing *In the Matter of Communications Assistance for Law Enforcement Act,* 14 F.C.C.R. 16794, 16815, ¶ 44 (1999)). The plain import of this statement is that law enforcement agencies would be able to get authorizations to obtain cell site information from some mechanism, although the Government would have to meet an authorization requirement different from the minimal standard provided in the Pen Register Statute.

Having rejected the two alternatives--that is, that cell site data can be obtained without reliance on the Pen Register Statute or that it is not obtainable at all--we are back at the originally discussed reading of the word "solely." We thus conclude that Congress expected physical location information--including cell site information--would be obtainable by the Government by using some mechanism in combination with the Pen Register Statute. The idea of combining some mechanism with as yet undetermined features of the Pen Register Statue is certainly an unattractive choice. After all, no guidance is provided as to how this "combination" is to be achieved. But, again, in light of the language used in section 1002, the Court believes that it is the only choice possible.

The next question is (1) whether the other mechanism relied on by the Government--18 U.S.C. § 2703--is an appropriate mechanism to "combine" with the Pen Register Statute, and (2) if so, how section 2703 should be "combined" with the Pen Register Statute. To answer these questions, we turn to an examination of section 2703.

C. *Section 2703*

*8 Section 2703 contains three main sections that authorize the Government to obtain records. Two are not relevant here: section 2703(a) authorizes disclosure of the contents of wire or electronic communications held by a "provider of electronic communication service" and section 2703(b) authorizes disclosure of the contents of wire or electronic communications in a "remote computing service ."

Section 2703(c)(1) --the section relied upon by the Government--provides that a "governmental entity may require a provider of electronic communication service or remote computing service to disclose a record or other information pertaining to a subscriber to or customer of

such service (not including the contents of communications)," provided the Government "offers specific and articulable facts showing ... reasonable grounds to believe that ... the records or other information sought, are relevant and material to an ongoing criminal investigation" under 18 U.S.C. § 2703(d). A separate portion of section 2703 provides that basic subscriber information--such as name, address and duration of calls--need not even meet this threshold showing but is obtainable merely by subpoena. *See* 18 U.S.C. § 2703(c)(2). The Government may obtain additional information about a subscriber under 18 U.S.C. § 2703(c)(1)(B) as long as the "specific and articulable facts" standard is met.

The first question that arises is whether prospective cell site data is encompassed in the phrase "record or other information pertaining to a subscriber to or customer of [an electronic communication] service."

Certainly, prospective cell site data is "information," and it may also be said--in this District at least--to be in the form of a "record" inasmuch as cell site information is transmitted to the Government only after it has been in the possession of the cell phone company. Cell site data also "pertain[s]" to a subscriber to or customer of cellular telephone service. The remaining question is whether cellular telephone service constitutes an "electronic communication service." According to 18 U.S.C. § 2711(1), we must turn to 18 U.S.C. § 2510 for the definition of this term. Section 2510 defines an "electronic communication service" to mean "any service which provides to users thereof the ability to send or receive wire or electronic communications." 18 U.S.C. § 2510(15).

The phrase "electronic communication" is itself defined. Section 2510(12) provides that "electronic communication" means "any transfer of signs, signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic, photoelectronic or photooptical system that affects interstate or foreign commerce." With the definition taken thus far, it would be plain that a user of a cellular telephone is a "customer of an electronic communication service" under section 2703(d) since the cellular telephone makes transmissions to a tower through an electromagnetic system. *See generally* http://www.fda.gov/cellphones/qa.html# 1 (wireless phones rely on radio-frequency energy, which is a form of electromagnetic energy).

*9 *Amicus* argues, however, that an exception contained in the definition of "electronic communication" in section 2510(12) is of importance here. *Amicus* Letter at 8. The exception states that an "electronic communication ... does not include ... any communication from a tracking device (as defined in section 3117 of this title)." 18 U.S.C. § 2510(12)(C). Section 3117 in turn defines a tracking device as "an electronic or mechanical device which permits the tracking of the movement of a person or thing." 18 U.S.C. § 3117(b).

Because a cellular telephone arguably has the capability of being a "device which permits ... tracking"--in addition to its normal voice and data transmission uses--we must determine if the tracking device exception to the definition of "electronic communication" means that a cellular telephone service subscriber is not in fact a "customer of an electronic communication service" under section 2703(c).

To understand the import of this exception, it is necessary to examine what "service" is being provided to the customer of a cellular telephone. This is because the term "electronic communication" is used in section 2703 to describe the sort of "service" that an individual subscribes to or is a customer of, and the Government may only obtain "records or other information" pertaining to such a person. Section 2510(15) says that the relevant service is a service that provides to users thereof the ability to "send or receive ... electronic communications." The exception in section 2510(12)(C) tells us only that "tracking" information is not considered to be an electronic communication. But this exception does not alter the fact that the cellular telephone *service* that the customer uses and to which the subscriber subscribes is nonetheless an "electronic communication service" under section 2510(15).

We next turn back to section 2703, which governs "information" pertaining to "customers and users" of electronic communications service. It is certainly the case that cell site or tracking information constitutes "information" pertaining to customers or users of electronic communications services. Thus, such cell site or tracking information comes within section 2703(c) and consequently is the sort of "information" that the Government may seek pursuant to an order under section 2703(d).

The objection to this reading, *see Amicus* Letter at 8-9, appears to be as follows: section 2703(c) governs information pertaining to electronic communication services. The definition of "electronic communication" in section 2510(12)(C) excludes tracking information. Therefore, the Government cannot get under section 2703 the tracking information a cell phone provides.

The problem with this syllogism is that it assumes that the term "information" in section 2703(c) is limited by the definition contained in section 2510. In fact, section 2510 does not speak to the scope of the term "information" in section 2703. Rather, section 2510 speaks only to the meaning of the term "electronic communication service," which it defines broadly as a service that "provides to users thereof the ability to send or receive ... electronic communications." Thus, the term "electronic communications service" in section 2703(c) refers broadly to the "service" of providing users with the "ability to send or receive ... electronic communications." It does not refer to any one particular piece of information, such as cell site

information, that might be obtainable from the device carried by the user of the service. While tracking information is not to be considered part of "electronic communications" pursuant to the exception contained in 2510(12)(C), this does not alter the fact that the cellular telephone service to which a cellphone customer subscribes necessarily comes within the definition of section 2510(15). After all, the service a cellular telephone company "provides to users" is the ability to make cellular telephone calls, not exclusively tracking information. Inasmuch as a service that provides cellular telephone capabilities is within section 2510(15), information pertaining to a subscriber to or customer of that "service" is obtainable under section 2703(c).

*10 In other words, information on the location of cell towers is not the "service" to which a cellular customer subscribes. Instead, the user subscribes to the voice--and perhaps data--transmission capabilities provided by the cellular carrier. Although tower location information may be a necessary ingredient for the operation of that service, the "service" to which the user subscribes is still the "electronic communication" capabilities of the cellular telephone. Section 2703(c) tells us broadly that the Government may obtain "information" pertaining to users of this sort of service. Cell site information is just one of many possible categories of "information" that pertains to users of this service. The exception in section 2510(12)(C) does not purport to limit the meaning of the term "information." [FN6]

> FN6. There is potentially an independent reason why the exception clause in section 2510(12)(C) does not limit the Government's ability to obtain cell site information under section 2703. The exception clause points to section 3117 for the definition of a tracking device. Section 3117, however, is a statute that refers to a tracking device that has been "install[ed]" at the behest of the Government. 18 U.S.C. § 3117(a). Here, however, no tracking device has been "installed."

It may seem anomalous that the Government may obtain under section 2703 a particular category of information pertaining to a user of electronic communications that is excepted from the term electronic communications itself. But this is not surprising given the multiple purposes that the section 2510(12)(C) exception serves. The definitions in section 2510 apply across the board to (1) wiretaps; (2) section 2703 applications; and (3) Pen Register Statute applications. *See* 18 U.S.C. §§ 2510 (introductory clause); 2711(1); and 3127(1). There is no suggestion in the structure of the statues that the section 2510(12)(C) exception was meant to limit in any way the "information" that the Government was entitled to get under section 2703(c).

In light of the analysis so far, section 2703(c)'s use of the term "information" would cover the prospective cell site data being sought here. At least some of the cell site cases recognize that the term "information" includes historical cell site information. *See* Texas Decision, 396 F.Supp.2d at 759 n. 16; EDNY Decision, 396 F.Supp.2d at 313; Maryland Decision, 2005 WL 3160860, at *4; *see also Amicus* Letter at 12. They question, however, whether cell site information not yet in existence at the time of the order--that is, prospective or what is colloquially referred to as "real time" data--may be included in the term "information."

The text of the statute itself contains no limitation of this kind. Some courts have pointed to the title of the chapter in which the statute appears-- the "Stored Wire and Electronic Communications and Transactional Records Access"--as harboring some importance in this regard. *See* Texas Decision, 396 F.Supp.2d at 760. But this title is of limited significance for two reasons. First, it refers to types of data--"communications" and "records"-- that are narrower than one of the actual terms in section 2703(c): "information." Second, and more significantly, even the data being obtained regarding the location of the cell phone is in fact "stored" by the carrier--at least in this District. Cell site information is not obtained directly by the Government. Instead, it is transmitted to the Government only after it has come into the possession of the cellular telephone provider in the form of a record.

*11 The question of "historical" versus "real time" data is still of some significance, however. While the data the Government seeks can appropriately be characterized as "stored" or "historical" records by the time the Government gets possession of them, the Government wants that information on an ongoing basis. That is, it wants a continuing order for the cell phone company to provide the stored records in the future.

Amicus and the cell site cases have properly pointed to aspects of 2703 that make it unsuited to requiring the carrier to provide cell site data on an ongoing basis. *Amicus* Letter at 12. The two related statutes that plainly permit transmission of information to the Government on an ongoing basis--the Pen Register Statute and Title III--both contain limitations, 60 days and 30 days respectively, that cap the duration of any prospective orders. *See* 18 U.S.C. § 3123(c)(1); 18 U.S.C. § 2518(5). Section 2703, by contrast, contains no such time limitation. In a similar vein, the Pen Register Statute and Title III contain automatic sealing provisions, *see* 18 U.S.C. § 2518(8)(b) and 3123(d)(1)--provisions that are obviously important to the Government when obtaining ongoing information--whereas section 2703 does not.

These omissions, however, are understandable when considered in the context of the discussion presented thus far. *Amicus* and the cell site cases have conducted their analysis of section 2703 as an effort to determine whether Congress "intended" section 2703 to cover prospective cell site data. *See, e.g.,* Texas Decision, 396 F.Supp.2d at 760;

Amicus Letter at 11-12. But there is no reason to believe that section 2703 was specifically enacted as the mechanism to cover such cell site data inasmuch as the Pen Register Statute professes to be the only statute that authorizes the installation of the device used to capture this sort of data, *i.e.* "signaling information." *See* 18 U.S.C. § 3121(a).

Section 2703, however, remains an appropriate candidate as a legal mechanism that could properly be "combined," as contemplated by 47 U.S.C. § 1002(a)(2), with the Pen Register Statute to obtain cell site locations. This is because the text of section 2703(c) covers the data the Government seeks here. The heart of the statute--granting authority to obtain "information" about cell phone customers--does not on its face contain any limitation regarding when such information may come into being. It is thus susceptible to an interpretation that the "information" sought might come into being in the future. Moreover, because cell site data in this District exists as a record before it is transmitted to the Government, the text of the statute does not prevent the Government from presenting daily or hourly (or even more frequent) applications to the Court to obtain historical cell site data. Thus, as a theoretical matter, the statute permits the Government to obtain cell site data on a continuing or ongoing basis even under a narrow reading of section 2703.

*12 The principal reason why the statute does not serve easily as a fully independent source of authority for providing such data is a structural one: the statute does not contain certain procedural features, such as a time limitation, that Congress has typically included in statutes that permit the gathering of ongoing information. But this is an understandable omission given that Congress envisioned a pen register as the mechanism that would be used to capture cell site data, and the Pen Register Statute contains the procedural features missing from section 2703. In other words, the Pen Register Statute contains the time limitation (and sealing) provisions that are tied to the very "device"--that is, the pen register--that Congress deemed necessary to obtain prospective cell site information. It is thus logical to conclude that these two statutes in combination contain the necessary authority contemplated by Congress in 47 U.S.C. § 1002.

Section 2703 is an appropriate mechanism to "combine" with the Pen Register Statute for yet another reason. As the District of Columbia Circuit recognized, and as is implicit from the statement presented by Director Freeh, the objection to using the Pen Register Statute alone for the purpose of obtaining cell site data was that it contained a "minimal[ ]" authorization requirement. *United States Telecom Ass'n,* 227 F.3d at 463 (citing *In the Matter of Communications Assistance for Law Enforcement Act,* 14 F.C.C.R. 16794, 16815, ¶ 44 (1999)). Thus, the District of Columbia Circuit concluded that the section 1002 exception "simply imposes upon law enforcement an authorization requirement different from that minimally necessary for use of pen registers and trap and trace devices." *Id.* Section 2703, by contrast, contains a higher authorization requirement than that required for a pen register. While the Pen Register Statute permits disclosure of information upon the mere showing that the information likely to be obtained is "relevant to an ongoing criminal investigation" being conducted by the agency, 18 U.S.C. § 3122(b)(2), section 2703 requires the Government to offer "specific and articulable facts showing ... reasonable grounds to believe that ... the records or other information sought, are relevant and material to an ongoing criminal investigation." *See* 18 U.S.C. § 2703(d). Using section 2703 thus fulfills the apparent purpose of the section 1002 exception: to require something different from than the "minimal[ ]" authorization requirement imposed by the Pen Register Statute.

Of course, *amicus* and the cell site cases suggest that Fed.R.Crim.P. 41 or Title III are better mechanisms than section 2703 to obtain the cell site information. They rely on them, however, based in part on their belief that the non-pen-register mechanism for obtaining cell-site data must operate independently of the Pen Register Statute. [FN7] But once this proposition is rejected, section 2703 is a far more obvious source of authority since it covers the very sort of information that is being sought under the warrant. Its only failing is that it does not explicitly allow for the continuous release of such information. Certainly, Title III does not represent an appropriate fit for cell site information inasmuch as its purpose is to govern the interception of the "contents" of communications. *See, e.g.,* 18 U.S.C. §§ 2510(4), 2511(1); *United States v. New York Tel. Co.,* 434 U.S. 159, 167 (1977) (pen registers not within Title III because they do not acquire the "contents" of communications).

> FN7. Their reliance is also based on the belief that a cell phone is transformed into a "tracking device" when prospective cell site data is sought. For reasons discussed further in the next section, the requirements that attach to tracking devices are not relevant here.

*13 In sum, section 2703 is the most obvious candidate to be used in combination with the Pen Register Statute to authorize the ongoing collection of cell site information because it covers cell site information generally. Section 2703's absence of procedural provisions that typically attach to the transmission of ongoing information is explained by the fact that the pen register is the proper "device" to obtain cell-site information. Thus the Pen Register Statute's procedural provisions that are tied to such a device are appropriately combined with an application under section 2703 to obtain such information.

D. *Effect of the Fourth Amendment*

The only remaining question is whether the issuance of a court order for cell site information under section 2703 and the Pen Register Statute is unconstitutional because it violates the Fourth Amendment's prohibition against

unreasonable searches and seizures. *Amicus* (and some of the cell site cases) discusses the issue in terms of whether the cell phone is a "tracking device" and whether a warrant grounded in probable cause is necessary for the installation of such a device. But the data being sought by the Government in this District is not what *amicus* believes it to be. The information does not provide a "virtual map" of the user's location. *Amicus* Letter at 24. The information does not pinpoint a user's location within a building. Instead, it only identifies a nearby cell tower and, for some carriers, a 120-degree face of that tower. These towers can be up to 10 or more miles apart in rural areas and may be up to a half-mile or more apart even in urban areas. Moreover, the data is provided only in the event the user happens to make or receive a telephone call. Thus, *amicus's* reference to tracking devices and the cases considering this technology is not on point. [FN8]

> FN8. The tracking device statute, 18 U.S.C. § 3117, is of no relevance at all because it provides no guidance on what showing must be made to install a tracking device. It states only that *"If* a court is empowered to issue a warrant or other order for the installation of a mobile tracking device, such order may authorize the use of that device within the jurisdiction of the court, and outside that jurisdiction if the device is installed in that jurisdiction." 18 U.S.C. § 3117(a) (emphasis added); *see also United States v. Gbemisola,* 225 F.3d 753, 758 (D.C.Cir.2000) ("section 3117 does not prohibit the use of a tracking device in the absence of conformity with the section"). Not only is the statute prefaced by a conditional clause, the statute itself contemplates that a tracking device may be installed merely pursuant to an "order"--that is, without a warrant and thus without a probable cause showing. And, of course, it contemplates the "installation" of a tracking device, which has not been sought here.

In any event, the case most strongly relied on by *amicus, United States v. Karo,* 468 U.S. 705 (1984), held only that the installation of a true tracking device without the knowledge of the person it was tracking must be the subject of a warrant if the device discloses its location inside someone's home and that information could not have been obtained by observation. 468 U.S. at 714; *cf. United States v. Knotts,* 460 U.S. 276, 282 (1983) (no warrant required where the installed tracking device reveals information observable from a public highway). Here, however, the Government does not seek to install the "tracking device": the individual has chosen to carry a device and to permit transmission of its information to a third party, the carrier. As the Supreme Court has held in the context of telephone numbers captured by a pen register, the provision of information to a third party does not implicate the Fourth Amendment. *See Smith v. Maryland,* 442 U.S. 735, 744 (1979); *see also United States Telecom. Ass'n v. FCC,* 227 F.3d at 459 (*"Smith's* reason for finding no legitimate expectation of privacy in dialed telephone numbers-- that callers voluntarily convey this information to the phone company in order to complete calls--applies as well to much of the information provided by the challenged capabilities.") (referring to information that included "antenna tower location"). *Amicus* argues that the information is not voluntarily conveyed because, unlike telephone numbers, location information is being transmitted even in the absence of a telephone call. *Amicus* Letter at 23 (citing Texas Decision, 396 F.Supp.2d at 756-57). The Court need not reach this question because the only information being sought by the Government here is information tied to an actual telephone call. [FN9]

> FN9. *United States v. Forest,* 355 F.3d 942, 951 (6th Cir.2004), suggests in dictum that there might be a Fourth Amendment concern where a law enforcement agent purposely dialed the target cellphone in order to obtain location data. The court viewed such an act as demonstrating that the user was not voluntarily providing the cell site data. Here, we have no request to authorize such an act.

Conclusion

*14 The above analysis applies with respect to the instant Order, and is based upon the technology that is available to the Government in this District. Because the Court cannot know how that technology may change, it intends to identify specifically, in any future orders authorizing the provision of cell site information, the character of the information that may be provided by a carrier. Specifically, any such Order will make clear that it contemplates the production only of: (1) information regarding cell site location that consists of the tower receiving transmissions from the target phone (and any information on what portion of that tower is receiving a transmission, if available); (2) tower information that is tied to a particular telephone call made or received by the user; and (3) information that is transmitted from the provider to the Government. If the Government seeks to obtain other information, it should provide additional briefing on why such information is permissible under the relevant authorities.

Sole Source Justification

(S)

(S)

The following reasons assist in explaining why:

(S)

(S)

(S)

b1
b3
b7E

(U) Other companies would probably require a substantial monetary investment and possibly years of development time to make systems that could provide the same capabilities and compete on the same level as the requested system.

(U) All of these reasons support the claim that it is in the FBI's best interest to acquire the requested systems. Funding for this procurement is available from Budget Item [redacted] Subobject Classification [redacted]

NON-ADVERTISEMENT STATEMENT

Sole Source Justification for [redacted] 07/07/04

1. Identification of the agency and the contracting activity, and specific identification of the document as a "Justification for other than full and open competition". ? - not sure what you want here??

2. Nature and/ or description of the action being approved.

(S) [redacted]

3. A description of the supplies or services required to meet the agency's needs
MINIMUM SALIENT REQUIREMENTS

(S) [redacted]

b1
b3
b7E

~~SECRET~~

001369

CELL/OTD

CELLSITE-474

4. Identification of the statutory authority (Contracting Officer will complete this questions) (OMIT)

5. A demonstration that the proposed contractor's unique qualifications or the nature of the acquisition requires use of the authority cited.

(S) X

6. A description of efforts made to ensure that offers are solicited from as many potential sources as is practicable, including whether a notice was or will be publicized as required by Subpart 5.2 and, if not, which exception under 5.202 applies.

b1
b3

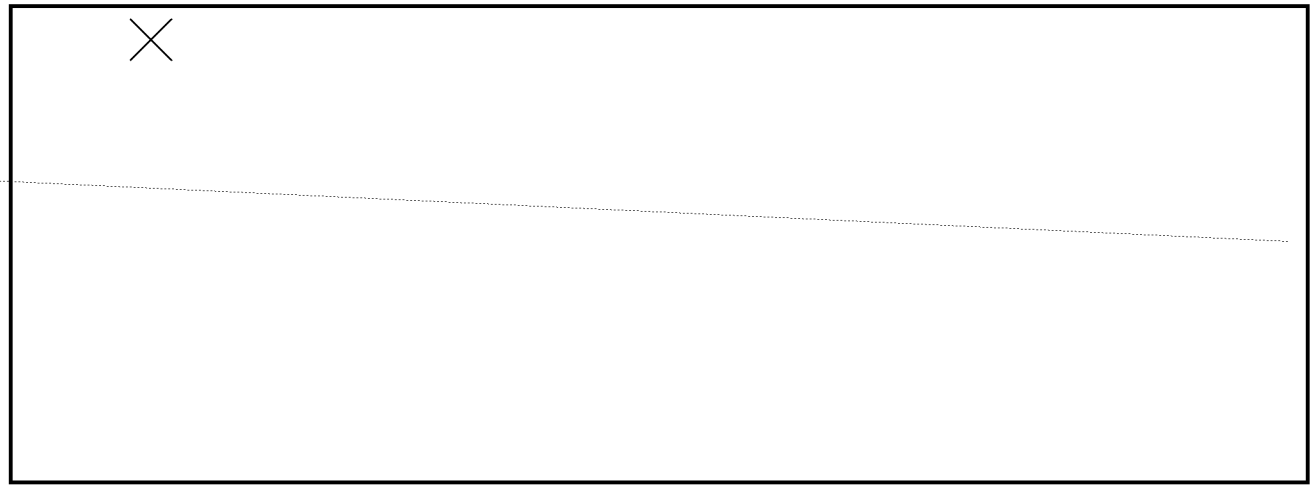
7. A determination by the Contracting Officer that amount is fair and reasonable (OMIT)

8. A description of the market research conducted and the results or a statement of the reason market was not conducted.

(S) X

9. Any other facts supporting the use if other than full and open competition such as: example follow on work ; etc.

(S)



b1
b3

10. A listing of the sources, if any, that expressed, in writing, an interest in the acquisition.
None.

11. A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services required.

The FBI could initiate a developmental effort with another vendor to design, develop and manufacture equipment capable of meeting the minimum salient requirements. However, due to the urgent and compelling need and exorbitant costs associated with 'reinventing-the-wheel' it is in the FBI's best interest to use the most expedient, cost-effective solution. This solution would be to procure existing, commercially available equipment.

- [redacted] The Contractor shall deliver a [redacted] which shall encompass the methods and solutions detailed in the Final Research Report.

The draft and final research reports shall be submitted in both hard copy and electronic copy, with electronic versions in MS Word format (or MS Excel if applicable). The [redacted] shall be delivered [redacted] b3 b7E

Reporting Requirements
At minimum, the contractor shall provide a status briefing and report to the Contracting Officer (CO) and Contracting Officer Technical Representative (COTR) every 2 months from the start date of the activity. This briefing should contain at a minimum the following:

Reporting Period Information
1. A narrative review of work accomplished during the reporting period and significant events/major milestones.
2. Problem areas
3. Anticipated activity for the next reporting period
4. Other relative information as necessary or requested

In addition the contractor shall provide the following:
- The contractor shall inform the CO in writing of the actual task starting date on or before the starting date.
- The contractor shall bring technical issues or potential problems affecting performance to the attention of the COTR as soon as possible. Verbal reports must be followed up with written reports when directed by the COTR.
- The contractor shall notify the CO when 75 % of the amount of the task has been expended.
- Additional written reports may be required as deemed necessary by the CO or COTR.

1 INTRODUCTION

This document serves as the instrument for the Mobile Computing Security Program to identify requirements and assess risk, with the objective of providing an approval-to-operate (ATO). The information required for this assessment includes, but is not limited to, a complete scope of need, justification, concept of operations, technical specifications, configuration management and residual risk relative to the device being placed into service. Once completed, and if residual risk is deemed acceptable, an official EC will be generated granting an ATO for those device(s) described within, in the manner set forth in the concept of operations. Attachments 1 and 2 are "living" documents. That is they are updated each time there is a change in the configuration, or when new devices are fielded under this SMP. Attachment 1 is the Configuration Management control document that lists the specific applications in use under this SMP. Attachment 2 is a complete listing of all devices fielded under this SMP.

7 POINTS OF CONTACT

The ISSM has approval authority for the [redacted] and is responsible for the life cycle system security. Significant changes in configuration or usage will be submitted to the ISSM by the ISSO for approval.

The ISSO is responsible for day-to-day oversight of the [redacted] He is responsible for engineering, development, configuration management and ensuring that the program security requirements are met. The ISSO also maintains an up-to-date inventory of all [redacted] contained within this OP plan and to report any:

- Loss
- Changes in configuration or usage
- Incremental/decremental changes to the baseline to the ISSO and ISSM.

Note: In the event that an ISSM is not assigned, ISSM duties are the responsibility of the assigned security officer.

b3
b6
b7C
b7E

8 CONFIGURATION MANAGEMENT

Configuration management is a process that controls and manages changes (i.e., new applications, peripherals, changes in configuration, etc.) to a device or system. By controlling changes made to a system's hardware, software, firmware, and/or documentation, throughout the system/device life cycle, configuration management is a mandatory, integral part of this overall risk management solution. The ISSM and ISSO are responsible for managing this process.

8.1 Incremental Changes

Incremental changes to the baseline may be vetted and approved by the ISSM. Minor changes such as the revision number of an application do not require ISSM approval but are to be tracked by the ISSO in the configuration information periodically provided to the ISSM in the configuration management document illustrated in Attachment 1.

8.2 Security Architecture and Usage Changes

Any changes affecting the security architecture including the manner in which the [redacted] are used or the type of data stored on them may require a renegotiated ATO.

9 RULES OF BEHAVIOR

The PEDs known as [redacted] covered under this SMP are granted deviations from the standard security settings based on operational need. These deviations have corresponding expected rules of behavior with respect to how they are used, stored, and maintained. These include:

9.1 [redacted] Protection

b6
b7C
b7E

To all:

The class is going to be switched to one day earlier - for many reasons - a conflict with retirement lunch - others couldn't make it - and I will probably have to testify on that day - so it will be held the same time (8:30am) in the LARGE SAC conference room on Tuesday, November 7th.

It is probably more geared toward the agents and TFOs that will be doing the investigative work so that they are better equiped to properly hand things off to - but it would be good for the ISSs who do a lot with to come. We will cover everything from the moment you get a from an informant or other source There will be a lot of good info and handouts given out so that everyone is up to date on the latest things you need to complete your mission.

I just recently did this twice in the last two weeks for other groups - so it will definitely go about So plan on a little bit later of a lunch. I promise you won't be bored. We will have a short legal portion in the middle by and also a Wireless Intercept Tracking Team

Just remember - date switch to Tuesday, November 7th - 8:30am - SAC Large Conference Room.

UNITED STATES DISTRICT COURT

DISTRICT OF ARIZONA

United States of America,

Plaintiff,

v.

Daniel David Rigmaiden, et al.,

Defendant.

No. CR-08-0814-PHX-DGC

GOVERNMENT'S MEMORANDUM RE MOTION FOR DISCOVERY

The United States, through undersigned counsel, submits this Memorandum in an attempt to clarify and narrow some issues for the upcoming October 28, 2011, hearing regarding Defendant's Motion for Discovery.

First, the United States proposes that the Court assume, arguendo, for Defendant's Motion for Discovery and any forthcoming motion to suppress, that the aircard tracking operation was a Fourth Amendment search and seizure. [1/]

[1/] The United States' position continues to be that, as a factual matter, the operation did not involve a search or seizure under the Fourth Amendment. The United States explained in its March 11, 2011, Memorandum Regarding Law Enforcement Privilege that Defendant does not have a reasonable expectation of privacy in his general location or in the cell site records he transmitted wirelessly to Verizon. (CR 465 at 13-17.) Therefore, the use of the cell site simulator is not a search under the Fourth Amendment. See, e.g., Smith v. Maryland, 442 U.S. 735, 740 (1979) ("application of the Fourth Amendment depends on whether the person invoking its protection can claim a 'justifiable,' a 'reasonable,' or a 'legitimate expectation of privacy' that has been invaded by government action"). Nevertheless, in an attempt to simplify the analysis and to avoid unnecessary disclosure of privileged information, the United States will

(continued...)

Second, the United States agrees to rely solely on the Rule 41 tracking warrant, application, and affidavit, No. CR08-90330-MISC, to authorize the use of equipment to communicate directly with Defendant's aircard and determine its location. [2/]

Third, the United States will agree to allow the Court to factually assume, that, at the conclusion of the July 16, 2008, aircard tracking operation, the FBI located the aircard within Unit 1122 of the Domocilio Apartments. [3/]

Fourth, with respect to whether the equipment used to locate the aircard was operated in a "man in the middle" manner or caused a brief "disruption of service," the United States will agree that the Court can assume, arguendo, that it did. [4/]

Fifth, for the purpose of defendant's pending motion(s) to compel discovery and his prospective motion to suppress, the United States does not expect to present facts in any in camera proceeding that it would then request the Court to consider for the purpose of rebutting any of defendant's claims without disclosing those facts to the defendant.

[1/] (...continued)
no longer argue in this case only that the aircard tracking operation was not a search or seizure under the Fourth Amendment, and will instead rely on its authority under the hybrid order and tracking warrant, Defendant's lack of standing, and, if necessary, the agents' good faith reliance on these court orders.

[2/] Again, the United States' position is that the hybrid order confers sufficient authority to use a cell site simulator and that a tracking warrant is unnecessary. Nevertheless, the United States will rely solely on the Rule 41 warrant application, affidavit and order in this case to authorize its use of a cell site simulator. The hybrid order, No. CR08-90331-MISC, will be used to justify obtaining cell site and other non-content information from Verizon Wireless.

[3/] This is not, in fact, accurate. As explained previously, the FBI was only able to narrow the aircard down to three or four apartments. But to avoid disclosure of privileged information and simplify the Fourth Amendment analysis, the United States will concede, for purposes of any forthcoming motion to suppress, that the FBI located the aircard within Unit 1122 of the Domocilio Apartments.

[4/] The United States indicated at the September 22, 2011, hearing that it believed "the simulator in this case was taking the message it received from the aircard and sending it on to a Verizon tower." (RT 9/22/2011 (CR 637) at 61:5-8.) As FBI Agent Bradley Morrison clarifies in the attached affidavit, however, the equipment did not capture any content and it did not act as a "man in the middle," collecting data and passing it along to Verizon Wireless. (Morrison Aff. 2-3 ¶ 4.)

CELL/OTD 004855

CELLSITE-14269

Finally, the United States is submitting a sworn affidavit from Bradley Morrison, the Unit Chief of the FBI Tracking Technology Unit, to describe facts regarding the aircard tracking operation and clarify some remaining factual issues. The United States will make Agent Morrison available ex parte and in camera to answer questions the Court may have about the tracking operation and the equipment used. In addition, the United States will make this individual available for testimony at any future suppression hearing, so long as the United States has an opportunity to file a motion in limine in order to seek to limit cross-examination regarding privileged law enforcement sensitive material. In order to proceed in this fashion, the United States requests an opportunity to explain, in camera, the basis for its claims of privilege.

Respectfully submitted this 27th day of October, 2011.

[redacted] asked me to pass along the attached, which incorporates some suggestions from [redacted] on the draft affidavit. Please let us know where we are on the affidavit and whether you have any comments on the memo [redacted] sent. We plan to file it in advance of the hearing, which is tomorrow.

Thanks again for your help.

[redacted]

I'd like to just add my [redacted] and appreciation to [redacted] for taking the time to help with the mission. Not only was his expertise invaluable, but his instruction on operational techniques was excellent.

Thanks again for your support in allowing [redacted] to come out to help. I look forward to employing the WITT mission here in [redacted] I know the case agents are all excited in us having this capability.

[redacted]

Thank you for your support in putting this mission together. We had a number of difficulties, and without your quick responses and approvals, I don't think we would have pulled it off. Thank you.

I also wanted to let you know that [redacted] was a BIG help. I know he was in Denver during the mission, but he was still responsive and provided information, even until after mid-night his time.

b7E

[redacted] and I discussed the possibility of him coming to [redacted] to assist with a week's worth of WITT missions, possibly after January. We also discussed the possibility of me coming out to assist [redacted] with training for [redacted] Obviously, this will be your call. In the mean time, I will be available to assist via phone. b6 b7C b7E

[redacted] b7E

Please let me know your thoughts and what you would like me to do to proceed.

Thank you again for the opportunity. I believe this was a very productive trip,

Special Agent [redacted]

Attention: [redacted] Contracting Officer

Subject: [redacted] Proposal Dated 16 August 2010

Reference: a) [redacted] Request for Proposal (RFP) dated 25 January 2010
b) [redacted]

Enclosure: 1) Proposal (Volume 1- Technical and Volume 2 – Cost)

Dear [redacted]

[redacted] is happy to provide its response to the Sponsors referenced (a) RFP for effort to be added under the referenced (b) [redacted] contract. Our specific assumptions used in preparing this proposal are included in both the Technical and Cost volumes.

The Consolidated Materials List (CML) for this effort currently is not finalized (non-auditable). Our staff is working to generate an fully auditable CML which we will provide during negotiations.

As requested this proposal shall remain valid for a period of sixty (60) days. [redacted] reserves the right to revise, update, or extend the validity of this proposal should the proposed rates change prior to negotiations.

Should you require further information please do not hesitate to contact the undersigned at [redacted]

Very truly yours,

[redacted]

Here's the applicable policy: the MIOG (OTD section pertaining to GPS) provides the following guidance:

16-4.8.13 Tracking and Location Information - Evidentiary Considerations (TTU) (See MIOG, Part 2, 16-2.12 (3).)

(1) Tracking and location information may in fact constitute evidence in a number of investigative scenarios. See MIOG, Part 2, 10-10.8. Hence, such tracking and location information when evidential in nature should be maintained in an appropriate evidence envelope within the IA or IB section of a case file or within the Bulky Evidence Room. (TTU)

b7E

(2) Since tracking and location information may constitute evidence in a number of investigative scenarios, it is important that careful consideration be given to field office WITT personnel becoming involved in the operation of tracking/locating devices, and in the downloading and chain of custody of tracking/locating information, with respect to the potential for being called to testify as a witness at trial (see FBI policy of . Accordingly, consultation with the field office Chief Division Counsel (CDC) is warranted. Also see MIOG, Part 2, 10-9.8.1(2)(c) and 10-10.16. (TTU)

87

b5

CELL/OTD 09/17 CELLSITE-20282

[redacted] b5

10-10.16 [redacted]

[redacted] b7E

(4) Expert witnesses are available from the Operational Technology Division, Engineering Research Facility, Quantico, Virginia, for media analysis and court testimony regarding authenticity [redacted] and other associated matters. These normally become points of question at pretrial hearings. It is a well-established fact that media recordings and other technically collected evidence are admissible in court. On the basis of current case law, the government can introduce recording media solely on the testimony of the Agent(s) who monitors and records the intercept (assuming the Agent can identify the voice(s) and testify to the authenticity of the media) [redacted] Normally, the Agent who signs the application
for a court-ordered intercept will be called as a witness at a suppression hearing. [redacted] b7E
[redacted] See MIOG, Part 2, 16-7.2.2, 16- 3.1.6 (7).)

(5) If, in an unusual circumstance, the government's case mandates a disclosure of FBI technical operations, equipment or technique, the problem should be first brought to the attention of the Chief Division Counsel who will determine the disclosure and the reasons. Alternatives to disclosure will be sought and if no resolution is possible which would protect FBI technical concerns, then notification should be made to FBIHQ, Operational Technology Division, Electronic Surveillance Technology Section, so a final decision can be made in conjunction with the appropriate FBIHQ investigative divisions.

The United States Court of Appeals for the Eleventh Circuit in United States v. Van Horn, 789 F.2d 1492(11th Cir.), cert. denied, 479 U.S. 854 (1986), recognized a qualified government privilege not to disclose sensitive investigative techniques. The court opined:

> We recognize a qualifed government privilege not to disclose sensitive investigative techniques in Roviaro v. United States, 353 U.S. 53, 77 S.Ct. 623, 1 L.Ed.2d 639 (1957), the Supreme Court acknowledged the existence of an "informer's privilege." The Court stated that the government has a privielge to withhold the identity of persons who furnish information of violations of law to the police, reasoning that the privilege furthered effective law enforcement by encouraging citizens to come forward with relevant information, 353 U.S. at 59, 77 S. Ct. at 627. . .
>
> We hold that the privilege applies equally to the nature and location of electronic surveillance equipment. Disclosing the precise locations where surveillance devices are hidden or their precise specifications will educate criminals regarding how to protect themselves against police surveillance. Electronic surveillance is an important tool of law enforcement, and its effectiveness should not be unnecessarily compromised. Disclosure of such information will also educate persons on how to employ such techniques themselves, in violation of Title III. (789 F.2d at 1507 to 1508).

The privilege will only give way if the Defendant can show a need for the information. 789 F.2d at 1508. To meet this burden, a defendant must establish that the information sought "is relevant and helpful to the defense of the accused, or is essential to a fair determination of a cause." Roviaro v. United States, 353 U.S. 53, 77 S.Ct. 623, 1 L.Ed.2d 639 (1957). The court must then weigh the defendant's need for the information against the government's interest in non-disclosure and the policies underlying the privilege. This case-by-case balancing process is necessarily ad hoc. However, in general, the courts applying the investigative techniques privilege have held that where the defendant has access to evidence from which a jury can determine the accuracy and validity of the surveillance equipment and techniques, the defendant has no need for the information. See, e.g., United States v. Van Horn, 789 F.2d at 1507-08 (concealed microphone in office, location and means of concealment not disclosed because defendant had alternative way to challenge voice identification through the tapes themselves);United States v. Harley, 682 F.2d 1018 (D.C. Cir. 1982); United States v. Garey, 2004 WL 2663023 (M.D.Ga. 2004)(defendant sought nature and technical details of device used to determine geographical location of cellular phone, because phone allegedly used in making threatening calls had been seized from defendant's residence it confirmed the accuracy of the geographic surveillance and defendant had the means to challenge the accuracy of the analysis used to link that phone to the criminal conduct). In contrast, if the defendant has no alternative means to examine the validity and accuracy of the surveillance, the balance will tend to shift in favor of disclosing the information to enable the defense to make his case. See, e.g., United States v. Foster, 986 F.2d 541, 543 (D.C. Cir. 1993) (defendant sought location of observation post: officer's observation of drug transaction was key evidence implicating defendant; surveillance not taped or photographed, so no alternative evidence for jury to examine to determine whether surveillance post provided clear view from which officer could make accurate

identification of defendant).

In this case, the Government has a qualified privilege to maintain the confidentiality of the technology and techniques used in the investigation of this case. [redacted] b5

[redacted] See, e.g., United States v. Harley, 682 F.2d 1018 (D.C. Cir. 1982); United States v. Angiuilo, 847 F.2d 956, 982-84 (1s Cir. 1988); United States v. Fernandez, 797 F.2d 943, 952-53 (11thCir. 1986).

Ladies and Gentlemen,

Attached are the amendments to the Federal Rules of Criminal Procedure as approved by the Judicial Conference (see www.uscourts.gov website) along with an excerpt of the "Report of the Advisory Committee on Criminal Rules," and, for your edification, a document and chart that describes the rulemaking process.

As always, please forward to appropriate personnel.

AMENDMENTS TO THE FEDERAL RULES OF CRIMINAL PROCEDURE

Rule 5. Initial Appearance

* * * * *

(c) Place of Initial Appearance; Transfer to Another District.

* * * * *

(3) ***Procedures in a District Other Than Where the Offense Was Allegedly Committed.*** If the initial appearance occurs in a district other than where the offense was allegedly committed, the following procedures apply:

* * * * *

(C) the magistrate judge must conduct a preliminary hearing if required by Rule 5.1;

(D) the magistrate judge must transfer the defendant to the district where the offense was allegedly committed if:

(i) the government produces the warrant, a certified copy of the warrant, or a reliable electronic form of either; and

* * * * *

Rule 6. The Grand Jury

* * * * *

(e) Recording and Disclosing the Proceedings.

* * * * *

(3) ***Exceptions.***

* * * * *

(D) An attorney for the government may disclose any grand-jury matter involving foreign intelligence, counterintelligence (as defined in 50 U.S.C. § 401a), or foreign

CELL/OTD 006126

CELLSITE-20291

intelligence information (as defined in Rule 6(e)(3)(D)(iii)) to any federal law enforcement, intelligence, protective, immigration, national defense, or national security official to assist the official receiving the information in the performance of that official's duties. An attorney for the government may also disclose any grand-jury matter involving, within the United States or elsewhere, a threat of attack or other grave hostile acts of a foreign power or its agent, a threat of domestic or international sabotage or terrorism, or clandestine intelligence gathering activities by an intelligence service or network of a foreign power or by its agent, to any appropriate federal, state,

CELL/OTD 006127

CELLSITE-20292

state subdivision, Indian tribal, or foreign government official, for the purpose of preventing or responding to such threat or activities.

(i) Any official who receives information under Rule 6(e)(3)(D) may use the information only as necessary in the conduct of that person's official duties subject to any limitations on the unauthorized disclosure of such information. Any state, state subdivision, Indian tribal, or foreign government official who receives information under Rule 6(e)(3)(D) may use the information only in a manner consistent with any guidelines issued

CELL/OTD 006128

CELLSITE-20293

by the Attorney General and the Director of National Intelligence.

* * * * *

(7) ***Contempt.*** A knowing violation of Rule 6, or of any guidelines jointly issued by the Attorney General and the Director of National Intelligence under Rule 6, may be punished as a contempt of court.

* * * * *

Rule 32.1. Revoking or Modifying Probation or Supervised Release

(a) Initial Appearance.

* * * * *

(5) ***Appearance in a District Lacking Jurisdiction.*** If the person is arrested or appears in a district that does not have

CELL/OTD 006129

CELLSITE-20294

jurisdiction to conduct a revocation hearing, the magistrate judge must:

* * * * *

(B) if the alleged violation did not occur in the district of arrest, transfer the person to the district that has jurisdiction if:

(i) the government produces certified copies of the judgment, warrant, and warrant application, or produces copies of those certified documents by reliable electronic means; and

(ii) the judge finds that the person is the same person named in the warrant.

* * * * *

CELL/OTD 006130

CELLSITE-20295

Rule 40. Arrest for Failing to Appear in Another District or for Violating Conditions of Release Set in Another District

(a) In General. A person must be taken without unnecessary delay before a magistrate judge in the district of arrest if the person has been arrested under a warrant issued in another district for:

(i) failing to appear as required by the terms of that person's release under 18 U.S.C. §§ 3141-3156 or by a subpoena; or

(ii) violating conditions of release set in another district.

* * * * *

Rule 41. Search and Seizure

(a) Scope and Definitions.

* * * * *

(2) ***Definitions.*** The following definitions apply under this rule:

CELL/OTD 006131

CELLSITE-20296

* * * * *

(D) "Domestic terrorism" and "international terrorism" have the meanings set out in 18 U.S.C. § 2331.

(E) "Tracking device" has the meaning set out in 18 U.S.C. § 3117(b).

(b) Authority to Issue a Warrant. At the request of a federal law enforcement officer or an attorney for the government:

(1) a magistrate judge with authority in the district — or if none is reasonably available, a judge of a state court of record in the district — has authority to issue a warrant to search for and seize a person or property located within the district;

(2) a magistrate judge with authority in the district has authority to issue a warrant for a person or

CELL/OTD 006132

CELLSITE-20297

property outside the district if the person or property is located within the district when the warrant is issued but might move or be moved outside the district before the warrant is executed;

(3) a magistrate judge — in an investigation of domestic terrorism or international terrorism — with authority in any district in which activities related to the terrorism may have occurred has authority to issue a warrant for a person or property within or outside that district; and

(4) a magistrate judge with authority in the district has authority to issue a warrant to install within the district a tracking device; the warrant may authorize use of the device to track the movement of a person or property located within the district, outside the district, or both.

CELL/OTD 006133
CELLSITE-20298

* * * * *

(d) Obtaining a Warrant.

(1) ***In General.*** After receiving an affidavit or other information, a magistrate judge — or if authorized by Rule 41(b), a judge of a state court of record — must issue the warrant if there is probable cause to search for and seize a person or property or to install and use a tracking device.

* * * * *

(3) ***Requesting a Warrant by Telephonic or Other Means.***

(A) *In General.* A magistrate judge may issue a warrant based on information communicated by telephone or other reliable electronic means.

CELLSITE-20299

(B) *Recording Testimony.* Upon learning that an applicant is requesting a warrant under Rule 41(d)(3)(A), a magistrate judge must:

(i) place under oath the applicant and any person on whose testimony the application is based; and

(ii) make a verbatim record of the conversation with a suitable recording device, if available, or by a court reporter, or in writing.

* * * * *

(e) Issuing the Warrant.

(1) ***In General.*** The magistrate judge or a judge of a state court of record must issue the warrant to an officer authorized to execute it.

(2) ***Contents of the Warrant.***

CELL/OTD 006135

CELLSITE-20300

(A) *Warrant to Search for and Seize a Person or Property.* Except for a tracking-device warrant, the warrant must identify the person or property to be searched, identify any person or property to be seized, and designate the magistrate judge to whom it must be returned. The warrant must command the officer to:

(i) execute the warrant within a specified time no longer than 10 days;

(ii) execute the warrant during the daytime, unless the judge for good cause expressly authorizes execution at another time; and

(iii) return the warrant to the magistrate judge designated in the warrant.

(B) *Warrant for a Tracking Device.* A tracking-

CELL/OTD 006136

CELLSITE-20301

device warrant must identify the person or property to be tracked, designate the magistrate judge to whom it must be returned, and specify a reasonable length of time that the device may be used. The time must not exceed 45 days from the date the warrant was issued. The court may, for good cause, grant one or more extensions for a reasonable period not to exceed 45 days each. The warrant must command the officer to:

(i) complete any installation authorized by the warrant within a specified time no longer than 10 calendar days;

(ii) perform any installation authorized by the warrant during the daytime, unless the judge for good cause expressly

authorizes installation at another time; and

(iii) return the warrant to the judge designated in the warrant.

(3) ***Warrant by Telephonic or Other Means.*** If a magistrate judge decides to proceed under Rule 41(d)(3)(A), the following additional procedures apply:

(A) *Preparing a Proposed Duplicate Original Warrant.* The applicant must prepare a "proposed duplicate original warrant" and must read or otherwise transmit the contents of that document verbatim to the magistrate judge.

(B) *Preparing an Original Warrant.* If the applicant reads the contents of the proposed duplicate original warrant, the magistrate

CELL/OTD 006138

CELLSITE-20303

judge must enter those contents into an original warrant. If the applicant transmits the contents by reliable electronic means, that transmission may serve as the original warrant.

(C) *Modification.* The magistrate judge may modify the original warrant. The judge must transmit any modified warrant to the applicant by reliable electronic means under Rule 41(e)(3)(D) or direct the applicant to modify the proposed duplicate original warrant accordingly.

(D) *Signing the Warrant.* Upon determining to issue the warrant, the magistrate judge must immediately sign the original warrant, enter on its face the exact date and time it is issued, and transmit it by reliable electronic

CELL/OTD 006139

CELLSITE-20304

means to the applicant or direct the applicant to sign the judge's name on the duplicate original warrant.

(f) Executing and Returning the Warrant.

(1) ***Warrant to Search for and Seize a Person or Property.***

(A) *Noting the Time.* The officer executing the warrant must enter on it the exact date and time it was executed.

(B) *Inventory.* An officer present during the execution of the warrant must prepare and verify an inventory of any property seized. The officer must do so in the presence of another officer and the person from whom, or from whose premises, the property was taken. If either one is not present, the officer must prepare and verify the

CELL/OTD 006140

CELLSITE-20305

inventory in the presence of at least one other credible person.

(C) *Receipt.* The officer executing the warrant must give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken or leave a copy of the warrant and receipt at the place where the officer took the property.

(D) *Return.* The officer executing the warrant must promptly return it — together with a copy of the inventory — to the magistrate judge designated on the warrant. The judge must, on request, give a copy of the inventory to the person from whom, or from whose premises, the property was taken and to the applicant for the warrant.

CELL/OTD 006141

CELLSITE-20306

(2) ***Warrant for a Tracking Device.***

(A) *Noting the Time.* The officer executing a tracking-device warrant must enter on it the exact date and time the device was installed and the period during which it was used.

(B) *Return.* Within 10 calendar days after the use of the tracking device has ended, the officer executing the warrant must return it to the judge designated in the warrant.

(C) *Service.* Within 10 calendar days after the use of the tracking device has ended, the officer executing a tracking-device warrant must serve a copy of the warrant on the person who was tracked or whose property was tracked. Service may be accomplished by delivering a copy to the person who, or whose property, was tracked; or by leaving a

CELL/OTD 006142

CELLSITE-20307

copy at the person's residence or usual place of abode with an individual of suitable age and discretion who resides at that location and by mailing a copy to the person's last known address. Upon request of the government, the judge may delay notice as provided in Rule 41(f)(3).

(3) ***Delayed Notice.*** Upon the government's request, a magistrate judge — or if authorized by Rule 41(b), a judge of a state court of record — may delay any notice required by this rule if the delay is authorized by statute.

* * * * *

Rule 58. Petty Offenses and Other Misdemeanors

* * * * *

(b) Pretrial Procedure.

* * * * *

CELL/OTD 006143
CELLSITE-20308

(2) ***Initial Appearance.*** At the defendant's initial appearance on a petty offense or other misdemeanor charge, the magistrate judge must inform the defendant of the following:

* * * * *

(G) any right to a preliminary hearing under Rule 5.1, and the general circumstances, if any, under which the defendant may secure pretrial release.

* * * * *

CELL/OTD 006144

To: **Hon. David F. Levi, Chair**
Standing Committee on Rules of Practice and Procedure

From: **Hon. Susan C. Bucklew, Chair**
Advisory Committee on Federal Rules of Criminal Procedure

Subject: **Report of the Advisory Committee on Criminal Rules**

Date: **May 17, 2005**

I. Introduction

The Advisory Committee on Federal Rules of Criminal Procedure met on April 4-5, 2005 in Charleston, South Carolina and took action on a number of proposed amendments to the Rules of Criminal Procedure.

* * * * *

II. Action Items – Overview

First, the Committee considered two public comments to the following rules:

- Rule 5, Initial Appearance, Proposed Amendment Regarding Use of Electronic Means to Transmit Warrant.
- Rule 32.1, Revoking or Modifying Probation or Supervised Release; Proposed Amendment Regarding Use of Electronic Means to Transmit Warrant.
- Rule 40, Arrest for Failing to Appear in Another District; Proposed Amendment to Provide for Authority to Set Conditions for Release.

CELL/OTD 006145

CELLSITE-20310

- Rule 41, Search and Seizure; Proposed Amendment Concerning Use of Electronic Means to Transmit Warrant.

- Rule 58, Petty Offenses and Misdemeanors; Proposed Amendment to Resolve Conflict with Rule 5 Concerning Right to Preliminary Hearing.

- Rule 41. Search and Seizure; Previously Approved Amendment Concerning Tracking Device Warrants.

As noted in the following discussion, the Advisory Committee proposes that amendments to Rule 6 be approved by the Committee and forwarded to the Judicial Conference without being published for comment.

Second, the Committee considered technical and conforming amendments to the following rule:

- Rule 6, The Grand Jury.

As noted in the following discussion, the Advisory Committee proposes that this amendment be forwarded to the Judicial Conference.

* * * * *

III. Action Items–Recommendations to Forward Amendments to the Judicial Conference

At its June 2004 meeting, the Standing Committee approved the publication of proposed amendments to Rules 5, 32.1, 40, 41, and 58. The comment period for the proposed amendments was closed on February 15, 2005. The Advisory Committee received two comments on the proposed amendments, and several suggestions from the Style Committee. The Committee made only minor changes as proposed by the Style Committee, and it recommends that all of the proposed amendments be forwarded to the Judicial Conference for approval and transmitted to the Supreme Court. The following discussion briefly summarizes the proposed amendments.

CELL/OTD 006146

CELLSITE-20311

1. ACTION ITEM–Rule 5, Initial Appearance, Proposed Amendment Regarding Use of Electronic Means to Transmit Warrant.

The amendment to Rule 5 is intended to permit the magistrate judge to accept a warrant by reliable electronic means. At present, the rule requires the government to produce the original warrant, a certified copy of the warrant, or a facsimile copy of either of those documents. The amendment reflects the availability of improved technology, which makes the use of electronic media as reliable and efficient as using a facsimile. The term "electronic" is used to provide some flexibility, allowing for further technological advances in transmitting data. If electronic means are used, the rule requires that the means be "reliable," and leaves the definition of that term to a court or magistrate judge at the local level. The Advisory Committee received two comments on the published amendment. Federal Public Defender Frank Dunham wrote that the rule should make clear that "non-certified electronic copies" are not reliable electronic means. The Federal Magistrate Judges Association expressed its support for the rule as drafted.

Following consideration of the comments, the Committee unanimously approved the amendment, as published.

Recommendation–The Advisory Committee recommends that the amendment to Rule 5 be approved and forwarded to the Judicial Conference.

2. ACTION ITEM–Rule 32.1, Revoking or Modifying Probation or Supervised Release; Proposed Amendment Regarding Use of Electronic Means to Transmit Warrant.

This amendment to Rule 32.1 permits the magistrate judge to accept a judgment, warrant, and warrant application by reliable electronic means. It parallels similar changes to Rule 5, reflecting the same enhancements in technology. As in Rule 5, what constitutes "reliable" electronic means is left to a court or magistrate judge to determine as a local matter. The Committee received only one comment on the published amendment, in which the Federal Magistrate Judges Association expressed its support for the change.

CELL/OTD 006147

CELLSITE-20312

Following consideration of the comment, the Committee unanimously approved the amendment, as published (with a minor change recommended by the Style Committee).

Recommendation–The Advisory Committee recommends that the amendment to Rule 32.1 be approved and forwarded to the Judicial Conference.

3. ACTION ITEM–Rule 40, Arrest for Failing to Appear in Another District; Proposed Amendment to Provide for Authority to Set Conditions for Release.

This amendment to Rule 40 is intended to fill a perceived gap in the rule related to persons who are arrested for violating the conditions of release in another district. It authorizes the magistrate judge in the district where the arrest takes place to set conditions of release. The amendment makes it clear that the judge has this authority not only in cases where the arrest takes place because of failure to appear in another district, but also for violation of any other condition of release. The Committee received only one comment on the published amendment, in which the Federal Magistrate Judges Association expressed its support for the change.

Following consideration of the comment, the Committee unanimously approved the amendment, as published (with a minor change recommended by the Style Committee).

Recommendation–The Advisory Committee recommends that the amendment to Rule 40 be approved and forwarded to the Judicial Conference.

4. ACTION ITEM–Rule 41, Search and Seizure; Proposed Amendment Concerning Use of Electronic Means to Transmit Warrant.

CELL/OTD 006148

CELLSITE-20313

This amendment to Rule 41 authorizes magistrate judges to use reliable electronic means to issue warrants. This parallels similar changes to Rules 5 and 32.1(a)(5)(B)(i), allowing the use of improved technology, and leaving what constitutes "reliable" electronic means to a court or magistrate judge to determine as a local matter. The Committee received only one comment on the published amendment, in which the Federal Magistrate Judges Association expressed its support for the change.

Following consideration of the comment, the Committee unanimously approved the amendment, as published.

Recommendation–The Advisory Committee recommends that the amendment to Rule 41 be approved and forwarded to the Judicial Conference.

5. ACTION ITEM–Rule 58, Petty Offenses and Misdemeanors; Proposed Amendment to Resolve Conflict with Rule 5 Concerning Right to Preliminary Hearing.

Rule 58(b)(2) governs the advice to be given to defendants at an initial appearance on a misdemeanor charge. The amendment eliminates a conflict with Rule 5.1(a) concerning a defendant's entitlement to a preliminary hearing. Instead of attempting to define in this rule when a misdemeanor defendant may be entitled to a Rule 5.1 preliminary hearing, the rule is amended to direct the reader to Rule 5.1. The Committee received only one comment on the published amendment, in which the Federal Magistrate Judges Association expressed its support for the change.

Following consideration of the comment, the Committee unanimously approved the amendment, as published.

Recommendation–The Advisory Committee recommends that the amendment to Rule 58 be approved and forwarded to the Judicial Conference.

CELL/OTD 006149
CELLSITE-20314

6. ACTION ITEM–Rule 41. Search and Seizure; Previously Approved Amendment Concerning Tracking Device Warrants.

An amendment to Rule 41 which would provide procedures for tracking device warrants was recommended, published for public comment, reviewed by the Advisory Committee, and approved by the Standing Committee at its June 2003 meeting for submission to the Judicial Conference. However, subsequent to that meeting the Department of Justice requested additional time to review the proposal. At the April 2005 meeting of the Advisory Committee, Ms. Rhodes stated that the Department had completed its review of the amendment and had no further recommendations for changes to it. In light of the clarification of the Department's position, there is no longer any need to defer submission to the Judicial Conference.

The rule and committee note as approved by the Standing Committee at its June 2003 meeting, including changes proposed by the Style Committee, are submitted again for consideration.

Recommendation–The Advisory Committee recommends that the amendment to Rule 41 be approved and forwarded to the Judicial Conference.

7. ACTION ITEM–Rule 6. The Grand Jury; Technical and Conforming Amendments.

This amendment makes technical changes to the language added to Rule 6 by the Intelligence Reform and Terrorism Prevention Act of 2004, Pub.L. 108-458, Title VI, § 6501(a), 118 Stat. 3760, in order to bring the new language into conformity with the conventions introduced in the general restyling of the Criminal Rules. No substantive change is intended.

The Advisory Committee unanimously approved the proposal as a technical and conforming amendment, for which no publication and comment period would be necessary.

CELL/OTD 006150

CELLSITE-20315

Recommendation–The Advisory Committee recommends that the technical and conforming amendment to Rule 6 be approved and forwarded to the Judicial Conference.

PROPOSED AMENDMENTS TO THE FEDERAL RULES OF CRIMINAL PROCEDURE*

Rule 5. Initial Appearance

* * * * *

(c) Place of Initial Appearance; Transfer to Another District.

* * * * *

(3) ***Procedures in a District Other Than Where the Offense Was Allegedly Committed.*** If the initial appearance occurs in a district other than where the offense was allegedly committed, the following procedures apply:

* * * * *

(C) the magistrate judge must conduct a preliminary hearing if required by Rule 5.1 ~~or Rule 58(b)(2)(G)~~;

*New material is underlined; matter to be omitted is lined through.

(D) the magistrate judge must transfer the defendant to the district where the offense was allegedly committed if:

(i) the government produces the warrant, a certified copy of the warrant, ~~a facsimile of either,~~ or ~~other appropriate~~ a reliable electronic form of either; and

* * * * *

COMMITTEE NOTE

Subdivisions (c)(3)(C) and (D). The amendment to Rule 5(c)(3)(C) parallels an amendment to Rule 58(b)(2)(G), which in turn has been amended to remove a conflict between that rule and Rule 5.1(a), concerning the right to a preliminary hearing.

Rule 5(c)(3)(D) has been amended to permit the magistrate judge to accept a warrant by reliable electronic means. Currently, the rule requires the government to produce the original warrant, a certified copy of the warrant, or a facsimile copy of either of those documents. This amendment parallels similar changes to Rules 32.1(a)(5)(B)(i) and 41. The reference to a facsimile version of the warrant was removed because the Committee believed that the broader term "electronic form" includes facsimiles.

CELLSITE-20318

The amendment reflects a number of significant improvements in technology. First, more courts are now equipped to receive filings by electronic means, and indeed, some courts encourage or require that certain documents be filed by electronic means. Second, the technology has advanced to the state where such filings could be sent from, and received at, locations outside the courthouse. Third, electronic media can now provide improved quality of transmission and security measures. In short, in a particular case, using electronic media to transmit a document might be just as reliable and efficient as using a facsimile.

The term "electronic" is used to provide some flexibility to the rule and make allowance for further technological advances in transmitting data.

The rule requires that if electronic means are to be used to transmit a warrant to the magistrate judge, that the means used be "reliable." While the rule does not further define that term, the Committee envisions that a court or magistrate judge would make that determination as a local matter. In deciding whether a particular electronic means, or media, would be reliable, the court might consider first, the expected quality and clarity of the transmission. For example, is it possible to read the contents of the warrant in its entirety, as though it were the original or a clean photocopy? Second, the court may consider whether security measures are available to insure that the transmission is not compromised. In this regard, most courts are now equipped to require that certain documents contain a digital signature, or some other similar system for restricting access. Third, the court may consider whether there are reliable means of preserving the document for later use.

CELL/OTD 006154

CELLSITE-20319

Changes Made After Publication and Comment

The Committee made no changes in the Rule and Committee Note as published. It considered and rejected the suggestion that the rule should refer specifically to non-certified photocopies, believing it preferable to allow the definition of reliability to be resolved at the local level. The Committee Note provides examples of the factors that would bear on reliability.

* * * * *

Rule 6. The Grand Jury

* * * * *

(e) Recording and Disclosing the Proceedings.

* * * * *

(3) ***Exceptions.***

* * * * *

(D) An attorney for the government may disclose any grand-jury matter involving foreign intelligence, counterintelligence (as defined in 50 U.S.C. § 401a), or foreign intelligence information (as defined in Rule

CELL/OTD 006155

CELLSITE-20320

6(e)(3)(D)(iii)) to any federal law enforcement, intelligence, protective, immigration, national defense, or national security official to assist the official receiving the information in the performance of that official's duties. An attorney for the government may also disclose any grand-jury matter involving, within the United States or elsewhere, a threat of attack or other grave hostile acts of a foreign power or its agent, a threat of domestic or international sabotage or terrorism, or clandestine intelligence gathering activities by an intelligence service or network of a foreign power or by its agent, to any appropriate federal ~~Federal~~, state~~State~~, state~~State~~ subdivision, Indian

CELL/OTD 006156

CELLSITE-20321

tribal, or foreign government official, for the purpose of preventing or responding to such threat or activities.

(i) Any official who receives information under Rule 6(e)(3)(D) may use the information only as necessary in the conduct of that person's official duties subject to any limitations on the unauthorized disclosure of such information. Any state~~State~~, state~~State~~ subdivision, Indian tribal, or foreign government official who receives information under Rule 6(e)(3)(D) may use the information ~~only consistent with such guidelines as the Attorney General and the Director of National Intelligence shall jointly~~

CELLSITE-20322

~~issue~~ only in a manner consistent with any guidelines issued by the Attorney General and the Director of National Intelligence.

* * * * *

(7) ***Contempt.*** A knowing violation of Rule 6, or of any guidelines jointly issued by the Attorney General and the Director of National Intelligence ~~pursuant to~~ under Rule 6, may be punished as a contempt of court.

* * * * *

COMMITTEE NOTE

Subdivision (e)(3) and (7). This amendment makes technical changes to the language added to Rule 6 by the Intelligence Reform and Terrorism Prevention Act of 2004, Pub.L. 108-458, Title VI, § 6501(a), 118 Stat. 3760, in order to bring the new language into conformity with the conventions introduced in the general restyling of the Criminal Rules. No substantive change is intended.

CELL/OTD 006158

CELLSITE-20323

Rule 32.1. Revoking or Modifying Probation or Supervised Release

(a) Initial Appearance.

* * * * *

(5) ***Appearance in a District Lacking Jurisdiction.*** If the person is arrested or appears in a district that does not have jurisdiction to conduct a revocation hearing, the magistrate judge must:

* * * * *

(B) if the alleged violation did not occur in the district of arrest, transfer the person to the district that has jurisdiction if:

(i) the government produces certified copies of the judgment, warrant, and warrant application, or produces copies of those certified documents by reliable electronic means; and

CELLSITE-20324

(ii) the judge finds that the person is the same person named in the warrant.

* * * * *

COMMITTEE NOTE

Subdivision (a)(5)(B)(i). Rule 32.1(a)(5)(B)(i) has been amended to permit the magistrate judge to accept a judgment, warrant, and warrant application by reliable electronic means. Currently, the rule requires the government to produce certified copies of those documents. This amendment parallels similar changes to Rules 5 and 41.

The amendment reflects a number of significant improvements in technology. First, receiving documents by facsimile has become very commonplace and many courts are now equipped to receive filings by electronic means, and indeed, some courts encourage or require that certain documents be filed by electronic means. Second, the technology has advanced to the state where such filings could be sent from, and received at, locations outside the courthouse. Third, electronic media can now provide improved quality of transmission and security measures. In short, in a particular case, using electronic media to transmit a document might be just as reliable and efficient as using a facsimile.

The term "electronic" is used to provide some flexibility to the rule and make allowance for further technological advances in transmitting data. The Committee envisions that the term "electronic" would include use of facsimile transmissions.

The rule requires that if electronic means are to be used to transmit a warrant to the magistrate judge, the means used be

CELL/OTD 006160

CELLSITE-20325

"reliable." While the rule does not further define that term, the Committee envisions that a court or magistrate judge would make that determination as a local matter. In deciding whether a particular electronic means, or media, would be reliable, the court might consider first, the expected quality and clarity of the transmission. For example, is it possible to read the contents of the warrant in its entirety, as though it were the original or a clean photocopy? Second, the court may wish to consider whether security measures are available to insure that the transmission is not compromised. In this regard, most courts are now equipped to require that certain documents contain a digital signature, or some other similar system for restricting access. Third, the court may consider whether there are reliable means of preserving the document for later use.

Changes Made After Publication and Comment

The Committee made minor clarifying changes in the published rule at the suggestion of the Style Committee.

* * * * *

Rule 40. Arrest for Failing to Appear in Another District or for Violating Conditions of Release Set in Another District

~~**(a) In General.** If a person is arrested under a warrant issued in another district for failing to appear — as required by the terms of that person's release under 18~~

CELL/OTD 006161

CELLSITE-20326

~~U.S.C. §§ 3141–3156 or by a subpoena — the person must be taken without unnecessary delay before a magistrate judge in the district of the arrest.~~

(a) **In General.** A person must be taken without unnecessary delay before a magistrate judge in the district of arrest if the person has been arrested under a warrant issued in another district for:

(i) failing to appear as required by the terms of that person's release under 18 U.S.C. §§ 3141-3156 or by a subpoena; or

(ii) violating conditions of release set in another district.

* * * * *

COMMITTEE NOTE

Subdivision (a). Rule 40 currently refers only to a person arrested for failing to appear in another district. The amendment is intended to fill a perceived gap in the rule that a magistrate judge in the district of arrest lacks authority to set release conditions for a person arrested only for violation of conditions of release. *See,*

CELLSITE-20327

e.g., *United States v. Zhu*, 215 F.R.D. 21, 26 (D. Mass. 2003). The Committee believes that it would be inconsistent for the magistrate judge to be empowered to release an arrestee who had failed to appear altogether, but not to release one who only violated conditions of release in a minor way. Rule 40(a) is amended to expressly cover not only failure to appear, but also violation of any other condition of release.

Changes Made After Publication and Comment

The Committee made minor clarifying changes in the published rule at the suggestion of the Style Committee.

* * * * *

Rule 41. Search and Seizure

(a) Scope and Definitions.

* * * * *

(2) ***Definitions.*** The following definitions apply under this rule:

* * * * *

(D) "Domestic terrorism" and "international terrorism" have the meanings set out in 18 U.S.C. § 2331.

CELL/OTD 006163

CELLSITE-20328

(E) "Tracking device" has the meaning set out in 18 U.S.C. § 3117(b).

(b) Authority to Issue a Warrant. At the request of a federal law enforcement officer or an attorney for the government:

(1) a magistrate judge with authority in the district — or if none is reasonably available, a judge of a state court of record in the district — has authority to issue a warrant to search for and seize a person or property located within the district;

(2) a magistrate judge with authority in the district has authority to issue a warrant for a person or property outside the district if the person or property is located within the district when the warrant is issued but might move or be moved

CELLSITE-20329

outside the district before the warrant is executed; ~~and~~

(3) a magistrate judge — in an investigation of domestic terrorism or international terrorism ~~(as defined in 18 U.S.C. § 2331) having~~ — with authority in any district in which activities related to the terrorism may have occurred~~, may~~ has authority to issue a warrant for a person or property within or outside that district~~.~~; and

(4) a magistrate judge with authority in the district has authority to issue a warrant to install within the district a tracking device; the warrant may authorize use of the device to track the movement of a person or property located within the district, outside the district, or both.

* * * * *

(d) Obtaining a Warrant.

(1) ~~*Probable Cause*~~ ***In General.*** After receiving an affidavit or other information, a magistrate judge — or if authorized by Rule 41(b), ~~or~~ a judge of a state court of record — must issue the warrant if there is probable cause to search for and seize a person or property or to install and use a tracking device ~~under Rule 41(c)~~.

* * * * *

(3) ***Requesting a Warrant by Telephonic or Other Means.***

(A) *In General.* A magistrate judge may issue a warrant based on information communicated by telephone or other reliable electronic means. ~~appropriate means, including facsimile transmission.~~

(B) *Recording Testimony.* Upon learning that an applicant is requesting a warrant under Rule 41(d)(3)(A), a magistrate judge must:

(i) place under oath the applicant and any person on whose testimony the application is based; and

(ii) make a verbatim record of the conversation with a suitable recording device, if available, or by a court reporter, or in writing.

* * * * *

(e) Issuing the Warrant.

(1) ***In General.*** The magistrate judge or a judge of a state court of record must issue the warrant to an officer authorized to execute it.

(2) ***Contents of the Warrant.***

CELLSITE-20332

(A) *Warrant to Search for and Seize a Person or Property.* Except for a tracking-device warrant, ~~T~~ the warrant must identify the person or property to be searched, identify any person or property to be seized, and designate the magistrate judge to whom it must be returned. The warrant must command the officer to:

~~(A)~~(i) execute the warrant within a specified time no longer than 10 days;

~~(B)~~(ii) execute the warrant during the daytime, unless the judge for good cause expressly authorizes execution at another time; and

~~(C)~~(iii) return the warrant to the magistrate judge designated in the warrant.

(B) *Warrant for a Tracking Device.* A tracking-device warrant must identify the person or

CELL/OTD 006168
CELLSITE-20333

property to be tracked, designate the magistrate judge to whom it must be returned, and specify a reasonable length of time that the device may be used. The time must not exceed 45 days from the date the warrant was issued. The court may, for good cause, grant one or more extensions for a reasonable period not to exceed 45 days each. The warrant must command the officer to:

(i) complete any installation authorized by the warrant within a specified time no longer than 10 calendar days;

(ii) perform any installation authorized by the warrant during the daytime, unless the judge for good cause expressly

CELLSITE-20334

authorizes installation at another time; and

(iii) return the warrant to the judge designated in the warrant.

(3) ***Warrant by Telephonic or Other Means.*** If a magistrate judge decides to proceed under Rule 41(d)(3)(A), the following additional procedures apply:

(A) *Preparing a Proposed Duplicate Original Warrant.* The applicant must prepare a "proposed duplicate original warrant" and must read or otherwise transmit the contents of that document verbatim to the magistrate judge.

(B) *Preparing an Original Warrant.* If the applicant reads the contents of the proposed duplicate original warrant, the ~~The~~

magistrate judge must enter ~~the~~ those contents ~~of the proposed duplicate original warrant~~ into an original warrant. If the applicant transmits the contents by reliable electronic means, that transmission may serve as the original warrant.

(C) *Modifications~~.~~*. The magistrate judge may modify the original warrant. The judge must transmit any modified warrant to the applicant by reliable electronic means under Rule 41(e)(3)(D) or direct the applicant to modify the proposed duplicate original warrant accordingly. ~~In that case, the judge must also modify the original warrant.~~

(D) *Signing the ~~Original Warrant and the Duplicate Original~~ Warrant.* Upon determining to issue the warrant, the

CELL/OTD 006171

CELLSITE-20336

magistrate judge must immediately sign the original warrant, enter on its face the exact date and time it is issued, and transmit it by reliable electronic means to the applicant or direct the applicant to sign the judge's name on the duplicate original warrant.

(f) Executing and Returning the Warrant.

(1) Warrant to Search for and Seize a Person or Property.

~~(1)~~(A) *Noting the Time.* The officer executing the warrant must enter on it ~~its face~~ the exact date and time it ~~is~~ was executed.

~~(2)~~(B) *Inventory.* An officer present during the execution of the warrant must prepare and verify an inventory of any property seized. The officer must do so in the presence of another officer and the person from whom, or

CELL/OTD 006172
CELLSITE-20337

from whose premises, the property was taken. If either one is not present, the officer must prepare and verify the inventory in the presence of at least one other credible person.

~~(3)~~(C) *Receipt.* The officer executing the warrant must: ~~(A)~~ give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken; or ~~(B)~~ leave a copy of the warrant and receipt at the place where the officer took the property.

~~(4)~~(D) *Return.* The officer executing the warrant must promptly return it — together with a copy of the inventory — to the magistrate judge designated on the warrant. The judge must, on request, give a copy of the inventory to the person from whom, or from whose

CELLSITE-20338

premises, the property was taken and to the applicant for the warrant.

(2) ***Warrant for a Tracking Device.***

(A) *Noting the Time.* The officer executing a tracking-device warrant must enter on it the exact date and time the device was installed and the period during which it was used.

(B) *Return.* Within 10 calendar days after the use of the tracking device has ended, the officer executing the warrant must return it to the judge designated in the warrant.

(C) *Service.* Within 10 calendar days after the use of the tracking device has ended, the officer executing a tracking-device warrant must serve a copy of the warrant on the person who was tracked or whose property was tracked. Service may be accomplished

CELLSITE-20339

by delivering a copy to the person who, or whose property, was tracked; or by leaving a copy at the person's residence or usual place of abode with an individual of suitable age and discretion who resides at that location and by mailing a copy to the person's last known address. Upon request of the government, the judge may delay notice as provided in Rule 41(f)(3).

(3) ***Delayed Notice.*** Upon the government's request, a magistrate judge — or if authorized by Rule 41(b), a judge of a state court of record — may delay any notice required by this rule if the delay is authorized by statute.

* * * * *

COMMITTEE NOTE

The amendments to Rule 41 address three issues: first, procedures for issuing tracking device warrants; second, a

CELL/OTD 006175

CELLSITE-20340

provision for delaying any notice required by the rule; and third, a provision permitting a magistrate judge to use reliable electronic means to issue warrants.

Subdivision (a). Amended Rule 41(a)(2) includes two new definitional provisions. The first, in Rule 41(a)(2)(D), addresses the definitions of "domestic terrorism" and "international terrorism," terms used in Rule 41(b)(2). The second, in Rule 41(a)(2)(E), addresses the definition of "tracking device."

Subdivision (b). Amended Rule 41(b)(4) is a new provision, designed to address the use of tracking devices. Such searches are recognized both by statute, *see* 18 U.S.C. § 3117(a) and by caselaw, *see, e.g., United States v. Karo*, 468 U.S. 705 (1984); *United States v. Knotts*, 460 U.S. 276 (1983). Warrants may be required to monitor tracking devices when they are used to monitor persons or property in areas where there is a reasonable expectation of privacy. *See, e.g., United States v. Karo, supra* (although no probable cause was required to install beeper, officers' monitoring of its location in defendant's home raised Fourth Amendment concerns). Nonetheless, there is no procedural guidance in current Rule 41 for those judicial officers who are asked to issue tracking device warrants. As with traditional search warrants for persons or property, tracking device warrants may implicate law enforcement interests in multiple districts.

The amendment provides that a magistrate judge may issue a warrant, if he or she has the authority to do so in the district, to install and use a tracking device, as that term is defined in 18 U.S.C. § 3117(b). The magistrate judge's authority under this rule includes the authority to permit entry into an area where there is a reasonable expectation of privacy, installation of the tracking device, and maintenance and removal of the device. The Committee did not intend by this amendment to expand or contract

CELL/OTD 006176

CELL/

CELLSITE-20341

the definition of what might constitute a tracking device. The amendment is based on the understanding that the device will assist officers only in tracking the movements of a person or property. The warrant may authorize officers to track the person or property within the district of issuance, or outside the district.

Because the authorized tracking may involve more than one district or state, the Committee believes that only federal judicial officers should be authorized to issue this type of warrant. Even where officers have no reason to believe initially that a person or property will move outside the district of issuance, issuing a warrant to authorize tracking both inside and outside the district avoids the necessity of obtaining multiple warrants if the property or person later crosses district or state lines.

The amendment reflects the view that if the officers intend to install or use the device in a constitutionally protected area, they must obtain judicial approval to do so. If, on the other hand, the officers intend to install and use the device without implicating any Fourth Amendment rights, there is no need to obtain the warrant. *See, e.g., United States v. Knotts, supra*, where the officers' actions in installing and following tracking device did not amount to a search under the Fourth Amendment.

Subdivision (d). Amended Rule 41(d) includes new language on tracking devices. The tracking device statute, 18 U.S.C. § 3117, does not specify the standard an applicant must meet to install a tracking device. The Supreme Court has acknowledged that the standard for installation of a tracking device is unresolved, and has reserved ruling on the issue until it is squarely presented by the facts of a case. *See United States v. Karo*, 468 U.S. 705, 718 n. 5 (1984). The amendment to Rule 41 does not resolve this issue or hold that such warrants may issue only on a showing of probable cause. Instead, it simply provides

CELL/OTD 006177

CELLSITE-20342

that if probable cause is shown, the magistrate judge must issue the warrant. And the warrant is only needed if the device is installed (for example, in the trunk of the defendant's car) or monitored (for example, while the car is in the defendant's garage) in an area in which the person being monitored has a reasonable expectation of privacy.

Subdivision (e). Rule 41(e) has been amended to permit magistrate judges to use reliable electronic means to issue warrants. Currently, the rule makes no provision for using such media. The amendment parallels similar changes to Rules 5 and 32.1(a)(5)(B)(i).

The amendment recognizes the significant improvements in technology. First, more counsel, courts, and magistrate judges now routinely use facsimile transmissions of documents. And many courts and magistrate judges are now equipped to receive filings by electronic means. Indeed, some courts encourage or require that certain documents be filed by electronic means. Second, the technology has advanced to the state where such filings may be sent from, and received at, locations outside the courthouse. Third, electronic media can now provide improved quality of transmission and security measures. In short, in a particular case, using facsimiles and electronic media to transmit a warrant can be both reliable and efficient use of judicial resources.

The term "electronic" is used to provide some flexibility to the rule and make allowance for further technological advances in transmitting data. Although facsimile transmissions are not specifically identified, the Committee envisions that facsimile transmissions would fall within the meaning of "electronic means."

While the rule does not impose any special requirements on use of facsimile transmissions, neither does it presume that those

CELL/OTD 006178

CELLSITE-20343

transmissions are reliable. The rule treats all electronic transmissions in a similar fashion. Whatever the mode, the means used must be "reliable." While the rule does not further define that term, the Committee envisions that a court or magistrate judge would make that determination as a local matter. In deciding whether a particular electronic means, or media, would be reliable, the court might consider first, the expected quality and clarity of the transmission. For example, is it possible to read the contents of the warrant in its entirety, as though it were the original or a clean photocopy? Second, the court may consider whether security measures are available to insure that the transmission is not compromised. In this regard, most courts are now equipped to require that certain documents contain a digital signature, or some other similar system for restricting access. Third, the court may consider whether there are reliable means of preserving the document for later use.

Amended Rule 41(e)(2)(B) is a new provision intended to address the contents of tracking device warrants. To avoid open-ended monitoring of tracking devices, the revised rule requires the magistrate judge to specify in the warrant the length of time for using the device. Although the initial time stated in the warrant may not exceed 45 days, extensions of time may be granted for good cause. The rule further specifies that any installation of a tracking device authorized by the warrant must be made within ten calendar days and, unless otherwise provided, that any installation occur during daylight hours.

Subdivision (f). Current Rule 41(f) has been completely revised to accommodate new provisions dealing with tracking device warrants. First, current Rule 41(f)(1) has been revised to address execution and delivery of warrants to search for and seize a person or property; no substantive change has been made to that provision. New Rule 41(f)(2) addresses execution and delivery of

CELL/OTD 006179

CELLSITE-20344

tracking device warrants. That provision generally tracks the structure of revised Rule 41(f)(1), with appropriate adjustments for the particular requirements of tracking device warrants. Under Rule 41(f)(2)(A) the officer must note on the warrant the time the device was installed and the period during which the device was used. And under new Rule 41(f)(2)(B), the officer must return the tracking device warrant to the magistrate judge designated in the warrant, within 10 calendar days after use of the device has ended.

Amended Rule 41(f)(2)(C) addresses the particular problems of serving a copy of a tracking device warrant on the person who has been tracked, or whose property has been tracked. In the case of other warrants, current Rule 41 envisions that the subjects of the search typically know that they have been searched, usually within a short period of time after the search has taken place. Tracking device warrants, on the other hand, are by their nature covert intrusions and can be successfully used only when the person being investigated is unaware that a tracking device is being used. The amendment requires that the officer must serve a copy of the tracking device warrant on the person within 10 calendar days after the tracking has ended. That service may be accomplished by either personally serving the person, or both by leaving a copy at the person's residence or usual abode and by sending a copy by mail. The Rule also provides, however, that the officer may (for good cause) obtain the court's permission to delay further service of the warrant. That might be appropriate, for example, where the owner of the tracked property is undetermined, or where the officer establishes that the investigation is ongoing and that disclosure of the warrant will compromise that investigation.

Use of a tracking device is to be distinguished from other continuous monitoring or observations that are governed by statutory provisions or caselaw. *See* Title III, Omnibus Crime

CELL/OTD 006180

CELLSITE-20345

Control and Safe Streets Act of 1968, *as amended* by Title I of the 1986 Electronic Communications Privacy Act, 18 U.S.C. §§ 2510-2520; *United States v. Biasucci*, 786 F.2d 504 (2d Cir. 1986) (video camera); *United States v. Torres*, 751 F.2d 875 (7th Cir. 1984) (television surveillance).

Finally, amended Rule 41(f)(3) is a new provision that permits the government to request, and the magistrate judge to grant, a delay in any notice required in Rule 41. The amendment is co-extensive with 18 U.S.C. § 3103a(b). That new provision, added as part of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001, authorizes a court to delay any notice required in conjunction with the issuance of any search warrants.

Changes Made After Publication and Comment

The Committee agreed with the NADCL proposal that the words "has authority" should be inserted in Rule 41(c)(3), and (4) to parallel similar language in Rule 41(c)(1) and (2). The Committee also considered, but rejected, a proposal from NADCL to completely redraft Rule 41(d), regarding the finding of probable cause. The Committee also made minor clarifying changes in the Committee Note.

CELLSITE-20346

Rule 58. Petty Offenses and Other Misdemeanors

* * * * *

(b) Pretrial Procedure.

* * * * *

(2) ***Initial Appearance.*** At the defendant's initial appearance on a petty offense or other misdemeanor charge, the magistrate judge must inform the defendant of the following:

* * * * *

(G) ~~if the defendant is held in custody and charged with a misdemeanor other than a petty offense, the~~ any right to a preliminary hearing under Rule 5.1, and the general circumstances, if any, under which the defendant may secure pretrial release.

* * * * *

CELL/OTD 006182

CELLSITE-20347

COMMITTEE NOTE

Subdivision (b)(2)(G). Rule 58(b)(2)(G) sets out the advice to be given to defendants at an initial appearance on a misdemeanor charge, other than a petty offense. As currently written, the rule is restricted to those cases where the defendant is held in custody, thus creating a conflict and some confusion when compared to Rule 5.1(a) concerning the right to a preliminary hearing. Paragraph (G) is incomplete in its description of the circumstances requiring a preliminary hearing. In contrast, Rule 5.1(a) is a correct statement of the law concerning the defendant's entitlement to a preliminary hearing and is consistent with 18 U.S.C. § 3060 in this regard. Rather than attempting to define, or restate, in Rule 58 when a defendant may be entitled to a Rule 5.1 preliminary hearing, the rule is amended to direct the reader to Rule 5.1.

Changes Made After Publication and Comment

The Committee no changes to the Rule or Committee note after publication.

Ladies and Gentlemen,

Attached are the amendments to the Federal Rules of Criminal Procedure as approved by the Judicial Conference (see www.uscourts.gov website) along with an excerpt of the "Report of the Advisory Committee on Criminal Rules," and, for your edification, a document and chart that describes the rulemaking process.

As always, please forward to appropriate personnel.

AMENDMENTS TO THE FEDERAL RULES OF CRIMINAL PROCEDURE

Rule 11. Pleas

* * * * *

(b) Considering and Accepting a Guilty or Nolo Contendere Plea.

(1) ***Advising and Questioning the Defendant.*** Before the court accepts a plea of guilty or nolo contendere, the defendant may be placed under oath, and the court must address the defendant personally in open court. During this address, the court must inform the defendant of, and determine that the defendant understands, the following:

* * * * *

(M) in determining a sentence, the court's obligation to calculate the applicable

sentencing-guideline range and to consider that range, possible departures under the Sentencing Guidelines, and other sentencing factors under 18 U.S.C. § 3553(a); and

* * * * *

Rule 32. Sentence and Judgment

* * * * *

(d) Presentence Report.

(1) ***Applying the Advisory Sentencing Guidelines.*** The presentence report must:

(A) identify all applicable guidelines and policy statements of the Sentencing Commission;

(B) calculate the defendant's offense level and criminal history category;

(C) state the resulting sentencing range and kinds of sentences available;

(D) identify any factor relevant to:

CELL/OTD 006187

CELLSITE-20352

(i) the appropriate kind of sentence, or

(ii) the appropriate sentence within the applicable sentencing range; and

(E) identify any basis for departing from the applicable sentencing range.

(2) ***Additional Information.*** The presentence report must also contain the following information:

(A) the defendant's history and characteristics, including:

(i) any prior criminal record;

(ii) the defendant's financial condition; and

(iii) any circumstances affecting the defendant's behavior that may be helpful in imposing sentence or in correctional treatment;

CELL/OTD 006188

CELLSITE-20353

(B) verified information, stated in a nonargumentative style, that assesses the financial, social, psychological, and medical impact on any individual against whom the offense has been committed;

(C) when appropriate, the nature and extent of nonprison programs and resources available to the defendant;

(D) when the law provides for restitution, information sufficient for a restitution order;

(E) if the court orders a study under 18 U.S.C. § 3552(b), any resulting report and recommendation; and

(F) any other information that the court requires, including information relevant to the factors under 18 U.S.C. § 3553(a).

* * * * *

CELL/OTD 006189

CELLSITE-20354

Rule 35. Correcting or Reducing a Sentence

* * * * *

(b) Reducing a Sentence for Substantial Assistance.

(1) ***In General.*** Upon the government's motion made within one year of sentencing, the court may reduce a sentence if the defendant, after sentencing, provided substantial assistance in investigating or prosecuting another person.

* * * * *

Rule 45. Computing and Extending Time

* * * * *

(c) Additional Time After Certain Kinds of Service. Whenever a party must or may act within a specified period after service and service is made in the manner provided under Federal Rule of Civil

CELL/OTD 006190

CELLSITE-20355

Procedure 5(b)(2)(B), (C), or (D), 3 days are added after the period would otherwise expire under subdivision (a).

Rule 49.1. Privacy Protection For Filings Made with the Court

(a) Redacted Filings. Unless the court orders otherwise, in an electronic or paper filing with the court that contains an individual's social-security number, taxpayer-identification number, or birth date, the name of an individual known to be a minor, a financial-account number, or the home address of an individual, a party or nonparty making the filing may include only:

(1) the last four digits of the social-security number and taxpayer-identification number;

(2) the year of the individual's birth;

(3) the minor's initials;

CELL/OTD 006191

CELLSITE-20356

(4) the last four digits of the financial-account number; and

(5) the city and state of the home address.

(b) Exemptions from the Redaction Requirement. The redaction requirement does not apply to the following:

(1) a financial-account number or real property address that identifies the property allegedly subject to forfeiture in a forfeiture proceeding;

(2) the record of an administrative or agency proceeding;

(3) the official record of a state-court proceeding;

(4) the record of a court or tribunal, if that record was not subject to the redaction requirement when originally filed;

(5) a filing covered by Rule 49.1(d);

CELL/OTD 006192

CELLSITE-20357

(6) a pro se filing in an action brought under 28 U.S.C. §§ 2241, 2254, or 2255;

(7) a court filing that is related to a criminal matter or investigation and that is prepared before the filing of a criminal charge or is not filed as part of any docketed criminal case;

(8) an arrest or search warrant; and

(9) a charging document and an affidavit filed in support of any charging document.

(c) Immigration Cases. A filing in an action brought under 28 U.S.C. § 2241 that relates to the petitioner's immigration rights is governed by Federal Rule of Civil Procedure 5.2.

(d) Filings Made Under Seal. The court may order that a filing be made under seal without redaction. The court may later unseal the filing or order the

CELL/OTD 006193

CELLSITE-20358

person who made the filing to file a redacted version for the public record.

(e) Protective Orders. For good cause, the court may by order in a case:

(1) require redaction of additional information; or

(2) limit or prohibit a nonparty's remote electronic access to a document filed with the court.

(f) Option for Additional Unredacted Filing Under Seal. A person making a redacted filing may also file an unredacted copy under seal. The court must retain the unredacted copy as part of the record.

(g) Option for Filing a Reference List. A filing that contains redacted information may be filed together with a reference list that identifies each item of redacted information and specifies an appropriate identifier that uniquely corresponds to each item listed. The list must be filed under seal and may be

CELL/OTD 006194

CELLSITE-20359

amended as of right. Any reference in the case to a listed identifier will be construed to refer to the corresponding item of information.

(h) Waiver of Protection of Identifiers. A person waives the protection of Rule 49.1(a) as to the person's own information by filing it without redaction and not under seal.

[Model Form for Use in 28 U.S.C. § 2254 Cases Involving a Rule 9 Issue under Section 2254 of Title 28, United States Code]

(Abrogated.)

Advisory Committee on Federal Rules of Criminal Procedure

Subject: **Report of the Advisory Committee on Criminal Rules**

Date: **May 20, 2005 (revised July 20, 2006)**

I. Introduction

The Advisory Committee on Federal Rules of Criminal Procedure ("the Committee") met on April 3-4, 2006 in Washington, D.C. and took action on a number of proposed amendments to the Rules of Criminal Procedure. The Draft Minutes of that meeting are attached.

This report addresses a number of action items: approval of published Rules 11, 32, 35, 45, and 49.1. for transmission to the Judicial Conference; approval of proposed amendments to Rules 29 and 41 for publication and comment; and approval of the time computation template for eventual publication. In addition, the Committee has several information items to bring to the attention of the Standing Committee, most notably continued discussion of a draft amendment to Rule 16.

II. Action Items–Recommendations to Forward Amendments to the Judicial Conference

1. ACTION ITEM–Rule 11. Pleas; Proposed Amendment Regarding Advice to Defendant Under Advisory Sentencing Guidelines.

This amendment is part of a package of proposals required to bring the rules into conformity with the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005). *Booker* held that the provisions of the federal sentencing statute that make the Guidelines mandatory violate the Sixth Amendment right to jury trial. With these provisions excised, the Sentencing Reform Act "makes the Guidelines effectively advisory," and "requires a sentencing court to consider Guidelines ranges, see 18 U.S.C.A. § 3553(a)(4) (Supp.2004), but it permits the court to tailor the sentence in light of other statutory concerns as well, see § 3553(a) (Supp.2004)." 543 U.S. at 222. Rule

CELL/OTD 006196

CELLSITE-20361

11(b)(M) incorporates this analysis into the information provided to the defendant at the time of a plea of guilty or nolo contendere.

There were many public comments received on this and the other *Booker* amendments. The Sentencing Commission stated that the amendment tracked the approach the Commission believes to be implicit in *Booker*, but it suggested that the word "calculate" be replaced with "determine and calculate." Other comments suggested that the amendment gave the Guidelines greater prominence than warranted under *Booker*, insufficiently emphasizing the remaining sentencing factors set forth in 18 U.S.C. § 3553(a). There was extensive discussion of the public comments and an additional concern, raised at the meeting, that the amendment might be read as requiring a complete guideline calculation in every case. That would be inconsistent with cases such as *United States v. Crosby*, 397 F.3d 103 (2nd Cir. 2005). *Crosby* recognized that the district courts would "normally" have to determine the applicable guideline range. *Id.* at 111. However, in some cases the court may conclude that it is unnecessary to resolve a particular guideline issue because statutory factors under 3553(a) require a variance that moots the guideline issue. *Id.* at 112. Consideration was given to adding a reference to *Crosby* in the note, but this effort was ultimately abandoned because of the difficulty crafting a statement that would be consistent with the varying approaches in the circuits.

The Committee agreed that the function of the rule is to advise a defendant who is pleading guilty of the manner in which the court will determine the defendant's sentence. The published language captures the approach taken by most courts after *Booker*. Here, and in the other *Booker* amendments, the Committee agreed to delete from the Committee Note a reference to the Fifth Amendment requirement of proof beyond a reasonable doubt from the description of *Booker*.

Recommendation–The Advisory Committee recommends that the proposed amendment to Rule 11 be approved as published and forwarded to the Judicial Conference.

2. ACTION ITEM–Rule 32, Sentencing and Judgment; Proposed Amendment Regarding Notice to Defendant Under Advisory Sentencing Guidelines.

These amendments adapt two subdivisions of the Rule 32 to *United States v. Booker*, 543 U.S. 220 (2005), which directs courts to consider not only information relevant to the Sentencing Guidelines, but also information relevant to the statutory factors listed in 18 U.S.C. § 3553(a). The Committee is proposing amendments only to subdivisions (d) and (h), which govern presentence reports and notice of possible departures. As noted below, the Committee has withdrawn the proposed amendment to subdivision (k) because of legislative activity that occurred after the approval of the amendments for publication and comment.

Subdivision (d) Subdivision (d) of the rule establishes the requirements for presentence reports. It already requires that the report include the applicable Guidelines and information relevant to the guideline calculations. The amendment adds the requirement that the report include

CELL/OTD 006197

CELLSITE-20362

information relevant to the statutory criteria under § 3553(a). However, in light of the difficulty that the probation office may have in determining the scope of the information that would be relevant to the broad statutory criteria under § 3553(a), the proposed amendment requires that information relevant to the statutory criteria be included only when required by the court.

The Committee received critical comments from the Federal Public Defenders and the National Association of Criminal Defense Lawyers who saw the published amendment as improperly giving primacy to the Guidelines in the sentencing process. They also urged that the rule address individually each of the sentencing factors under 3553(a) and that the rule be revised to require the probation office to collect all information relevant to each of the statutory factors. Additionally, they suggested that the title of the heading should be amended to refer to the "advisory" character of the Guidelines.

The Committee agreed that the heading should be revised to refer to the Guidelines as "advisory," and with that change it approved the amendment as published. The Committee felt the published language accurately reflects the approach most courts are taking after *Booker*, and it avoids placing an open-ended and unmanageable obligation on the probation office.

In the Committee Note accompanying the amendment to this subdivision and subdivision (h), the Committee also deleted the Fifth Amendment from the description of the *Booker* decision.

Subdivision (h). The Standing Committee approved publication of an amendment to Rule 32(h) to conform to the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005). The purpose of Rule 32(h) is to avoid unfair surprise to the parties in the sentencing process. Currently, it requires notice that the court is considering departing from the Guidelines on the basis of factors not identified in the presentence report or pleadings. The proposed amendment stated that the court must provide this notice when it is considering either a departure or a non-guideline sentence based upon the factors in 18 U.S.C. § 3553(a) on the basis of a ground not identified in the presentence report or prehearing submissions.

The public comments to the published draft revealed several ambiguities in the language. The language was interpreted by some as overly broad (requiring notice whenever the court intends to rely on a non-guideline factor) and by others as too narrow (requiring no notice when a factor has been identified for one purpose, but the parties are unaware that the court is considering it for a wholly different purpose). Given the potential for misinterpretation, the Committee agreed that a modification of the published language was needed, and it unanimously accepted the alternative language proposed by the Sentencing Commission.

After discussion at the Standing Committee of recent decisions taking various approaches to the question whether notice must be given, the proposed amendment to subdivision (h) was withdrawn to permit further study.

CELL/OTD 006198

CELLSITE-20363

Subdivision (k). The Standing Committee also approved the publication of a proposed amendment to subdivision (k) intended to standardize the collection of data regarding post-*Booker* sentencing by requiring all courts to enter their judgments, including the statement of reasons, on forms prescribed by the Judicial Conference. This provision, which provoked considerable controversy, was withdrawn by the Committee in light of the enactment of § 735 of the USA Patriot Improvement and Reauthorization Act, which amended 28 U.S.C. § 994(w). The amended statute requires the chief judge of each district to provide the Sentencing Commission with an explanation of each sentence including "the written statement of reasons form issued by the Judicial Conference and approved by the United States Sentencing Commission." The Criminal Law Committee withdrew its request for an amendment to Criminal Rules, and the Advisory Committee concluded that an amendment to subdivision (k) was no longer necessary.

Recommendation–The Advisory Committee recommends that the proposed amendment to Rule 32(d) be approved as published and forwarded to the Judicial Conference.

3. ACTION ITEM–Rule 35, Correcting or Reducing Sentence; Proposed Amendment Regarding Elimination of Reference to Mandatory Sentencing Guidelines.

This amendment conforms Rule 35(b)(1)(B) to the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005), holding that the Guidelines are advisory, rather than mandatory. The rule currently states that the court may reduce a sentence if "reducing the sentence accords with the Sentencing Commission's guidelines and policy statements." Although the Guidelines do not currently include provisions governing the correction of sentences under Rule 35, the amendment removes the rule's language that seems, on its face, to be inconsistent with the decision in *Booker*.

Both the Sentencing Commission and the National Association of Criminal Defense Lawyers (NACDL) suggested changes in either the amendment or the note. After discussion, the Committee decided not to alter the amendment. In essence, the proposed changes introduced additional issues that were not part of the amendment as published. NACDL suggested that given the advisory character of the Guidelines, it is no longer appropriate for the rule to require that the motion be made by the government, since powerful evidence of cooperation should be considered under 18 U.S.C. § 3553(a) even in the absence of such a motion. The language of the rule, however, was enacted by Congress. Even if the Committee had the authority to delete this requirement under the Rules Enabling Act, it could not do so without publishing such an amendment for public comment. The Sentencing Commission raised the question whether the *Booker* remedial opinion is applicable to the post-sentencing context. It suggested that the Committee Note be amended to address this issue. The Committee unanimously declined to introduce the new language to the Note, or otherwise to alter the rule as published for public comment. (The only exception was the agreement to eliminate the reference to the Fifth Amendment in the description of the *Booker* decision in this Note, as well as the notes accompanying the other *Booker* amendments.)

CELL/OTD 006199

CELLSITE-20364

Recommendation–The Advisory Committee recommends that the proposed amendment to Rule 35 be approved as published and forwarded to the Judicial Conference.

4. ACTION ITEM–Rule 45, Computing and Extending Time; Proposed Amendment Regarding Computation of Additional Time for Service.

This amendment has its origins in an amendment to Civil Rule 6 that clarifies the computation of the additional time provided when service is made by mail, leaving with the clerk of court, or electronic means under Civil Rule 5(b)(2)(B), (C), or (D). The amendment of the Civil Rule became effective on December 1, 2005. The proposed amendment to Rule 45 tracks the language of the civil rule.

The Committee received only one comment on the proposed amendment, which consisted of a statement of strong approval for the change. Without objection the Committee approved the amendment of Rule 45.

Recommendation–The Advisory Committee recommends that the proposed amendment to Rule 45 be approved as published and forwarded to the Judicial Conference.

5. ACTION ITEM–Rule 49.1, Privacy Protections for Filings Made with the Court; Proposed Rule to Implement E-Government Act.

This new rule, which is based upon the common template developed by Professor Daniel Capra, implements the E-Government Act. It differs from the common provisions in several respects, including the partial redaction of an individual's home addresses (which reflects the special concerns of witnesses and victims in criminal cases) and an exemption from redaction for certain information needed for forfeitures. Rule 49.1 also deletes the template provisions relating to social security and immigration cases, which are exclusively civil. The proposed rule includes provisions regarding actions under 28 U.S.C. §§ 2254, 2255, and 2241. Although these actions are also technically civil, the Advisory Committee concluded it was appropriate to refer to them in Rule 49.1 because they are governed by procedural rules recently restyled by the Criminal Rules Committee.

The e-government rules, including Rule 49.1, generated extensive public comment. A subcommittee reviewed the public comments and considered the advice of Professor Capra and the reporters for the other committees prior to the Committee's April meeting.

Many of the public comments dealt with considerations common to all of the e-government rules, and the Committee sought to incorporate the common changes recommended by Professor Capra after consultation with all of the reporters. These included (1) using of the term "individual" rather than "person" throughout the rule, (2) clarifying that the responsibility for redaction lies with the person making the filing, (3) rewording the exemption from redaction for information necessary

CELL/OTD 006200

CELLSITE-20365

to identify property subject to forfeiture, so that it is clearly applicable in ancillary proceedings related to forfeiture, and (4) rewording the exemption from redaction for judicial decisions that were not subject to redaction when originally filed.

The Committee also discussed the provisions for filing under seal and protective orders. The provisions, which were common to all of the e-government rules, were the topic of considerable commentary from the public and members of the Committee. The Committee ultimately endorsed a change in the provision on protective orders, and we understand that language may be adopted by the other advisory committees. The discussion focused on the difference between the standards for sealing and those for protective orders, which were not parallel in the amendment as published for comment. Protective orders were authorized only "[i]f necessary to protect private or sensitive information," while no similar restriction is placed on sealing. The Committee was satisfied with the explanation that the standard for sealing is well established, and there should be no effort to restate that standard in Rule 49.1. The Committee concluded, however, that the provision for protective orders should be modified to incorporate the more flexible standard for the issuance of protective orders set forth in Civil Rule 26(c), which employs the phrase "[f]or good cause shown." The Committee amended subdivision (d) to incorporate this language, and Professor Capra said that he would bring this change to the attention of the other advisory committees. After the Committee meeting all of the reporters agreed to recommend language based on this change to Rule 49.1, but to shorten the phrase to "cause shown." This phrasing is used elsewhere in the Criminal Rules, so we have conformed Rule 49.1 as well to "cause shown." (Note that this provision is now found in (e) due to the renumbering following the addition of a new subdivision (c) regarding immigration cases; the new subdivision is discussed below.)

Other issues addressed in the public comments and Committee discussion were specific to Rule 49.1 or bear most heavily on that rule.

Several issues related to information identifying individuals, particularly date of birth and social security number. After consultation with CACM staff and Professor Capra, the Committee was persuaded that the current rule reflects a careful balancing of interests, and it declined to make any changes. It thus rejected the request of background screeners, who urged that the public record in criminal cases should include full identifying information, such as date of birth, in order to aid private criminal records searches. It also rejected a suggestion from within the Committee that even the disclosure of the last four digits of an individual's social security number might create a danger of breaches of privacy or identity theft. The Committee was informed that CACM had considered the privacy and security issues relating to social security numbers, and had based the rule permitting disclosure of the last four digits on the practice of the Social Security Administration.

Several issues concerned actions under 18 U.S.C. §§ 2254, 2255, and 2241, which as noted above are covered by both Civil Rule 5.2 and Criminal Rule 49.1.

CACM and the National Association of Criminal Defense Lawyers (NACDL) expressed concern that a categorical exemption from redaction for filings in proceedings under 18 U.S.C.

CELL/OTD 006201

CELLSITE-20366

§§ 2254, 2255, and 2241, was unnecessarily broad. The Committee's rationale for exempting these actions was its conclusion that, as a practical matter, the pro se plaintiffs who file such actions will not generally be aware of the redaction requirements. To meet the overbreadth objection, the Committee decided to restrict the exemption to filings by pro se plaintiffs in these actions. The Committee declined, however, to eliminate the exemption entirely. It rejected the suggestion that it would be sufficient merely to relax the application of the redaction requirements in the case of pro se filings. If the rule as a technical matter requires redaction in the case of pro se filings, there could be adverse legal consequences for pro se plaintiffs who failed to redact sensitive information. If a pro se filing under §§ 2254, 2255, and 2241 contains unredacted information that raises security concerns, the court can issue a protective order.

Subsequent to the Advisory Committee meeting, Professor Cooper raised an additional issue regarding actions under 18 U.S.C. § 2241 raising immigration claims. Without going into great detail, the issue that emerged concerned efforts under Rule 5.2 to mesh the special considerations attendant to immigration cases (including limited remote access) with the considerations applicable to actions under §§ 2254, 2255, and 2241. All of the reporters agreed that it was important to apply the same standards to all 2241 cases involving immigration rights. Rather than import additional provisions into Rule 49.1 to deal with such cases, the reporters agreed that it would be preferable to deal with 2241 cases involving immigration rights exclusively under Rule 5.2. Accordingly, subdivision (c) was added to provide that such cases are governed exclusively by Rule 5.2. Since this change was needed to prevent a potential conflict with some or all of the provisions in Rule 5.2 governing immigration claims, it seemed to fall well within the authority that the Committee agreed to give to Judge Bucklew and the reporter.

CACM objected to the categorical exemption from redaction in Rule 49.1(b)(8), (9), and (10), for charging documents, affidavits in support of charging documents, arrest or search warrants, and filings prepared before the filing of a criminal charge that is not part of a docketed case. In CACM's view, redaction of specific private or sensitive information should be sufficient. The Committee reviewed the reasons for its original decision to exempt these filings, particularly the importance of particularity and identification in documents such as arrest or search warrants. Also, the public has a right to know with some specificity who has been charged with a criminal offense or where a search was executed. After discussion, the Committee agreed without objection to retain the exemptions as published.

CACM also expressed strong concern that Rule 49.1 as published did not protect the confidentiality of a grand jury foreperson's name, because it exempts charging documents from the redaction requirement. Disclosure of a grand juror's name, CACM noted, was inconsistent with its policy of protecting the privacy of jurors. Although the published draft includes the CACM policy in the Committee Note, the policy would require sealing on a case by case basis, which CACM deemed insufficient. In discussing this issue, the Committee noted that the petit jury verdict forms present a similar issue, since they are also signed by the foreperson.

CELL/OTD 006202

CELLSITE-20367

The Committee considered an amendment to the published rule that would have redacted the foreperson's name and substituted that person's initials. After extended discussion of the problems posed by requiring redaction, the Committee concluded that the rule should be recommended to the Judicial Conference as published, though the concerns raised by CACM may warrant further study. Several considerations weighed against requiring redaction at this time. Some of the concerns were practical in nature, given the importance of having an original signed version of the documents initiating a criminal prosecution and recording the verdict in the public record. Although it might be possible to have two versions of these documents, one signed and filed under seal and the other merely initialed and filed in the public record, it was unclear exactly how that would work. Moreover, that procedure had not been the subject of notice and public comment. Committee members also expressed concern about an anonymous system of justice. Under Rule 10(a)(1) the court must ensure that the defendant has a copy of the signed grand jury indictment at the time of arraignment. Rule 6(f) provides for the return of a grand jury indictment in open court, and there was support for the view that absent specific findings the public should be entitled to see any document filed in open court. Given the complexity of the issue, the Committee thought that it would be desirable to have a study to determine whether public disclosure of foreperson signatures has caused significant problems before proposing a new rule requiring redaction of every grand jury indictment and every petit jury verdict form.

Finally, the Committee clarified the relationship between the CACM policy statement, which was included in the Committee Note as published, and the rule itself. At Professor Capra's suggestion, the Committee Note was revised to state more clearly that when the rule itself does not exempt the materials listed in the CACM policy statement from disclosure, privacy and law enforcement concerns are to be accommodated through the sealing and protective order provisions of the rule.

Professor Capra also asked the Committee to give the chair and reporter the authority to work with their counterparts on the other advisory committees to work out any last-minute wording issues and to bring all of the e-government rules into agreement as far as possible.

Recommendation–The Advisory Committee recommends that proposed Rule 49.1 be approved, as modified after public comment, and forwarded to the Judicial Conference.

PROPOSED AMENDMENTS TO THE FEDERAL RULES OF CRIMINAL PROCEDURE*

Rule 11. Pleas

* * * * *

(b) Considering and Accepting a Guilty or Nolo Contendere Plea.

(1) ***Advising and Questioning the Defendant.*** Before the court accepts a plea of guilty or nolo contendere, the defendant may be placed under oath, and the court must address the defendant personally in open court. During this address, the court must inform the defendant of, and determine that the defendant understands, the following:

* * * * *

(M) in determining a sentence, the court's obligation to calculate the applicable sentencing-guideline range ~~apply the Sentencing Guidelines, and the~~

*New material is underlined; matter to be omitted is lined through.

CELLSITE-20369

~~court's discretion to depart from those guidelines under some circumstances~~ and to consider that range, possible departures under the Sentencing Guidelines, and other sentencing factors under 18 U.S.C. § 3553(a); and

* * * * *

COMMITTEE NOTE

Subdivision (b)(1)(M). The amendment conforms Rule 11 to the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005). *Booker* held that the provision of the federal sentencing statute that makes the Guidelines mandatory, 18 U.S.C. § 3553(b)(1), violates the Sixth Amendment right to jury trial. With this provision severed and excised, the Court held, the Sentencing Reform Act "makes the Guidelines effectively advisory," and "requires a sentencing court to consider Guidelines ranges, see 18 U.S.C.A. § 3553(a)(4) (Supp.2004), but it permits the court to tailor the sentence in light of other statutory concerns as well, see § 3553(a) (Supp. 2004)." *Id.* at 245-46. Rule 11(b)(M) incorporates this analysis into the information provided to the defendant at the time of a plea of guilty or nolo contendere.

CHANGES MADE TO PROPOSED AMENDMENT RELEASED FOR PUBLIC COMMENT

No changes were made to the text of the proposed amendment as released for public comment. One change was made to the Committee note. The reference to the Fifth Amendment was deleted from the description of the Supreme Court's decision in *Booker*.

* * * * *

Rule 32. Sentence and Judgment

* * * * *

(d) Presentence Report.

(1) ***Applying the Advisory Sentencing Guidelines.*** The presentence report must:

(A) identify all applicable guidelines and policy statements of the Sentencing Commission;

(B) calculate the defendant's offense level and criminal history category;

(C) state the resulting sentencing range and kinds of sentences available;

(D) identify any factor relevant to:

CELLSITE-20371

(i) the appropriate kind of sentence, or

(ii) the appropriate sentence within the applicable sentencing range; and

(E) identify any basis for departing from the applicable sentencing range.

(2) ***Additional Information.*** The presentence report must also contain the following information:

(A) the defendant's history and characteristics, including:

(i) any prior criminal record;

(ii) the defendant's financial condition; and

(iii) any circumstances affecting the defendant's behavior that may be helpful in imposing sentence or in correctional treatment;

(B) verified information, stated in a nonargumentative style, that assesses the financial, social, psychological, and medical

CELL/OTD 006207

CELLSITE-20372

impact on any individual against whom the offense has been committed;

(C) when appropriate, the nature and extent of nonprison programs and resources available to the defendant;

(D) when the law provides for restitution, information sufficient for a restitution order;

(E) if the court orders a study under 18 U.S.C. § 3552(b), any resulting report and recommendation; and

(F) any other information that the court requires, including information relevant to the factors under 18 U.S.C. § 3553(a).

* * * * *

COMMITTEE NOTE

Subdivision (d). The amendment conforms Rule 32(d) to the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005). *Booker* held that the provision of the federal sentencing

CELL/OTD 006208

CELLSITE-20373

statute that makes the Guidelines mandatory, 18 U.S.C. § 3553(b)(1), violates the Sixth Amendment right to jury trial. With this provision severed and excised, the Court held, the Sentencing Reform Act "makes the Guidelines effectively advisory," and "requires a sentencing court to consider Guidelines ranges, see 18 U.S.C.A. § 3553(a)(4) (Supp.2004), but it permits the court to tailor the sentence in light of other statutory concerns as well, see § 3553(a) (Supp.2004)." *Id.* at 245-46. Amended subdivision (d)(2)(F) makes clear that the court can instruct the probation office to gather and include in the presentence report any information relevant to the factors articulated in § 3553(a). The rule contemplates that a request can be made either by the court as a whole requiring information affecting all cases or a class of cases, or by an individual judge in a particular case.

CHANGES MADE TO PROPOSED AMENDMENT RELEASED FOR PUBLIC COMMENT

The Committee revised the text of subdivision (d) in response to public comments. In subdivision (d), the Committee revised the title to include the word "Advisory" in order better to reflect the guidelines' role under the *Booker* decision. It withdrew proposed subdivisions (k) and (h).

Proposed subdivision (h) would have expanded the sentencing court's obligation to give notice to the parties when it intends to rely on grounds not identified in either the presentence report or the parties' submissions. The amendment was intended to respond to the courts' expanded discretion under *Booker*. In light of a number of recent decisions in the lower courts considering the proper scope of

CELL/OTD 006209

CELLSITE-20374

this obligation in light of *Booker*, the proposed amendment was withdrawn for further study.

Subdivision (k), which would have required that courts use a specified judgment and statement of reasons form, was withdrawn because of the passage of § 735 of the USA Patriot Improvement and Reauthorization Act. This legislation amended 28 U.S.C. § 994(w) to impose a statutory requirement that sentencing information for each case be provided on "the written statement of reasons form issued by the Judicial Conference and approved by the United States Sentencing Commission." The Criminal Law Committee, which had previously requested that the uniform collection of sentencing information be addressed by an amendment to the rules, withdrew that request in light of the enactment of the statutory requirement.

Finally, here—as in the other *Booker* rules—the Committee deleted the reference in the Committee Note to the Fifth Amendment from the description of the Supreme Court's decision in *Booker*.

* * * * *

Rule 35. Correcting or Reducing a Sentence

* * * * *

(b) Reducing a Sentence for Substantial Assistance.

(1) ***In General.*** Upon the government's motion made within one year of sentencing, the court may reduce a sentence if: the defendant, after sentencing,

CELLSITE-20375

provided substantial assistance in investigating or prosecuting another person.

~~(A) the defendant, after sentencing, provided substantial assistance in investigating or prosecuting another person; and~~

~~(B) reducing the sentence accords with the Sentencing Commission's guidelines and policy statements.~~

* * * * *

COMMITTEE NOTE

Subdivision (b)(1). The amendment conforms Rule 35(b)(1) to the Supreme Court's decision in *United States v. Booker*, 543 U.S. 220 (2005). In *Booker* the Court held that the provision of the federal sentencing statute that makes the Guidelines mandatory, 18 U.S.C. § 3553(b)(1), violates the Sixth Amendment right to jury trial. With this provision severed and excised, the Court held, the Sentencing Reform Act "makes the Guidelines effectively advisory," and "requires a sentencing court to consider Guidelines ranges, see 18 U.S.C.A. § 3553(a)(4) (Supp.2004), but it permits the court to tailor the sentence in light of other statutory concerns as well, see § 3553(a) (Supp.2004)." *Id.* at 245-46. Subdivision (b)(1)(B) has been deleted because it treats the guidelines as mandatory.

CELL/OTD 006211

CELLSITE-20376

CHANGES MADE TO PROPOSED AMENDMENT RELEASED FOR PUBLIC COMMENT

No changes were made to the text of the proposed amendment as released for public comment, but one change was made in the Committee Note. Here—as in the other *Booker* rules—the Committee deleted the reference to the Fifth Amendment from the description of the Supreme Court's decision in *Booker*.

* * * * *

Rule 45. Computing and Extending Time

* * * * *

(c) Additional Time After Certain Kinds of Service. ~~When these rules permit or require~~ Whenever a party must or may to act within a specified period after ~~a notice or a paper has been served on that party~~ service and service is made in the manner provided under Federal Rule of Civil Procedure 5(b)(2)(B), (C), or (D), 3 days are added after ~~to~~ the period would otherwise expire under subdivision (a) ~~if service occurs in the manner provided under Federal Rule of Civil Procedure 5(b)(2)(B), (C), or (D)~~.

CELLSITE-20377

COMMITTEE NOTE

Subdivision (c). Rule 45(c) is amended to remove any doubt as to the method for extending the time to respond after service by mail, leaving with the clerk of court, electronic means, or other means consented to by the party served. This amendment parallels the change in Federal Rule of Civil Procedure 6(e). Three days are added after the prescribed period otherwise expires under Rule 45(a). Intermediate Saturdays, Sundays, and legal holidays are included in counting these added three days. If the third day is a Saturday, Sunday, or legal holiday, the last day to act is the next day that is not a Saturday, Sunday, or legal holiday. The effect of invoking the day that the rule would otherwise expire under Rule 45(a) can be illustrated by assuming that the thirtieth day of a thirty-day period is a Saturday. Under Rule 45(a) the period expires on the next day that is not a Sunday or legal holiday. If the following Monday is a legal holiday, under Rule 45(a) the period expires on Tuesday. Three days are then added — Wednesday, Thursday, and Friday as the third and final day to act unless that is a legal holiday. If the prescribed period ends on a Friday, the three added days are Saturday, Sunday, and Monday, which is the third and final day to act unless it is a legal holiday. If Monday is a legal holiday, the next day that is not a legal holiday is the third and final day to act.

Application of Rule 45(c) to a period that is less than eleven days can be illustrated by a paper that is served by mailing on a Friday. If ten days are allowed to respond, intermediate Saturdays, Sundays, and legal holidays are excluded in determining when the period expires under Rule 45(a). If there is no legal holiday, the period expires on the Friday two weeks after the paper was mailed. The three added Rule 45(c) days are Saturday, Sunday, and Monday, which is the third and final day to act unless it is a legal holiday. If

CELL/OTD 006213

CELLSITE-20378

Monday is a legal holiday, the next day that is not a legal holiday is the final day to act.

CHANGES MADE TO PROPOSED AMENDMENT RELEASED FOR PUBLIC COMMENT

No change was made in the rule as published for public comment.

* * * * *

Rule 49.1. Privacy Protection For Filings Made with the Court

(a) Redacted Filings. Unless the court orders otherwise, in an electronic or paper filing with the court that contains an individual's social-security number, taxpayer-identification number, or birth date, the name of an individual known to be a minor, a financial-account number, or the home address of an individual, a party or nonparty making the filing may include only:

(1) the last four digits of the social-security number and taxpayer-identification number;

CELLSITE-20379

(2) the year of the individual's birth;

(3) the minor's initials;

(4) the last four digits of the financial-account number; and

(5) the city and state of the home address.

(b) **Exemptions from the Redaction Requirement.** The redaction requirement does not apply to the following:

(1) a financial-account number or real property address that identifies the property allegedly subject to forfeiture in a forfeiture proceeding;

(2) the record of an administrative or agency proceeding;

(3) the official record of a state-court proceeding;

(4) the record of a court or tribunal, if that record was not subject to the redaction requirement when originally filed;

(5) a filing covered by Rule 49.1(d);

CELL/OTD 006215

CELLSITE-20380

(6) a pro se filing in an action brought under 28 U.S.C. §§ 2241, 2254, or 2255;

(7) a court filing that is related to a criminal matter or investigation and that is prepared before the filing of a criminal charge or is not filed as part of any docketed criminal case;

(8) an arrest or search warrant; and

(9) a charging document and an affidavit filed in support of any charging document.

(c) **Immigration Cases.** A filing in an action brought under 28 U.S.C. § 2241 that relates to the petitioner's immigration rights is governed by Federal Rule of Civil Procedure 5.2.

(d) **Filings Made Under Seal.** The court may order that a filing be made under seal without redaction. The court may later unseal the filing or order the person who made the filing to file a redacted version for the public record.

CELLSITE-20381

(e) **Protective Orders.** For good cause, the court may by order in a case:

(1) require redaction of additional information; or

(2) limit or prohibit a nonparty's remote electronic access to a document filed with the court.

(f) **Option for Additional Unredacted Filing Under Seal.** A person making a redacted filing may also file an unredacted copy under seal. The court must retain the unredacted copy as part of the record.

(g) **Option for Filing a Reference List.** A filing that contains redacted information may be filed together with a reference list that identifies each item of redacted information and specifies an appropriate identifier that uniquely corresponds to each item listed. The list must be filed under seal and may be amended as of right. Any reference in the case to a listed identifier will be

CELLSITE-20382

construed to refer to the corresponding item of information.

(h) Waiver of Protection of Identifiers. A person waives the protection of Rule 49.1 (a) as to the person's own information by filing it without redaction and not under seal.

COMMITTEE NOTE

The rule is adopted in compliance with section 205(c)(3) of the E-Government Act of 2002, Public Law No. 107-347. Section 205(c)(3) requires the Supreme Court to prescribe rules "to protect privacy and security concerns relating to electronic filing of documents and the public availability . . . of documents filed electronically." The rule goes further than the E-Government Act in regulating paper filings even when they are not converted to electronic form. But the number of filings that remain in paper form is certain to diminish over time. Most districts scan paper filings into the electronic case file, where they become available to the public in the same way as documents initially filed in electronic form. It is electronic availability, not the form of the initial filing, that raises the privacy and security concerns addressed in the E-Government Act.

The rule is derived from and implements the policy adopted by the Judicial Conference in September 2001 to address the privacy concerns resulting from public access to electronic case files. *See* http://www.privacy.uscourts.gov/Policy.htm. The Judicial Conference policy is that documents in case files generally should be made

CELL/OTD 006218

CELLSITE-20383

available electronically to the same extent they are available at the courthouse, provided that certain "personal data identifiers" are not included in the public file.

While providing for the public filing of some information, such as the last four digits of an account number, the rule does not intend to establish a presumption that this information never could or should be protected. For example, it may well be necessary in individual cases to prevent remote access by nonparties to any part of an account number or social security number. It may also be necessary to protect information not covered by the redaction requirement — such as driver's license numbers and alien registration numbers — in a particular case. In such cases, protection may be sought under subdivision (d) or (e). Moreover, the Rule does not affect the protection available under other rules, such as Criminal Rule 16(d) and Civil Rules 16 and 26(c), or under other sources of protective authority.

Parties must remember that any personal information not otherwise protected by sealing or redaction will be made available over the internet. Counsel should notify clients of this fact so that an informed decision may be made on what information is to be included in a document filed with the court.

The clerk is not required to review documents filed with the court for compliance with this rule. The responsibility to redact filings rests with counsel and the party or nonparty making the filing.

Subdivision (e) provides that the court can order in a particular case more extensive redaction than otherwise required by the Rule, where necessary to protect against disclosure to nonparties of sensitive or private information. Nothing in this subdivision is

CELL/OTD 006219

CELLSITE-20384

intended to affect the limitations on sealing that are otherwise applicable to the court.

Subdivision (f) allows a person who makes a redacted filing to file an unredacted document under seal. This provision is derived from section 205(c)(3)(iv) of the E-Government Act. Subdivision (g) allows the option to file a register of redacted information. This provision is derived from section 205(c)(3)(v) of the E-Government Act, as amended in 2004.

In accordance with the E-Government Act, subdivision (f) of the rule refers to "redacted" information. The term "redacted" is intended to govern a filing that is prepared with abbreviated identifiers in the first instance, as well as a filing in which a personal identifier is edited after its preparation.

Subdivision (h) allows a person to waive the protections of the rule as to that person's own personal information by filing it unsealed and in unredacted form. One may wish to waive the protection if it is determined that the costs of redaction outweigh the benefits to privacy. If a person files an unredacted identifier by mistake, that person may seek relief from the court.

Trial exhibits are subject to the redaction requirements of Rule 49.1 to the extent they are filed with the court. Trial exhibits that are not initially filed with the court must be redacted in accordance with the rule if and when they are filed as part of an appeal or for other reasons.

The Judicial Conference Committee on Court Administration and Case Management has issued "Guidance for Implementation of the Judicial Conference Policy on Privacy and Public Access to Electronic Criminal Case Files" (March 2004). This document sets

CELL/OTD 006220

CELLSITE-20385

out limitations on remote electronic access to certain sensitive materials in criminal cases. It provides in part as follows:

> The following documents shall not be included in the public case file and should not be made available to the public at the courthouse or via remote electronic access:
>
> - unexecuted summonses or warrants of any kind (*e.g.*, search warrants, arrest warrants);
> - pretrial bail or presentence investigation reports;
> - statements of reasons in the judgment of conviction;
> - juvenile records;
> - documents containing identifying information about jurors or potential jurors;
> - financial affidavits filed in seeking representation pursuant to the Criminal Justice Act;
> - ex parte requests for authorization of investigative, expert or other services pursuant to the Criminal Justice Act; and
> - sealed documents (*e.g.*, motions for downward departure for substantial assistance, plea agreements indicating cooperation).

To the extent that the Rule does not exempt these materials from disclosure, the privacy and law enforcement concerns implicated by

CELL/OTD 006221

CELLSITE-20386

the above documents in criminal cases can be accommodated under the rule through the sealing provision of subdivision (d) or a protective order provision of subdivision (e).

CHANGES MADE TO PROPOSED AMENDMENT RELEASED FOR PUBLIC COMMENT

Numerous changes were made in the rule after publication in response to the public comments as well as continued consultation among the reporters and chairs of the advisory committees as each committee reviewed its own rule.

A number of revisions were made in all of the e-government rules. These include: (1) using of the term "individual" rather than "person" where possible, (2) clarifying that the responsibility for redaction lies with the person making the filing, (3) rewording the exemption from redaction for information necessary to identify property subject to forfeiture, so that it is clearly applicable in ancillary proceedings related to forfeiture, and (4) rewording the exemption from redaction for judicial decisions that were not subject to redaction when originally filed. Additionally, some changes of a technical or stylistic nature (involving matters such as hyphenation and the use of "a" or "the") were made to achieve clarity as well as consistency among the various e-government rules.

Two changes were made to the provisions concerning actions under §§ 2241, 2254, and 2255, which the published rule exempted from the redaction requirement. First, in response to criticism that the original exemption was unduly broad, the Committee limited the exemption to pro se filings in these actions. Second, a new subdivision (c) was added to provide that all actions under § 2241 in which immigration claims were made would be governed exclusively.

CELL/OTD 006222

CELLSITE-20387

by Civil Rule 5.2. This change (which was made after the Advisory Committee meeting) was deemed necessary to ensure consistency in the treatment of redaction and public access to records in immigration cases. The addition of the new subdivision required renumbering of the subdivisions designated as (c) to (g) at the time of publication.

The provision governing protective orders was revised to employ the flexible "cause shown" standard that governs protective orders under the Federal Rules of Civil Procedure.

Finally, language was added to the Note clarifying the impact of the CACM policy that is reprinted in the Note: if the materials enumerated in the CACM policy are not exempt from disclosure under the rule, the sealing and protective order provisions of the rule are applicable.

Federal Rulemaking

The Rulemaking Process

A Summary for the Bench and Bar
April 2006

THE FEDERAL RULES OF PRACTICE AND PROCEDURE
ADMINISTRATIVE OFFICE OF THE U.S. COURTS

JAMES C. DUFF, DIRECTOR

The federal rules govern procedure, practice, and evidence in the federal courts. They set forth the procedures for the conduct of court proceedings and serve as a pattern for the procedural rules adopted by many state court systems.

Authority

The Congress has authorized the federal judiciary to prescribe the rules of practice, procedure, and evidence for the federal courts, subject to the ultimate legislative right of the Congress to reject, modify, or defer any of the rules. The authority and procedures for promulgating rules are set forth in the Rules Enabling Act. 28 U.S.C. §§ 2071-2077.

The Judicial Conference of the United States is also required by statute to "carry on a continuous study of the operation and effect of the general rules of practice and procedure." 28 U.S.C. § 331. As part of this continuing obligation, the Conference is authorized to recommend amendments and additions to the rules to promote:

- simplicity in procedure,
- fairness in administration,
- the just determination of litigation, and
- the elimination of unjustifiable expense and delay.

The Rules Committees

The Judicial Conference's responsibilities as to rules are coordinated by its Committee on Rules of Practice and Procedure, commonly referred to as the "Standing Committee." 28 U.S.C. § 2073(b). The Judicial Conference has authorized the appointment of five advisory committees to assist the Standing Committee, dealing respectively with the appellate, bankruptcy, civil, criminal, and evidence rules. 28 U.S.C. § 2073(a)(2). The Standing Committee reviews and coordinates the recommendations of the five advisory committees, and it recommends to the Judicial

CELL/OTD 006224

CELLSITE-20389

Conference proposed rules changes "as may be necessary to maintain consistency and otherwise promote the interests of justice." 28 U.S.C. § 2073(b).

The Standing Committee and the advisory committees are composed of federal judges, practicing lawyers, law professors, state chief justices, and representatives of the Department of Justice. Each committee has a reporter, a prominent law professor, who is responsible for coordinating the committee's agenda and drafting appropriate amendments to the rules and explanatory committee notes.

The Assistant Director for Judges Programs of the Administrative Office of the United States Courts currently serves as secretary to the Standing Committee, coordinates the operational aspects of the rules process, and maintains the records of the committees. The Rules Committee Support Office of the Administrative Office provides the day to day administrative and legal support for the secretary and the committees.

Open Meetings and Records

Meetings of the rules committees are open to the public and are widely announced. All records of the committees, including minutes of committee meetings, reports of the committees, suggestions and comments submitted by the public, statements of witnesses, transcripts of public hearings, and memoranda prepared by the reporters, are public and are maintained by the secretary. Copies of the rules and proposed amendments are available from the Rules Committee Support Office. The proposed amendments are also published on the Judiciary's website <http:\\www.uscourts.gov>.

HOW THE RULES ARE AMENDED

The pervasive and substantial impact of the rules on the practice of law in the federal courts demands exacting and meticulous care in drafting rule changes. The rulemaking process is time consuming and involves a minimum of seven stages of formal comment and review. From beginning to end, it usually takes two to three years for a suggestion to be enacted as a rule.

The process, however, may be expedited when there is an urgent need to amend the rules.

All interested individuals and organizations are provided an opportunity to comment on proposed rules amendments and to recommend alternative proposals. The comments received from this extensive and thorough public examination are studied very carefully by the committees and generally improve the amendments. The committees actively encourage the submission of comments, both positive and negative, to ensure that proposed amendments have been considered by a broad segment of the bench and bar.

STEP 1. INITIAL CONSIDERATION BY THE ADVISORY COMMITTEE

Making suggestions for changes

Proposed changes in the rules are suggested by judges, clerks of court, lawyers, professors, government agencies, or other individuals and organizations. They are considered in the first instance by appropriate advisory committees (appellate, bankruptcy, civil, criminal, or evidence). Suggestions for changes, additions, or deletions must be submitted in writing to the secretary, who acknowledges each letter and distributes it to the chair of the Standing Committee and the chair and reporter of the advisory committee.

The reporter normally analyzes the suggestions and makes appropriate recommendations to the advisory committee. The suggestions from the public and the recommendations of the reporter are placed on the advisory committee's agenda and are normally discussed at its next meeting. The advisory committees usually meet twice a year in the spring and fall, and they also conduct business by telephone and correspondence.

Consideration of suggestions

In considering a suggestion for a change in the rules, the advisory committee may take several courses of action, including:

1. Accepting the suggestion, either completely or with modifications or limitations;

2. Deferring action on the suggestion or seeking additional information regarding its operation and impact;

3. Rejecting a suggestion because it does not have merit or would be inconsistent with other rules or a statute; or

4. Rejecting a suggestion because, although it may be meritorious, it simply is not necessary or important enough to warrant the significant step of an amendment to the federal rules.

The secretary is required, to the extent feasible, to advise the person making a suggestion of the action taken on it by the advisory committee.

Drafting Rules Changes

When an advisory committee decides initially that a particular change in the rules would be appropriate, it normally asks its reporter to prepare a draft amendment to the rules and an explanatory committee note. The draft amendment and committee note are discussed and voted upon at a committee meeting.

The Standing Committee has a style subcommittee that works with the respective advisory committees in reviewing proposed amendments to ensure that the rules are written in clear and consistent language. In addition, the reporter of the Standing Committee and the reporters of the five advisory committees are encouraged to work together to promote clarity and consistency among the various sets of federal rules.

STEP 2. PUBLICATION AND PUBLIC COMMENT

Once an advisory committee votes initially to recommend an amendment to the rules, it must obtain the approval of the Standing Committee, or its chair, to publish the proposed amendment for public comment. In seeking publication, the advisory committee must explain to the Standing Committee the reasons for its proposal, including any minority or separate views.

After publication is approved, the secretary arranges for printing and distribution of the proposed amendment to the bench and bar, to publishers, and to the general public. More than 10,000 persons and organizations are on the mailing list, including

- federal judges and other federal court officers,
- United States attorneys,
- other federal government agencies and officials,
- state chief justices,
- state attorneys general,
- legal publications,
- law schools,
- bar associations, and
- interested lawyers, individuals, and organizations requesting distribution.

In order to promote public comment, the proposed amendments are sent to points of contact that have been established with 53 state bar associations.

The public is normally given 6 months to comment in writing to the secretary regarding the proposed amendment. In an emergency, a shorter time period may be authorized by the Standing Committee.

During the 6-month comment period, the advisory committee schedules one or more public hearings on the proposed amendments. Persons who wish to appear and testify at the hearings are required to contact the secretary at least 30 days before

the hearings.

STEP 3. CONSIDERATION OF THE PUBLIC COMMENTS AND FINAL APPROVAL BY THE ADVISORY COMMITTEE

At the conclusion of the public comment period, the reporter is required to prepare a summary of the written comments received from the public and the testimony presented at the hearings. The advisory committee then takes a fresh look at the proposed rule changes in light of the written comments and testimony.

If the advisory committee decides to make a substantial change in its proposal, it may provide a period for additional public notice and comment.

Once the advisory committee decides to proceed in final form, it submits the proposed amendment to the Standing Committee for approval. Each proposed amendment must be accompanied by a separate report summarizing the comments received from the public and explaining any changes made by the advisory committee following the original publication. The advisory committee's report must also include minority views of any members who wish to have their separate views recorded.

STEP 4. APPROVAL BY THE STANDING COMMITTEE

The Standing Committee considers the final recommendations of the advisory committee and may accept, reject, or modify them. If the Standing Committee approves a proposed rule change, it will transmit it to the Judicial Conference with a recommendation for approval, accompanied by the advisory committee's reports and the Standing Committee's own report explaining any modifications it made. If the Standing Committee makes a modification that constitutes a substantial change from the recommendation of the advisory committee, the proposal will normally be returned to the advisory committee with appropriate instructions.

STEP 5. JUDICIAL CONFERENCE APPROVAL

The Judicial Conference normally considers proposed amendments to the rules at its September session each year. If approved by the Conference, the amendments are transmitted promptly to the Supreme Court.

STEP 6. SUPREME COURT APPROVAL

CELL/OTD 006228
CELLSITE-20393

The Supreme Court has the authority to prescribe the federal rules, subject to a statutory waiting period. 28 U.S.C. §§ 2072, 2075. The Court must transmit proposed amendments to Congress by May 1 of the year in which the amendment is to take effect. 28 U.S.C. §§ 2074, 2075.

STEP 7. CONGRESSIONAL REVIEW

The Congress has a statutory period of at least 7 months to act on any rules prescribed by the Supreme Court. If the Congress does not enact legislation to reject, modify, or defer the rules, they take effect as a matter of law on December 1. 28 U.S.C. §§ 2074, 2075.

SUMMARY OF PROCEDURES

Action	Date
STEP 1	
• Suggestion for a change in the rules. *(Submitted in writing to the secretary.)*	At any time.
• Referred by the secretary to the appropriate advisory committee.	Promptly after receipt.
• Considered by the advisory committee.	Normally at the next committee meeting.
• If approved, the advisory committee seeks authority from the Standing Committee to circulate to bench and bar for comment.	Normally at the same meeting or the next committee meeting.
STEP 2	
• Public comment period.	6 months.
• Public hearings.	During the public comment period.
STEP 3	
• Advisory committee considers the amendment afresh in light of public comments and testimony at the hearings.	About one or two months after the close of the comment period.
• Advisory committee approves amendment in	About one or two months after

final form and transmits it to the Standing Committee.	the close of the comment period.
SSTEP 4	
• Standing Committee approves amendment, with or without revisions, and recommends approval by the Judicial Conference.	Normally at its June meeting.
SSTEP 5	
• Judicial Conference approves amendment and transmits it to the Supreme Court.	Normally at its September session.
SSTEP 6	
• The Supreme Court prescribes the amendment.	By May 1.
SSTEP 7	
• Congress has statutory time period in which to enact legislation to reject, modify, or defer the amendment.	By December 1.
• Absent Congressional action, the amendment becomes law.	December 1.

Title: PROPOSED AMENDMENT TO RULE 41
FEDERAL RULES OF CRIMINAL PROCEDURE
EFFECTIVE DECEMBER 1, 2006

Synopsis: To advise field offices of a proposed amendment to Rule 41 of the Federal Rules of Criminal Procedure, which addresses procedures for issuing tracking device warrants, and is effective December 1, 2006, absent Congressional action to the contrary.

Details: Effective December 1, 2006, and absent Congressional action to the contrary[1], Rule 41 of the Federal Rules of Criminal Procedure will be amended to reflect the following procedures for issuing tracking device warrants:

Rule 41(a) Scope and Definitions will include the following definition:

[1] Contact with the Office of Congressional Affairs has revealed that there is not any Congressional Action pending as of the date of this communication that would affect this provision and therefore it appears likely that this amendment will take effect on December 1, 2006.

(E) "Tracking device" has the meaning set out in 18 U.S.C. §3117(b).[2]

Rule 41(b) Authority to Issue a Warrant, will be amended to include the following:

(4) a magistrate judge with authority in the district has authority to issue a warrant to install within the district a tracking device; the warrant may authorize use of the device to track the movement of a person or property located within the district, outside the district, or both.

Rule 41(d) Obtaining a Warrant, will be amended to read as follows (amended language has been italicized and underlined):

(1) In General. After receiving an affidavit or other information, a magistrate judge-or if authorized by Rule 41(b) a judge of a state court of record-must issue the warrant if there is probable cause to search for and seize a person or property *or to install and use a tracking device*.

Rule 41(e)(2) Contents of the Warrant, will be amended to read as follows (amended language has been italicized and underlined):
(A) Warrant to Search for and Seize a Person or Property. *Except for a tracking-device-warrant*, the warrant must identify the person or property to be searched, identify any person or property to be seized, and designate the magistrate judge to whom it must be returned. The warrant must command the officer to:

(i) execute the warrant within a specified time no longer than 10 days;
(ii) execute the warrant during the daytime, unless the judge for good cause expressly authorizes execution at another time; and
(iii) return the warrant to the magistrate judge designated in the warrant.

(B) Warrant for a Tracking Device. *A tracking-device warrant must identify the person or property to be tracked, designate the magistrate judge to whom it must be returned, and specify a reasonable length of time that the device may be used. The time must not exceed 45 days from the date the warrant was issued. The court may, for good cause, grant one or more extensions for a reasonable period not to exceed 45 days each. The warrant must command the officer to:*

---

[2]A "tracking device" is defined to mean "an electronic or mechanical device which permits the tracking of the movement of a person or object." 18 U.S.C. § 3117(b).

CELL/OTD 006272 CELLSITE-20437

(i) complete any installation authorized by the warrant within a specified time no longer than 10 calendar days;
(ii) perform any installation authorized by the warrant during the daytime, unless the judge for good cause expressly authorizes installation at another time; and
(iii) return the warrant to the judge designated in the warrant.

Rule 41(f) Executing and Returning the Warrant, will be amended as follows (amended language has been italicized and underlined):

(1) Warrant to Search for and Seize a Person or Property.
(A) Noting the Time. The officer executing the warrant must enter it on the exact date and time it was executed.
(B) Inventory. An officer present during the execution of the warrant must prepare and verify an inventory of any property seized. The officer must do so in the presence of another officer and the person from whom, or from whose premises, the property was taken. If either one is not present, the officer must prepare and verify the inventory in the presence of at least one other credible person.
(C) Receipt. The officer executing the warrant must give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken or leave a copy of the warrant and receipt at the place where the officer took the property.
(D) Return. The officer executing the warrant must promptly return it-together with a copy of the inventory-to the magistrate judge designated on the warrant. The judge must, on request, give a copy of the inventory to the person from whom, or from whose premises, the property was taken and to the applicant for the warrant.

(2) Warrant for a Tracking Device.
(A) Noting the Time. The officer executing a tracking-device warrant must enter on it the exact date and time the device was installed and the period during which it was used.
(B) Return. Within 10 calendar days after the use of the tracking device has ended, the officer executing the warrant must return it to the judge designated in the warrant.
(C) Service. Within 10 calendar days after the use of the tracking device has ended, the officer executing a tracking device warrant must serve a copy of the warrant on the person who was tracked or whose property was tracked. Service may be accomplished by delivering a copy to the person who, or whose property, was tracked; or by leaving a copy at the person's

CELL/OTD 006273
CELLSITE-20438

residence or usual place of abode with an individual of suitable age and discretion who resides at that location and by mailing a copy to the person's last known address. Upon request of the government, the judge may delay notice as provided in Rule 41(f)(3).

(3) Delayed Notice. *Upon the government's request, a magistrate judge-or if authorized by Rule 41(b), a judge of a state court of record-may delay any notice required by this rule if the delay is authorized by statute.*

Proposed amendments to the Advisory Committee Notes state that the Committee "did not intend by this amendment to expand or contract the definition of what might constitute a tracking device." See F.R.Crim.P 41(b) advisory committee's note. The Advisory Committee indicated that the changes to Rule 41(b) were intended to provide procedural guidance for judicial officers who were asked to issue tracking device warrants. The Committee Notes indicate that the amendment "reflects the view that if the officers intend to install or use the device in a constitutionally protected area, they must obtain judicial approval to do so. If, on the other hand, the officers intend to install and use the device without implicating any Fourth Amendment rights, there is no need to obtain a warrant." Id. The Committee Notes also recognize that 18 U.S.C. § 3117, "does not specify the standard an applicant must meet to install a tracking device" and state that the "amendment to Rule 41 does not resolve this issue or hold that such warrants may issue only on a showing of probable cause. Instead, it simply provides that if probable cause is shown, the magistrate judge must issue the warrant." See F.R.Crim.P 41(d) advisory committee's note.

Case ID #: 66F-HQ-1085159 (Pending)

Title: PROPOSED AMENDMENT TO RULE 41
FEDERAL RULES OF CRIMINAL PROCEDURE
EFFECTIVE DECEMBER 1, 2006

Synopsis: To advise field offices of a proposed amendment to Rule 41 of the Federal Rules of Criminal Procedure, which addresses procedures for issuing tracking device warrants, and is effective December 1, 2006, absent Congressional action to the contrary.

Details: Effective December 1, 2006, and absent Congressional action to the contrary[1], Rule 41 of the Federal Rules of Criminal Procedure will be amended to reflect the following procedures for issuing tracking device warrants:

Rule 41(a) Scope and Definitions will include the following definition:

(E) "Tracking device" has the meaning set out in 18 U.S.C. §3117(b).[2]

---

[1] Contact with the Office of Congressional Affairs has revealed that there is not any Congressional Action pending as of the date of this communication that would affect this provision and therefore it appears likely that this amendment will take effect on December 1, 2006.

[2] A "tracking device" is defined to mean "an electronic or mechanical device which permits the tracking of the movement of a person or object." 18 U.S.C. § 3117(b).

Rule 41(b) Authority to Issue a Warrant, will be amended to include the following:

(4) a magistrate judge with authority in the district has authority to issue a warrant to install within the district a tracking device; the warrant may authorize use of the device to track the movement of a person or property located within the district, outside the district, or both.

Rule 41(d) Obtaining a Warrant, will be amended to read as follows (amended language has been italicized and underlined):

(1) In General. After receiving an affidavit or other information, a magistrate judge-or if authorized by Rule 41(b) a judge of a state court of record-must issue the warrant if there is probable cause to search for and seize a person or property *or to install and use a tracking device*.

Rule 41(e)(2) Contents of the Warrant, will be amended to read as follows (amended language has been italicized and underlined):
(A) Warrant to Search for and Seize a Person or Property. *Except for a tracking-device-warrant*, the warrant must identify the person or property to be searched, identify any person or property to be seized, and designate the magistrate judge to whom it must be returned. The warrant must command the officer to:

(i) execute the warrant within a specified time no longer than 10 days;
(ii) execute the warrant during the daytime, unless the judge for good cause expressly authorizes execution at another time; and
(iii) return the warrant to the magistrate judge designated in the warrant.

(B) Warrant for a Tracking Device. *A tracking-device warrant must identify the person or property to be tracked, designate the magistrate judge to whom it must be returned, and specify a reasonable length of time that the device may be used. The time must not exceed 45 days from the date the warrant was issued. The court may, for good cause, grant one or more extensions for a reasonable period not to exceed 45 days each. The warrant must command the officer to:*

(i) complete any installation authorized by the warrant within a specified time no longer than 10 calendar days;
(ii) perform any installation authorized by the warrant during the daytime, unless the judge for good cause expressly authorizes installation at another time; and
(iii) return the warrant to the judge designated in the warrant.

CELL/OTD 006281
CELLSITE-20446

Rule 41(f) Executing and Returning the Warrant, will be amended as follows (amended language has been italicized and underlined):

(1) Warrant to Search for and Seize a Person or Property.
(A) Noting the Time. The officer executing the warrant must enter it on the exact date and time it was executed.
(B) Inventory. An officer present during the execution of the warrant must prepare and verify an inventory of any property seized. The officer must do so in the presence of another officer and the person from whom, or from whose premises, the property was taken. If either one is not present, the officer must prepare and verify the inventory in the presence of at least one other credible person.
(C) Receipt. The officer executing the warrant must give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken or leave a copy of the warrant and receipt at the place where the officer took the property.
(D) Return. The officer executing the warrant must promptly return it-together with a copy of the inventory-to the magistrate judge designated on the warrant. The judge must, on request, give a copy of the inventory to the person from whom, or from whose premises, the property was taken and to the applicant for the warrant.

(2) Warrant for a Tracking Device.
(A) Noting the Time. The officer executing a tracking-device warrant must enter on it the exact date and time the device was installed and the period during which it was used.
(B) Return. Within 10 calendar days after the use of the tracking device has ended, the officer executing the warrant must return it to the judge designated in the warrant.
(C) Service. Within 10 calendar days after the use of the tracking device has ended, the officer executing a tracking device warrant must serve a copy of the warrant on the person who was tracked or whose property was tracked. Service may be accomplished by delivering a copy to the person who, or whose property, was tracked; or by leaving a copy at the person's residence or usual place of abode with an individual of suitable age and discretion who resides at that location and by mailing a copy to the person's last known address. Upon request of the government, the judge may delay notice as provided in Rule 41(f)(3).

(3) Delayed Notice. Upon the government's request, a magistrate judge-or if authorized by Rule 41(b), a judge of a state court of record-may delay any notice required by this rule if the delay is authorized by statute.

CELL/OTD 006282

CELLSITE-20447

Proposed amendments to the Advisory Committee Notes state that the Committee "did not intend by this amendment to expand or contract the definition of what might constitute a tracking device." See F.R.Crim.P 41(b) advisory committee's note. The Advisory Committee indicated that the changes to Rule 41(b) were intended to provide procedural guidance for judicial officers who were asked to issue tracking device warrants. The Committee Notes indicate that the amendment "reflects the view that if the officers intend to install or use the device in a constitutionally protected area, they must obtain judicial approval to do so. If, on the other hand, the officers intend to install and use the device without implicating any Fourth Amendment rights, there is no need to obtain a warrant." Id. The Committee Notes also recognize that 18 U.S.C. § 3117, "does not specify the standard an applicant must meet to install a tracking device" and state that the "amendment to Rule 41 does not resolve this issue or hold that such warrants may issue only on a showing of probable cause. Instead, it simply provides that if probable cause is shown, the magistrate judge must issue the warrant." See F.R.Crim.P 41(d) advisory committee's note.

U.S. v. GarciaC.A.7 (Wis.),2007.Only the Westlaw citation is currently available.

United States Court of Appeals,Seventh Circuit.
UNITED STATES of America, Plaintiff-Appellee,
v.
Bernardo GARCIA, Defendant-Appellant.
No. 06-2741.

Argued Jan. 10, 2007.
Decided Feb. 2, 2007.

Background: Following denial of his motion to suppress, 2006 WL 1601716, defendant was convicted in the United States District Court for the Western District of Wisconsin, Barbara B. Crabb, J., of crimes relating to the manufacture of methamphetamine. Defendant appealed.

Holding: The Court of Appeals, Posner, Circuit Judge, held that there was no search or seizure under Fourth Amendment when police placed GPS tracking unit underneath defendant's vehicle.

Affirmed.

[1] Searches and Seizures 349 124

349 Searches and Seizures
349II Warrants
349k123 Form and Contents of Warrant; Signature
349k124 k. Particularity or Generality and Overbreadth in General. Most Cited Cases
Under the Fourth Amendment, a warrant must describe with particularity the object of the search or seizure and must be supported both by an oath or affirmation and by probable cause. U.S.C.A. Const.Amend. 4.

[2] Searches and Seizures 349 101

349 Searches and Seizures
349II Warrants
349k101 k. In General. Most Cited Cases
The warrant requirement forces the police to make a record before the search, rather than allowing them to conduct the search without prior investigation in the expectation that if the search is fruitful a rationalization for it will not be difficult to construct, working backwards. U.S.C.A. Const.Amend. 4.

[3] Searches and Seizures 349 21

349 Searches and Seizures
349I In General
349k13 What Constitutes Search or Seizure
349k21 k. Use of Electronic Devices; Tracking Devices or "Beepers.". Most Cited Cases
There was no search or seizure within meaning of Fourth Amendment when police placed a global positioning system (GPS) tracking unit underneath bumper of vehicle driven by defendant; device did not affect vehicle's driving qualities, did not draw power from vehicle's engine or battery, did not take up room that might otherwise have been occupied by passengers or packages, did not alter vehicle's appearance, and police could follow a car around or observe its route by means of cameras or satellite imaging without it being a search. U.S.C.A. Const.Amend. 4.

Appeal from the United States District Court for the Western District of Wisconsin. No. 05-CR-155-C-Barbara B. Crabb, Chief Judge.

David Reinhard, Office of the United States Attorney, Madison, WI, for Plaintiff-Appellee.
Patrick J. Stangl, Stangl Law Offices, Madison, WI, for Defendant-Appellant.

Before POSNER, MANION, and SYKES, Circuit Judges.
POSNER, Circuit Judge.
*1 The defendant appeals from his conviction for crimes relating to the manufacture of methamphetamine. The only issue is whether evidence obtained as a result of a tracking device attached to his car should have been suppressed as the fruit of an unconstitutional search.

The defendant had served time for methamphetamine offenses. Shortly after his release from prison, a person who was a known user of meth reported to police that the defendant had brought meth to her and her husband, consumed it with them, and told them he wanted to start manufacturing meth again.

© 2007 Thomson/West. No Claim to Orig. U.S. Govt. Works.

Another person told the police that the defendant had bragged that he could manufacture meth in front of a police station without being caught. A store's security video system recorded the defendant buying ingredients used in making the drug.

From someone else the police learned that the defendant was driving a borrowed Ford Tempo. They went looking for it and found it parked on a public street near where the defendant was staying. The police placed a GPS (global positioning system) "memory tracking unit" underneath the rear bumper of the Ford. Such a device, pocket-sized, battery-operated, commercially available for a couple of hundred dollars (see, e.g., Vehicle-Tracking, Incorporated, "GPS Vehicle Tracking with the Tracking Key," www.vehicle-tracking.com/products/Tracking-Key.html, visited Jan. 21, 2007), receives and stores satellite signals that indicate the device's location. So when the police later retrieved the device (presumably when the car was parked on a public street, as the defendant does not argue that the retrieval involved a trespass), they were able to learn the car's travel history since the installation of the device. One thing they learned was that the car had been traveling to a large tract of land. The officers obtained the consent of the tract's owner to search it and they did so and discovered equipment and materials used in the manufacture of meth. While the police were on the property, the defendant arrived in a car that the police searched, finding additional evidence.

The police had not obtained a warrant authorizing them to place the GPS tracker on the defendant's car. The district judge, however, found that they had had a reasonable suspicion that the defendant was engaged in criminal activity, and she ruled that reasonable suspicion was all they needed for a lawful search, although she added that they had had probable cause as well. The defendant argues that they needed not only probable cause to believe that the search would turn up contraband or evidence of crime, but also a warrant. The government argues that they needed nothing because there was no search or seizure within the meaning of the Fourth Amendment.

[1][2] The Fourth Amendment forbids unreasonable searches and seizures. There is nothing in the amendment's text to suggest that a warrant is required in order to make a search or seizure reasonable. All that the amendment says about warrants is that they must describe with particularity the object of the search or seizure and must be supported both by an oath or affirmation and by probable cause, which is understood, in the case of searches incident to criminal investigations, to mean probable cause that the search will turn up contraband or evidence of crime. *Zurcher v. Stanford Daily*, 436 U.S. 547, 554-55, 98 S.Ct. 1970, 56 L.Ed.2d 525 (1978). The Supreme Court, however, has created a presumption that a warrant is required, unless infeasible, for a search to be reasonable. E.g., *United States v. Leon*, 468 U.S. 897, 913-14 (1984); *Mincey v. Arizona*, 437 U.S. 385, 390, 98 S.Ct. 2408, 57 L.Ed.2d 290 (1978); *Henry v. United States*, 361 U.S. 98, 100, 80 S.Ct. 168, 4 L.Ed.2d 134 (1959); see *Nicholas v. Goord*, 430 F.3d 652, 678 (2d Cir.2005). "Although the framers of the Fourth Amendment were more fearful that the warrant would protect the police from the citizen's tort suit through operation of the doctrine of official immunity than hopeful that the warrant would protect the citizen against the police, see [Telford] Taylor, *Two Studies in Constitutional Interpretation* 23-43 (1969), and although the effective neutrality and independence of magistrates in ex parte proceedings for the issuance of search warrants may be doubted, there is a practical reason for requiring warrants where feasible: it forces the police to make a record before the search, rather than allowing them to conduct the search without prior investigation in the expectation that if the search is fruitful a rationalization for it will not be difficult to construct, working backwards." *United States v. Mazzone*, 782 F.2d 757, 759 (7th Cir.1986). But of course the presumption in favor of requiring a warrant, or for that matter the overarching requirement of reasonableness, does not come into play unless there is a search or seizure within the meaning of the Fourth Amendment.

*2 [3] The defendant's contention that by attaching the memory tracking device the police seized his car is untenable. The device did not affect the car's driving qualities, did not draw power from the car's engine or battery, did not take up room that might otherwise have been occupied by passengers or packages, did not even alter the car's appearance, and in short did not "seize" the car in any intelligible sense of the word. But was there a search? The Supreme Court has held that the mere tracking of a vehicle on public streets by means of a similar though less sophisticated device (a beeper) is not a search. *United States v. Knotts*, 460 U.S. 276, 284-85, 103 S.Ct. 1081, 75 L.Ed.2d 55 (1983). But the Court left open the question whether installing the device in the vehicle converted the subsequent tracking into a search. *Id.* at 279 n. 2; see also *United States v. Karo*, 468 U.S. 705, 713-14, 104 S.Ct. 3296, 82 L.Ed.2d

© 2007 Thomson/West. No Claim to Orig. U.S. Govt. Works.

530 (1984). The courts of appeals have divided over the question. Compare *United States v. McIver*, 186 F.3d 1119, 1127 (9th Cir.1999), and *United States v. Pretzinger*, 542 F.2d 517, 520 (9th Cir.1976) (per curiam), holding (and *United States v. Michael*, 645 F.2d 252, 256 and n. 11 (5th Cir.1981) (en banc), and *United States v. Bernard*, 625 F.2d 854, 860-61 (9th Cir.1980), intimating) that there is no search, with *United States v. Bailey*, 628 F.2d 938, 944-45 (6th Cir.1980); *United States v. Shovea*, 580 F.2d 1382, 1387-88 (10th Cir.1978), and *United States v. Moore*, 562 F.2d 106, 110-12 (1st Cir.1977), holding the contrary. Several of the cases actually take intermediate positions, such as requiring reasonable suspicion rather than probable cause (a possible interpretation of *Michael),* or probable cause but no warrant-*Shovea* and *Moore.* This court has not spoken to the issue.

If a listening device is attached to a person's phone, or to the phone line outside the premises on which the phone is located, and phone conversations are recorded, there is a search (and it is irrelevant that there is a trespass in the first case but not the second), and a warrant is required. But if police follow a car around, or observe its route by means of cameras mounted on lampposts or of satellite imaging as in Google Earth, there is no search. Well, but the tracking in this case *was* by satellite. Instead of transmitting images, the satellite transmitted geophysical coordinates. The only difference is that in the imaging case nothing touches the vehicle, while in the case at hand the tracking device does. But it is a distinction without any practical difference.

There is a practical difference lurking here, however. It is the difference between, on the one hand, police trying to follow a car in their own car, and, on the other hand, using cameras (whether mounted on lampposts or in satellites) or GPS devices. In other words, it is the difference between the old technology-the technology of the internal combustion engine-and newer technologies (cameras are not new, of course, but coordinating the images recorded by thousands of such cameras is). But GPS tracking is on the same side of the divide with the surveillance cameras and the satellite imaging, and if what they do is not searching in Fourth Amendment terms, neither is GPS tracking.

***3** This cannot be the end of the analysis, however, because the Supreme Court has insisted, ever since *Katz v. United States*, 389 U.S. 347, 88 S.Ct. 507, 19 L.Ed.2d 576 (1967), that the meaning of a Fourth Amendment search must change to keep pace with the march of science. So the use of a thermal imager to reveal details of the interior of a home that could not otherwise be discovered without a physical entry was held in *Kyllo v. United States*, 533 U.S. 27, 34, 121 S.Ct. 2038, 150 L.Ed.2d 94 (2001), to be a search within the meaning of the Fourth Amendment. But *Kyllo* does not help our defendant, because his case unlike *Kyllo* is not one in which technology provides a substitute for a form of search unequivocally governed by the Fourth Amendment. The substitute here is for an activity, namely following a car on a public street, that is unequivocally *not* a search within the meaning of the amendment.

But while the defendant's efforts to distinguish the GPS case from the satellite-imaging and lamppost-camera cases are futile, we repeat our earlier point that there is a difference (though it is not the difference involved in *Kyllo)* between all three of those situations on the one hand and following suspects around in a car on the other. The new technologies enable, as the old (because of expense) do not, wholesale surveillance. One can imagine the police affixing GPS tracking devices to thousands of cars at random, recovering the devices, and using digital search techniques to identify suspicious driving patterns. One can even imagine a law requiring all new cars to come equipped with the device so that the government can keep track of all vehicular movement in the United States. It would be premature to rule that such a program of mass surveillance could not possibly raise a question under the Fourth Amendment-that it could not be a search because it would merely be an efficient alternative to hiring another 10 million police officers to tail every vehicle on the nation's roads.

Of course the amendment cannot sensibly be read to mean that police shall be no more efficient in the twenty-first century than they were in the eighteenth. *United States v. Knotts, supra*, 460 U.S. at 283-84. There is a tradeoff between security and privacy, and often it favors security. Even at the height of the "Warren Court," the Court held over a strong dissent by Justice Brennan that the planting of an undercover agent in a criminal gang does not become a search just because the agent has a transmitter concealed on his person, even though the invasion of privacy is greater when the suspect's words are recorded and not merely recollected. *Lopez v. United States*, 373 U.S. 427, 439, 83 S.Ct. 1381, 10 L.Ed.2d 462 (1963).

Yet Chief Justice Warren, while concurring in the judgment in *Lopez,* remarked "that the fantastic

© 2007 Thomson/West. No Claim to Orig. U.S. Govt. Works.

advances in the field of electronic communication constitute a great danger to the privacy of the individual; that indiscriminate use of such devices in law enforcement raises grave constitutional questions under the Fourth and Fifth Amendments; and that these considerations impose a heavier responsibility on this Court in its supervision of the fairness of procedures in the federal court system." *Id.* at 441. These "fantastic advances" continue, and are giving the police access to surveillance techniques that are ever cheaper and ever more effective. Remember the beeper in *Knotts?* "Officers installed a beeper inside a five-gallon container of chloroform ... [and] followed the car in which the chloroform had been placed, maintaining contact by using both visual surveillance and a monitor which received the signals sent from the beeper." *United States v. Knotts, supra,* 460 U.S. at 278. That was only a modest improvement over following a car by means of unaided human vision.

***4** Technological progress poses a threat to privacy by enabling an extent of surveillance that in earlier times would have been prohibitively expensive. Whether and what kind of restrictions should, in the name of the Constitution, be placed on such surveillance when used in routine criminal enforcement are momentous issues that fortunately we need not try to resolve in this case. So far as appears, the police of Polk County (a rural county in northwestern Wisconsin), where the events of this case unfolded, are not engaged in mass surveillance. They do GPS tracking only when they have a suspect in their sights. They had, of course, abundant grounds for suspecting the defendant. Should government someday decide to institute programs of mass surveillance of vehicular movements, it will be time enough to decide whether the Fourth Amendment should be interpreted to treat such surveillance as a search. Cf. *Zurcher v. Stanford Daily, supra,* 436 U.S. at 566.

Affirmed.

(2) THE USE OF FBI ELECTRONIC SURVEILLANCE EQUIPMENT IN **JOINT CASES** WHERE STATE AND LOCAL LAW ENFORCEMENT AGENCIES OBTAINED AUTHORITY FOR ITS USE (SEE MIOG, PART 2, 10-10.3 (8).) (RCU)

| (a) A JOINT CASE, for purposes of this section, is an investigation in which there exists significant FBI interest in the subject or subjects of a local investigation and substantial FBI investigative resources have been utilized and/or will be utilized in the planned investigation with the local agency. (RCU)

| **(b) FBIHQ authority MUST be obtained prior to any use of FBI electronic surveillance equipment or personnel in furtherance of any order or authority obtained by state or local law enforcement agencies.** Should approval be granted for such use, the pertinent local or state order or authority MUST contain specific language authorizing FBI participation and specifying whether the assistance is for installation, monitoring, or whatever is required. (RCU)

| (c) In requesting FBIHQ authority, the field office is to set forth the following information: (RCU)

| 1. A synopsis of the investigation conducted to date by FBI and the local agency involved, to include the date the FBI
| case was opened, as well as when the joint investigation was initiated. (RCU)

| 2. the specific SAC comments as to the value of the assistance to the FBI investigation and extent of federal control
| over local electronic surveillance. (RCU)

| 3. the exact nature of equipment to be utilized and technical assistance required, and whether the equipment is on
| hand in the requesting division. (RCU)

b7E

| 4. the specific comments of the [redacted] as to the complexity of the equipment and the ability of the
| local agency to properly utilize technical equipment requested. (RCU)

| 5. that the local agency has valid legal authority under state or local law to conduct the electronic
| surveillance for which equipment will be utilized, to include citation of the specific statute; (RCU)

| 6. that the Chief Division Counsel or the Assistant U.S. Attorney has reviewed the affidavits and orders to be
| filed and concurs in their sufficiency; and, (RCU)

| 7. that FBI policy in limiting disclosure as set forth in Part 2, Sections 10-10.13 and 10-10.16, of this manual, will
| be honored in any subsequent local proceedings. (RCU)

CELLSITE-20517

CELL/OTD 006370

| The above information is to be provided by appropriate communication to the attention of the Operational Technology Division, as well as to either the Criminal Investigative Division or the [redacted] as appropriate. (RCU) b7D

(d) Any request for FBI assistance in the execution of a locally obtained court order which requires [redacted] will be handled separately and will require significant justification. Emergency requests for such | assistance are to be discouraged and likely will NOT be approved. (RCU)

62-3.3 Policy

(1) Upon receipt of requests for investigation from local or state law enforcement agencies involving matters in which there is no FBI jurisdictional interest, the FBI's cooperative role will be limited to the acquisition of records or information from the criminal files of local or state law enforcement agencies or records of nongovernmental organizations and concerns and other governmental agencies.

(a) Records or information are defined as material normally available to law enforcement agencies which can be obtained without a court order.
(b) When obtaining material outlined above, dissemination authority must be obtained from that agency providing the records/information, when appropriate.
(2) In addition to record gathering and dissemination noted above, [redacted] b7E

(4) Domestic Police Cooperation matters received in the field should be opened on an individual case basis, the subject of the record indexed to the general indices, resulting disclosures recorded in accordance with Privacy Act requirements and maintained in accordance with existing instructions pertaining to the destruction of field office files and records, MAOP, Part II, 2-4.5.
(5) SACs may approve use of FBI resources on behalf of local and state agencies providing such action falls within the above guidelines. No communication need be

CELLSITE-20520
CELL/OTD 006373

forwarded to FBIHQ advising of the initiation of a Domestic Police Cooperation investigation.

(6) Name check requests for a review of pertinent information contained in our central records system received by FBIHQ from authorized state and local criminal justice agencies will be | processed by the|Executive Agencies Dissemination|Unit, Information|Management Division, in accordance with MAOP, Part II,9-3. Completed responses will be returned to the respective field office which covers the territory of the submitting agency for appropriate dissemination.
(7) Domestic Police Cooperation cases are not to be opened in the field for the purpose of conducting foreign inquiries through Interpol. All state and local law enforcement agencies in the United States have direct access to the United States National Central Bureau (USNCB), Interpol, by mail or via the National Law Enforcement Telecommunications System (NLETS). The USNCB mailing address is:Interpol, U.S. Department of Justice, Washington, D.C. 20530. The NLETS ORI is "DCINTER0/0/."

This authority appears to also be codified by Regulation at 28 CFR 0.85(j)

See also Part I, Section 184-1 Investigative Authority

2) Under DOJ guidelines, the FBI's role in Domestic Police Cooperation, see this manual, Part 1, Section 62, entitled "Domestic Police Cooperation," is limited to: (1) FBI record checks; (2) record checks of other governmental agencies, nongovernmental organizations and concerns; (3) record checks of criminal files of local or state law enforcement agencies; (4) verifying the location of an individual whose interview is desired by local authorities; and (5) acting in a liaison capacity between local law enforcement agencies to facilitate one agency handling the investigative requests of another [redacted] b5 b7E

[redacted]

[redacted]

(g) No Federal Bureau of Investigation personnel may be used to ***install the equipment or participate in the surveillance***, unless deemed necessary ***and authorized by the Director or his designee.*** This restriction does not prohibit maintenance and of the equipment when not installed.

the AG Order also expressly states that:

i The Director may delegate his authority to a designated representative ***(not lower than an appropriate Headquarters-level Section Chief)*** to approve loans of electronic surveillance equipment to state and local law enforcement agencies

Title: AMENDMENT TO RULE 41
FEDERAL RULES OF CRIMINAL PROCEDURE
EFFECTIVE DECEMBER 1, 2006

Synopsis: To advise field offices of an amendment to Rule 41 of the Federal Rules of Criminal Procedure, which addresses procedures for issuing tracking device warrants, and became effective December 1, 2006.

Details: Effective December 1, 2006, Rule 41 of the Federal Rules of Criminal Procedure was amended to reflect procedures for issuing tracking device warrants (copy is attached). Amendments to the Advisory Committee Notes state that the Committee "did not intend by this amendment to expand or contract the definition of what might constitute a tracking device." See F.R.Crim.P 41(b) advisory committee's note. The Advisory Committee indicated that the changes to Rule 41(b) were intended to provide procedural guidance for judicial officers who were asked to issue tracking device warrants. The Committee Notes indicate that the amendment "reflects the view that if the officers intend to install or use the device in a constitutionally protected area, they must obtain judicial approval to do so. If, on the other hand, the officers intend to install and use the device without implicating any Fourth Amendment rights, there is no need to obtain a warrant." Id. The Committee Notes also recognize that 18 U.S.C. § 3117, "does not specify the standard an applicant must meet to install a tracking device" and state that the "amendment to Rule 41 does not resolve this issue or hold that such warrants may issue only on a showing of probable cause. Instead, it simply provides that if probable cause is shown, the magistrate judge must issue the warrant." See F.R.Crim.P 41(d) advisory committee's note.

Federal Rules of Criminal Procedure, Rule 41

(a) Scope and Definitions.

(1) Scope. This rule does not modify any statute regulating search or seizure, or the issuance and execution of a search warrant in special circumstances.

(2) Definitions. The following definitions apply under this rule:

(A) "Property" includes documents, books, papers, any other tangible objects, and information.

(B) "Daytime" means the hours between 6:00 a.m. and 10:00 p.m. according to local time.

(C) "Federal law enforcement officer" means a government agent (other than an attorney for the government) who is engaged in enforcing the criminal laws and is within any category of officers authorized by the Attorney General to request a search warrant.

(D) "Domestic terrorism" and "international terrorism" have the meanings set out in 18 U.S.C. § 2331.

(E) "Tracking device" has the meaning set out in 18 U.S.C. §3117(b).[4]

(b) Authority to Issue a Warrant. At the request of a federal law enforcement officer or an attorney for the government:

(1) a magistrate judge with authority in the district - or if none is reasonably available, a judge of a state court of record in the district - has authority to issue a warrant to search for and seize a person or property located within the district;

(2) a magistrate judge with authority in the district has authority to issue a warrant for a person or property outside the district if the person or property is located within the district when the warrant is issued but might move or be moved outside the district before the warrant is executed; and

---

[4] A "tracking device" is defined to mean "an electronic or mechanical device which permits the tracking of the movement of a person or object." 18 U.S.C. § 3117(b).

CELL/OTD 006389

CELLSITE-20536

(3) a magistrate judge - in an investigation of domestic terrorism or international terrorism - with authority in any district in which activities related to the terrorism may have occurred has authority to issue a warrant for a person or property within or outside that district; and

(4) a magistrate judge with authority in the district has authority to issue a warrant to install within the district a tracking device; the warrant may authorize use of the device to track the movement of a person or property located within the district, outside the district, or both.

(c) Persons or Property Subject to Search or Seizure. A warrant may be issued for any of the following:

(1) evidence of a crime;

(2) contraband, fruits of crime, or other items illegally possessed;

(3) property designed for use, intended for use, or used in committing a crime; or

(4) a person to be arrested or a person who is unlawfully restrained.

(d) Obtaining a Warrant.

(1) In General. After receiving an affidavit or other information, a magistrate judge - or if authorized by Rule 41(b) a judge of a state court of record-must issue the warrant if there is probable cause to search for and seize a person or property or to install and use a tracking device.

(2) Requesting a Warrant in the Presence of a Judge.

(A) Warrant on an Affidavit. When a federal law enforcement officer or an attorney for the government presents an affidavit in support of a warrant, the judge may require the affiant to appear personally and may examine under oath the affiant and any witness the affiant produces.

(B) Warrant on Sworn Testimony. The judge may wholly or partially dispense with a written affidavit and base a warrant on sworn testimony if doing so is reasonable under the circumstances.

(C) Recording Testimony. Testimony taken in support of a warrant must be recorded by a court reporter or by a suitable recording

CELL/OTD 006390

CELLSITE-20537

device, and the judge must file the transcript or recording with the clerk, along with any affidavit.

(3) Requesting a Warrant by Telephonic or Other Means.

(A) In General. A magistrate judge may issue a warrant based on information communicated by telephone or other reliable electronic means.

(B) Recording Testimony. Upon learning that an applicant is requesting a warrant under Rule 41(d)(3)(A), a magistrate judge must:

(i)place under oath the applicant and any person on whose testimony the application is based; and

(ii) make a verbatim record of the conversation with a suitable recording device, if available, or by a court reporter, or in writing.

(C) Certifying Testimony. The magistrate judge must have any recording or court reporter's notes transcribed, certify the transcription's accuracy, and file a copy of the record and the transcription with the clerk. Any written verbatim record must be signed by the magistrate judge and filed with the clerk.

(D) Suppression Limited. Absent a finding of bad faith, evidence obtained from a warrant issued under Rule 41(d)(3)(A) is not subject to suppression on the ground that issuing the warrant in that manner was unreasonable under the circumstances.

(e) Issuing the Warrant.

(1) In General. The magistrate judge or a judge of a state court of record must issue the warrant to an officer authorized to execute it.

(2) Contents of the Warrant.

(A) Warrant to Search for and Seize a Person or Property. Except for a tracking-device warrant, the warrant must identify the person or property to be searched, identify any person or property to be seized, and designate the magistrate judge to whom it must be returned. The warrant must command the officer to:

(i) execute the warrant within a specified time no longer than 10 days;

CELL/OTD 006391
CELLSITE-20538

(ii) execute the warrant during the daytime, unless the judge for good cause expressly authorizes execution at another time; and

(iii) return the warrant to the magistrate judge designated in the warrant.

(B) Warrant for a Tracking Device. A tracking-device warrant must identify the person or property to be tracked, designate the magistrate judge to whom it must be returned, and specify a reasonable length of time that the device may be used. The time must not exceed 45 days from the date the warrant was issued. The court may, for good cause, grant one or more extensions for a reasonable period not to exceed 45 days each. The warrant must command the officer to:

(i) complete any installation authorized by the warrant within a specified time no longer than 10 calendar days;

(ii) perform any installation authorized by the warrant during the daytime, unless the judge for good cause expressly authorizes installation at another time; and

(iii) return the warrant to the judge designated in the warrant.

(3) Warrant by Telephonic or Other Means. If a magistrate judge decides to proceed under Rule 41(d)(3)(A), the following additional procedures apply:

(A) Preparing a Proposed Duplicate Original Warrant. The applicant must prepare a "proposed duplicate original warrant" and must read or otherwise transmit the contents of that document verbatim to the magistrate judge.

(B) Preparing an Original Warrant. If the applicant reads the contents of the proposed duplicate original warrant, the magistrate judge must enter those contents into an original warrant. If the applicant transmits the contents by reliable electronic means, that transmission may serve as the original warrant.

(C) Modification. The magistrate judge may modify the original warrant. The judge must transmit any modified warrant to the applicant by reliable electronic means under Rule 41(e)(3)(D) or direct the applicant to modify the proposed duplicate original warrant accordingly.

CELL/OTD 006392 CELLSITE-20539

(D) Signing the Warrant. Upon determining to issue the warrant, the magistrate judge must immediately sign the original warrant, enter on its face the exact date and time it is issued, and transmit it by reliable electronic means to the applicant or direct the applicant to sign the judge's name on the duplicate original warrant.

(f) Executing and Returning the Warrant.

(1) Warrant to Search for and Seize a Person or Property.

(A) Noting the Time. The officer executing the warrant must enter it on the exact date and time it was executed.

(B) Inventory. An officer present during the execution of the warrant must prepare and verify an inventory of any property seized. The officer must do so in the presence of another officer and the person from whom, or from whose premises, the property was taken. If either one is not present, the officer must prepare and verify the inventory in the presence of at least one other credible person.

(C) Receipt. The officer executing the warrant must give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken or leave a copy of the warrant and receipt at the place where the officer took the property.

(D) Return. The officer executing the warrant must promptly return it-together with a copy of the inventory-to the magistrate judge designated on the warrant. The judge must, on request, give a copy of the inventory to the person from whom, or from whose premises, the property was taken and to the applicant for the warrant.

(2) Warrant for a Tracking Device.

(A) Noting the Time. The officer executing a tracking-device warrant must enter on it the exact date and time the device was installed and the period during which it was used.

(B) Return. Within 10 calendar days after the use of the tracking device has ended, the officer executing the warrant must return it to the judge designated in the warrant.

(C) Service. Within 10 calendar days after the use of the tracking device has ended, the officer executing a tracking device warrant must serve a copy of the warrant on the person who

CELL/OTD 006393

CELLSITE-20540

was tracked or whose property was tracked. Service may be accomplished by delivering a copy to the person who, or whose property, was tracked; or by leaving a copy at the person's residence or usual place of abode with an individual of suitable age and discretion who resides at that location and by mailing a copy to the person's last known address. Upon request of the government, the judge may delay notice as provided in Rule 41(f)(3).

(3) Delayed Notice. Upon the government's request, a magistrate judge-or if authorized by Rule 41(b), a judge of a state court of record-may delay any notice required by this rule if the delay is authorized by statute.

(g) Motion to Return Property. A person aggrieved by an unlawful search and seizure of property or by the deprivation of property may move for the property's return. The motion must be filed in the district where the property was seized. The court must receive evidence on any factual issue necessary to decide the motion. If it grants the motion, the court must return the property to the movant, but may impose reasonable conditions to protect access to the property and its use in later proceedings.

(h) Motion to Suppress. A defendant may move to suppress evidence in the court where the trial will occur, as Rule 12 provides.

(i) Forwarding Papers to the Clerk. The magistrate judge to whom the warrant is returned must attach to the warrant a copy of the return, of the inventory, and of all other related papers and must deliver them to the clerk in the district where the property was seized.

Hi guys,

After reading the below e-mail I have the following question:

I recently read an article where a guy was charged criminally for tracking his ex-girlfriend with a cell phone he slapped on her vehicle. Honestly, I'm not sure what violation was used to charge this guy.

I have been working closely with OTD and the WITT members on this and Improvements have been made in the approval process to support the I'm not sure of OTD's statistical accomplishments, but WITT's accomplishments are included below. Most notable (outside of arrest stats) are the number of victims recovered. As you are well aware, these cases move fast.

WITT Tracking Cases.xls

WITT STAT CHART.wpd

I've closely coordinated with OTD UC on this issue numerous times. SAC approval has been the standard recently as long as WITT personnel and the

Additionally, I've previously been advised by ASC (OTD) that can be approved by SACs as long as

Also. I am going to send all WITT personnel an email asking them to FORMALLY brief their SAC's and SSA's on WITT capabilities. This way your EC and a personal brief should address any future requirements and it will be fresh in the minds of the managers.. Please send me all the names and offices of the WITT personnel for inclusion. I will ask that in the offices where we have both capabilities that they do the brief together.

I have been working closely with OTD and the WITT members on this and Improvements have been made in the approval process to support the I'm not sure of OTD's statistical accomplishments, but WITT's accomplishments are included below. Most notable (outside of arrest stats) are the number of victims recovered. As you are well aware, these cases move fast.

<< File: WITT Tracking Cases.xls >> << File: WITT STAT CHART.wpd >>
I've closely coordinated with OTD UC on this issue numerous times. SAC approval has been the standard recently as long as WITT personnel and the

Also. I am going to send all WITT personnel an email asking them to FORMALLY brief their SAC's and SSA's on WITT capabilities. This way your EC and a personal brief should address any future requirements and it will be fresh in the minds of the managers.. Please send me all the names and offices of the [redacted] WITT personnel for inclusion. I will ask that in the offices where we have both capabilities that they do the brief together.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI) Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition

b3
b7E

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(U) is responsible for providing the FBI with

The FBI's Wireless Intercept and Tracking Team (WITT) plays a critical role

(S)

b1
b3
b7E

(U)

~~SECRET~~

$XXXXXX.00. Requisition #E00XXXX, in the amount of $XXXXXX.00 has been submitted to fund the requirement.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

b1
b3

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b3
b7E

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A

STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [redacted] b3 b7E [redacted] that [redacted] can provide.

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

OPINION OF THE COURT

CELL/OTD 013215

CELLSITE-18061

SLOVITER, *Circuit Judge*.

The United States ("Government") applied for a court order pursuant to a provision of the Stored Communications Act, 18 U.S.C. § 2703(d), to compel an unnamed cell phone provider to produce a customer's "historical cellular tower data," also known as cell site location information or "CSLI." App. at 64. The Magistrate Judge ("MJ") denied the application. *See In re Application of the United States for an Order Directing a Provider of Elec. Commc'n Serv. to Disclose Records to the Gov't*, 534 F. Supp. 2d 585, 616 (W.D. Pa. 2008) (hereafter "*MJOp.*"). In doing so, the MJ wrote an extensive opinion that rejected the Government's analysis of the statutory language, the legislative history, and the Government's rationale for its request. On the Government's appeal to the District Court, the Court recognized "the important and complex matters presented in this case," but affirmed in a two page order without analysis. *In re Application of the United States for an Order Directing a Provider of Elec. Commc'n Serv. to Disclose Records to the Gov't*, No. 07-524M, 2008 WL 4191511, at *1 (W.D. Pa. Sept. 10, 2008). The Government appeals.

We have de novo review. *See DIRECTV Inc. v. Seijas*, 508 F.3d 123, 125 (3d Cir. 2007). This appeal gives us our first opportunity to review whether a court can deny a Government application under 18 U.S.C. § 2703(d) after the Government has satisfied its burden of proof under that provision, a task that to our knowledge has not been performed by any other court of appeals.[1]

---

[1] Because the Government's application was *ex parte*, there was no adverse party to review or oppose it. However, we received amici briefs in support of affirmance of the District Court from a group led by the Electronic Frontier Foundation and joined by the American Civil Liberties Union, the ACLU-Foundation of Pennsylvania, Inc., and the Center for Democracy and Technology (hereafter jointly referred to as "EFF") and from Susan A. Freiwald, a law professor who teaches and writes in the area of cyberspace law and privacy law. Representatives on behalf of EFF

CELL-OTD 013219

CELLSITE-18062

I.

The growth of electronic communications has stimulated Congress to enact statutes that provide both access to information heretofore unavailable for law enforcement purposes and, at the same time, protect users of such communication services from intrusion that Congress deems unwarranted. The Stored Communications Act ("SCA"), was enacted in 1986 as Title II of the Electronic Communications Privacy Act of 1986 ("ECPA"), Pub. L. No. 99-508, 100 Stat. 1848 (1986) (codified as amended at 18 U.S.C. §§ 2701-2711 (2010)), which amended the Omnibus Crime Control and Safe Streets Act of 1968 (the "Wiretap Act"), Pub. L. No. 90-351, 82 Stat. 197 (1968).[2] In 1994, Congress enacted the Communications Assistance for Law Enforcement Act ("CALEA"), Pub. L. No. 103-414, 108 Stat. 4279, 4292 (1994) (codified in relevant part at 18 U.S.C. § 2703 (2010)), in part to amend the SCA.

The SCA is directed to disclosure of communication information by providers of electronic communications ("providers"). Section 2703(a) covers the circumstances in which a governmental entity may require providers to disclose the *contents* of wire or electronic communications in electronic storage; section 2703(b) covers the circumstances in which a governmental entity may require providers to disclose the *contents* of wire or electronic communications held by a remote computing service. *See* 18 U.S.C. § 2703(a)-(b). Neither of those sections is at issue here. The Government does not here seek disclosure of the contents of wire or electronic communications. Instead, the Government seeks what is

---

and Professor Freiwald participated in the proceedings below and at the oral argument before us. We are grateful to the amici for their interest in the issue and their participation in this matter.

[2] Title II of the ECPA was formally entitled "Stored Wire and Electronic Communications and Transactional Records Access." Pub. L. No. 99-508, 100 Stat. 1848 (1986).

CELL-OTD 013220
CELLSITE-18063

referred to in the statute as "a record or other information pertaining to a subscriber to or customer of such service," a term that expressly excludes the contents of communications. *Id.* § 2703(c)(1).

Section 2703(c)(1) of the SCA provides:

> **(c) Records concerning electronic communication service or remote computing service.--(1)** A governmental entity may require a provider of electronic communication service or remote computing service to disclose a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications) only when the governmental entity–
>
> **(A)** obtains a warrant issued using the procedures described in the Federal Rules of Criminal Procedure (or, in the case of a State court, issued using State warrant procedures) by a court of competent jurisdiction;
>
> **(B)** obtains a court order for such disclosure under subsection (d) of this section;
>
> **(C)** has the consent of the subscriber or customer to such disclosure;
>
> **(D)** submits a formal written request relevant to a law enforcement investigation concerning telemarketing fraud for the name, address, and place of business of a subscriber or customer of such provider, which subscriber or customer is engaged in telemarketing (as such term is defined in section 2325 of this title); or
>
> **(E)** seeks information under paragraph (2).

Id. The formal separation of these options in § 2703(c)(1)

CELL-OTD 013221 CELLSITE-18064

evinces Congressional intent to separate the requirements for their application. Each option in § 2703(c)(1) is an independently authorized procedure. The only options relevant to the matter before us are § 2703(c)(1)(A) for obtaining a warrant and § 2703(c)(1)(B) for obtaining a court order under § 2703(d).

A third option covered by the statute provides for the governmental entity to use "an administrative subpoena authorized by a Federal or State statute or a Federal or State grand jury or trial subpoena . . . ." *Id.* § 2703(c)(2). The subpoena option covers more limited information – such as a customer's name, address, and certain technical information[3] –

---

[3] Subsection (2) of § 2703(c) provides:

> **(2)** A provider of electronic communication service or remote computing service shall disclose to a governmental entity the–
>
> **(A)** name;
>
> **(B)** address;
>
> **(C)** local and long distance telephone connection records, or records of session times and durations;
>
> **(D)** length of service (including start date) and types of service utilized;
>
> **(E)** telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address; and
>
> **(F)** means and source of payment for such service (including any credit card or bank account number),
>
> of a subscriber to or customer of such service . . . .

CELL/OTD 013222

CELLSITE-18065

as distinguished from that referred to in § 2703(c)(1) which broadly covers "a record or other information pertaining to a subscriber or customer." The Government may seek such information under any of these three options *ex parte*, and no notice is required to a subscriber or customer. *See id.* § 2703(c)(3).

In submitting its request to the MJ in this case, the Government did not obtain either a warrant under § 2703(c)(1)(A), or a subpoena under § 2703(c)(2), nor did it secure the consent of the subscriber under § 2703(c)(1)(C). Instead it sought a court order as authorized by § 2703(c)(1)(B). The requirements for a court order are set forth in § 2703(d) as follows:

> **(d) Requirements for court order.**--A court order for disclosure under subsection (b) or (c) may be issued by any court that is a court of competent jurisdiction and shall issue only if the governmental entity *offers specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation.* In the case of a State governmental authority, such a court order shall not issue if prohibited by the law of such State. A court issuing an order pursuant to this section, on a motion made promptly by the service provider, may quash or modify such order, if the information or records requested are unusually voluminous in nature or compliance with such order otherwise would cause an undue burden on such provider.

Id. § 2703(d) (emphasis added).

---

18 U.S.C. § 2703(c)(2).

CELL/OTD 013223

CELLSITE-18066

As the Government notes in its reply brief, there is no dispute that historical CSLI is a "record or other information pertaining to a subscriber . . . or customer," and therefore falls within the scope of § 2703(c)(1). Instead, the dispute in this case concerns the standard for a § 2703(d) order. The Government states that the records at issue, which are kept by providers in the regular course of their business, include CSLI, i.e., the location of the antenna tower and, where applicable, which of the tower's "faces" carried a given call at its beginning and end and, inter alia, the time and date of a call.

The Government's application, which is heavily redacted in the Appendix, seeks

> historical cellular tower data i.e. transactional records (including, without limitation, call initiation and termination to include sectors when available, call handoffs, call durations, registrations and connection records), to include cellular tower site information, maintained with respect to the cellular telephone number [of a subscriber or subscribers whose names are redacted].

App. at 64. The Government does not foreclose the possibility that in a future case it will argue that the SCA may be read to authorize disclosure of additional material.

II.

The MJ concluded, "as a matter of statutory interpretation, that nothing in the provisions of the electronic communications legislation authorizes it [i.e., the MJ] to order a [provider's] covert disclosure of CSLI absent a showing of probable cause under Rule 41." *MJOp.*, 534 F. Supp. 2d at 610. Rule 41(d) of the Federal Rules of Criminal Procedure, referred to by the MJ, provides:

(d) Obtaining a Warrant.

CELL-OTO 013224

CELLSITE-18067

> **(1) In General.** After receiving an affidavit or other information, a magistrate judge--or if authorized by Rule 41(b), a judge of a state court of record--must issue the warrant if there is *probable cause* to search for and seize a person or property or to install and use a tracking device.

Fed. R. Crim. P. 41(d) (emphasis added).

The Government argues that 18 U.S.C. § 2703(d) on its face requires only that it make a showing of "specific and articulable facts establishing reasonable grounds" that the information sought is "relevant and material to an ongoing criminal investigation." It argues that it made such a showing in this case by the statement in its application that the requested cell phone records are relevant and material to an ongoing investigation into large-scale narcotics trafficking and various related violent crimes, that nothing more is required, and that the MJ erred in holding that something more, in particular probable cause, is required before issuing the requested order. Thus, the counterpoised standards are "probable cause," the standard for a Rule 41 warrant, and the "relevant and material" language in 18 U.S.C. § 2703(d).

We begin with the MJ's opinion. We note, preliminarily, that the MJ's opinion was joined by the other magistrate judges in that district. This is unique in the author's experience of more than three decades on this court and demonstrates the impressive level of support Magistrate Judge Lenihan's opinion has among her colleagues who, after all, routinely issue warrants authorizing searches and production of documents.

One of the principal bases for the MJ's conclusion that the Government must show probable cause for a § 2703(d) order was her explanation that probable cause is the standard which the Government has long been required to meet in order to obtain court approval for the installation and use by law enforcement agents of a device enabling the Government to record, or "track," movement of a person or thing. *See MJOp.*, 534 F. Supp. 2d at 613-14. The MJ also held that a cell phone is

CELL/OTD 013225

CELLSITE-18068

a "tracking device" under 18 U.S.C. § 3117, and that the Government cannot obtain information from a "tracking device" under § 2703(d). *See id.* at 601-02. A statute, incorporated by reference in § 2711(1) of the SCA, defines a "tracking device" as "an electronic or mechanical device which permits the tracking of the movement of a person or object." 18 U.S.C. § 3117(b).[4]

Section 2703(c) applies only to "provider[s] of electronic communication service[s]." 18 U.S.C. § 2703(c)(1). An "electronic communication service" is defined as "any service which provides to users thereof the ability to send or receive wire or electronic communications." *Id.* § 2510(15).[5] The

---

[4] We note that the Senate Report on the ECPA, which encompasses the SCA, defines "electronic tracking devices" as follows:

> These are one-way radio communication devices that emit a signal on a specific radio frequency. This signal can be received by special tracking equipment, and allows the user to trace the geographical location of the transponder. Such "homing" devices are used by law enforcement personnel to keep track of the physical whereabouts of the sending unit, which might be placed in an automobile, on a person, or in some other item.

S. Rep. No. 99-541, at 10 (1986), *reprinted in* 1986 U.S.C.C.A.N. 3555, 3564.

[5] "'[W]ire communication' means any aural transfer made in whole or in part through the use of facilities for the transmission of communications by the aid of wire, cable, or other like connection between the point of origin and the point of reception (including the use of such connection in a switching station) furnished or operated by any person engaged in providing or operating such facilities for the transmission of interstate or foreign communications or communications affecting interstate or foreign commerce . . . ." 18 U.S.C. § 2510(1).

CELL/OTD 013226

CELLSITE-18069

definition of "electronic communication" found in § 2510(12) excludes the communications from a "tracking device." *See id.* § 2510(12) ("'[E]lectronic communication' . . . does not include . . . any communication from a tracking device . . . ."). The MJ held that CSLI that allows the Government to follow where a subscriber was over a period of time is information from a tracking device deriving from an electronic communications service, and that therefore the Government cannot obtain that information through a § 2703(d) order. *See MJOp.*, 534 F. Supp. 2d at 589, 601. If CSLI could be characterized as information from a tracking device, and a tracking device is not covered by the SCA, this would be a relatively straightforward case because the Government, when seeking judicial permission to install or use a tracking device, must ordinarily obtain a warrant. *See* Fed. R. Crim. P. 41.

The Government vigorously objects to treating CSLI from cell phone calls as information from a tracking device. It

---

"'[E]lectronic communication' means any transfer of signs, signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic, photoelectronic or photooptical system that affects interstate or foreign commerce, but does not include --

> (A) any wire or oral communication;
>
> (B) any communication made through a tone-only paging device;
>
> (C) any communication from a tracking device (as defined in section 3117 of this title); or
>
> (D) electronic funds transfer information stored by a financial institution in a communications system used for the electronic storage and transfer of funds . . . ."

Id. § 2510(12).

CELL/OTD 013227

CELLSITE-18070

explains that cellular calls are wire communications, that tracking devices are excluded from the definition of electronic communications but not from the definition of wire communications, and that, in any event, it hasn't sought records from a tracking device in this case.

Section 2510(1) defines "wire communication" as "any aural transfer made in whole or in part through the use of facilities for the transmission of communications by the aid of wire, cable, or other like connection between the point of origin and the point of reception (including the use of such connection in a switching station) . . . ." 18 U.S.C. § 2510(1). The CSLI requested by the Government consists of records of information collected by cell towers when a subscriber makes a cellular phone call. That historical record is derived from a "wire communication" and does not itself comprise a separate "electronic communication." Thus, even if the record of a cell phone call does indicate generally where a cell phone was used when a call was made, so that the resulting CSLI was information from a tracking device, that is irrelevant here because the CSLI derives from a "wire communication" and not an "electronic communication." *See id.* § 2703(c) (providing that the Government may require "a provider of electronic communication service" to disclose records); *id.* § 2510(15) (defining "electronic communication service" to include providers of "wire *or* electronic communications") (emphasis added).[6]

---

[6] We acknowledge that numerous magistrate judges and district courts in other jurisdictions have addressed various issues regarding whether the Government can obtain prospective CSLI through the authorization found in § 2703(d) alone or in combination with the pen register and trap and trace statutes (the "hybrid" theory), and/or whether the Government can obtain historical CSLI through a § 2703(d) order. *See, e.g., MJOp.*, 534 F. Supp. 2d at 599-600 (discussing "hybrid" theory and citing cases). Some of those cases hold that the government cannot obtain prospective, i.e., realtime, CSLI through the "hybrid" theory. *See, e.g., In re Application of the United States for an Order: (1)*

CELL/OTD 013228

CELLSITE-18071

As with other issues under the SCA, the issue of the

Authorizing the Installation & Use of a Pen Register & Trap & Trace Device; (2) Authorizing the Release of Subscriber & Other Info.; & (3) Authorizing the Disclosure of Location-Based Servs., Nos. 1:06-MC-6,-7, 2006 WL 1876847, at *1 (N.D. Ind. July 5, 2006); *In re Application for Pen Register & Trap/Trace Device with Cell Site Location Auth.*, 396 F. Supp. 2d 747, 765 (S.D. Tex. 2005); *In re Application of the United States for an Order (1) Authorizing the Use of a Pen Register & a Trap & Trace Device & (2) Authorizing Release of Subscriber Info. &/or Cell Site Info.*, 396 F. Supp. 2d 294, 327 (E.D.N.Y. 2005). Others cases hold that the Government may obtain prospective cell site location information through the "hybrid" theory. *See, e.g., In re Application of the United States for an Order for Prospective Cell Site Location Info. on a Certain Cellular Tel.*, 460 F. Supp. 2d 448, 461 (S.D.N.Y. 2006); *In re Application of the United States for an Order for Disclosure of Telecomm. Records & Authorizing the Use of a Pen Register & Trap & Trace*, 405 F. Supp. 2d 435, 449 (S.D.N.Y. 2005). Most relevant here, at least two cases expressly hold that historical CSLI can be obtained through a § 2703(d) order. *See In re Application of the United States for an Order: (1) Authorizing the Installation & Use of a Pen Register & Trap & Trace Device, & (2) Authorizing Release of Subscriber & Other Info.*, 622 F. Supp. 2d 411, 418 (S.D. Tex. 2007); *In re Applications of the United States for Orders Pursuant to Title 18, U.S.C. § 2703(d)*, 509 F. Supp. 2d 76, 82 (D. Mass. 2007). Additionally, judges in at least two cases, *In re Applications*, 509 F. Supp. 2d at 81 n.11, and *In re Application of the United States for an Order for Disclosure of Telecommunications Records & Authorizing the Use of a Pen Register & Trap & Trace*, 405 F. Supp. 2d 435, 449 (S.D.N.Y. 2005), have specifically held that cell phones are not tracking devices under 18 U.S.C. § 3117. In contrast, Judge McMahon of the Southern District of New York held that CSLI is information from a tracking device under § 3117 and is therefore excluded from § 2703(c). *See In re Application of the United States for an Order Authorizing the Use of a Pen Register with Caller Identification Device Cell Site Location Auth. on a Cellular Tel.*, 2009 WL 159187, at *6-7 (S.D.N.Y. Jan. 13, 2009).

CELL/OTD 013229

CELLSITE-18072

standard by which the Government may obtain CSLI is not easily avoided. The MJ held that even if the CSLI here is included within the scope of § 2703(c)(1), the Government must show probable cause because a cell phone acts like a tracking device. The MJ's holding that probable cause was the correct standard appeared to be influenced by her belief that CSLI, and cell phone location information generally, make a cell phone act like a tracking device in that the CSLI discloses movement/location information. *See MJOp.*, 534 F. Supp. 2d at 609 ("In the case of movement/location information derived from an electronic device, the traditionally-applied legal standard has been a showing of probable cause; and nothing in the text, structure, purpose or legislative history of the SCA dictates a departure from that background standard as to either historic or prospective CSLI.").

In response, the Government notes that the historical CSLI that it sought in this case does not provide information about the location of the caller closer than several hundred feet. However, much more precise location information is available when global positioning system ("GPS") technology is installed in a cell phone. A GPS is a widely used device installed in automobiles to provide drivers with information about their whereabouts. The Government argues that it did not seek GPS information in this case.

Nonetheless, the Government does not argue that it cannot or will not request information from a GPS device through a § 2703(d) order. In fact, a publication of the Computer Crime and Intellectual Property Section of the U.S. Department of Justice contains a "Sample 18 U.S.C. § 2703(d) Application and Order" seeking "[a]ll records and other information relating to the account(s) and [the relevant] time period" including "telephone records, . . . caller identification records, cellular site and sector information, *GPS data*," and other information. U.S. Department of Justice, Computer Crime and Intellectual Property Section, Criminal Division, *Searching and Seizing Computers and Obtaining Electronic Evidence in Criminal Investigations*, 222 (3d ed. 2009) (emphasis added), *available at*

CELL/OTD 013230 CELLSITE-18073

http://www.cybercrime.gov/ssmanual/ssmanual2009.pdf (last visited Aug. 3, 2010).

We take no position whether a request for GPS data is appropriate under a § 2703(d) order. However, a § 2703(d) order requiring production of CSLI or GPS data could elicit location information. For example, historical CSLI could provide information tending to show that the cell phone user is generally at home from 7 p.m. until 7 a.m. the next morning (because the user regularly made telephone calls from that number during that time period). With that information, the Government may argue in a future case that a jury can infer that the cell phone user was at home at the time and date in question.

Amicus EFF points to the testimony of FBI Agent William B. Shute during a trial in the Eastern District of Pennsylvania in which he analyzed cell location records – seemingly the records of the towers used during calls – and concluded that it was "highly possible that [a cell phone user] was at her home," EFF App. at 20, and at another time that the user was "in the vicinity of her home," *id.* at 21. Later, Agent Shute testified that the cell phone records revealed a genuine probability that the individual was in another person's home. *Id.* at 25. Agent Shute also testified that at one point the phone was in an "overlap area" of less than eight blocks. *Id.* at 27-28. Moreover, Agent Shute said that he could track the direction that the individual was traveling based on when the individual switched from one tower to another. *Id.* at 21-22. According to Agent Shute, he has given similar testimony in the past. In other words, the Government has asserted in other cases that a jury should rely on the accuracy of the cell tower records to infer that an individual, or at least her cell phone, was at home.

The Government counters that Agent Shute acknowledged that historical cell site information provides only a rough indication of a user's location at the time a call was made or received. The Government correctly notes that Agent Shute did not state that the cell-site information "is reliable evidence" that the suspect was at home, as EFF asserts. EFF Br. at 15. Agent Shute only stated that it is "highly possible" that

CELL/OTD 013231CELLSITE-18074

the user was at home or in the vicinity.

This dispute may seem to be a digression, but it is not irrelevant. The MJ proceeded from the premise that CSLI can track a cell phone user to his or her location, leading the MJ to conclude that CSLI could encroach upon what the MJ believed were citizens' reasonable expectations of privacy regarding their physical movements and locations. The MJ regarded location information as "extraordinarily personal and potentially sensitive." *MJOp.*, 534 F. Supp. 2d at 586. We see no need to decide that issue in this case without a factual record on which to ground the analysis. Instead, we merely consider whether there was any basis for the MJ's underlying premises.

For that purpose, we refer to two opinions of the Supreme Court, both involving criminal cases not directly applicable here, but which shed some light on the parameters of privacy expectations. In *United States v. Knotts*, 460 U.S. 276 (1983), the Supreme Court held that the warrantless installation of an electronic tracking beeper/radio transmitter inside a drum of chemicals sold to illegal drug manufacturers, and used to follow their movements on public highways, implicated no Fourth Amendment concerns, as the drug manufacturers had no reasonable expectation of privacy while they and their vehicles were in plain view on public highways. The following year, in *United States v. Karo*, 468 U.S. 705 (1984), the Court held that where a beeper placed inside a chemical drum was then used to ascertain the drum's presence within a residence, the search was unreasonable absent a warrant supported by probable cause. More specifically, the Court stated that the "case . . . present[ed] the question whether the monitoring of a beeper in a private residence, a location not open to visual surveillance, violates the Fourth Amendment rights of those who have a justifiable interest in the privacy of the residence." *Karo*, 468 U.S. at 714. The *Karo* Court distinguished *Knotts*:

> [M]onitoring of an electronic device such as a beeper is, of course, less intrusive than a full-scale search, but it does reveal a critical fact about the interior of the premises that the Government is

CELL-OTD 013232

CELLSITE-18075

> extremely interested in knowing and that it could not have otherwise obtained without a warrant. The case is thus not like *Knotts*, for there the beeper told the authorities nothing about the interior of Knotts' cabin . . . . here, as we have said, the monitoring indicated that the beeper was inside the house, a fact that could not have been visually verified.

Id. at 715.

We cannot reject the hypothesis that CSLI may, under certain circumstances, be used to approximate the past location of a person. If it can be used to allow the inference of present, or even future, location, in this respect CSLI may resemble a tracking device which provides information as to the actual whereabouts of the subject. The *Knotts/Karo* opinions make clear that the privacy interests at issue are confined to the interior of the home. There is no evidence in this record that historical CSLI, even when focused on cell phones that are equipped with GPS, extends to that realm. We therefore cannot accept the MJ's conclusion that CSLI by definition should be considered information from a tracking device that, for that reason, requires probable cause for its production.

In sum, we hold that CSLI from cell phone calls is obtainable under a § 2703(d) order and that such an order does not require the traditional probable cause determination. Instead, the standard is governed by the text of § 2703(d), i.e., "specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation." 18 U.S.C. § 2703(d). The MJ erred in allowing her impressions of the general expectation of privacy of citizens to transform that standard into anything else. We also conclude that this standard is a lesser one than probable cause, a conclusion that, as discussed below, is supported by the legislative history.

CELL-OTD 013233 CELLSITE-18076

III.

On different occasions in the MJ's opinion, the MJ referred to her understanding that the "relevant legislative history indicates that Congress did not intend its electronic communications legislation to be read to require, on its authority, disclosure of an individual's location information . . . ." *MJOp.*, 534 F. Supp. 2d at 610. We also have reviewed the legislative history of the SCA and find no support for this conclusion.

The legislative history of the ECPA begins in 1985 with the introduction by Representative Kastenmeier of H.R. 3378. *See* 131 Cong. Rec. 24,397 (1985) (statement of Rep. Robert W. Kastenmeier). At the hearings on H.R. 3378, Senator Leahy explained that "the bill provides that law enforcement agencies must obtain a court order based on a reasonable suspicion standard before . . . being permitted access to records of an electronic communication system which concern specific communications." *Electronic Communications Privacy Act: Hearings on H.R. 3378 Before the Subcomm. on Courts, Civil Liberties, and the Admin. of Justice of the H. Comm. on the Judiciary*, 99th Cong. 7 (1985) (statement of Sen. Patrick Leahy). H.R. 3378 was not enacted.

The statute that was enacted the following year, the ECPA, was designed "to protect against the unauthorized interception of electronic communications. The bill amends the 1968 law [the Wiretap Act,] to update and clarify Federal privacy protections and standards in light of dramatic changes in new computer and telecommunications technologies." S. Rep. No. 99-541, at 1 (1986). The Senate Report states that Title II of the ECPA, the SCA, "addresses access to stored wire and electronic communications and transactional records. It is modeled after [legislation that] protects privacy interests in personal and proprietary information, while protecting the Government's legitimate law enforcement needs." *Id.* at 3; *see also* 132 Cong. Rec. 27,633 (1986) (statement of Sen. Leahy that the ECPA "provides standards by which law enforcement agencies may obtain access to . . . the records of an electronic communications system."). During House consideration and

CELL-OTD 013234

CELLSITE-18077

passage of the ECPA, Representative Moorhead explained that "the legislation establishes clear rules for Government access to new forms of electronic communications as well as the transactional records regarding such communications [and] . . . removes cumbersome procedures from current law that will facilitate the interests of Federal law enforcement officials." 132 Cong. Rec. 14,887 (1986) (statement of Rep. Carlos J. Moorhead).

Eight years later, in 1994, Congress amended the statute to keep pace with technological changes through CALEA, which altered the standard in 18 U.S.C. § 2703 to its current state. Pub. L. No. 103-414, 108 Stat. 4922 (1994). In Senate Report No. 103-402, which accompanied the CALEA legislation, it noted that the bill "also expands privacy and security protection for telephone and computer communications. The protections of the [ECPA] are extended to cordless phones and certain data communications transmitted by radio." S. Rep. No. 103-402, at 10 (1994).

The legislative history strongly supports the conclusion that the present standard in § 2703(d) is an "intermediate" one. For example, Senate Report No. 103-402 states that § 2703(d)

> imposes an intermediate standard to protect on-line transactional records. It is a standard higher than a subpoena, but not a probable-cause warrant. The intent of raising the standard for access to transactional data is to guard against "fishing expeditions" by law enforcement. Under the intermediate standard, the court must find, based on law enforcement's showing of facts, that there are specific and articulable grounds to believe that the records are relevant and material to an ongoing criminal investigation.

Id. at 31; *see also* H.R. Rep. No. 103-827, pt. 1, at 31 (1994) (noting same), *reprinted in* 1994 U.S.C.C.A.N. 3489, 3511. We are aware of no conflicting legislative history on the matter, and

CELL-OTD 015235
CELLSITE-18078

we will accept the intermediate standard as applicable to all attempts to obtain transaction records under § 2703(d).

In its interpretation of the standard to be applied to § 2703(d) orders, the MJ referred to the testimony of then-FBI Director Louis Freeh supporting the passage of CALEA. *See MJOp.*, 534 F. Supp. 2d at 596-97 (citing *Digital Telephony and Law Enforcement Access to Advanced Telecommunications Technologies and Services: Joint Hearings on H.R. 4922 and S. 2375 Before the Subcomm. on Technology and the Law of the S. Comm. on the Judiciary and the Subcomm. on Civil and Constitutional Rights of the H. Comm. on the Judiciary*, 103d Cong. 2, 22-23, 27-29 (1994) (statement of Louis J. Freeh, Director, Federal Bureau of Investigation) ("Freeh Testimony")). The MJ described Director Freeh's testimony as follows:

> Freeh addressed Congress' concern that with advances in cell phone technology, law enforcement could obtain-by CSLI-information of an individual's physical movement previously obtainable only through visual surveillance or the covert installation of a radio-wave transmitter. During the course of his testimony, Director Freeh reassured Congress that law enforcement was not attempting to obtain via the 1994 enactments, or to otherwise alter the standards applicable to, movement/location information.

Id. at 596.

Director Freeh's testimony, referred to by the MJ, does not provide support for the MJ's conclusion that a warrant is required to obtain CSLI. Director Freeh's testimony regarding allegations of "tracking" persons focused on the Government's ability to obtain information through a pen register or trap and trace device, which is governed by a different, and lower, standard than that applicable to a § 2703(d) order. *See* Freeh Testimony at 33. To obtain information from pen register and trap and trace devices, the Government need only certify "that the information likely to be obtained by such installation and use

CELL-OTD 013236
CELLSITE-18079

is relevant to an ongoing criminal investigation." 18 U.S.C. § 3123(a)(1). In contrast, § 2703(d) requires "specific and articulable facts," "reasonable grounds to believe," and "material[ity]" to an ongoing criminal investigation, a higher standard. *Id.* § 2703(d). Thus, the protections that Congress adopted for CSLI in 47 U.S.C. § 1002(a)(2)[7] have no apparent relevance to § 2703(d), and the legislative history does not show that Congress intended to exclude CSLI or other location information from § 2703(d). Although the language of § 2703(d) creates a higher standard than that required by the pen register and trap and trace statutes, the legislative history provides ample support for the proposition that the standard is an intermediate one that is less stringent than probable cause.

IV.

Because we conclude that the SCA does not contain any language that requires the Government to show probable cause as a predicate for a court order under § 2703(d) and because we are satisfied that the legislative history does not compel such a result, we are unable to affirm the MJ's order on the basis set forth in the MJ's decision. The Government argues that if it presents a magistrate court with "specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation," 18 U.S.C. § 2703(d), the magistrate judge *must* provide the order and cannot demand an additional showing. The EFF disagrees, and argues that the requirements of § 2703(d) merely provide a floor – the minimum showing required of the Government to obtain the information – and that

---

[7] *See* 47 U.S.C. § 1002(a)(2)(B) ("with regard to information acquired solely pursuant to the authority for pen registers and trap and trace devices" a telecommunications carrier need not allow the government access to "call-identifying information . . . that may disclose the physical location of the subscriber (except to the extent that the location may be determined from the telephone number) . . . .").

CELL/OTD 013237
CELLSITE-18080

magistrate judges do have discretion to require warrants.

We begin with the text. Section § 2703(d) states that a "court order for disclosure under subsection (b) or (c) *may be* issued by any court that is a court of competent jurisdiction and *shall* issue *only if*" the intermediate standard is met. 18 U.S.C. § 2703(d) (emphasis added). We focus first on the language that an order "may be issued" if the appropriate standard is met. This is the language of permission, rather than mandate. If Congress wished that courts "shall," rather than "may," issue § 2703(d) orders whenever the intermediate standard is met, Congress could easily have said so. At the very least, the use of "may issue" strongly implies court discretion, an implication bolstered by the subsequent use of the phrase "only if" in the same sentence.

The EFF argues that the statutory language that an order can be issued "only if" the showing of articulable facts is made indicates that such a showing is necessary, but not automatically sufficient. EFF Br. at 4. If issuance of the order were not discretionary, the EFF asserts, the word "only" would be superfluous. *Id.* at 5. The EFF compares the use of the words "only if" with the clearly mandatory language of the pen register statute, 18 U.S.C. § 3123(a)(1), which states that a court "shall" enter an ex parte order "if" the court finds that information relevant to an ongoing criminal investigation would be found. In other words, the difference between "shall . . . if" (for a pen register) and "shall . . . only if" (for an order under § 2703(d)) is dispositive.

We addressed the effect of the statutory language "only . . . if" in the Anti-Head Tax Act, which provides that a "State or political subdivision of a State *may* levy or collect a tax on or related to a flight of a commercial aircraft or an activity or service on the aircraft *only if* the aircraft takes off or lands in the State or political subdivision as part of the flight." 49 U.S.C. § 40116(c) (emphasis added). In *Township of Tinicum v. United States Department of Transportation*, 582 F.3d 482 (3d Cir. 2009), we stated that the "phrase 'only if' describe[d] a necessary condition, not a sufficient condition," *id.* at 488 (citing

CELL/OTD 013238

CELLSITE-18081

California v. Hodari D., 499 U.S. 621, 627-28 (1991) (explaining that "only if" describes "a *necessary,* but not a *sufficient*, condition")), and that while a "necessary condition describes a prerequisite[,]" *id.*, a "sufficient condition is a guarantee[,]" *id.* at 489. Adopting the example of the baseball playoffs and World Series, we noted that while "a team may win the World Series *only if* it makes the playoffs . . . a team's meeting the necessary condition of making the playoffs does not guarantee that the team will win the World Series." *Id.* at 488. In contrast, "winning the division is a sufficient condition for making the playoffs because a team that wins the division is ensured a spot in the playoffs . . . [and thus] a team makes the playoffs *if* it wins its division." *Id.* at 489. The EFF's argument, essentially, is that our analysis of the words "only if" in § 2703(d) should mirror that in *Tinicum*.

This is a powerful argument to which the Government does not persuasively respond. Under the EFF's reading of the statutory language, § 2703(c) creates a "sliding scale" by which a magistrate judge can, at his or her discretion, require the Government to obtain a warrant or an order. EFF Br. at 6. As the EFF argues, if magistrate judges were required to provide orders under § 2703(d), then the Government would never be required to make the higher showing required to obtain a warrant under § 2703(c)(1)(A). *See id.*

The Government's only retort to the argument that it would never need to get a warrant under § 2703(c)(1)(A) if it could always get CSLI pursuant to an order under § 2703(d) is that the warrant reference in § 2703(c)(1)(A) is "alive and well" because a prosecutor can "at his or her option . . . employ a single form of compulsory process (a warrant), rather than issuing a warrant for content and a separate subpoena or court order for the associated non-content records." Appellant's Reply Br. at 14. In other words, the Government asserts that obtaining a warrant to get CSLI is a purely discretionary decision to be made by it, and one that it would make only if a warrant were, in the Government's view, constitutionally required. We believe it trivializes the statutory options to read the § 2703(c)(1)(A) option as included so that the Government may proceed on one

CELL/OTD 013239
CELLSITE-18082

paper rather than two.

In response to the EFF's statutory argument, the Government argues that the "shall issue" language is the language of mandate. It also asserts that without the word "only", the sentence would read that an order "may be issued by [a] court . . . and shall issue if the government" makes the correct showing. Appellant's Reply Br. at 12. The difficulty with the Government's argument is that the statute does contain the word "only" and neither we nor the Government is free to rewrite it.

The Government argues that when the statutory scheme is read as a whole, it supports a finding that a magistrate judge does not have "arbitrary" discretion to require a warrant. We agree that a magistrate judge does not have arbitrary discretion. Indeed, no judge in the federal courts has arbitrary discretion to issue an order. Orders of a magistrate judge must be supported by reasons that are consistent with the standard applicable under the statute at issue. Nonetheless, we are concerned with the breadth of the Government's interpretation of the statute that could give the Government the virtually unreviewable authority to demand a § 2703(d) order on nothing more than its assertion. Nothing in the legislative history suggests that this was a result Congress contemplated.[8]

Because the MJ declined to issue a § 2703(d) order on legal grounds without developing a factual record, she never performed the analysis whether the Government's affidavit even met the standard set forth in § 2703(d). The Government's position would preclude magistrate judges from inquiring into the types of information that would actually be disclosed by a

---

[8] We are puzzled by the Government's position. If, as it suggests, the Government needs the CSLI as part of its investigation into a large scale narcotics operation, it is unlikely that it would be unable to secure a warrant by disclosing additional supporting facts. In our experience, magistrate judges have not been overly demanding in providing warrants as long as the Government is not intruding beyond constitutional boundaries.

CELL/OTD 013240

CELLSITE-18083

cell phone provider in response to the Government's request, or from making a judgment about the possibility that such disclosure would implicate the Fourth Amendment, as it could if it would disclose location information about the interior of a home.

The Government argues that no CSLI can implicate constitutional protections because the subscriber has shared its information with a third party, i.e., the communications provider. For support, the Government cites *United States v. Miller*, 425 U.S. 435 (1976), in which the Supreme Court found that an individual's bank records were not protected by the Constitution because "all of the records [which are required to be kept pursuant to the Bank Secrecy Act,] pertain to transactions to which the bank was itself a party," *id.* at 441 (internal quotation and citation omitted), and "[a]ll of the documents obtained, including financial statements and deposit slips, contain only information voluntarily conveyed to the banks and exposed to their employees in the ordinary course of business," *id.* at 442.

The Government also cites *Smith v. Maryland*, 442 U.S. 735 (1979), in which the Supreme Court held that citizens have no reasonable expectation of privacy in dialed phone numbers because "a person has no legitimate expectation of privacy in information he voluntarily turns over to third parties," *id.*, at 744, and a phone call "voluntarily convey[s] numerical information to the telephone company and 'expose[s]' that information to its equipment in the ordinary course of business," *id.* at 744. The Court reasoned that individuals "assume[] the risk that the company w[ill] reveal to police the numbers . . . dialed . . . [and the] switching equipment that processed those numbers is merely the modern counterpart of the operator who, in an earlier day, personally completed calls for the subscriber." *Id.*

A cell phone customer has not "voluntarily" shared his location information with a cellular provider in any meaningful way. As the EFF notes, it is unlikely that cell phone customers are aware that their cell phone providers *collect* and store historical location information. Therefore, "[w]hen a cell phone user makes a call, the only information that is voluntarily and

CELL/OTD 013241

CELLSITE-18084

knowingly conveyed to the phone company is the number that is dialed and there is no indication to the user that making that call will also locate the caller; when a cell phone user receives a call, he hasn't voluntarily exposed anything at all." EFF Br. at 21.

The EFF has called to our attention an FCC order requiring cell phone carriers to have, by 2012, the ability to locate phones within 100 meters of 67% of calls and 300 meters for 95% of calls for "network based" calls, and to be able to locate phones within 50 meters of 67% of calls and 150 meters of 95% of calls for "hand-set" based calls. EFF Br. at 12 n.5 (citing 47 C.F.R. § 20.18(h)(1)(2008)). The record does not demonstrate whether this can be accomplished with present technology, and we cannot predict the capabilities of future technology. *See Kyllo v. United States*, 533 U.S. 27, 36 (2001) ("While the technology used in the present case was relatively crude, the rule we adopt must take account of more sophisticated systems that are already in use or in development."); *see also id.* ("the novel proposition that inference insulates a search is blatantly contrary to [*Karo*], where the police 'inferred' from the activation of a beeper that a certain can of ether was in the home.").

Although CSLI differs from information received from a beeper, which the Supreme Court held in *Karo* required a warrant before disclosure of information from a private home, the remarks of the Supreme Court in *Karo* are useful to contemplate, particularly in connection with the Government's extreme position. The Supreme Court stated:

> We cannot accept the Government's contention that it should be completely free from the constraints of the Fourth Amendment to determine by means of an electronic device, without a warrant and without probable cause or reasonable suspicion, whether a particular article-or a person, for that matter-is in an individual's home at a particular time. Indiscriminate monitoring of property that has been withdrawn from public view would present far too serious a threat to privacy

CELL/OTD 013242

CELLSITE-18085

> interests in the home to escape entirely some sort of Fourth Amendment oversight.

Karo, 468 U.S. at 716.

The Government is also not free from the warrant requirement merely because it is investigating criminal activity. A similar argument was rejected in *Karo* where the Court stated:

> We also reject the Government's contention that it should be able to monitor beepers in private residences without a warrant if there is the requisite justification in the facts for believing that a crime is being or will be committed and that monitoring the beeper wherever it goes is likely to produce evidence of criminal activity. Warrantless searches are presumptively unreasonable, though the Court has recognized a few limited exceptions to this general rule. *See, e.g., United States v. Ross*, 456 U.S. 798, 102 S. Ct. 2157, 72 L. Ed. 2d 572 (1982) (automobiles); *Schneckloth v. Bustamonte*, 412 U.S. 218, 93 S. Ct. 2041, 36 L. Ed. 2d 854 (1973) (consent); *Warden v. Hayden*, 387 U.S. 294, 87 S. Ct. 1642, 18 L. Ed. 2d 782 (1967) (exigent circumstances). The Government's contention that warrantless beeper searches should be deemed reasonable is based upon its deprecation of the benefits and exaggeration of the difficulties associated with procurement of a warrant. The Government argues that the traditional justifications for the warrant requirement are inapplicable in beeper cases, but to a large extent that argument is based upon the contention, rejected above, that the beeper constitutes only a minuscule intrusion on protected privacy interests. The primary reason for the warrant requirement is to interpose a "neutral and detached magistrate" between the citizen and "the officer engaged in the often competitive enterprise of ferreting out crime." *Johnson v. United States*,

CELL/OTD 013243

CELLSITE-18086

> 333 U.S. 10, 14, 68 S. Ct. 367, 369, 92 L. Ed. 436 (1948). Those suspected of drug offenses are no less entitled to that protection than those suspected of nondrug offenses. Requiring a warrant will have the salutary effect of ensuring that use of beepers is not abused, by imposing upon agents the requirement that they demonstrate in advance their justification for the desired search.

Id. at 717.

Similar reasoning lay behind the MJ's refusal to grant a § 2703(d) order. In the issue before us, which is whether the MJ may require a warrant with its underlying probable cause standard before issuing a § 2703(d) order, we are stymied by the failure of Congress to make its intention clear. A review of the statutory language suggests that the Government can proceed to obtain records pertaining to a subscriber by several routes, one being a warrant with its underlying requirement of probable cause, and the second being an order under § 2703(d). There is an inherent contradiction in the statute or at least an underlying omission. A warrant requires probable cause, but there is no such explicit requirement for securing a § 2703(d) order. We respectfully suggest that if Congress intended to circumscribe the discretion it gave to magistrates under § 2703(d) then Congress, as the representative of the people, would have so provided. Congress would, of course, be aware that such a statute mandating the issuance of a § 2703(d) order without requiring probable cause and based only on the Government's word may evoke protests by cell phone users concerned about their privacy. The considerations for and against such a requirement would be for Congress to balance. A court is not the appropriate forum for such balancing, and we decline to take a step as to which Congress is silent.

Because the statute as presently written gives the MJ the option to require a warrant showing probable cause, we are unwilling to remove that option although it is an option to be used sparingly because Congress also included the option of a § 2703(d) order. However, should the MJ conclude that a warrant

CELL/OTD 013244

CELLSITE-18087

is required rather than a § 2703(d) order, on remand it is imperative that the MJ make fact findings and give a full explanation that balances the Government's need (not merely desire) for the information with the privacy interests of cell phone users.

We again note that although the Government argues that it need not offer more than "specific and articulable facts showing that there are reasonable grounds to believe that the . . . information sought . . . [is] relevant and material to an ongoing criminal investigation," 18 U.S.C. § 2703(d), the MJ never analyzed whether the Government made such a showing. We leave that issue for the MJ on remand.

V.

For the reasons set forth, we will vacate the MJ's order denying the Government's application, and remand for further proceedings consistent with this opinion.

TASHIMA, Circuit Judge, concurring:

I concur in the result and in most of the reasoning of the majority opinion. I write separately, however, because I find the majority's interpretation of the discretion granted to a magistrate judge by 18 U.S.C. § 2703(d) troubling.

The majority begins its analysis of § 2703(d) correctly:

> In sum, we hold that CSLI from cell phone calls is obtainable under a § 2703(d) order and that such an order does not require the traditional probable cause determination. Instead, the standard is governed by the text of § 2703(d), i.e., "specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the record or other information sought, are relevant."

CELL/OTD 013245

CELLSITE-18088

Maj. Op. at 16-17 (quoting § 2703(d)). But the majority then appears to contradict its own holding later in its opinion, when it states "[b]ecause the statute as presently written gives the MJ the option to require a warrant showing probable cause, we are unwilling to remove that option although it is an option to be used sparingly because Congress also included the option of a § 2703(d) order." *Id.* at 28. Thus, the majority suggests that Congress did not intend to circumscribe a magistrate's discretion in determining whether or not to issue a court order, while at the same time acknowledging that "[o]rders of a magistrate judge must be supported by reasons that are consistent with the standard applicable under the statute at issue." *Id.* at 24. I do not believe that these contradictory signals give either magistrate judges or prosecutors any standards by which to judge whether an application for a § 2703(d) order is or is not legally sufficient.

Granting a court unlimited discretion to deny an application for a court order, even after the government has met statutory requirements, is contrary to the spirit of the statute. *Cf. Huddleston v. United States*, 485 U.S. 681, 688 (1988) (noting, in interpreting Federal Rule of Evidence 404(b), that the word "may" does not vest with the trial judge arbitrary discretion over the admissibility of evidence); The Federalist No. 78, p. 529 (J. Cooke ed. 1961) ("'To avoid an arbitrary discretion in the courts, it is indispensable that they should be bound down by strict rules and precedents, which serve to define and point out their duty in every particular case that comes before them.'").

As the majority notes, "a magistrate judge does not have arbitrary discretion. Indeed, no judge in the federal courts has arbitrary discretion to issue an order." Maj. Op. at 24. I respectfully suggest, however, that the majority's interpretation of the statute, because it provides *no* standards for the approval or disapproval of an application for an order under § 2703(d), does just that – vests magistrate judges with arbitrary and uncabined discretion to grant or deny issuance of § 2703(d)

CELL-OTD 013245

CELLSITE-18089

orders at the whim of the magistrate,[9] even when the conditions of the statute are met.

I would cabin the magistrate's discretion by holding that the magistrate may refuse to issue the § 2703(d) order here only if she finds that the government failed to present specific and articulable facts sufficient to meet the standard under § 2703(d) or, alternatively, finds that the order would violate the Fourth Amendment absent a showing of probable cause because it allows police access to information which reveals a cell phone user's location within the interior or curtilage of his home.[10] *See Kyllo v. United States*, 533 U.S. 27, 35-36 (2001); *United States v. Pineda-Moreno*, 2010 WL 3169573 (9th Cir. 2010) (Kozinski, C.J., dissenting from denial of rehearing en banc).

With this caveat as to the magistrate's duty and the scope of her discretion on remand, I concur in the majority opinion and in the judgment.[11]

---

[9] Unless the admonition that the magistrate's naked power should "be used sparingly," Maj. Op. at 28, is accepted as a meaningful and objectively enforceable guideline.

[10] Alternatively, the magistrate may condition her order by requiring minimization to exclude those portions which disclose location information protected by the Fourth Amendment, *i.e.*, within the home and its curtilage.

[11] I am also troubled by the majority's assumption, without any support in the record, that "[a] cell phone customer has not 'voluntarily' shared his location information with a cellular provider in any meaningful way." Maj. Op. at 25. In *Smith v. Maryland*, 442 U.S. 735 (1979), the Supreme Court held that "a person has no legitimate expectation of privacy in information he voluntarily turns over to third parties." *Id.* at 743-44. Subsequent cases in this fast-changing technological era have found that this is a fact-intensive inquiry. *Compare United States v. Maynard*, 2010 WL 3063788 (D.C. Cir. 2010) (holding that there is an expectation of privacy in long-term GPS surveillance records), *with U.S. Telecom Ass'n v. FCC*, 227 F.3d 450, 459 (D.C. Cir. 2000) (finding no legitimate expectation of privacy in information, including cell

CELL-OTD 013247

CELLSITE-18090

site location information, conveyed to the phone company in order to complete calls); *United States v. Forrester*, 512 F.3d 500, 510 (9th Cir. 2008) ("[E]-mail and Internet users have no expectation of privacy in the to/from addresses of their messages or the IP addresses of the websites they visit because they should know that this information is provided to and used by Internet service providers for the specific purpose of directing the routing of information.").

Like the magistrate's failure to find whether the government made a sufficient showing under § 2703(d), *see* Maj. Op. at 28 ("the MJ never analyzed whether the Government made such a showing"), I would also "leave [the expectation of privacy] issue for the MJ on remand," *id.* at 29, in the first instance, if determination of that issue becomes relevant.

GPS tracking

U.S. v. Maynard, 2010 WL 3063788 (D.C. Cir.). In this tracking device appeal, the government (acting without a warrant) installed a GPS tracking device on the defendant's jeep and thereby tracked his public movements for a period of four weeks. On appeal, the D.C. Circuit reversed the defendant's conviction, holding that this "long-term" GPS tracking violated the defendant's reasonable expectation of privacy and therefore required a warrant. In reaching this conclusion, the D.C. Circuit attempted to distinguish Seventh, Eighth, and Ninth Circuit precedent by claiming that these circuits relied on an overly broad interpretation of the Supreme Court's decision in *Knotts*. In the D.C. Circuit's view, *Knotts* addressed a limited issue – the use of a tracking device during a "discrete journey" – and "specifically reserved the question whether a warrant would be required in a case involving 'twenty-four hour surveillance.'" The D.C. Circuit then concluded that the extended use of a tracking device in this case was unconstitutional because the defendant had a reasonable expectation of privacy in "the totality of [his] movements," even if all of those movements occurred in public. The court offered two principal rationales for this conclusion. First, the defendant's movements over the course of a month were not "actually exposed to the public" because there was effectively no chance that anyone would observe all of his movements, even though they occurred in public. In reaching this conclusion, the court said that the relevant issue is not what the government could have done (e.g., a month of physical/visual surveillance), but rather "what a reasonable person expects another might actually do." Second, the court found that even if all of the defendant's individual movements were exposed to the public, the "whole of his movements" were not exposed, based on a "mosaic" theory that the "whole reveals more . . . than does the sum of its parts." According to the court, "prolonged surveillance of a person's movements may reveal an intimate picture of his life," including his routines and habits, and a reasonable person expects these movements to remain "disconnected and anonymous" – i.e., private. (Ellickson)

U.S. v. Pineda-Moreno, 2010 WL 3169573 (9th Cir.). In this tracking device appeal, the Ninth Circuit denied the defendant's petition for rehearing en banc, less than a week after the D.C. Circuit issued its controversial opinion in *Maynard*, which had criticized the panel decision in *Pineda-Moreno*. Five judges dissented from the denial of the en banc petition, including Judges Kozinski and Reinhardt, who wrote dissenting opinions (with Kozinski citing *Maynard* in passing). The panel decision in the case, issued in January 2010, found that the government did not violate the defendant's Fourth Amendment rights by attaching a warrantless tracking device to his car on seven occasions, including two occasions when the car was parked in the defendant's driveway. The panel also found that the government did not violate the defendant's Fourth Amendment rights when it used the tracking devices to "continuously monitor" the location of the defendant's car. (Ellickson)

Subject: Significant Guidance Document Data Call - Deadline March 16th

UNCLASSIFIED
NON-RECORD

Good Afternoon,

The revised Executive Order 12866 - Regulatory Planning and Review, signed January 18, 2007, requires Executive Branch agencies to provide copies of all "significant guidance documents" currently being circulated. Further, to provide a list of guidance documents whose determination of "significant" is uncertain and provide a recommendation as to whether the document should be so designated.

There are two hurdles a document must meet in order to be a "significant guidance document."

The first hurdle states that the "guidance document" is an agency statement of general applicability and future effect, other than a regulatory action, that sets forth a policy on a statutory, regulatory, or technical issue or an interpretation of a statutory or regulatory issue.

The second hurdle establishes the definition of a "significant guidance document" to be a guidance document disseminated to **regulated entities** or the **general public** that may reasonably be anticipated to:

(i) lead to an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(ii) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(iii) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or

(iv) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866, as further amended.

CELL/OTD 013352

CELLSITE-18129

Items which are specifically excluded as "significant guidance documents" are:

- legal advisory opinions for internal Executive Branch use and not for release (such as DOJ Legal Counsel opinions);
- briefs and other positions taken by agencies in investigations, pre-litigation, litigation, or other enforcement proceedings;
- speeches;
- editorials;
- media interviews;
- press materials;
- Congressional correspondence;
- guidance documents that pertain to military or foreign affairs function of the United States; (other than guidance on procurement or the import or export of non-defense articles and services);
- grant solicitations;
- warning letters;
- case or investigatory letters responding to complaints involving fact-specific determination;
- purely internal agency policies;
- guidance documents that pertain to the use, operation or control of a government facility;
- internal guidance documents directed solely to other Federal agencies; and
- any other category of significant guidance documents exempted by an agency head in consultation with the OIRA Administrator.

It is the belief of the Office of General Counsel (OGC) and the Corporate Policy Office (CPO) that "significant guidance documents" are more than likely never issued by the FBI or possibly in a rare occasion done by a specific program within the FBI. Therefore, in order to insure that we had fully complied with the request it was determined that FBI would request all FBIHQ divisions to make the determination as to whether "significant guidance documents" had been released. For example a guidance document was produced, for the telephone industry, with regards to complying with the specifications of CALEA.

By 3/16/2007, please provide to back to me a list and copy of all guidance documents. Negative responses are also required. The list should contain a description of each document, date, title, brief synopsis of the document and why the it was determined the document meets the threshold of "significant guidance document" or why the document is exempt from inclusion.

Thank you

Chief,

[redacted]

Attached is my response to the ODNI survey. It's the best I could do at such short notice, and I hope I answered the questions appropriatly. Perhaps [redacted] can take a shot at it afterwards if this is not what they are looking for. Two of the questions I could not answer, and I marked them with an N/A.

[redacted]

Please call my cell phone and leave a message as I'll be locked in a SCIF all day for most of the week. [redacted] has the lead on all admin matters (writing duties). [redacted] can handle operational issues if they come up.

Cc:
Subject: Proposals and Summaries for October 29

~~SECRET~~
RECORD 319O9-HQ-A1487622-OTD

b6
b7C

The first meeting for FY09 is scheduled for Wednesday, October 29 at 1:00 in the ERF Main Conference Room. b3
members include the Assistant Section Chiefs or designated representatives b5
Proposals reviewed at this meeting will be competing for the funding provided by the b6
and come from only two units, b7C

I am sending you the draft agenda showing the proposals to be reviewed. I am also including summaries of the b7E
6 proposals and the entire proposal text for 5. One proposal was partially funded in FY08 from the and was required to provide only a quad-chart summary with its request for FY09 second-increment funding.

I will also be providing the summaries to subject matter experts listed on the agenda. Feel free to have me add names to the list if there are others whom you wish to have participate in the October 29 meeting.

Thank you!

Statement of Work

[redacted] Wireless Intercept and Tracking Team Program

1.0 Introduction

1.1 Organization

This Statement of Work is for the provision of services to the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Operational Technology Division (OTD)

1.1.1 Identification and Address

United State Department of Justice
Federal Bureau of Investigation
Engineering Research Facility, Building 27958A
Quantico, VA 22135

1.2 Scope

The scope of this requirement includes [redacted] b3 b7E

[redacted]

1.3 Background

[redacted]

2.0 Task

2.1 This is an Indefinite Delivery/Infinite Quantity (IDIQ) Contract, anticipated to be awarded as an FBI Contract consisting of one base year, and two option years. The value of this contract will [redacted]

2.2 Procurement of Equipment and Services

Contractor will provide [redacted] The customer will initiate procurement requests via delivery tasking, and contractor invoicing will be accomplished through FBI Contracting Office personnel.

3.0 Administrative Considerations

3.1 Contact Persons

The FBI's Contracting Officer (CO), Contract Specialist (CS), and the Contracting Officer's Technical Representative (COTR) will perform the administration and monitoring of this Work. The COTR will provide all the technical assistance and clarification required, through completion of this Work. FBI contact persons for this Work are as follows:

3.1.1 FBI Contracting Officer (CO)

To be determined

3.1.2 FBI Contract Specialist (CS)

To be determined

3.1.3 Contracting Officer's Technical Representative (COTR)

(To be determined)
Contracting Officer's Technical Representative
Federal Bureau of Investigation (FBI)
Engineering Research Facility
Building # 27958A
Quantico, VA 22135

3.2 Period of Performance

The period of performance will commence from the date of task award to 12 months with one (2) 12-month options.

Justification for Other Than Full and Open Competition In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI) Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

The FBI's Wireless Intercept and Tracking Team (WITT)

(S)

b1
b3
b7E

(U) is requesting this sole source procurement with The proposed procurement is Requisition in the amount of has been submitted to fund the requirement.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

~~SECRET~~

(S)

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b1
b3
b7E

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION**

(U) See paragraph (5) above for facts

supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U//FOUO/LES) FINAL Delivery	(U//FOUO/LES) NLT 330 days upon award of OPTION YEAR
(U//FOUO/LES) SYSTEM Training	(U//FOUO/LES) Ongoing - Final - NLT 330 days after award of OPTION YEAR

(S//NF) Table 1: Delivery Schedule

3.2 (U) DELIVERY ITEM DESCRIPTIONS

(U) The following provides further descriptions of items described above in Table 1.

CELL/OTD 014863

CELLSITE-4090

- 3.2.1 (U//FOUO/LES) MONTHLY STATUS REPORTING - The vendor shall provide monthly status reporting in electronic and documented format to the FBI, which consists of at minimum information related to labor hours, other direct costs; details of work performed or project status, as well as the identification of any issues that need to be communicated to the FBI. The vendor shall provide a reporting format to the FBI at project inception, and receive concurrence on appropriate format of monthly status reports. Monthly status reports shall describe and reflect that status of developments and deliverables, to include scheduling issues, to enable the FBI to intervene and provide any direction as necessary.

- 3.2.2 (U//FOUO/LES

- 3.2.3 (U//FOUO/LES) TESTING, VERIFICATION, AND DEMONSTRATION
  - 3.2.3.1 (U//FOUO/LES) The vendor shall provide "access", for the FBI, to for testing and verification of requirements and characteristics, throughout the development life cycle, at the VENDOR facilities.
  - 3.2.3.2 (U//FOUO/LES) The vendor shall provide the FBI a TEST plan, which may be executed during testing of
  - 3.2.3.3 (U//FOUO/LES) Upon FINAL Delivery, as specified below, the vendor shall provide a demonstration of the final SYSTEM at a site designated by the FBI, which demonstrates an Demonstration should also include system setup and use, and overview of manuals or documentation that may be provided.

- 3.2.4 (S//NF

b1
b3
b7E

- 3.2.5 (U//FOUO/LES document – As described in section 2.1 of this document, the vendor shall deliver a documented plan to the FBI that details ongoing issues and costs associated with providing of the SYSTEM as is developed and delivered to the FBI at the end of the option year.

- 3.2.6 (U//FOUO/LES) [redacted] – As described in section 2.2.1 of this document, the vendor shall enable the [redacted] no later than eight (8) months upon the award of the option year.

- 3.2.7 (U//FOUO/LES) [redacted] DELIVERY – The vendor shall provide delivery of the [redacted] which includes the following:

  - [redacted]

b3
b7E

- 3.2.7 (U//FOUO/LES) SYSTEM TRAINING – The vendor shall provide training for [redacted] at vendor facility [redacted] Training shall be on-site at a location determined by the FBI for [redacted]

4. (U//FOUO/LES) OTHER REQUIREMENTS

(U) The following sections shall describe other requirements related to the development and delivery of the SYSTEM, to the FBI from the vendor, described in this STATEMENT OF WORK.

4.1 (U) PLACE OF PERFORMANCE

4.1.1 (U//FOUO/LES) Vendor development efforts will be conducted primarily within vendor business spaces. The Vendor shall be afforded access to FBI spaces for meetings, product

CELL/OTD 014865

CELLSITE-4092

demonstrations and general interaction with FBI personnel, pending proper passing of clearances and visit requests.

4.2 (U) GOVERNMENT FURNISHED EQUIPMENT

4.2.1 (U//FOUO/LES) Vendor shall provide the FBI with listing of required Government Furnished Equipment (GFE) in response to this SOW. GFE only is used to either levy costs associated with ODC, or provide access to FBI owned equipment that the vendor may not otherwise have access to. The FBI shall retain all ownership titles to GFE equipment, and the vendor shall provide accounting information during FBI inventory inspections. The FBI shall be afforded opportunities to provide an on-site inspection of GFE items, should the inspection process require visual inspection procedures.

4.3 (U) OTHER DIRECT COSTS (EQUIPMENT)

4.3.1 (U//FOUO/LES) The vendor shall be approved to purchase [redacted] to be delivered to the FBI. The vendor shall seek documented approval, from the FBI, on all [redacted] items prior to purchase. Documented approval shall include an itemized list of all costs associated with procurement of [redacted] The FBI shall retain ownership of all equipment purchases under ODC funds.

For Official Use Only

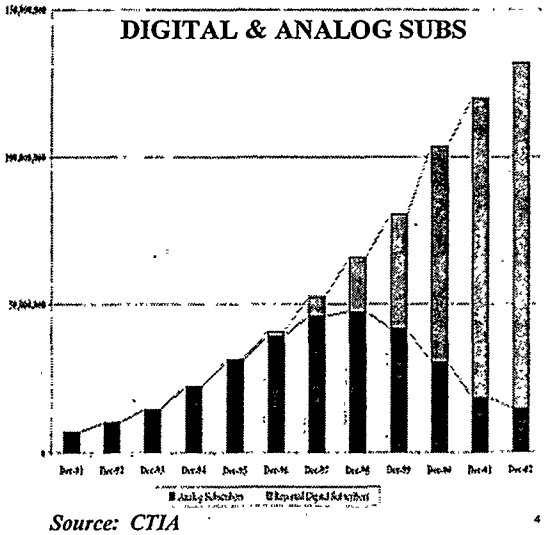
US Cellular Market

- 151.8 million subscribers (11/03)
- 147,719 Base-stations (6/03)
- More mobile than landline usage (10/02)
- Digital systems replacing Analog systems



Source: CTIA

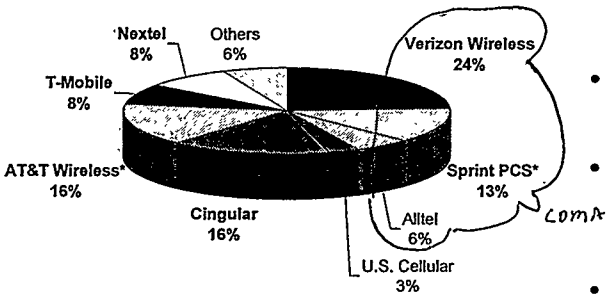
Service Provider Landscape

b7E

U.S. Carrier Market Share (2003Q3)



*Includes affiliates and resale

- Market dominated by 6 nationwide providers
- Few regional independents
- Others franchised or aligned with 'Big 6'
- Expect further consolidation

Introduction to the Mobile Phone Systems [redacted]

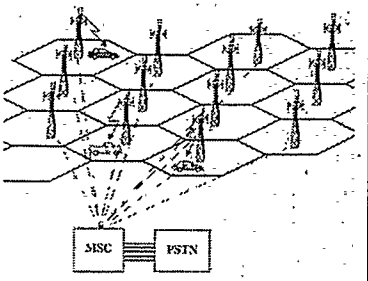
b7E

[redacted]

1

Overview: Cellular System Concept

- Cellular System allows the reuse of spectrum within a region by employing centrally connected base stations
- Each base station wirelessly connects to multiple mobiles within a designated geographic area (cell)
- Base stations connect to a Mobile Switching Center (MSC) and then to the Public Switched Telephone Network (PSTN)
- The system allows
  - Reuse of spectrum in regions, increasing the capacity of the system over a trunked radio system
  - Mobility of users in the system without loss of connectivity



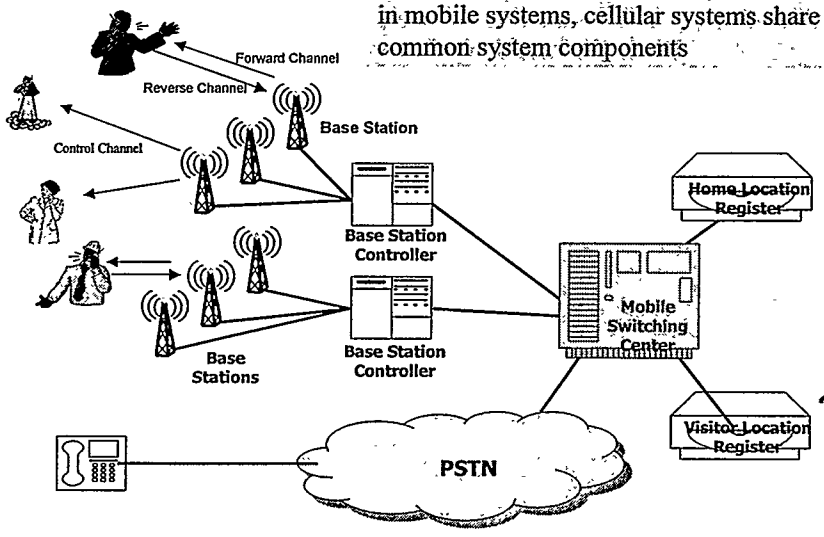
2

b7E

For Official Use Only

Overview: Cellular Components

While multiple access techniques are employed in mobile systems, cellular systems share common system components



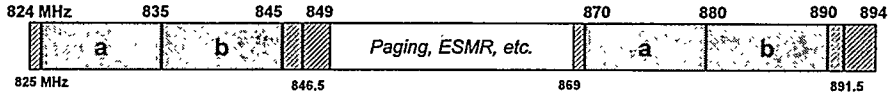
3

For Official Use Only

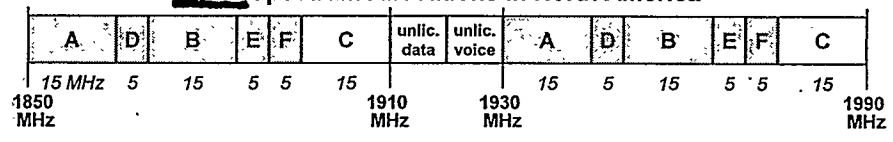
Cellular System: Frequency Bands

Communication between the mobiles and the network occur in two frequency bands in the United States*

Cellular Spectrum Allocations in North America



PCS Spectrum Allocations in North America



* Nextel's iDEN solution operates in the 806-824MHz and 851-869MHz frequency bands.

CELL/OTD 004326

CELLSITE-10913

For Official Use Only

Cellular System: RF Channels

Cellular and PCS frequency bands are subdivided into Radio Frequency (RF) channels for communication between base stations and mobiles

Access Technologies

There are currently five cellular technologies in use in the U.S. market

- AMPS (10% Market Share)
- TDMA (IS-136) (20%* Market Share)
- GSM (17% Market Share)
- CDMA (46% Market Share)
- iDEN (7% Market Share)

[redacted]

b7E

* Carriers are converting TDMA systems to GSM

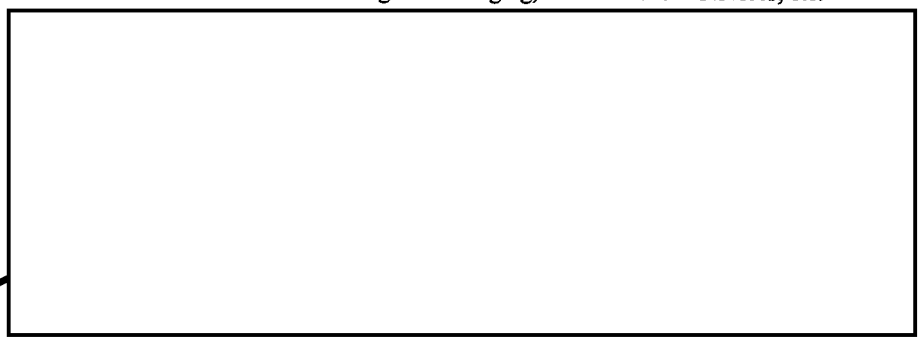
14

For Official Use Only

AMPS (Advanced Mobile Phone Service)

- Background
  - Initial U.S. cellular system
  - Reached feasible system capacity limits in mid 90s
- Limitations
  - Provides basic voice service
  - No additional services: Digital Messaging, Location based services, etc.

b3
b7E

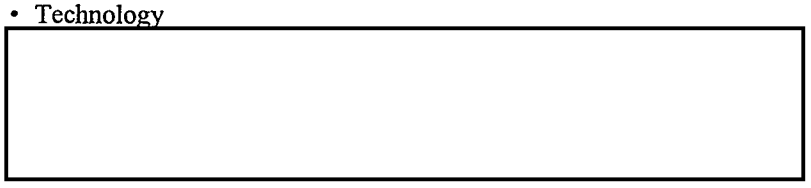


15

For Official Use Only

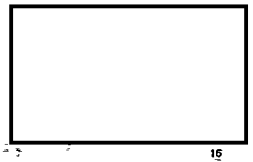
TDMA (Time Division Multiple Access)

- Background
  - Technology was the first commercially available digital cellular technology in U.S.
  - Provides increased system capacity and advanced digital services
- Technology



b3
b7E

- U.S. TDMA systems being replaced with GSM systems



15

CELL/OTD 004332

For Official Use Only

GSM (Global System for Mobile Communications)

- Background
  - Technology first introduced in Europe and migrated to the U.S.
  - Provides increased system capacity, advanced digital services and ability to offer seamless international mobile operation
- Technology
  - Multiplex users by assigning unique operating time slots in shared frequency channels
  - [redacted]
- GSM is the most widely adopted cellular technology in the world

b3
b7E

17

For Official Use Only

General Trends

- CDMA and GSM phones will dominate near term U.S. market
  - 83 percent of the market (with conversion of IS-136 systems to GSM)
- 3G Systems will be CDMA based
- Carriers will continue to develop enhanced features

For Official Use Only

Glossary Cont'd

Handoff – Transferring communication with a mobile station from one base station to another

[redacted] b7E b3

Long PN Code – 42-bit pseudo-random code used to uniquely identify CDMA mobile stations on the uplink

Mobile Identification Number (MIN) – Telephone number associated with a mobile phone

Mobile Station – *See* **Cellular Phone**

Mobile Switching Center (MSC) – Switch connecting the cellular network to the PSTN which coordinates call routing in a given service area

Mobile Telephone Switching Office (MTSO) – *See* **Mobile Switching Center**

Multipath - Radio signals from the transmitter arriving at the receiver via a number of different paths

Neighbor Channel – One of a group channels that are probable candidates for handoff

Network Identification (NID) – Number uniquely identifying a network within a cellular system

Paging Channel – Walsh code channel in the CDMA forward channel used for transmission of control information and pages from the base station to the mobile

Pilot Channel – Signal transmitted continuously by CDMA base stations allowing mobiles to acquire base station timing and assess signal quality

4

CELL/OTD 004402

For Official Use Only

Glossary Cont'd

PN Code Offset – One of 512 time offset versions of the Short PN Code used to identify CDMA base station sectors in a network

Power Amplifier (PA) – Provides gain in a transmitter

Public Switch Telephone Network (PSTN) – Collection of interconnected voice-oriented public telephone networks

Radio Frequency (RF) – Radio signals between 9 kHz-300 GHz

Registration – Process by which a mobile station identifies its location and parameters to a base station

Reverse Link – From the mobile to the base station

Short PN Code – 15-bit pseudo-random code used to uniquely identify CDMA base station sectors in a network

Short PN Code Offset – *See* **PN Code Offset**

Sync Channel – Walsh code channel 32 in the CDMA forward channel which transports the synchronization message to the mobile

System Identification (SID) – Number uniquely identifying a cellular system

Temporary Mobile Station Identity (TMSI) – Temporary mobile station identification assigned by the base station

Time Division Multiple Access (TDMA) – Multiplexing technique which uses frequency and time to distinguish users

Traffic Channel – Communicating path between a mobile station and base station used to transport call content and commands

5

For Official Use Only

Glossary Cont'd

Uplink – *See* **Reverse Link**

Visitor Location Register (VLR) – Database containing mobile subscriber information for mobiles active in the local system but registered in another cellular system

Walsh Codes – 64 orthogonal codes used to define CDMA communication subchannels on the forward link

CELL-OTD 00440

16-7.3.4 Loan of Electronic Surveillance Equipment (See MIOG, Part 2, 10-9.14 & 10-10.10.)

(1) LOAN OF ELECTRONIC SURVEILLANCE EQUIPMENT TO STATE AND LOCAL LAW ENFORCEMENT AGENCIES.

By Department Order 1945-95, dated January 18, 1995 (replacing Department Order 890-80, dated April 29, 1980), the Attorney General delegated to the Federal Bureau of Investigation the authority to approve loans of electronic surveillance equipment to state and local law enforcement agencies for use in their investigations (i.e., NOT joint FBI investigations). Under this delegation, the loan of such equipment is to be made only in exceptional circumstances and to be consistent with federal and state laws, as well as with state and local law enforcement regulations.

Electronic surveillance equipment is defined as any equipment which would be used in Title 18, USC, Section 2510, et seq. (Title III) - or consensual electronic coverages.

(a) It is the policy of the Department of Justice that loans of electronic surveillance equipment to state and local law enforcement agencies are generally to be discouraged and are to be permitted only:

1. in furtherance of the federal government's interests in the investigation and prosecution of violations of state criminal law that are of federal concern;

2. in compliance with all applicable provisions of federal, state and local law;

3. without interfering with state and local control of state and local law enforcement; and

4. without duplication of other federal programs of assistance to state and local law enforcement.

(b) No request may be granted until the head of the state or local law enforcement agency certifies in writing that the agency:

1. has authority under state and local law to borrow the equipment on the terms required by this Order;

2. has valid legal authority under state and local law to conduct the particular electronic surveillance for which the equipment is requested: and

3. cannot obtain the requested equipment from other law enforcement agencies within the state.

(c) The Director of the FBI or his designee may, at his discretion, grant a request for the loan of electronic surveillance equipment upon receipt of a written request from a state or local law enforcement agency. The formal request must contain a copy of a written opinion of the

CELL-OTD 004431

CELLSITE-11028

chief legal officer of the state or local government relative to compliance with (b) 1. and (b) 2. above.

(d) The Director of the FBI or his designee shall not grant a request for the loan of electronic surveillance equipment unless the Director or his designee determines that:

1. there is no current need for the equipment within the Bureau;

2. it is in the interest of the United States to facilitate the criminal investigation for which the equipment is needed; and,

3. the agency has previously not violated the terms of any loan of electronic surveillance equipment by the FBI.

(e) Any loan of electronic surveillance equipment shall be made by written agreement between the Director of the Federal Bureau of Investigation or his designee and the state or local law enforcement agency. The agreement shall identify the equipment and state the subject, duration, location, and purpose of the surveillance to be conducted. It shall also include the following provisions:

1. the loan of the equipment is subject to the needs of the Department of Justice, and the equipment must be returned upon request;

2. the loan of the equipment is limited to the duration of the validly authorized surveillance for which it is requested, and in any event not to exceed 90 days;

3. the equipment may be used only for the validly authorized surveillance for which it was requested;

4. the agency will not permit any other person or governmental entity to use the equipment;

5. the agency may disclose electronic surveillance equipment, information concerning it, or its installation or use only with the consent of the Director of the FBI or his designee and subject to the nondisclosure provisions set forth in 28 C.F.R. 1622, 1624, and 1626;

6. the agency will not use the electronic surveillance equipment outside the United States or under circumstances where there is reason to believe that the equipment may be taken outside of the United States, without the approval of the Director of the FBI or his designee; and,

7. the agency will reimburse the United States for all loss or damage to the equipment. Any dispute over the amount of loss or damage will be resolved by the Director of the FBI or his designee, and this resolution will be final. The Director of the FBI or his designee may agree to any other terms consistent with the above stipulations.

CELL/OTD 004432

(f) When the head of the state or local law enforcement agency represents to the Director or his designee that an emergency situation and need for electronic surveillance equipment exist and that the requesting agency is authorized under state law to conduct emergency electronic surveillance in such circumstances, and specifies the provision of state law upon which he is proceeding, the Director or his designee may grant the emergency request. The information required to be submitted by the head of the law enforcement agency in (b) and (c) must be submitted to the Director or his designee within three days of the day on which the loan is made.

(g) The Director of the FBI, pursuant to Attorney General Department Order 1945-95, dated January 18, 1995, has delegated his authority to permit [redacted] b7E [redacted] on a case-by-case basis, to assist in the installation and operation of electronic surveillance equipment. Such delegated authority requires the concurrent approval from the Section Chief of the appropriate Criminal Investigative Division section having oversight over the investigative program involved; the Electronic Surveillance Technology Section Chief, Laboratory Division; and the Office of the General Counsel. If such technical assistance is approved, the state or local court orders (where required) should specifically include the court's authorization for FBI assistance in the state and local electronic surveillance endeavor. Without such approval, no FBI personnel may install the equipment or participate in the surveillance. This restriction does not prohibit maintenance and repair of the equipment when not installed.

(h) The Director of the FBI will retain all requests for electronic surveillance equipment by state and local law enforcement agencies. The Director will report to the Assistant Attorney General, Criminal Division, on October 1 and April 1 of each year on the duration and results of all loans made pursuant to the order.

(i) The Director of the FBI, pursuant to Attorney General Department Order 1945-95, dated January 18, 1995, has delegated his authority to approve loans of electronic surveillance equipment upon written request from a state or local law enforcement agency. Such delegated authority requires the concurrent approval of the Section Chief of the appropriate Criminal Investigative Division section having oversight over the investigative program involved and the Electronic Surveillance Technology Section Chief, Laboratory Division. Where requests involve installation or operation of technical equipment by FBI [redacted] b7E [redacted] approval by the Office of the General Counsel is also required.

(j) The FBI field division must advise FBIHQ when requesting approval to loan electronic surveillance equipment (be it either a routine or an emergency request) whether there is a current need for equipment within the division; whether, in the SAC's opinion, it is within the interests of the United States to loan the requested equipment in the specific criminal investigation; and, whether the agency involved has previously violated the terms of any loan of electronic surveillance equipment by the FBI.

(k) Routine requests should be by electronic communication (EC) to FBIHQ, directed to the Electronic Surveillance Technology Section, Laboratory Division, and to the appropriate Criminal Investigative Division section having oversight over the investigative

program involved, and should enclose both a written request from the head of the local or state law enforcement agency and the written opinion of the chief legal officer of the local or state government. Emergency requests should be by telephone, confirmed by EC, and followed by an EC, enclosing the necessary documents.

(2) THE USE OF FBI ELECTRONIC SURVEILLANCE EQUIPMENT IN JOINT CASES WHERE STATE AND LOCAL LAW ENFORCEMENT AGENCIES OBTAINED AUTHORITY FOR ITS USE (SEE MIOG, Part 2, 10-10.3 (8).)

(a) A JOINT CASE, for purposes of this section, is an investigation in which there exists significant FBI interest in the subject or subjects of a local investigation and substantial FBI investigative resources have been utilized and/or will be utilized in the planned investigation with the local agency.

(b) FBIHQ authority MUST be obtained prior to any use of FBI electronic surveillance equipment or personnel in furtherance of any order or authority obtained by state or local law enforcement agencies. Should approval be granted for such use, the pertinent local or state order or authority MUST contain specific language authorizing FBI participation and specifying whether the assistance is for installation, monitoring, or whatever is required.

(c) In requesting FBIHQ authority, the field office is to set forth the following information:

1. A synopsis of the investigation conducted to date by FBI and the local agency involved, to include the date the FBI case was opened, as well as when the joint investigation was initiated.

2. the specific SAC comments as to the value of the assistance to the FBI investigation and extent of federal control over local electronic surveillance.

3. the exact nature of equipment to be utilized and technical assistance required, and whether the equipment is on hand in the requesting division.

4. the specific comments of the [redacted] as to the ability of the local agency to properly utilize technical equipment requested. b7E

5. that the local agency has valid legal authority under state or local law to conduct the electronic surveillance for which equipment will be utilized, to include citation of the specific statute;

6. that the Chief Division Counsel or the Assistant U.S. Attorney has reviewed the affidavits and orders to be filed and concurs in their sufficiency; and,

7. that FBI policy in limiting disclosure as set forth in Part 2, Sections 10-10.13 and 10-10.16, of this manual, will be honored in any subsequent local proceedings.

CELL/OTD 00433

The above information is to be provided by appropriate communication to the attention of the Laboratory Division, as well as to either the Criminal Investigative Division or the [redacted] as appropriate.

(d) Any request for FBI assistance in the execution of a locally obtained court order which requires [redacted] will be handled separately and will require significant justification. Emergency requests for such assistance are to be discouraged and likely will NOT be approved. b7E

(3) LOAN OF ELECTRONIC SURVEILLANCE EQUIPMENT TO OTHER FEDERAL AGENCIES.

(a) The loan of FBI technical electronic surveillance equipment to other federal agencies is permissible on a short-term basis. The loan of equipment is subject to availability and must not negatively affect the technical investigative capabilities of the FBI.

(b) For agencies of the Department of Justice (DOJ) (e.g., the Drug Enforcement Administration (DEA)), material support and assistance, including the loan of technical equipment, should be handled on a local level, subject to the provisions stated above.

(c) For agencies outside the DOJ, requests must be made on a headquarters level, and the requesting agency must have appropriate electronic surveillance authority and capability.

(d) All technical equipment provided must be available in existing field office inventory.

CELL-OTD 004435

Wireless Intercept & Tracking Team (WITT): The USA Patriot Act

b5

CELL/OTD 004436

Why the "USA Patriot Act"?

- **Senate: Uniting and Strengthening America (Act)**
- **House: Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (Act)**

Overview

- **The Pen Register and Trap and Trace Statute**
- **Other Amendments to the Wiretap Statute and ECPA relating to Wireless**

CELL/GTD 004437

CELLSITE-11034

I. The Pen/Trap Statute

- **Old statute:** the term "pen register" means a *device* which records or decodes electronic or other impulses which identify the *numbers dialed* or otherwise transmitted on the *telephone line to which such device is attached* (18 U.S.C. 3127(3))
- **New statute: Technology-neutral language**

I. The Pen/Trap Statute (old statute)

- ***In the matter of the Application of the USA for an Order Authorizing the Use of a Cellular Telephone Digital Analyzer*, 885 F.Supp 197 (S.D. CA 1995).**
- **FACTS:**
  - **First application denied for failure to describe operation of device. Supp. Affidavit filed.**
  - **AUSA asks for PR/T&T order out of "abundance of caution"**
  - **Affidavit discloses that Digital Analyzer (DA) captures ESN, user's cell # and number dialed when in close proximity.**

CELL-OTD 004438

CELLSITE-11035

I. *In the matter of the Application of the USA for an Order Authorizing the Use of a Cellular Telephone Digital Analyzer*, 885 F.Supp 197 (S.D. CA 1995).

- **Holding:**
  - **Court agrees that no order is required.**
  - **Court notes:**

    The statutory definition of a pen register limits it to a device 'which records or decodes electronic or other impulses which identify the numbers dialed or otherwise transmitted on the telephone line *to which such device is attached....*' 18 U.S.C. 3127(3)" .
  - **Court finds that because DA is not "attached" to a line, DA does not qualify as a PR.**

I. *In the matter of the Application of the USA for an Order Authorizing the Use of a Cellular Telephone Digital Analyzer*, 885 F.Supp 197 (S.D. CA 1995).

- **Court addresses application even though not required.**
- **Court denies request because:**
  - **As drafted, order is not limited to use in that judicial district** [redacted]
  - **Moreover:** *"The order sought, ...would not insure sufficient accountability. For example, depending upon the effective range of the digital analyzer, telephone numbers and calls made by others than the subjects of the investigation could be inadvertently intercepted."* ***Id.*** **at 201.**

b5

CELL/OTD 004439

CELLSITE-11036

The Pen/Trap Statute (USA Patriot changes)

- **New PR Language:** the term "pen register" means a device *or process* which records or decodes dialing, routing, addressing, or signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted ...
- **No content**: ...provided, however, that such information shall not include the contents of any communication (18 U.S.C. 3127(3), (4))
- **Technology-neutral adjustments made throughout PR/T&T statute.**

The Pen/Trap Statute (USA Patriot changes)

- **New T&T Language:** the term "trap and trace" means a device *or process* which identify the originating number or other dialing, routing, addressing, and *signaling information reasonably likely to identify the source of a wire or electronic communication...."* 18 U.S.C. § 3127(4).

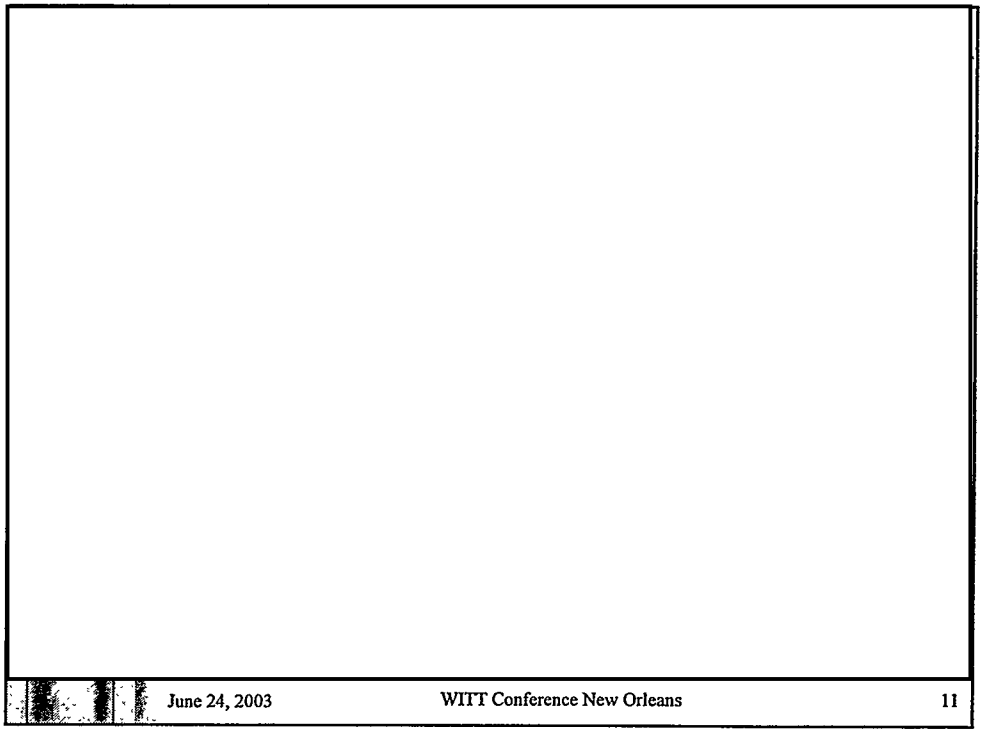
b5



b5

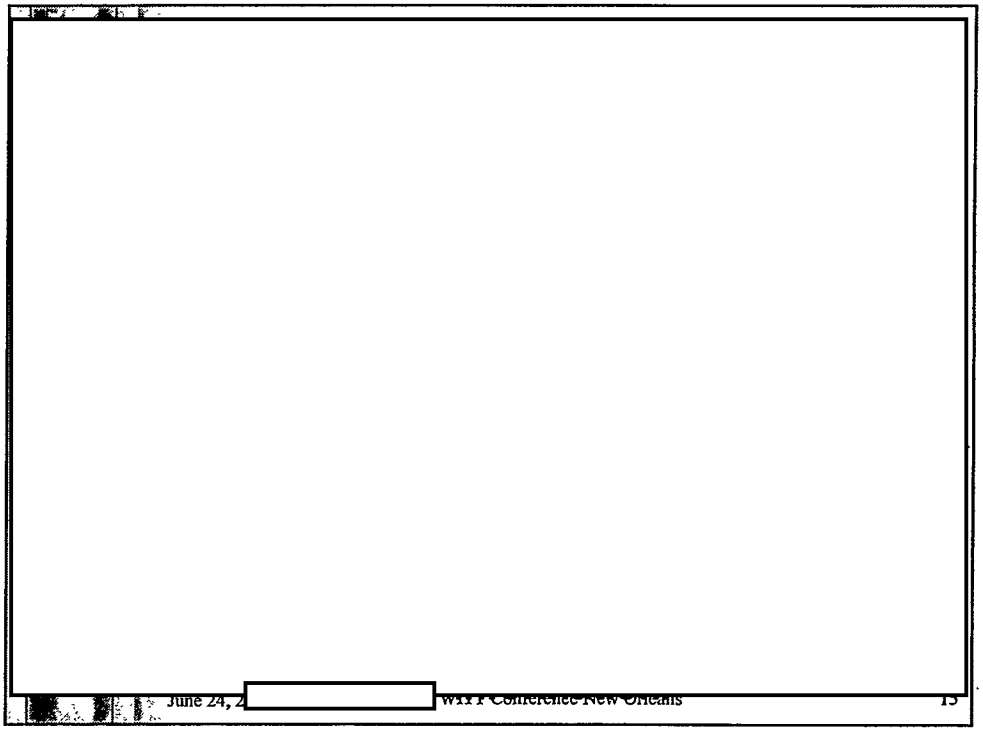
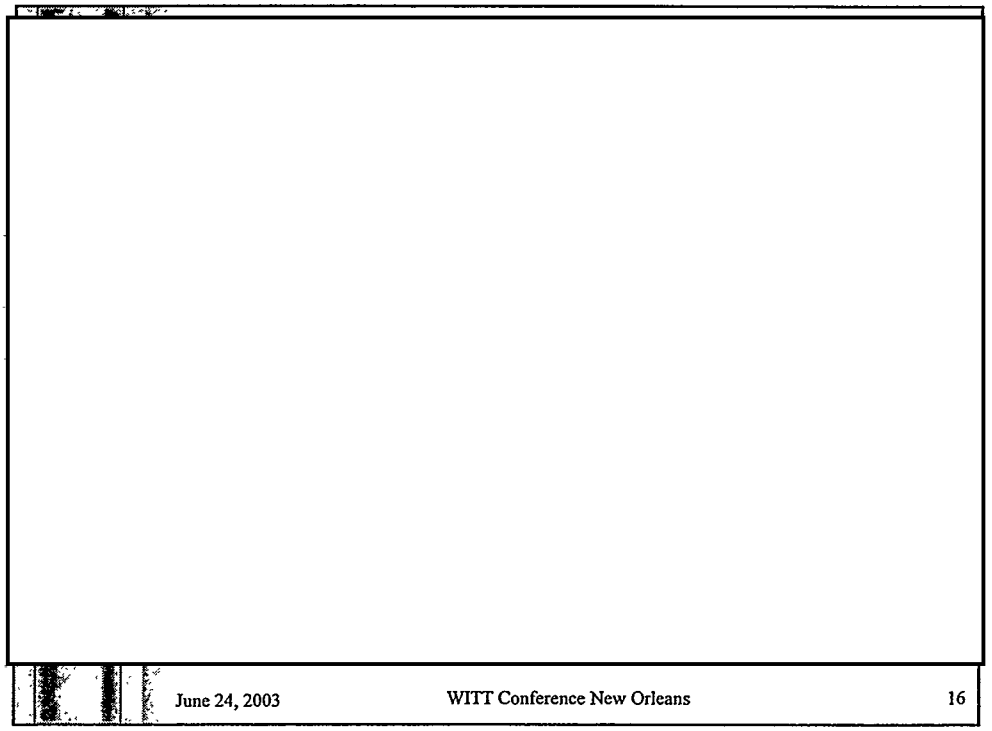
CELL/OTD 004442

b5



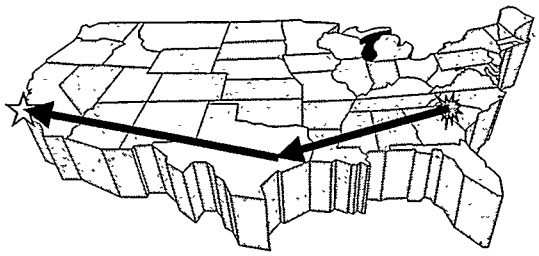
b5



CELL/OTD 004443

Pen/Trap: Nationwide Effect

- Can obtain order locally for a device installed in another district (18 U.S.C. 3123(a))
- Order is good nationwide, even if providers that carry the communication are located outside of the district (18 U.S.C. 3123(a))
- Court issuing the order must have jurisdiction over the offense



- [redacted]
- Providers not named in order may demand a certification (18 USC 3123(a))

b7E

CELL/OTD 004444

Pen/Trap: [redacted]

- **New reporting requirement where law enforcement uses its own device on a public provider's network pursuant to a pen/trap order (3123(a)(3))**
  - **E.g.: date and time of installation and removal; information collected**
- **No 4yr Sunset onPen/Trap Reports**

b7E

Pen/Trap: [redacted]

- **Actual text triggers reporting when:** "the law enforcement agency implementing an ex parte order under this subsection seeks to do so by installing and using its own pen register or trap and trace device on a packet-switched data network of a provider of electronic communication service to the public" P.L. 107-56, sec. 216

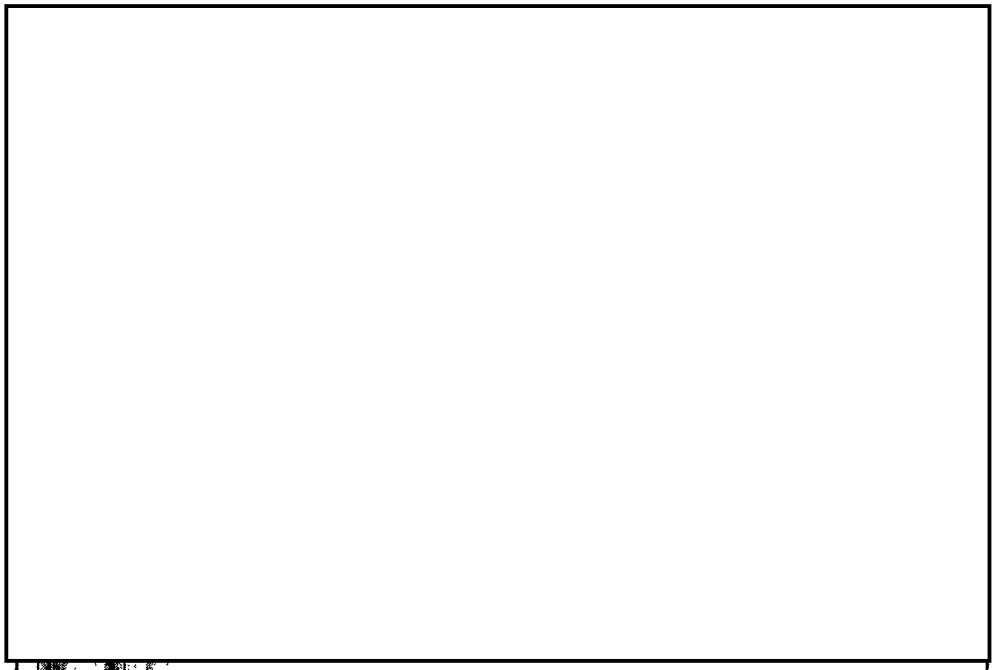
CELLSITE-11042

b5



b5

CELL-OTD 004446

CELLSITE-11043

Overview

- The Pen Register and Trap and Trace Statute
- Other Amendments to the Wiretap Statute and ECPA

II. The Computer Trespasser Exception

- Old law: law enforcement often had to get a wiretap order in order to help victims monitor computer hackers

[redacted] b5

- New law: new exception to Title III: 18 U.S.C. 2511(2)(I)
  - allows interception of "computer trespassers" - i.e. those without authorization to use a computer

CELLSITE-11044

II. The Computer Trespasser Exception

[redacted]

b5

[redacted] new exception to Title III at 18 U.S.C. 2511(2)(i)

- Subject to 4-year sunset provision
  - grandfather clause for pre-sunset offenses

Definition of Computer Trespasser

- "Computer trespasser" defined (18 U.S.C. 2510(21))
  - Person who accesses "without authorization"
  - Definition continues: "and thus has no reasonable expectation of privacy..."

[redacted]

Overview

- The Pen Register and Trap and Trace Statute
- The Computer Trespasser Exception
- The Cable Act Fix
- Other Amendments to the Wiretap Statute and ECPA

CELL-OTD 004449

IV. Other Amendments to Title III and ECPA

- Voice mail fix
- Scope of subpoenas under 2703(c)
- Voluntary disclosure of information by providers
- Nationwide search warrants for e-mail
- Voice wiretaps in hacker investigations

Voice Mail Fix

- Old law: unopened voice mail required a Title III order (18 U.S.C. 2510(1))
- Extra problem because of the convergence in technologies
- New law: all stored voice is governed by ECPA
  - Treat it like e-mail
  - Fresh, unopened voice mail: search warrant
  - Old or opened: subpoena, 2703(d) order with (delayable) notice
- Subject to the 4-year sunset provision

CELL-OTD 004450

CELLSITE-11047

Scope of Subpoenas

- **Old law: can obtain "basic subscriber information" with a subpoena (18 U.S.C. 2703(c)(1)(C):**
  - name
  - address
  - local and long distance telephone toll billing records
  - telephone number or other subscriber number or identity
  - length of service of a subscriber

Subpoena-Broadened Scope

- **New law: all previous categories plus (18 U.S.C. 2703(c)(2)):**
- **Information on credit card/bank account used to pay for an account**
- **"temporarily assigned network address" and "records of session times and durations"**

[redacted] b5

- **Not subject to 4 yr sunset provision**

CELL-OTD 004451

CELLSITE-11048

Voluntary Disclosure By Providers (Part 1)

- Old law: providers could disclose content but not non-content records to protect their rights and property
- New law: all voluntary disclosures covered by 18 U.S.C. 2702
  - non-public providers can now voluntarily disclose for any reason
- Adds disclosures by public providers to protect rights and property (18 U.S.C. 2702(b)(5), (c)(3))
- Subject to the 4-year sunset provision

Voluntary Disclosure by Providers (Part II)

- Old law: no explicit provision to allow providers to disclose to protect life and limb
- New law: public providers can disclose content and non-content information in emergencies "involving immediate danger of death or serious physical injury" (18 U.S.C. 2702(b)(6)(C), (c)(4))
- Subject to the 4-year sunset provision

CELL/OTD 004452

CELLSITE-11049

Voluntary Disclosure by Providers (Part II)

- 18 USC 2702(b): Public Provider may voluntarily disclose to law enforcement when:
  - USA Patriot Act: If provider reasonably believes an emergency involving immediate danger of death or serious bodily injury requires disclosure 18 U.S.C. 2702(b)(6)(C).
  - Homeland Security Act (P.L. 107-296, §225) further amended USA Patriot Act: "To a Federal, State, or local governmental entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of communications relating to that emergency." 18 U.S.C 2702(b)(7).

Voluntary Disclosure by Providers (Part II)

- Assuming emergency situation, LE can provide facts to convince provider that emergency involving danger of death or serious injury exists and provider may disclose.
  - [redacted]
  - Exception applies to content and non-content information (dialing, addressing, routing, signaling, and location)
  - REPORTING REQUIREMENT

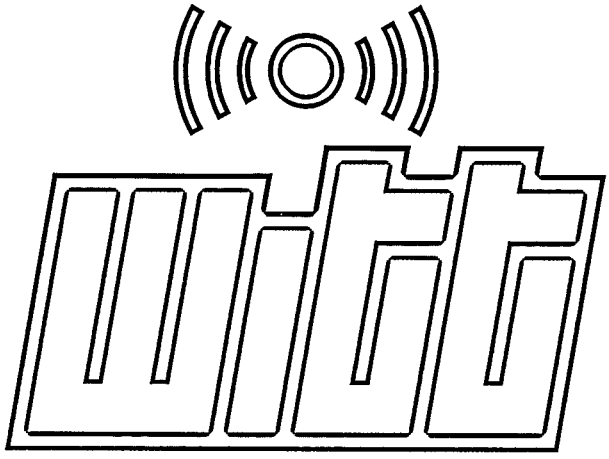
PROGRAM

TRAINING COURSE #2

b7E



APRIL 6-8, 2004

[redacted]

b7E

[redacted] VA

CELLSITE-13152

for official use only

To: From: Investigative Technology
Re: 268-HQ-1068430, 03/22/2004

Precedence: PRIORITY **Date:** 03/22/2004

To: **Attn**

From: Investigative Technology
Electronic Surveillance Technology Sectio QT-ERF
Contact: SSA

Approved By:

Drafted By:

Title: WIRELESS INERCEPT AND TRACKING TEAM (WITT)

Synopsis: To provide details of for commencing on 04/06/2004 to 04/08/2004 in Virginia.

Details: The WITT is tasked with providing FBI field offices with legal guidance, technical equipment, and technical training necessary for this To this end, WITT has organized, established and trained

is hosting a training course. The point-of-contacts for this training are Electronics Engineer (EE) and Electronics Technician (ET) This

To [redacted] From: Investigative Technology
Re: 268-HQ-1068430, 03/22/2004

training will occur 04/06/2004 through 04/08/2004. All attendees are requested to travel on Monday 04/05/2004 prior to the training, which starts on Tuesday morning at 8:30 am at the [redacted] Training will be completed Thursday evening, with students having the opportunity to travel back to their field offices on Friday. b6 b7C b3 b7E

CELLSITE-13193

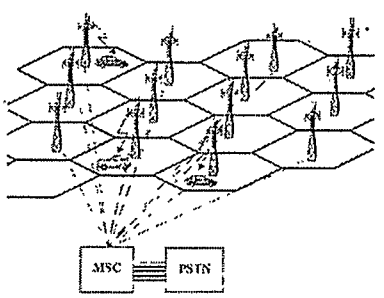
Mobile Phone Systems Review

[redacted]

b7E

Cellular System Concept

- Cellular System allows the reuse of spectrum within a region by employing centrally connected base stations
- Each base station wirelessly connects to multiple mobiles within a designated geographic area (cell)
- Base stations connect to a Mobile Switching Center (MSC) and then to the Public Switched Telephone Network (PSTN)
- The system allows
  - Reuse of spectrum in regions, increasing the capacity of the system over a trunked radio system
  - Mobility of users in the system without loss of connectivity



[redacted]

b7E

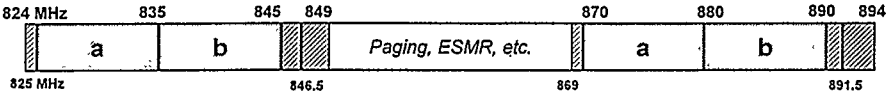
CELLSITE-001984

For Official Use Only

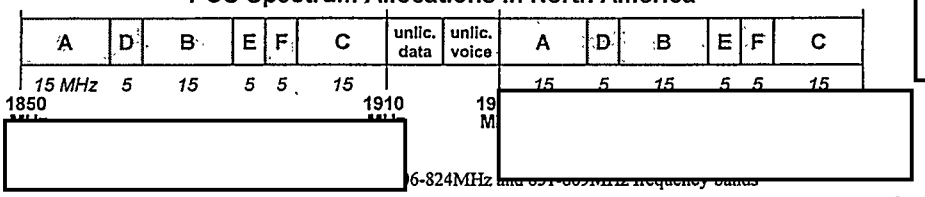
Frequency Bands

Communication between the mobiles and the network occur in two frequency bands in the United States*

Cellular Spectrum Allocations in North America



PCS Spectrum Allocations in North America



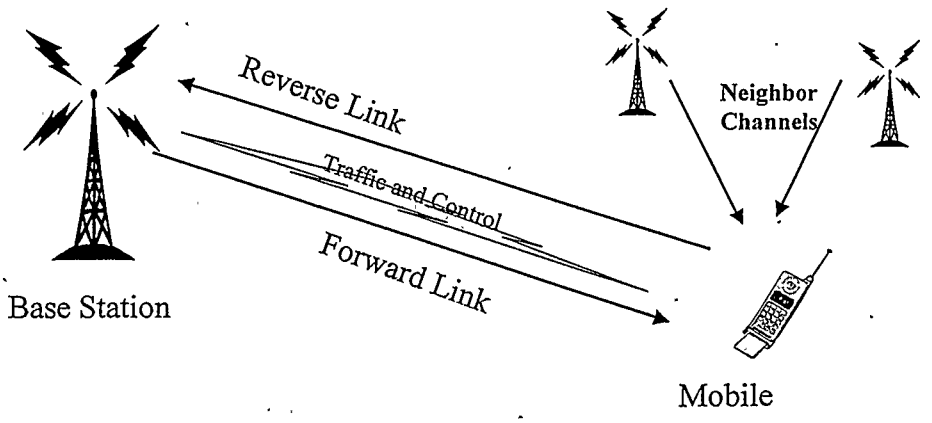
b3
b7E

3

For Official Use Only

RF Channels

Cellular and PCS frequency bands are subdivided into Radio Frequency (RF) channels for communication between base stations and mobiles



4

CELL/GTD 001985

CELLSITE-13196

Mobile Handoff

To maintain seamless mobility in the system, mobiles must change assigned channels when moving from cell to cell

Glossary

Access Channel – Reverse CDMA channel used by mobile stations for communicating to the base station

b3
b7E

Absolute Radio Frequency Channel Number (ARFCN) – Number used for describing GSM channels (PCS1900 uses ARFCN's 512-810)

Advanced Mobile Phone Service (AMPS) – First U. S. cellular standard; based on analog FDMA technology

Base [Transceiver] Station (BTS) – Fixed radio site communicating with mobiles within a geographical area

Base Station Controller (BSC) – Interface between base stations and the switch which conveys switch commands to the appropriate base station and base station requests to the switch

Base Station Identity Code (BSIC) – Number identifying individual base stations and their capabilities

Broadcast Control Channel (BCCH) – Channel used by the base station to send control data to GSM mobiles

Camped – When a mobile is not on a call but actively monitoring the paging or control channel

Cellular Phone – Portable radio used to communicate wirelessly in a network

Code Division Multiple Access (CDMA) – Spread spectrum technology which uses codes to differentiate signals sharing the same frequencies

b3
b7E

Control Channel – Radio channel on the forward or reverse link used to send command and requests

Glossary Cont'd

Direct Sequence Spread Spectrum – Technique employed in US cellular CDMA systems which uses codes shared between sender and receiver to spread transmitted data and send over the air

Direction Finding (DF) – A technique used to identify the location of a radio signal

Downlink – *See* **Forward Link**

Ec/Io – Ratio (in dB) between the Pilot Channel signal energy and the total interference in the received bandwidth

Electronic Serial Number (ESN) – Unique serial number programmed into the memory of a mobile phone by the manufacturer

Forward Link – From the base station to the mobile

Frequency Division Multiple Access (FDMA) – Multiplexing technique which uses frequency to distinguish users

Global Standard for Mobile Communications (GSM) – Cellular technology utilizing TDMA techniques which originated in Europe

Handoff – Process of switching a mobile unit from a voice or control channel of one cell to a new voice or control channel of another cell

Home Location Register (HLR) – Database containing mobile subscriber information for locally registered mobiles

Idle – *See* **Camped**

Integrated Dispatch Enhanced Network (iDEN) – Proprietary cellular technology utilized by Nextel

Intercept – Reception of communications between a subject and his serving network [redacted]

[redacted]

b3
b7E

CELLSITE-13414

CELL/OTD 002189

Glossary Cont'd

International Mobile Equipment Identity (IMEI) – Code uniquely identifying the mobile station hardware

International Mobile Subscriber Identity (IMSI) – Method of identifying stations in the land mobile service

Handoff – Transferring communication with a mobile station from one base station to another

[redacted] b3 b7E

Long PN Code – 42-bit pseudo-random code used to uniquely identify CDMA mobile stations on the uplink

Mobile Identification Number (MIN) – Telephone number associated with a mobile phone

Mobile Station – *See* **Cellular Phone**

Mobile Switching Center (MSC) – Switch connecting the cellular network to the PSTN which coordinates call routing in a given service area

Mobile Telephone Switching Office (MTSO) – *See* **Mobile Switching Center**

Multipath - Radio signals from the transmitter arriving at the receiver via a number of different paths

Neighbor Channel – One of a group channels that are probable candidates for handoff

Network Identification (NID) – Number uniquely identifying a network within a cellular system

Paging Channel – Walsh code channel in the CDMA forward channel used for transmission of control information and pages from the base station to the mobile

[redacted] b3 b7E

CELLSITE-13415

CELL/OTD 002190

Glossary Cont'd

Pilot Channel – Signal transmitted continuously by CDMA base stations allowing mobiles to acquire base station timing and assess signal quality

PN Code Offset – One of 512 time offset versions of the Short PN Code used to identify CDMA base station sectors in a network

Power Amplifier (PA) – Provides gain in a transmitter

Public Switch Telephone Network (PSTN) – Collection of interconnected voice-oriented public telephone networks

Radio Frequency (RF) – Radio signals between 9 kHz-300 GHz

Registration – Process by which a mobile station identifies its location and parameters to a base station

Reverse Link – From the mobile to the base station

Short PN Code – 15-bit pseudo-random code used to uniquely identify CDMA base station sectors in a network

Short PN Code Offset – *See* **PN Code Offset**

Sync Channel – Walsh code channel 32 in the CDMA forward channel which transports the synchronization message to the mobile

System Identification (SID) – Number uniquely identifying a cellular system

Temporary Mobile Station Identity (TMSI) – Temporary mobile station identification assigned by the base station

Time Division Multiple Access (TDMA) – Multiplexing technique which uses frequency and time to distinguish users

CELSITE-00219

Glossary Cont'd

Traffic Channel – Communicating path between a mobile station and base station used to transport call content and commands

Uplink – *See* **Reverse Link**

Visitor Location Register (VLR) – Database containing mobile subscriber information for mobiles active in the local system but registered in another cellular system

Walsh Codes – 64 orthogonal codes used to define CDMA communication subchannels on the forward link

FEDERAL BUREAU OF INVESTIGATION

Supplement 1 to [redacted] Task Order

(U) INTRODUCTION

(U) ~~(S)~~ This purpose of this paper is to request the vendor to provide Rough Order of Magnitude (ROM) estimate for additional requirements for providing engineering services for the development of products described in the original Statement of Work in the [redacted] Task Order. The following shall provide an overall description of the additional requirements not addressed in the original Statement of Work in the [redacted] Task Order.

(U) DESCRIPTION OF REQUIREMENTS

b3
b7E

(U) ~~(S)~~ Specifically, the FBI is requesting the vendor to provide ROM estimate for developing, productizing, and delivering additional functionality to the "architecture" or SYSTEM that was previously proposed in the [redacted] Task Order. No changes shall be made to the previously agreed upon [redacted] Tasking, the enhancement below shall be provided as an addition to the original requirement.

U.S. Department of Justice

Federal Bureau of Investigation

Washington, DC 20535

19 August 2011

Subject: [redacted] Contract [redacted]
New Tasking - [redacted]

Dear [redacted]

Please find enclosed a copy of the Statement of Work (SOW) for engineering services developed by the Federal Bureau of Investigation (FBI). The FBI is interested in obtaining a proposal for this new task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the SOW. Labor rates and similar costs were agreed upon at the award of the Contract, as a result, the Cost Proposal shall be reflective of this. Estimates of hours per labor category are required at a minimum. This SOW provides for an intended new Task Order under the existing [redacted] contract; therefore, the FBI does not intend to reimburse the Offeror for any costs incurred in preparing a proposal.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days. It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than September 6, 2011 at 1:00 PM EST. Unclassified proposals maybe email to [redacted] The FBI intends to award this requirement with current year funding. Award is contingent upon receipt of these funds.

Should you have any questions concerning this matter, please contact me at [redacted] [redacted] response may be faxed to [redacted] secure fax [redacted]

Sincerely,

[redacted]
Contracting Officer

[redacted] Task Order 1

1 (U//LES) SCOPE

1.1 (U//LES) Task Overview

(U//LES) The objective of the [redacted] task will be to modify and or adapt the [redacted] systems to support investigators in [redacted]

b3
b7E

1.2 (U) Task Deliverables

- (U) Weekly Status Report (See Section 3.3)
- (U) Monthly Program Review (See Section 3.3)
- (U) System Testing Plan (See Section 3.2)
- (U) System Demonstration at contractor facility (See Section 3.2)
- (U) Final Technical Summary Report (See Section 3.2)
- (U) [redacted]

1.3 (U//LES) Sub Task 1

(U) The vendor shall perform analysis, modeling, and testing to verify the capability of the [redacted] This requirement shall include the following:

b3
b7E

a) [redacted]

b)

c)

d) **(U)** The work performed in this task shall include engineering and prototyping mechanical housings to result in the integration of electrical and mechanical improvements into a single package.

1.4 (U//LES) Sub Task 2

(U//LES) The vendor shall produce a [redacted] that demonstrates [redacted] This requirement shall include:

a) [redacted]

b) [redacted]

b3
b7E

c) (U) The performance specifications of developments under this task shall be in accordance with [redacted]

2 (U//LES) Sub Task Milestones and Requirements

2.1 (U//LES) Sub Task Milestones

- (U) The initial kick off meeting shall be held no later than 30 days after contract award.
- (U) A Preliminary design review shall be held 2 months after contract award. The vendor shall deliver a PDR report to the Contracting Officer's Technical Representative (COTR) no later than 2 weeks after completion of the meeting.
- (U) A Critical design review shall be held 6 months after contract award. The vendor shall deliver a CDR report to the COTR no later than 2 weeks after completion of the meeting.
- (U//LES) The vendor shall conduct a demonstration / user acceptance test of the [redacted] to the COTR and approved government attendees. The vendor shall deliver a full report of the conduct of the test and user acceptance/rejection with a mitigation plan in the case of COTR rejection. Testing shall be conducted no later than 2 weeks prior to the end of the period of performance.
- (U) The vendor shall deliver an acceptance test plan to the COTR 2 weeks prior to the demonstration / user acceptance test.
- (U//LES) The vendor shall deliver to the COTR a report of analysis, modeling and testing that verifies the capability of the [redacted] This report shall not be an assemblage of power point slides, although their use in support of written narrative is acceptable. This report shall be due at the end of the period of performance.
- (U) Transition of deliverables shall be coordinated with the COTR at the end of the period of performance.

b3
b7E

CELLSITE-15924

2.2 (U) Sub Task Requirements

- (U) The vendor shall provide personnel with the requisite knowledge, technical background and skills to successfully complete the tasks described in this SOW. These qualities shall include but are not limited to:
  - [redacted]

3 (U) Requirements

3.1 Security Standards and Regulations

(U) Refer to [redacted] Statement of Work section 2.3 for guidance.

(U) SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

b3
b7E

3.2 (U) Contractor Furnished Documentation

(U) PDR report (as described in Section 2)
(U) CDR report (as described in Section 2)
(U) Final report of analysis, modeling and testing (as described in Section 2)
(U) Refer to [redacted] Statement of Work section 2.6 for any additional documentation not explicitly stated in this SOW.

3.3 (U) Status Reporting

(U) Refer to [redacted] Statement of Work Section 3.3 for guidance

3.4 (U) Formal Meetings

(U) Refer to [redacted] Statement of Work Section 3.4 for guidance

CELLSITE-15925

3.5 (U) Government Furnished Equipment

(U) The government does not anticipate the need for any Government Furnished Equipment (GFE) on this task. However, if the purchase of equipment is required the vendor shall obtain written authorization from the government Contracting Officer prior to any individual purchase equal to or exceeding $50,000.00. The Contracting Officer may lower or raise the $50,000.00 threshold at his/her discretion. If the CO and COTR approve such a purchase the item shall become property of the government, and as such will be maintained in accordance to currently existing property accountability procedures. The COTR will determine final disposition of any such items at the end of the period of performance of this task.

3.6 (U) Period of Performance

(U) The vendor shall propose the most efficient and cost effective schedule to complete this requirement for government consideration. All deliverables and milestones are expected to be proposed at their specified date in the above deliverable / milestone schedule or otherwise adjusted by the vendor and justified. Based on the needs of the government and complexity of the requirement, the government recommends a period no longer than 12 months. This recommended period includes 90 days to allow for review, preparation and submission of deliverables and closeout activities by government personnel.

3.7 (U) Place of Performance

(U) The vendor shall perform all work under this task at the vendor's facilities. Therefore the government expects no travel charges.

1.2 (U) Task Deliverables

- (U) Weekly Status Report (See Section 3.3)
- (U) Monthly Program Review (See Section 3.3)
- (U) System Testing Plan (See Section 3.2)
- (U) System Demonstration at contractor facility (See Section 3.2)
- (U) Final Technical Summary Report (See Section 3.2)
- (U) [redacted]

1.3 (U//LES) Sub Task 1

(U) The vendor shall perform analysis, modeling, and testing to verify the capability of the [redacted] This requirement shall include the following:

b3
b7E

a) [redacted]

b)

c)

d) **(U)** The work performed in this task shall include engineering and prototyping mechanical housings to result in the integration of electrical and mechanical improvements into a single package.

CELLSITE-15932

1.4 (U) Sub Task 2

(U) The vendor shall produce a [redacted] that demonstrates [redacted] This requirement shall include:

a) [redacted]

b) [redacted]

b3
b7E

c) **(U)** The performance specifications of developments under this task shall be in accordance with Stingray [redacted]

2 (U) Sub Task Milestones and Requirements

2.1 (U) Sub Task Milestones

- (U) The initial kick off meeting shall be held no later than 30 days after contract award.
- (U) A Preliminary design review shall be held 2 months after contract award. The vendor shall deliver a PDR report to the Contracting Officer's Technical Representative (COTR) no later than 2 weeks after completion of the meeting.
- (U) A Critical design review shall be held 6 months after contract award. The vendor shall deliver a CDR report to the COTR no later than 2 weeks after completion of the meeting.
- (U) The vendor shall conduct a demonstration / user acceptance test of the [redacted] to the COTR and approved government attendees. The vendor shall deliver a full report of the conduct of the test and user acceptance/rejection with a mitigation plan in the case of COTR rejection. Testing shall be conducted no later than 2 weeks prior to the end of the period of performance.
- (U) The vendor shall deliver an acceptance test plan to the COTR 2 weeks prior to the demonstration / user acceptance test.
- (U) The vendor shall deliver to the COTR a report of analysis, modeling and testing that verifies the capability of the [redacted] This report shall not be an assemblage of power point slides, although their use in support of written narrative is acceptable. This report shall be due at the end of the period of performance.
- (U) Transition of deliverables shall be coordinated with the COTR at the end of the period of performance.

b3
b7E

2.2 (U) Sub Task Requirements

CELLSITE-15933

- (U) The vendor shall provide personnel with the requisite knowledge, technical background and skills to successfully complete the tasks described in this SOW. These qualities shall include but are not limited to:
  - o [redacted]
  - o
  - o
  - o
  - o

b3
b7E

3 (U) Requirements

3.1 Security Standards and Regulations

(U) Refer to [redacted] Statement of Work section 2.3 for guidance.

(U) SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

3.2 (U) Contractor Furnished Documentation

(U) PDR report (as described in Section 2)
(U) CDR report (as described in Section 2)
(U) Final report of analysis, modeling and testing (as described in Section 2)
(U) Refer to [redacted] Statement of Work section 2.6 for any additional documentation not explicitly stated in this SOW.

b3
b7E

3.3 (U) Status Reporting

(U) Refer to [redacted] Statement of Work Section 3.3 for guidance

3.4 (U) Formal Meetings

(U) Refer to [redacted] Statement of Work Section 3.4 for guidance

3.5 (U) Government Furnished Equipment

(U) The government does not anticipate the need for any Government Furnished Equipment (GFE) on this task. However, if the purchase of equipment is required

CELLSITE-15934

the vendor shall obtain written authorization from the government Contracting Officer prior to any individual purchase equal to or exceeding $50,000.00. The Contracting Officer may lower or raise the $50,000.00 threshold at his/her discretion. If the CO and COTR approve such a purchase the item shall become property of the government, and as such will be maintained in accordance to currently existing property accountability procedures. The COTR will determine final disposition of any such items at the end of the period of performance of this task.

3.6 (U) Period of Performance

(U) The vendor shall propose the most efficient and cost effective schedule to complete this requirement for government consideration. All deliverables and milestones are expected to be proposed at their specified date in the above deliverable / milestone schedule or otherwise adjusted by the vendor and justified. Based on the needs of the government and complexity of the requirement, the government recommends a period no longer than 12 months. This recommended period includes 90 days to allow for review, preparation and submission of deliverables and closeout activities by government personnel.

3.7 (U) Place of Performance

(U) The vendor shall perform all work under this task at the vendor's facilities. Therefore the government expects no travel charges.

4 (U) Contact Information

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE

☐ A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

☐ B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).

☐ C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

☒ D. OTHER (Specify type of modification and authority)
FAR 43.103(a) "Bilateral" and FAR 32.7 "Funding"

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

The purpose of this modification is to award Subtask 1 of [redacted] a new Task Order under the above Contract. This modification provides [redacted] for Phase 1; [redacted] for Phase 2; and [redacted] of incremental funding for Phase 3 of Subtask 1 through PO [redacted] for a total of [redacted] The Period of Performance for this effort is 9/22/11-9/22/12. The following documents are hereby incorporated into the Contract: FBI [redacted] SOW dated 9/1/11 and [redacted] Cost and Technical Proposal documentation dated 9/8/11. All work is to be conducted in accordance with the SOW and Terms and Conditions of the Contract. Contractor exceeds funding at own risk. All technical guidance is to come from [redacted] COTR. Invoice to COTR.

[redacted] Program

[redacted] Task Order 2 [redacted]

1 SCOPE

b3
b7E

1.1 *Task Overview*

This Task Order requires that the Contractor provide engineering services to the Operational Technology Division's (OTD) [redacted] through development and execution of [redacted]

The FBI is the principal investigative arm of the United States Department of Justice. It is charged with gathering and reporting facts, locating witnesses, and obtaining evidence in cases involving Federal jurisdiction. The mission of the FBI's OTD is to provide forensic services to the FBI and other law enforcement agencies and to support their ability to conduct lawfully authorized electronic surveillance. To that end, the OTD is engaged in a number of development projects and activities that focus on developing the forensic, collection, surveillance, and tactical communications capabilities required for law enforcement to accomplish its objectives. The projects supported through the [redacted]

The focus of this overall effort is to provide the services required to [redacted] to support specific case requirements for [redacted] The [redacted] shall be designed to ensure FBI [redacted] can effectively [redacted]

b3
b7E

The purpose of this SOW is to describe the tasking necessary to support the FBI's requirement to [redacted] The task shall be achieved through engineering support to the [redacted]

1.2 Deliverables: Pre-Award and Post-Award

1.2.1 Task Order Proposal Instructions, Pre-Award

As a part of the proposal for this effort, the Contractor shall provide the following documents:

- Project Management Plan (See Section 2.2)

CELLSITE-15954

- [redacted] Documentation (See Section 1.3.1(a))
- [redacted] (Section 1.3.1(a) and 1.3.1 (b))
  - [redacted]

1.2.2 Task Order Deliverables, Post-Award

The FBI intends to award the following on a firm fixed-price basis:

- [redacted] identified in Section 1.3.1(b) in accordance with the requirements of Section 1.3.1.
- Monthly Status Reporting (See Section 2.2) – to minimize administrative burdens and costs, this information may be provided as part of the ongoing monthly Contract reporting

1.3 Category of Efforts

The FBI currently owns [redacted] that have been used by [redacted] and [redacted] for [redacted] in support of FBI investigations. OTD's [redacted] is also a user of the [redacted] for similar usage but different operational goals than [redacted] The FBI's goal is to field all [redacted] to the [redacted] The Key Areas below detail the FBI's needs that shall at a minimum be met. The Contractor is to provide a technical approach to at a minimum meet these needs and may provide alternative strategies for review.

Subject: Request for Engineering Change Proposal:

Dear

Please find attached the supplement to the original developed by the Federal Bureau of Investigation (FBI). was awarded under in September of 2010 for these requested engineering services. This enhancement to the original shall be performed in accordance with the Contract. shall provide technical and cost engineering change proposals (ECP) to support this enhancement as set forth in the SOW. Labor rates and similar costs were agreed upon at the award of the contract and Task Order, as a result, the FBI does not anticipate an extensive Cost Proposal. Estimates of hours per labor category are required at a minimum. Additional supporting documentation is also attached and referenced in the SOW enhancement document.

b3
b6
b7C
b7E

If there are any question regarding this SOW please submit them to my office within the next five (5) business days. It is requested that review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical ECP should be submitted in accordance with the terms and conditions of the Contract no later than June 14, 2011 at 1:00 PM EST or sooner. Unclassified proposals shall be emailed to

Should you have any questions concerning this matter, please contact me at the e-mail address above or

Sincerely,

Contracting Officer

Subject: Request for Engineering Change Proposal

b3
b6
b7C
b7E

Dear

Please find attached the supplement to the original Statements of Work (SOW) developed by the Federal Bureau of Investigation (FBI) was awarded under in September of 2010 for these requested engineering services. This enhancement to the original shall be performed in accordance with the Contract. shall provide technical and cost engineering change proposals (ECP) to support this enhancement as set forth in the SOW. Labor rates and similar costs were agreed upon at the award of the contract and Task Order, as a result, the FBI does not anticipate an extensive Cost Proposal. Estimates of hours per labor category are required at a minimum. Additional supporting documentation is also attached and referenced in the SOW enhancement document.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days. It is requested that review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical ECP should be submitted in accordance with the terms and conditions of the Contract no later than June 14, 2011 at 1:00 PM EST or sooner. Unclassified proposals shall be emailed to

Should you have any questions concerning this matter, please contact me at the e-mail address above or

-

b)

he contractor shall perform the following system improvements:

-
-

b3
b7E

-
-
-
-

CELLSITE-11176

- [redacted]

c) [redacted] sees a number of longer term issues that require attention, such as [redacted] n order to be mitigating the risks associated with [redacted] would require the vendor to perform studies that will help guide future efforts. The contractor shall perform the following studies: b3 b7E

- [redacted]

d) [redacted] **Only Requirements** – [redacted] has requirements specific to their operational use of [redacted] This would perhaps make a [redacted] since these capabilities [redacted] The contractor shall perform the following: b3 b7E

- [redacted]

2 Requirements

2.1 Security Standards and Regulations

Refer to [redacted] Statement of Work section 2.3 for guidance.

SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR. b3 b7E

2.2 Contractor Furnished Documentation

Refer to [redacted] Statement of Work sections 2.6 and 3.2 for guidance.

Project management plan shall consist of the Contractor's proposed solution to include the composition of required project team, complete task schedule, and total labor and non-labor costs for fully implementing the proposed solution.

2.3 Status Reporting

Refer to [redacted] Statement of Work Section 3.3 for guidance.

2.4 Formal Meetings

Refer to [redacted] Statement of Work Section 3.4 for guidance.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 10-17-2012 BY 65179 DMH/rs

Phone call w [redacted] on 8/10/10 @ 2:45

Called to let me know she'll be providing a spreadsheet w/ changes/mods for POs – some of the pricing we're using isn't the best pricing. They included GSA and Contract pricing and allowed us to use whatever was "cheapest." We used contract pricing not knowing there were two price lists. She calculates approximately [redacted] in changes – credits.

[redacted] is also working on one consolidated price list for the contract to avoid future confusion. She has suggested that we do a quote per order to ensure most up to date pricing [redacted] sees this as a potential administrative burden if pricing has already been established.

b3
b6
b7C
b7E

[redacted] also is under the impression that if the GSA contract pricing adjusts (something allowable under the GSA Contract vehicle) we would be able to take advantage of lower prices or pay more if prices went up. [redacted] informed her that that is NOT how FFP contracts work. Both parties will look into this before making final determinations. [redacted] needs to discuss w/ OGC the feasibility of having "2 contracts" under one and the ability to change pricing mid stream like that on an FFP contract.

[redacted] noted that each cost proposal on the TOs had lengthily conditions and assumptions [redacted] said these were inserted per the original contract. Reference 2.6 is from the original SOW for the contract.

[redacted] Contract Meeting – Project Status Reports and Planning, [redacted] Contract Mods
Contract [redacted]
Date: 6/23/10 at [redacted]
Attendees: [redacted]

b3
b6
b7C
b7E

Topics: 6-23-10

- Project Status Reports
  - [redacted] wants 2 slides per project 1) project status and 2) project plan (w/ start date) and wants [redacted] to identify key personnel on each.
  - Comments: presentations were too lengthy, repeated information presented in March and April of 2010, [redacted] in [redacted] internal initiative on equipment progress
  - Projecting all [redacted] by late July 2010
  - [redacted] informed that condensed version will be made available to [redacted]
    - [redacted] received assurance that new [redacted] can be added to [redacted] and can [redacted] as needed
  - Off Topic Presentations:
    - [redacted]
    - WITT conference discussed products and Q&A with field
- Space for work:
  - Identified FBI designated space for classified work to begin – includes equipment to start work and storage,
  - Space is currently "restricted" until our security personnel can approve it as [redacted] security personnel should be approving the space for use by 6/25
    - Need a [redacted] – closest "approved [redacted] is in offsite [redacted]
- Statements of Work
  - [redacted] has many questions – information within is unclear, need "scope definition," [redacted] SOW lacks clarity and teeth – no "shall" within SOW. [redacted] thinks they are asking for more detail than required – he should provide definition of an end result and it's [redacted] responsibility to do the "how"
  - All questions and secure information should go through [redacted] to track SOW changes
  - [redacted] can turn around a technical and cost proposal within 2-3 weeks
- Contracting Matters
  - COs decided to retract all services funding [redacted] as SOWs were unclear, new contract with new "starting points" for all Tasks – cannot use previous SOW [redacted] will need to send TO Letter to [redacted] for each SOW to gain technical and cost proposals and define new scope per project.
  - [redacted]
  - [redacted]

Subject: [redacted]

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services developed by the Federal Bureau of Investigation (FBI).

The FBI is interested in obtaining a proposal for this task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the Statement of Work.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days.

It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than August 3, 2010 1:00 PM EST. Unclassified proposals maybe email to [redacted]

Should you have any questions concerning this matter, please contact me at [redacted] [redacted] esponse may be faxed to [redacted] secure fax [redacted]

Subject: [redacted]
Request for Engineering Change Proposal [redacted]

Dear [redacted]

Please find attached the supplement to the original [redacted] Statements of Work (SOW) developed by the Federal Bureau of Investigation (FBI) [redacted] was awarded under [redacted] in September of 2010 for these requested engineering services. This enhancement to the original Task shall be performed in accordance with the Contract. [redacted] shall provide technical and cost engineering change proposals (ECP) to support this enhancement as set forth in the SOW. Labor rates and similar costs were agreed upon at the award of the contract and Task Order, as a result, the FBI does not anticipate an extensive Cost Proposal. Estimates of hours per labor category are required at a minimum.

b3
b7E

If there are any questions regarding this SOW please submit them to my office or log them for discussions during the FBI status review meeting during the week of August 8. It is requested that [redacted] review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical ECP should be submitted in accordance with the terms and conditions of the Contract no later than August 17, 2011 at 2:00 PM EST or sooner. Unclassified proposals shall be emailed to [redacted]

Should you have any questions concerning this matter, please contact me at the e-mail address above or [redacted]

Sincerely,

[redacted]
Contracting Officer

Subject: [redacted] Engineering Change Proposal - [redacted] Task Order

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services to provide an [redacted] to the ongoing [redacted] Task Order under the task previously awarded by the Federal Bureau of Investigation (FBI). This enhancement to the original Task shall be performed in accordance with the subject Contract. [redacted] shall provide technical and cost proposals to support this enhancement as set forth in the attached Statement of Work. Because labor rates and similar costs were agreed upon at the award of the contract and Task Order, an extensive Cost Proposal is not anticipated. Estimates of hours per labor category are required at a minimum.

b3
b7E

If there are any question regarding this SOW please submit them to my office within the next five (5) business days. It is requested that you the [redacted] review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than April 7, 2010 1:00 PM EST. Proposals may be submitted through fax at one of the numbers below or through unclassified e-mail at [redacted]

Should you have any questions concerning this matter, please contact me at [redacted] [redacted] response may be faxed to [redacted] secure fax [redacted]

Contract:
Subject: FBI Response to Letter dated 11 October 2011

Good Afternoon

On October 6, 2011, Program Manager requested the FBI convert funding originally proposed for in the amount of This conversion was requested to cover additional service hours not estimated in the original proposal. stimated an additional under Phase 2 and under Phase 3 would be required in order to complete the original requirements of th Task Order (TO).

On October 7, 2011, the FBI requested provide additional information and assurances demonstrating actions taken by to control costs and share in the financial responsibility of these overruns. The above referenced Letter provides the requested response. The FBI appreciates efforts to mitigate such risks in the future.

In response to the conversion request and this Letter, the FBI provides the following approvals and assertions:

b3
b7E

- September 2010: proposed of funding for under the TO;
- Winter 2011: the FBI provided equipment required in the proposal as Government Furnished Equipment, yielding a savings of for the government;
- Mary 2011: the FBI approved the conversion of of thi budget towards required under Phase 1 of the TO, requested by in April 2011;
- The FBI hereby approves the conversion of the remaining of this original budget towards the above requested for Phases 2 and 3;

The FBI understands that [redacted] is not requesting additional funding beyond the originally awarded TO value. Regardless, the above requests for funding conversion represent additional funding required in excess of the originally budgeted funding for [redacted] As such, the requested additional [redacted] is hereby recorded as cost overruns required to complete the [redacted] under the TO. The FBI appreciates [redacted] use of management reserve and benefits from other efficiencies in order to identify the remaining funds necessary. [redacted] is advised that no additional funding beyond this portion shall be afforded to complete these efforts.

If there are any questions please do not hesitate to contact my office.

b7E

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b3
b7E

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [redacted] continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [redacted] routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. [redacted] assessed available capabilities and have determined that other vendor technologies have not yet achieved the advanced capabilities that [redacted] can provide.

DECLASSIFY ON: 10-18-2037

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

(U) This document is classified "~~SECRET~~" in its entirety, unless otherwise noted.

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) In response to a requirement from the Operational Technology Division (OTD), [redacted] has prepared this Justification for Other Than Full and Open Competition for the establishment of an Indefinite Delivery Indefinite Quantity (IDIQ) type contract with provisions for Firm Fixed Price, Cost Plus Fixed Fee and Time and Materials for quick reaction tasking with [redacted] acquisition of [redacted]

b3
b7E

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a contract in support of on going missions of the FBI involving [redacted] This [redacted] is only available through the [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b1
b3
b7E

(U) [redacted] is responsible for providing the FBI with [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) plays a critical role in the [redacted]

(S) [redacted]

~~SECRET~~

(S)

b1
b3
b7E

(U) [ ] contemplates the award of an IDIQ type contract with provision for FFP, CPFF and T&M for quick reaction type tasking as required by the contract in support of ongoing efforts. The estimated cost over the life of the contract is [ ] The guaranteed minimum is [ ] and maximum not to exceed [ ] The initial term of the contract will be for the base 12 month period, with four additional one-year options.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

b1
b3
b7E

(S) [redacted] b1 b3

(U) Therefore, in accordance with 41 U.S.C. 253 (c)(6), as authorized by FAR 6-302-6 this procurement will not be conducted as a full and open competition, as disclosure of the FBI's need would compromise national security and the FBI's missions.

6. **EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE,** INCLUDING COMPLIANCE WITH SUBPART 5.2 AND, IF NOT, WHICH EXCEPTION UNDER FAR PART 5.202 APPLIES:

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would [redacted]

[redacted] b1 b3 b7E

(S) [redacted]

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) A cost and price analysis will be conducted prior to award each task to ensure the FBI is paying a fair and reasonable price for all equipment and services.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

(U) [redacted] continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [redacted] routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. [redacted] assessed available capabilities and have determined that other vendor technologies have not yet achieved the advanced capabilities that [redacted] can provide.

(U) The [redacted] continues to search the market place for contractors to expand its contractor base for both diversity and competition. To the extent that is possible, a market survey was done. Because even limited search of the market places involves discussions with contractors about b3 b7E

[redacted]

[redacted] contracts with additional contractor must be kept to a minimum. Publication in the Fedbizopps and other public offerings are not possible because of the damage that this would case to national security.

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION**

[redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. **A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. **A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED**

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

Conclusion--

(U) Based on the above findings, it is hereby determined, that in accordance with FAR the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the

disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:

(a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
X	D. OTHER (Specify type of modification and authority) FAR 52.243-2 "Changes - Cost-Reimbursement"

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

The purpose of this modification is to provide a no cost extension to the period of performance for the above PO for the [redacted] effort. The revised POP is 9/30/10-3/31/11. All work is to be performed in accordance with the statement of work and all terms and conditions remain the same. Contractor exceeds funding at their own risk. All technical guidance to come from the COTR [redacted]

Good Afternoon [redacted]

Thank you for your continued patience. Please be advised, I am faxing down Mod 1 to PO [redacted] On this PO we have deobligated the funding for Lines 1 and 2 for [redacted] Based on a change in mission requirements, we will no longer be requiring these pieces of equipment. The revised PO reflects this change.

Secondly, please be advised that the FBI intends to remove the [redacted] equipment from Contract [redacted] [redacted] An official modification to the contract will also be included with the revised PO referenced above.

Please let me know if you have any questions.

Thank you again for your assistance,

Questions:

Enclosure 2 (Contractor Purchasing System Review (CPSR) Approval)

Letter from [redacted] January 4, 2006 grants approval for [redacted] purchasing system. Approval is to run through December 31, 2006. Unless it is revoked it should run an additional 3 years, to December 31, 2009.

Letter from [redacted] dated March 6, 2008 references a non-enclosed letter dated March 8, 2007 from the same [redacted] regarding approval for the system to be extended for one year until March 8, 2009.

Was approval revoked between January 2006 and March 2008?
Why?
Last listed date of expiration of approval is March 8, 2009. We are past that date, is continued approval under re-consideration?
Was the March 8, 2007 letter in regards to reinstating the approval?

[redacted] Comments & Considerations for Delivery Order Numbers:

[redacted]

b3
b7E

Each Delivery Order (DO) has been established with incremental funding. Statements of Work (SOW) are to be or have been provided. [redacted] has several questions on the SOW's received thus far necessitating the need for a technical meeting to clarify the requirements and DO deliverables. This Technical meeting must be held within the next few weeks. Once the requirements are clearly defined [redacted] must prepare and submit proposals to the Customer in order to establish the firm contract value (including COM, and fee) for each DO. Definitization should occur on or before 180 days.

The DO's once formally definitized by the Customer will establish each DO value and Period of Performance (POP).

Assumptions:

- Current Incremental Funding establishes the baseline value and is not to be construed to represent a firm total DO value and is subject to the Limitation of Funds Clause 52.232.22.
- The POP dates called out in each DO of 6/4/2010 – 6/4/2011 will be adjusted based on the negotiations.
- Payment Invoices: Block 9 states an individual to send the invoices to the attention of. Within the body of the DO direction states that the invoices will be submitted to the COTR [redacted] [redacted] Section G.3 lists the Invoice Requirements for the IDIQ.
  - Based on each of these [redacted] will submit invoices:
    - Original invoice is submitted to the COTR, currently named as [redacted] s responsible to review and verify DO progress/acceptance.
    - [redacted] s to affix his verification notice to the original invoice and forward to the cognizant CO who in turn will approve the invoice or recommend corrective action. Approved invoices will be forwarded by the CO to the payment office.
    - Payment Terms will be Net 30 once the COTR received the original invoice.
- Intellectual Property rights assertions will be made, if appropriate, each DO. [redacted] typically does not provide documentation to the Customer on its internally developed (IRAD).

b3
b7E
b6
b7C

Specific Questions to individual DO's:

- DO [redacted]
  - Two CLINs (0001 and 0002) are called out.
    - CLIN 0001
    - CLIN 0002 [redacted]
- The SOW does not clearly define what is relative to CLIN 0001 and that to CLIN 0002.

b7E

- Customer please clarify why the two CLINs, and how invoices should be handled.

  _____ Expend funds linearly (expend CLIN 1 up to [redacted] then invoice CLIN 0002 up to [redacted] or whatever the firm DO value is negotiated at).

  or

  [redacted] _____ Expend funds consecutively (Contractor determines apportionment for each CLIN and invoices this amount on the invoices: based on the negotiated DO value).

  or [redacted]

  _____ _____.

b7E
b5

- DO [redacted] & DO [redacted]
  - DO [redacted] requires [redacted] to study and develop enhancements to the [redacted]
  - DO [redacted] orders [redacted]
  - The POP for each is noted as 6/4/10-6/4/11.
  - [redacted] currently believes that we must perform DO [redacted] to some level prior to engaging in the manufacture and delivery of [redacted]
    - POP will need to be adjusted to reflect this. Once the requirements of DO [redacted] are clarified at the upcoming Technical Meeting [redacted] will propose the value and POP to the Customer.
    - The revised hardware is what will be required by [redacted] and the period of performance will remain To Be Defined (TBD) until the outcome of [redacted] allows the team to define the delivery.
    - The per unit price for the [redacted] may change given the hardware update to the Customer's new requirements [redacted]

b3
b7E

Justification and Approval For Other than Full and Open Competition

In accordance With 41 U.S.C. 253 (c) (1)

1. **Identification of the agency and the contracting activity, and specific identification of the document as a "Justification for Other Then Full and Open Competition."**

   The Federal Bureau of Investigation's Quantico Contracts Unit (QCU) has prepared this justification for Other than Full and Open Competition in response to a requirement from the [redacted] to establish a fixed price contract for the acquisition for equipment.

2. **Nature and/or description of the action being approved.**

   This Justification for Other Than Full and Open Competition is being prepared in accordance with the authority of FAR 6.302-1 "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements."

3. **A description of the supplies or services required to meet the agency's needs (including the estimated value).**

   The [redacted] has been working in association with the [redacted] to identify, evaluate, and procure Commercial Off-the-Shelf (COTS) [redacted]

b7E

(S) [redacted]

b1
b3
b7E

~~SECRET~~

(S) [redacted] b1 b3 b7E

The total is [redacted]

4. **An identification of the statutory authority permitting other than full and open competition.**

   FAR 6.302-1 Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements.

5. **A demonstration that the proposed contractor's unique qualifications or the nature of the acquisition requires use of the authority cited.**

   [redacted] system is proprietary, [redacted] is the only company that makes the specific item that is being requested for procurement. b3 b7E

6. **A description of efforts made to ensure that offers are solicited from as many potential sources as is practicable, including whether a notice was or will be publicized as required by Subpart 5.2 and, if not, which exception under 5.202 applies.**

   No publication of this procurement will be made in accordance with FAR 5.202(a)(1) because of the sensitive nature of this program and technical capabilities. Although some of the expertise may exist in the FBI and Intelligence Community today, it is not feasible or practicable to advertise this requirement openly as it will represent unnecessary risk by divulging the nature of the mission of the Unit and this program.

7. **A determination by the contracting officer that the anticipated cost to the Government will be fair and reasonable.**

   The Contracting Officer will ensure that the anticipated cost to the government will be fair and reasonable. Techniques may include an analysis of proposed direct costs,

audit or comparison of proposed indirect factors with audited factors in use elsewhere in the Government and comparison of proposed rates to published rates.

8. **A description of the market research conducted and the results or a statement of the reason market research was not conducted.**

Over the past year, the [redacted] has evaluated three [redacted]

[redacted]

b3
b7E

Based on its fulfillment of very specific evaluation criteria, th[redacted] has selected the [redacted]

[redacted]

FBI representatives from [redacted] will continue to do market research and meet with vendor representatives to further research.

9. **Any other facts supporting the use of other than full and open competition**

(S) [redacted]

b1
b3
b7E

10. **A listing of the sources, if any, that expressed, in writing, an interest in the acquisition.**

None

11. **A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services required.**

The FBI will continue to do market surveys to identify potential sources on subsequent acquisitions.

[redacted] Need EC justification, requisition , cost proposal, funding source, etc so this can get completed. [redacted] **will need to do a PO by Friday morning** . I you have authorized this already [redacted] will bill the FBI for their time to do power points, travel, and time as this has been a historical issue [redacted] did not authorize this nor are funds to be taken from

existing [redacted] projects/tasks since these are already encumbered [redacted] discussed this with you already). . If [redacted] is doing this on their dime then no problem. [redacted] wants to cut a separate PO so that funding from ongoing task orders will not be utilized for this briefing.. Currently [redacted] has three personnel to conduct this brief and it is the same brief that was conducted with you several weeks ago.

To prevent a possible Ratification issue this needs to be completed and [redacted] needs requisition NLT Friday am.. .

Good Afternoon [redacted]

It is in the FBI's best interest to have our own representatives provide the presentation. This strategy would be more cost effective as it would not require the funding for [redacted] preparation/presentation and would eliminate the need for government travel. Furthermore, our FBI representatives could provide a more in depth presentation as they are intricately involved in the programs and are more familiar with the FBI operational needs.

I support [redacted] recommendation for an internal presentation. If I can be of any further assistance please do not hesitate to contact me. b3 b6 b7C b7E

1 July 2010

Subject: Action Items for 6-23-10 Program Meeting
Contract

b3
b6
b7C
b7E

Dear

Thank you for taking the time to meet with our on June 23, 2010. As we made clear during the meeting, we are anxious to get work started under this contract. Additionally, our funding has a life expectancy. As advised on during this Program Meeting has been instructed not to proceed with any additional services and additional work regarding any Purchase Orders revoked during the meeting has been advised to stop work until such time that the FBI submits official tasking statements of work and has provided funding for services.

Cancelled Purchase Orders: The following Purchase Orders are hereby withdrawn and is instructed to destroy these documents as funding has been deobligated until Taskings have been officially awarded. These awards will be issued under new Purchase Orders. POs to destroy:

Forthcoming Tasking Requests: The FBI is working diligently to complete our final, official Statements of Work (SOW) for the above Taskings. It is our intention to submit these Taskings on 7/12/10 for a technical and cost proposal from Each Tasking should be treated as an individual project; therefore, a response for one Tasking should not be held or delay any responses to other Taskings is the Contracting Officer's Technical Representative for the Contract. Any Technical Leads on individual Taskings will be identified within the SOW or at the Tasking Kick-Off Meeting.

b3
b6
b7C
b7E

Security Matters: Please provide the FBI with a status of the secured space for work and a proposed schedule for any outstanding requirements in order to . We are working with Security to coordinate the requested STE and making adjustments to the DD-254. Unfortunately, these requirements must go through the security division. We have provided them with the

background and delays on this project; however, we are unable to control the rate at which they provide us with the final equipment and documentation.

NDAs: The NDAs for all participants in [redacted] contract require an FBI employee to witness the signature on behalf of the Director of the FBI. [redacted] is making arrangements during the week of 7/6/10 for those [redacted] individuals still needing to sign an NDA before assisting in the proposal responses. All original documents shall be mailed to [redacted] for tracking. Any travel conducted as a result of these signatures will not be funded by the FBI.

b3
b7E
b6
b7C

[redacted] Services: The engineers for this program have signed the required NDA, as such, services under PO [redacted] for the [redacted] may start as soon as possible [redacted] under this effort are classified, while the specific [redacted] development is unclassified – please see the SOW and other contract documentation for specific details – all terms and conditions apply per the contract.

[redacted]

If I can be of further assistance with this effort you may contact me via e-mail at [redacted]@ic.fbi.gov.

b6
b7C
b3
b7E

Sincerely,

[redacted]
Contracting Officer

[redacted] Task Order 1 Questions

b3
b7E

Regarding Section "1.3.1 Key Areas" of the [redacted] SOW, the items are listed as "examples" of what should be done on the Task. In order to properly bid these activities, we are making the following assumptions. The contractor requests that you review these assumptions, verify their accuracy and provide more clarification where necessary.

Subject: Contrac[redacted]
Task Order Letter Request

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for training developed by the Federal Bureau of Investigation (FBI). This requirement describes the need for training of FBI personnel in the operation of the [redacted] device. The FBI intends to award this requirement as a new Task Order under the existing [redacted] Contract utilizing Firm Fixed Price (FFP) provisions. The FBI is interested in obtaining a proposal for this task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the Statement of Work. Contractor is requested to provide pricing on a per person/student basis and per class for a comparison and determination of most cost effective and efficient strategy for obtaining the necessary training. In the future, the FBI may consider adding this training to the Contract price list.

b3
b6
b7C
b7E

The award of this TO is contingent upon receipt of funding. If there are any question regarding this SOW please submit them to my office, in writing, within the next five (5) business days. It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract no later than 10 May 2012 at 1:00 PM EST or sooner. Unclassified proposals maybe email t[redacted]@ic.fbi.gov.

Should you have any questions concerning this matter, please contact me at 202[redacted] response may be faxed to 202[redacted]

[redacted] Training Evaluation

Cost Assessment:

The cost of the course is [redacted] for one instructor per four students. The FBI requests [redacted] students and [redacted] instructors so we can perform [redacted] classes simultaneously for a cost of [redacted]. This equates to [redacted] per student for [redacted] days of instruction which includes [redacted] of classroom instruction [redacted] of deployment practical exercises with emphasis on [redacted] will include a written test and a practical application test. [redacted] b7E

We also requested two classes simultaneously to get as many [redacted] trained in the shortest amount of time.

Technical Evaluation:

The [redacted] training material consists of six sections.

		10B. DATED (SEE ITEM 13) 05/18/2011

b3 b6 b7C b7E

CODE	FACILITY CODE

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

[ ] The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers [ ] is extended, [ ] is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
[ ]	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
[ ]	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
[ ]	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
[X]	D. OTHER (Specify type of modification and authority) FAR 32.7 "Funding" and 43.103 "Bilateral"

E. IMPORTANT: Contractor [ ] is not, [X] is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

The purpose of this modification is to provide funding for services for the [redacted] [redacted] Tasking. Services are to be provided in accordance with the Terms & Conditions of the contract, SOW, and ECP agreements. POP for [redacted] is 6/10/11-8/31/11; original [redacted] Task is extended through 8/30/11 for consistency. For [redacted] Contractor shall not exceed [redacted] and does so at own risk. Technical guidance will come from [redacted], TL; invoice to COTR [redacted]. The following documentation is hereby incorporated into the award of [redacted] and Contract: 1) SOW and support docs e-mailed 5/23/11 at 4:33PM; 2) ECP Technical [redacted] doc e-mailed 6/14/11 at 5:10PM; 3) e-mail chain 6/23/11 at 3:43PM; and 4) [redacted] ECP Cost doc to be revised and agreed upon ASAP.

b3 b6 b7C b7E

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

Subject:

I confirm, that I want harris to purchase items for the project but:

This only for items that we did not already provide them, as I believe that we may have already

Also, I would like them to pay for any services needed for the as well.

These would not become property of harris at end of contract, and shall be F bumbered.

This is my opinion, and think will make final call on this.

Hi

Just to be clear - you do not want to issue them for any of the 4 items listed in the attachment. Instead you would like Harris to purchase these with funding from the task order once awarded. Please be advised that they will be tacking on to these purchases, i.e.

Please confirm.

Thanks,

b6

I did not agree to any of the to Harris. They were listed in the technical part of the proposal. I would rather they buy them, to include the service, and quote that as part of the contract price.

FD-857 (Rev. 9-15-05)

SENSITIVE INFORMATION NONDISCLOSURE AGREEMENT

An Agreement between_____ and the Federal Bureau of Investigation (FBI) regarding the following activities:

1. Intending to be legally bound, I hereby accept the obligations contained in this Agreement in consideration of my being granted access to sensitive information from FBI investigations as required to perform my duties. As used in this Agreement, sensitive information is marked or unmarked information, including, but not limited to, oral communications, the disclosure of which may compromise, jeopardize or subvert any investigation. Sensitive information also includes information relating to closed investigations, the disclosure of which might compromise, jeopardize or subvert other law enforcement activities or investigations. I understand and accept that by being granted access to this sensitive information, special confidence and trust shall be placed in me by the FBI.

2. I hereby acknowledge that I have received an indoctrination concerning the nature and protection of sensitive information, including the procedures to be followed in ascertaining whether other persons to whom I contemplate disclosing this information have been approved for access to it, and that I understand these procedures.

3. I have been advised that the unauthorized disclosure, unauthorized retention, or negligent handling of sensitive information may cause irreparable damage to FBI investigations and that I will never divulge sensitive information to anyone unless (a) I have officially verified that the recipient has been properly authorized by the FBI to receive it; or (b) I have been given prior written notice of authorization from the FBI that such disclosure is permitted. I understand that if I am uncertain as to the sensitive nature or status of information, I am required to confirm from an authorized official that the information may de disclosed prior to disclosure of this information.

4. I have been advised that any breach of this Agreement may result in the termination of my relationship with the FBI. In addition, I have been advised that any unauthorized disclosure of information by me may constitute a violation or violations of United States criminal laws, including Title 18. United States Code, or may lead to criminal prosecution for obstruction of lawful government functions. I realize that nothing in this Agreement constitutes a waiver by the United States of the right to prosecute me for any statutory violation.

5. I understand that all sensitive information to which I have access or may obtain access by signing this agreement is now and will remain the property of, or in the control of the FBI unless otherwise determined by an authorize official or final ruling in a court of law. I agree that I shall return all sensitive materials which have or may come into my possession, or for which I am responsible because of such access: (a) upon demand by an authorized representative of the United States Government; or (b) upon the conclusion of my relationship with the FBI, whichever occurs first.

6. I understand that these restrictions are consistent with and do not supersede, conflict with, or otherwise alter my obligations, rights, or liabilities created by Executive Order No. 12958; Section 7211 of Title 5, U.S.C. (governing disclosures to Congress); Section 1034 of Title 10, United States Code, as amended by the Military Whistleblower Protection Act (governing disclosure to Congress by members of the military); section 2302(b)(8) of Title 5, United States Code, as amended by the Whistleblower Protection Act (governing disclosures of illegality, waste, fraud, abuse or public health or safety threats); the FBI Whistleblower Protection Act (5 U.S.C. 2303, 28 C.F.R. Part 27) (governing disclosures of illegality, waste, fraud, abuse or public health or safety threats); the Intelligence Identities Protection Act of 1982 (50 U.S.C. 421 et seq.) (governing disclosures that could expose confidential government agents); and the statutes which protect against disclosure that may compromise the national security, including Sections 641, 793, 794, 798, and 952 of Title 18, United States Code, and Section 4(b) of the Subversive Activities Act of 1950 (50 U.S.C. 783(b)). The definitions, requirements, obligations, rights, sanctions, and liabilities created by said Executive Order and listed statutes are incorporated into this agreement and are controlling. I further understand, however, that any such information that is disclosed pursuant to applicable federal law continues to be subject to this agreement for all other purposes, and disclosure to the appropriate entities provided by federal law does not constitute public disclosure or declassification, if applicable, or such information.

7. Unless and until I am released in writing by an authorized representative of the FBI, I understand that all conditions and obligations imposed upon me by this Agreement apply during the time I am granted access to the sensitive information and at all times thereafter.

8. Each provision of this Agreement is severable. If a court should find any provision of this Agreement to be unenforceable, all other provisions of the Agreement shall remain in full force and effect.

9. I understand that the United Stated Government may seek any remedy available to it to enforce this Agreement including, but not limited to, application for a court order prohibiting disclosure of information in breach of this agreement. I hereby assign to the United Stated Government all royalties, remuneration, and emoluments that have resulted, will result or may result from any disclosure, publication, or revelation of sensitive information not consistent with the terms of this Agreement.

10. I have read this Agreement carefully and my questions, if any, have been answered:

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 11-01-2012 BY 65179 DMH/MJS

NON-DISCLOSURE AGREEMENT
by and between
the Federal Bureau of Investigation and [redacted]

Effective the day of , 2009, [redacted] ("Receiving Party"), a corporation of the [redacted] and the Federal Bureau of Investigation ("FBI"), having its headquarters at 935 Pennsylvania Avenue, N.W., Washington, D.C. 20535 (collectively, "the parties"), agree as follows.

WHEREAS, in furtherance of providing valuable information to develop new and/or to enhance existing products and services of the respective parties, certain disclosures may be made by the parties to one another, wherein these certain disclosures may contain information considered to be Aproprietary,@ as defined below in Article II of this Agreement. Such disclosures are hereinafter referred to as Aproprietary information,@ as defined below in Article II of this Agreement.

ARTICLE I - SUBJECT MATTER OF THIS AGREEMENT

[redacted] b3 b7E

Wireless Intercept Tracking Team (WITT) [redacted]

[redacted]

[redacted] . The WITT [redacted]

[redacted]

ARTICLE II - DEFINITIONS

As used herein, the following terms and phrases shall have the meaning set forth below.

"Proprietary" shall mean information that is not available to the public and which the parties desire to protect against disclosure or competitive use, and which may be subject to a trade secret, and shall include, but not be limited to, law enforcement sensitive information.

"Information" shall include, but not be limited to: specifications, drawings, tracings, sketches, figures, tables, charts and designs; computer software and other computer programming documentation, computer hardware and other equipment; know-how; models, samples, products and materials; data, including, but not limited to, test data; technologies, ideas and concepts; and non-public, current, future and historical commercial information, including, but not limited to, business plans, reports, marketing strategies and forecasts, product development plans and other product development information and financial plans and other financial information.

"Proprietary Information" shall mean information that is in possession of the parties, is not available to the public and which the parties desire to protect against unrestricted disclosure

or competitive use, and which, if disclosed, could harm or otherwise impede investigative activities, techniques and methods, or other activities of the parties.

"Personnel" shall include, but not be limited to: employees, contractors, authorized agents and authorized representatives of the respective parties.

ARTICLE III - DESIGNATING PROPRIETARY INFORMATION

If the proprietary information is tangible, it shall be clearly designated by the FBI as proprietary by appropriate legend, marking, stamp or other positive identification indicating the proprietary nature. If the proprietary information is communicated orally or visually to the Receiving Party, then such oral or visual communication shall be deemed proprietary at the time of the communication. The FBI shall have the right to correct any inadvertent failure to designate information as Proprietary Information by written notification as soon as practical after such inadvertent failure to designate is determined. The Receiving Party shall thereafter treat such information as Proprietary Information.

ARTICLE IV - OBLIGATIONS AND LIMITATIONS

No proprietary information disclosed by the FBI pursuant to this Agreement shall be used, duplicated or disclosed for purposes other than as set forth in Article I of this Agreement without the prior written approval of the FBI. If the proprietary information is reproduced in whole or in part, then the reproduction shall carry a proprietary designation identical to or, at least, similar to, that which appears on the original.

After receipt of proprietary information from the FBI, the Receiving Party shall disclose such information only on a need-to-know basis to personnel of the Receiving Party. Receiving Party personnel who have or had access to the FBI=s proprietary information shall be informed of and obligated to protect the proprietary information from unauthorized use, duplication or disclosure. The Receiving Party shall promptly notify the FBI of any unauthorized use, disclosure or duplication of the FBI=s proprietary information and shall endeavor to prevent further unauthorized use, duplication or disclosure thereof.

The Receiving Party shall protect proprietary information disclosed by the FBI with, at least, the same degree of care as if it were the Receiving Party=s own proprietary information, but in no case with less than a reasonable degree of care.

The Receiving Party agrees not to reverse engineer any proprietary information disclosed by the FBI pursuant to this Agreement.

ARTICLE V - NO ENDORSEMENT, LICENSE, ASSIGNMENT OR THIRD PARTY RIGHTS

The use of any materials, technologies, equipment, products and processes by the [redacted] shall not constitute an endorsement of any such materials, b7E technologies, equipment, products or processes. Such use shall not be construed as an

CELLSITE-10692

endorsement, nor imply, orally or in writing, that the [redacted] endorses any such materials, technologies, equipment, products or processes. b7E

No license, exclusive or non-exclusive, under any foreign or domestic patent or foreign or domestic patent application, provisional or non-provisional, shall be granted to the Receiving Party, either directly or indirectly by this Agreement; nor shall rights of ownership in any proprietary information be granted to the Receiving Party by this Agreement; nor shall the Receiving Party file, cause to be filed or assist in preparing or filing, any provisional or non-provisional, domestic or foreign, patent application that relates in any way to the FBI=s proprietary information without the express written consent of the FBI. All Proprietary Information shall remain the property of the FBI. If the parties decide to enter into any licensing arrangement regarding the Proprietary Information or present or future patent claims disclosed hereunder, it shall only be done on the basis of a separate written agreement between them.

This Agreement shall not be assigned by either party without the other party=s prior written consent, which consent shall not be unreasonably withheld. This Agreement shall inure to the benefit of and be binding upon the parties= successors and said consented to assigns.

This Agreement is not intended, and should not be construed, to create any right or benefit, substantive or procedural, enforceable at law or otherwise, by any third party against the United States or the parties or personnel thereof.

ARTICLE VI - TERM AND TERMINATION OF THE AGREEMENT AND THE RETURN OF PROPRIETARY INFORMATION

This Agreement shall remain in force for a period of five (5) years from the effective date set forth on page one (1) of this Agreement, unless earlier terminated as provided for herein, or unless amended and extended by mutual written agreement of the parties. Either party, upon thirty (30) days advance written notice, may terminate this Agreement. Termination shall not, however, affect the provisions, limitations and obligations contained herein of both parties with respect to proprietary information supplied under the terms of this Agreement prior to termination. These provisions, limitations and obligations shall survive the expiration of the term of this Agreement.

The Receiving Party shall, upon written request of the FBI or upon termination of this Agreement, whichever is sooner, cease use of all proprietary information received from the FBI and shall destroy all such information, including copies thereof, and shall furnish to the FBI written certification of such destruction; or, alternatively, at the FBI=s request, the Receiving Party shall return to the FBI all the FBI's proprietary information disclosed under this Agreement in substantially the same condition as it was received, to the extent possible. All notes, abstracts, memoranda, or other documents prepared by the Receiving Party which contain Proprietary Information or any discussion thereof, shall be destroyed or returned to the FBI upon written request.

The failure of either party to enforce at any time any provision of this Agreement, or the failure to require at any time performance by the other party of any provision of this Agreement,

CELLSITE-10693

shall in no way be construed to be a present or future waiver of such provision, nor in any way affect the right of either party to enforce any such provision thereafter.

Notwithstanding anything else in this Agreement, no default, delay or failure to perform on the part of either party shall be considered a breach of this Agreement if such default, delay or failure to perform is shown to be due to causes beyond the reasonable control of the party charged with default, delay or failure to perform. Causes beyond the parties' reasonable control shall include, but not be limited to: strikes, lockouts or other labor disputes, riots, civil disturbances, actions or inactions of governmental authorities or suppliers, epidemics, war, embargoes, severe weather, fire, earthquakes, acts of God or the public enemy or nuclear disasters or default of a common carrier.

ARTICLE VII - LIABILITIES

Neither party shall be liable for the use, disclosure or duplication of proprietary information under any of the following conditions:

1. the information is in the possession of or known to the Receiving Party prior to receipt thereof from the FBI;
2. the information is independently developed by the Receiving Party without use of the FBI=s proprietary information, as evidenced by the Receiving Party's records;
3. the information is or becomes public knowledge or publicly available through no fault of the Receiving Party;
4. the information is or becomes rightfully available to the Receiving Party from a source other than the FBI; and
5. disclosure of the information is required by a government or court requirement or order, in which case the Receiving Party shall provide the FBI prompt advance notice sufficient to enable the FBI time to object to such disclosure.

The relationship between the parties shall be solely that of independent contractors, wherein each party is responsible for its own personnel. Nothing in this Agreement shall be deemed to constitute, create, give effect to or otherwise recognize a teaming, joint venture, agency, partnership or other type of arrangement between the parties. Rather, the parties agree that this Agreement is for the purpose of protecting and preserving the status of the FBI's proprietary information, as well as to ensure that misunderstandings as to the subsequent use, disclosure or duplication of such proprietary information do not occur.

Neither party assumes responsibility for the other party=s costs, expenses, risks and liabilities associated with the research, development and exchange and authorized use, duplication and disclosure of the other party=s proprietary information.

The Receiving Party acknowledges that monetary damages may not be a sufficient remedy for unauthorized disclosure of the FBI=s proprietary information and that the FBI shall be entitled, without waiving any other rights or remedies, to seek injunctive or other equitable relief as may be deemed proper by a court of competent jurisdiction.

CELLSITE-10694

ARTICLE VIII - INTEGRATION AND ALTERATION

This Agreement supersedes all prior or contemporaneous oral or written representations, understandings and communications by or between the parties pertaining to the subject matter set forth in Article I of this Agreement. This Agreement applies in lieu of and notwithstanding any previous or contemporaneous agreement or other contract or arrangement pertaining to the subject matter set forth in Article I of this Agreement.

Any provision of this Agreement may be modified or otherwise altered only by a writing signed by both parties.

ARTICLE IX - SEVERABILITY

The parties agree that if any Article or provision of this Agreement shall be found illegal or in conflict with any valid controlling law, then the validity of the remaining Articles and provisions shall not be affected.

ARTICLE X - COMPLIANCE WITH LAWS

The Receiving Party shall adhere to the U.S. Export Administration laws and regulations and shall not export any proprietary information, or other materials, technologies, equipment, products or processes received from the FBI to any proscribed country listed in the U.S. Export Administration regulations, unless properly authorized by the FBI.

Disagreements between the parties arising under or relating to this Agreement shall be resolved by consultation between the parties. Any dispute, claim or controversy arising out of or relating to this Agreement, or the breach or validity hereof, shall be adjudicated, if necessary, by the U.S. District Court for the District of Columbia.

With respect to liability and indemnification, the exclusive remedy for the negligent or wrongful act by or omission of U.S. Government personnel, acting within the scope of their employment, shall be an action against the United States under the Federal Tort Claims Act, 28 U.S.C. ' ' 1346(b) and 2671-2680.

The individual executing this Agreement does so in his/her official capacity and as part of his/her official duties as an employee of the FBI and the U.S. Department of Justice. As such, this Agreement shall be governed and controlled by applicable Federal Law without regard to conflict of laws principles.

ARTICLE XI - HEADINGS

The headings used in this Agreement are for reference purposes only and shall not be deemed to be a part of this Agreement.

CELLSITE-10695

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

[redacted] Special Provision on Commercialization of Technology Developed Under Contract (Contractor Retains Patent Rights)

(a) The parties to this contract agree that, although the technology being developed under this contract is unclassified, it is nonetheless sensitive in nature, and the uncontrolled dissemination of the technology outside of the Sponsor could potentially be detrimental to national security. Accordingly, the parties agree to the following special provisions to control the dissemination of the technology developed under this contract.

(b) For the purpose of this clause, the following terms shall have the following definitions:

"Data" shall have the same meaning as the term in clause 52.227-14 and shall specifically include technical data and computer software as defined in clause 52.227-14.

"Subject invention" shall have the same meaning as the term defined in clause 52.227-11.

"Commercialize" means to use any data first produced in the performance of this contract, any subject invention, or any hardware manufactured and deliverable under this contract that incorporates or was built using data first produced under this contract, for any commercial purpose other than doing business with the Sponsor.

"Technology" means intellectual property of a scientific or technical nature that comes into existence as a direct result of performance of this contract regardless of the physical properties of the technology or the stage of its development.

(c) The parties agree that:

(1) Notwithstanding any other provisions in the contract, including but not limited to clause 52.227-14 Rights in Data General, the contractor shall not take any action to commercialize the technology developed under this contract without the express, written approval of the Contracting Officer, and such approval shall not be unreasonably withheld. Should the Contracting Officer decline to grant such approval due to national security considerations, the contractor agrees that this determination shall not constitute a basis for an equitable adjustment to the contract.

(2) The contract price includes consideration for the increased rights retained by the Sponsor.

(d) The contractor shall take all necessary steps to effectuate the intent of this agreement, to include ensuring that contractor employees with access to data first produced under this contract and/or information pertaining to subject inventions execute binding non-disclosure agreements to protect the information both during their employment with the contractor as well as post-employment.

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing Items 8 and 15, and returning ____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
☐	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
☐	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
☐	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
☒	D. OTHER (Specify type of modification and authority) FAR 43.103(a) "Bilateral"

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:

(a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
X	D. OTHER (Specify type of modification and authority) FAR 32.7 Funding

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

Please see attached pages for details:

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

[redacted]

I agree with the process, as outlined in the slides. Sorry I missed the conference call. Also, [redacted] is going to physically sign a couple of the [redacted] invoices for me. I'm going to try to get in for a little while Friday afternoon. It looked better yesterday, so far today has been kind of rough but I'll still try. Let me know if you might be around.

[redacted]

Hi [redacted]

Here are a few questions we have regarding the price list. Can [redacted] provide pricing on the following items:

1) [redacted] The FBI currently has [redacted] equipment and would like to [redacted] compatible units. This has been done with other [redacted] in the past and we would like to know if this will also be an option under the new price list.

2) [redacted] Under the previous price list [redacted] offered both [redacted]. The new price list only identifies [redacted] be offered if so will there be any change to the pricing from the old list?

Thanks again for your patience - illnesses and scheduling conflicts have caused a few delays but I hope to resolve the price list and a few more action items in the next few days or early next week. I have a meeting set up for tomorrow morning to discuss the price list internally and will let you know if any more questions come up.

I'll be at QT the next 2 days. I now have a dedicated phone line with voice mail should you need to contact me there.

[redacted]

Thanks,

[redacted]

Thanks very much for the email.

The IAA for the [redacted] was countersigned by the FBI in April and was obligated by [redacted] once that signature was received. Since then, however, FBI has not made any expenditures against it. I was aware that it was going to take some time to get the [redacted] contract going, but generally our IAA funding is IPACed in whole by the receiving agency at the beginning of the effort.

If you intend to pull funds periodically from [redacted] as the PO advances, that should not be an issue. However, the PoP for our IAA expires in August 2011 – so we'll just have to keep an eye on that if you plan to pull funds past that date.

"if wasn't what we needed; new direction"

15.506 Postaward debriefing of offerors.

(c) The contracting officer should normally chair any debriefing session held. Individuals who conducted the evaluations shall provide support.

(d) At a minimum, the debriefing information shall include—

(1) The Government's evaluation of the significant weaknesses or deficiencies in the offeror's proposal, if applicable; broad areas

(2) The overall evaluated cost or price (including unit prices) and technical rating, if applicable, of the successful offeror and the debriefed offeror, and past performance information on the debriefed offeror;

(3) The overall ranking of all offerors, when any ranking was developed by the agency during the source selection;

(4) A summary of the rationale for award;

(5) For acquisitions of commercial items, the make and model of the item to be delivered by the successful offeror; and

(6) Reasonable responses to relevant questions about whether source selection procedures contained in the solicitation, applicable regulations, and other applicable authorities were followed.

(e) The debriefing shall not include point-by-point comparisons of the debriefed offeror's proposal with those of other offerors. Moreover, the debriefing shall not reveal any information prohibited from disclosure by 24.202 or exempt from release under the Freedom of Information Act (5 U.S.C. 552) including—

(1) Trade secrets;

(2) Privileged or confidential manufacturing processes and techniques;

(3) Commercial and financial information that is privileged or confidential, including cost breakdowns, profit, indirect cost rates, and similar information; and

(4) The names of individuals providing reference information about an offeror's past performance.

(f) An official summary of the debriefing shall be included in the contract file.

Subject: FW: [redacted] Access

[redacted]

I don't have a problem with this going forward, but it should be on a per case basis not global as requested. If they are working to get a new employee [redacted] clearance and they sign our NDA, I don't see a problem with them being worked into the team on UNCLASSIFIED work. I would also like to have them report on the employee's status in the weekly status updates. I don't want it to become something they/we forget about over time. I want the [redacted] team to be reminded every week when they report that the new employee should not be given access to our classified information.

If you agree we should respond with an official letter approving this individual, stating it is on a per case basis, and requesting his status be included in the [redacted] weekly reporting.

[redacted]

Subject: RE: [redacted] Access

Hi [redacted]

Per our recent conversation I wanted to expand and clarify the below request. We would like to include [redacted] in our daily [redacted] stand up meetings in order to engage him productively in the work of the team and the consensus choices being made each morning about allocating folks to tasks. These meetings have been entirely focused on [redacted] task details and do not broach the subject of [redacted] or other classified material.

Moreover, we would like the discretion to include him, as necessary, in various meetings that include only unclassified content – no exposure to classified program content or [redacted] will be allowed. Please confirm that this is in concert with your security guidelines and can applied on a global basis to other employees/Tasks (i.e. an NDA'd individual without [redacted] clearance can work unclassified aspects of [redacted] Tasks).

Your concurrence in this matter is greatly appreciated.

Thanks,

[redacted]

Long story short. I told that the only way he can get approval is to have the person under background (posses interm SECRET), they sign an NDA and only work UNCLASSIFIED. When I told him that he assumed that meant he only had to accomplish those three things, and not bother to ask permission as well. The criteria is global, not the approval. I'll send an email this afternoon.

Cc:
Subject: RE: Access

Hi

Thank you for approving for access to I must admit I am a bit confused as to why this isn't a global approval. It has been our understating for some time (reiterated with during late June meeting in that individuals working only unclassified aspects of Tasks need only have a signed NDA for access. This was further reiterated in the Requirements Control Process (attached) which you approved 10 December.

We fully appreciate and share the Customer's sensitivity to these projects and endeavor as much as possible to only assign staff with That said there will always be cases where that ideal situation is not possible, where a key resource can make a significant impact on Task progress, and we would like to have the latitude to implement to our agreed processes without the need to gain case by case approvals.

Thank you for your consideration,

Subject: Contract [redacted]
Engineering Change Proposal – [redacted] Task Order

Dea[redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services to provide an enhanced capability to the ongoing [redacted] Task Order under the task previously awarded by the Federal Bureau of Investigation (FBI). This enhancement to the original Task shall be performed in accordance with the subject Contract [redacted] shall provide technical and cost proposals to support this enhancement as set forth in the attached Statement of Work. Because labor rates and similar costs were agreed upon at the award of the contract and Task Order, an extensive Cost Proposal is not anticipated. Estimates of hours per labor category are required at a minimum.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days. It is requested that [redacted] review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than April 7, 2010 1:00 PM EST. Proposals may be submitted through fax at one of the numbers below or through unclassified e-mail at [redacted]@ic.fbi.gov.

(U) DESCRIPTION AND REQUIREMENTS

(U) TASK DESCRIPTIONS

(U) Specifically, the FBI is tasking the vendor to develop, productize, and deliver products that provide the FBI with

b3
b7E

provide the mentioned capabilities in an effective, efficient, and timely fashion, which provides benefit to the FBI's operational requirements.

(U) SYSTEM DESCRIPTION

(U) Included in the CLASSIFIED SOW is a description of the SYSTEM to be developed and delivered to the FBI that shall satisfy requirements as set forth in the STATEMENT OF WORK. Included are also details of requirements that define functional objectives of the SYSTEM. Functional objectives are defined as the minimum requirements that define "what" functions the SYSTEM shall perform to satisfy the goals and objectives of the development.

(U) DELIVERABLES

(U) The following section provides for a delivery schedule as listed in Table 1 below, as well as details concerning each delivery requirement.

(U) DELIVERY SCHEDULE

ITEM	Time Frame
Monthly Project Status Reports	NLT Five (5) Business Days of each new month upon project inception, to include the following: • Schedules • Financial Status • Overall description of Issues/Concerns
[redacted]	Reoccurring - [redacted]
Testing, Verification, and Demonstration	Testing and Verification shall be performed throughout the development lifecycle as required. A government Acceptance test shall be delivered to the contractor within 180 days after project start.
FINAL SYSTEM Delivery	Pending successful final acceptance testing, NLT than 548 days (1.5 Years) after project start
SYSTEM Training	Ongoing – Provided during delivery of [redacted] Final – Provided to FBI personnel on FINAL SYSTEM Delivery NLT 548 days (1.5 Years) after project inception
SYSTEM Documentation	NLT 30 days after FINAL SYSTEM Delivery

b7E

(U) DELIVERY ITEM DESCRIPTIONS

(U) The following provides **further** descriptions of items described above in Table 1.

- (U) MONTHLY STATUS REPORTING - The vendor shall provide monthly status reporting in electronic and documented format to the FBI, which consists of at minimum information related to labor hours, other direct costs; details of work performed or project status, as well as the identification of any issues that need to be communicated to the FBI. The vendor shall provide a format to the FBI at project inception, and receive concurrence on appropriate format of monthly status reports. Monthly status reports shall describe and reflect that status of developments and deliverables, to include scheduling issues, to enable the FBI to intervene and provide any direction as necessary.

- (U) TESTING, VERIFICATION, AND DEMONSTRATION
  - [redacted] b3 b7E
  - The vendor shall provide, at vendor facilities, for a government "**ACCEPTANCE TEST**", which shall demonstrate system configuration and setup, and all functionality of the SYSTEM, prior to FINAL SYSTEM delivery. The SYSTEM shall be demonstrated as operationally connected, fully functional, end-to-end SYSTEM.

- (U) FINAL SYSTEM DELIVERY – The vendor shall provide delivery of the SYSTEM, which includes the following:
  - SYSTEM shall be operationally able to function, end-to-end.
  - SYSTEM delivery shall include all [redacted] items required to install a fully operational product, to include user manuals and other product related documentation. b3 b7E

- (U) SYSTEM TRAINING – The vendor shall provide training for a limited number of personnel as identified by the FBI on installation and use of the SYSTEM as delivered [redacted] FINAL SYSTEM Training shall be on-site at a remote location determined by the FBI

- (U) SYSTEM Operational Deployment – The vendor shall provide maintenance and troubleshooting support to resolve operational or performance issues as identified by the FBI. This period of support shall be, at a minimum, 1 year (365 days) upon delivery of the FINAL SYSTEM.

- (U) SYSTEM Documentation – The vendor shall deliver, to the FBI, technical documents that describe all components and operations of the SYSTEM. Documentation shall include

descriptions of all applicable [redacted] and related manuals used for setup, operations, and troubleshooting procedures. b3 b7E

(U) OTHER REQUIREMENTS

(U) The following sections shall describe other requirements related to the development and delivery of the SYSTEM described in this STATEMENT OF WORK.

(U) SPACE REQUIREMENTS

(U) Vendor development efforts will be conducted primarily within vendor business spaces. The Vendor shall be afforded access to the primary FBI entity's spaces for meetings, product demonstrations and general interaction with FBI personnel. All contractor access to FBI facilities is contingent on FBI security approval.

(U) OTHER DIRECT COSTS

Materials b3 b7E

(U) Other Direct Costs (ODC's) will be paid in accordance with th[redacted]ontract. The contractor shall purchase the materials needed to support the development addressed under this SOW. All purchases must be approved by the COTR prior to purchase execution. All materials, [redacted] [redacted] purchased as ODC shall be considered Government Furnished Equipment.

(U) GOVERNMENT FURNISHED EQUIPMENT

(U) Vendor shall provide the FBI with a listing of required GFE in response to this SOW.

Description

b3
b7E

b3
b7E

The request for information above and the immediate postponement of testing are intended to aid the FBI in providing concise guidance with sufficient detail. By making these inquiries and determinations during this Phase of testing the FBI intends to minimize revisions and alterations required prior to Phase 3 or Acceptance Testing. Your assistance is greatly appreciated. The FBI will provide additional background and direction as soon as possible.

To minimize the amount time required to fulfill the above effort, please do not hesitate to contact my office with any questions or concerns.

Sincerely,

b6
b7C

Subject: [redacted] Phase 3 Rescope Hours

b3
b6
b7C
b7E

[redacted]

We thought that providing you development hours (rather than $$) for the current Phase 3 and the [redacted] efforts was the best way to get a quick apples to apples comparison without spending a lot of time trying to give you a detailed menu of each item. When we get agreement on what scope needs to be removed, we can then spend the time to assess the cost impact (if any) and to replan the Phase 3 work.

b3
b6
b7C
b7E

The following table lists the development hours for both the [redacted] and current Phase 3 efforts. The good news is that it looks like the [redacted] gets us within [redacted] of the [redacted] hours.

Capability	Development Hours
[redacted]	[redacted]
Phase 3 Efforts

Contract: [redacted]
Subject: [redacted] Tasking – Phase 3 Updates

Good Afternoon [redacted]

The accompanying documentation, SF-30 Mod 3 and Purchase Order [redacted] provide for the award of the [redacted] under the [redacted] Tasking of the [redacted] Contract. This documentation provides the final increment of funding for the [redacted] Task including FY10 shortfalls and the addition of the [redacted] Please provide a signed copy of Mod 3 to officially provide these funds identified through the Mod.

As was discussed in meetings August 9 and 10 of this year, the FBI had contemplated cancelling subtaskings under Phase 3 of this Task Order due to revised priorities within the agency. The award documentation reflects and provides calculations identifying the changing in funding requirements. To finalize these calculations, [redacted] is hereby requested to provide the costs and breakdown of Overhead (OH) and G&A for the each of the 2 subtasks cancelled through the award documentation. In addition, the FBI is withholding the [redacted] ECP preparation costs pending an audit of these figures as they have been deemed excessive. [redacted] is requested to provide a detailed breakdown of all costs incurred to reach the requested ECP preparation costs. Once these two figures have been settled, a supplemental modification will be issued to provide the ECP preparation costs and OH & G&A adjustments.

b3
b7E

Thank you in advance for your assistance with these matters. If there are any questions please do not hesitate to contact my office.

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

b3 b7E

The purpose of this modification is to 1) cancel the requirements for [redacted] & [redacted] and [redacted] " 2) award the [redacted] to the [redacted] Task Order under the above Contract with ECP costs contingent up on audit; 3) provide final increment of funding for [redacted] 4) incorporate documentation; and 5) other contractual matters. See attached pages for detailed information.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

15A. NAME AND TITLE OF SIGNER (Type or print)		16A. NAME AND TITLE OF CONTRACTING OFFICER (Type or print)	
		[redacted] Contracting Officer	
15B. CONTRACTOR/OFFEROR	15C. DATE SIGNED	16B. UNITED STATES OF AMERICA	16C. DATE SIGNED
(Signature of person authorized to sign)		(Signature of Contracting Officer)	

b6 b7C

The purpose of this modification is to:

1. Cancel all work for the subtaskings under Phase 3 of the Task Order awarded in September 2010. According to Cost Proposal documentation dated 8/17/2011, these subtaskings are valued at respectively, not including Overhead (OH) and G&A costs. shall provide the costs for the OH and G&A costs for these two subtasks which will be reduced from the total Task Order value;
2. Award the supplement to Task Order in the amount of for services. Award of ECP preparation costs in the amount of are contingent upon an audit of these costs to be conducted as soon as possible;
3. Final increment of funding for the continuation of services under the Tasking, inclusive of the award, in the amount of is provided under this Mod and based on the following calculations:

   Original Proposal Cost Sept 2010

   Revised Cost of = Original Cost of

   Cost of Services for

   Interim Revised Total Cost = Revised Cost of + Cost of Services*
   *Note: Interim Revised Total Cost does not include the addition of ECP preparation Costs or the subtraction of OH/G&A Costs

   Interim Revised Total Cost
   FY10 Partial Funding Under
   Award = Interim Revised Total Cost – FY10 Partial Funding
   ECP Preparation Estimated Costs
   Full Award Potential = Mod 3 Award + Estimated ECP Costs

   Once the figures for the OH/G&A costs have been settled and the ECP Costs have been audited, the Award identified in this Mod 3 will be finalized to include these outstanding figures through a supplemental Mod 4;

4. The following documents are hereby incorporated into the contract: FBI SOW for Supplement 2 to the Task Order dated 8/1/11, questions regarding the ECP Request dated 8/11/11, and FBI Responses to questions dated 8/15/11, and Cost and Technical Proposals for the dated 8/17/11;
5. All work is to be performed in accordance with the SOWs for the Tasking, SOW for the Contract, and all T&C of the Contract. Period of Performance for the Task Order remains June 2012. Technical guidance is to come from COTR, . Invoice to COTR. Contractor exceeds funding at own risk.

RE: Clarification on Weekly Status Reports and Risk Impact Documents

b3 b6 b7C b7E

Sent: Thursday, February 24, 2011 2:32 PM
To:
Cc:

Hi

passed your email to me since, as Project Engineer on I share schedule and risk management responsibility with the Program Manager. I wanted to prepare thoughtful responses - which took a bit longer than anticipated - for each question. The responses are indicated in your email below.

b3 b6 b7C b7E

Subject: Clarification on Weekly Status Reports and Risk Impact Documents

b3 b6 b7C b7E

Hi

As much as I wanted to be at the last MSR, I had previously scheduled OCONUS trip and other projects that prevented me from attending. As I was reviewing the weekly status report and other related documents that passed to me, I'd like to seek some clarification on the following points:

Q1 Weekly Status Report:
Please explain the 2-4 week schedule slip and provide updated copy of project schedule / gant chart.

A1 Response:
This bullet in the weekly status report was meant as a heads up due to the longer than anticipated process of defining and getting the U//FOUO/LES System requirements out of the secure area. We are currently in the process of re-estimating our Phase 1 development effort (based on the defined system requirements) and updating our schedule to confirm a May release of the Phase 1 Once the schedule is updated, we will provide an updated project schedule.

Q2 Risk and Impact:
For each item, please address what measures were taken to mitigate the impact. The probability of impact has not changed since the document was first delivered to FBI team in early December. We would like to see the current status and progress of the mitigation. Specifically for the following items:

b3 b7E

A2 Response:

First, some general comments about the [redacted] risk process (based on [redacted] procedure). The risks were identified during the development of the [redacted] proposal last August and are reflective of what was known as well as recognizing what was unknown at the time. The types of the [redacted] risks identified don't lend themselves to mitigation plans prepared in advance. This is because the risks reflect information that won't be obtainable and actionable until the subject work [redacted] is carried out. Consequently, these risks indicate only an estimated impact to address them. Risks remain listed per [redacted] procedure until they are completely retired; however, the probability of realizing a risk should be adjusted - raised or lowered - as new information bearing on the risk becomes available. In [redacted] case, only the [redacted] risk has work in progress now [redacted] that will be generating information we can use to reassess that risk. As the study proceeds, it should allow us to lower the risk probability in the next few weeks and retire this risk entirely by the end of March. b3 b7E

Q3 1. Status update. Phase 1 should be close to [redacted] stage. Please update us on the progress made on testing plan.

Response:
On [redacted] we have adopted an incremental development process. [redacted] b3 b7E

The specific identified risk is that testing [redacted] that Phase 1 and Phase 2 releases are required to support proves to be more complex than expected. The [redacted] have yet to be developed so the risk cannot yet be evaluated. The [redacted] will likely become a development task spread over March and April development iterations. Risk updates following [redacted]. The ultimate risk retirement date of December, 2011 is based on an expectation that testing with a [redacted] has been in progress long enough to have confidence in its effectiveness as a test tool.

Q4 2. In the Communication Infrastructure Study document communicated to us in November 2010, there was not an indication that none of the [redacted] will be suitable to cover all the data and security need. The [redacted] is an inherent modification that has to be done to any generic [redacted] We simply do not understand the risk here.

Response:
The study completed in November was the [redacted] Communications Architecture Study whose purpose was to [redacted] b3 b7E

[redacted]

We've certainly learned more since the [redacted] was prepared and the initial architecture study gives us more confidence in the use of an [redacted]. Nonetheless, we think it prudent to carry the risk until the [redacted] trade study is completed.

Q5

3. What is the cause of the unreliability? Is it purely [redacted] What is the measure of reliability in your determination?

Response:
The [redacted]

b3
b7E

Q6

[redacted]

testing with the [redacted] testing. We will consult with you to determine how to address any additional scope represented in identifying/addressing an appropriate [redacted] risk factor.

End of responses...

I look forward to seeing the clarification to understand the documents better. Thanks!

[redacted]

Task #16 /PO Schedule Delay Detail, Impact and Recommendations

Synopsis

In recent weekly report submittals, has identified a schedule slip on Phase I of the program. The amount of delay was originally estimated at 3 to 4 weeks. After extensive analysis, it has been determined that the slip is actually 2 weeks. Initial examination had revealed that this impact could be absorbed without affecting the Phase I cost. However, after further review it is believed that the cost impact for this part of the program will incur approximately of additional cost, which represents two weeks of Phase I In order to avoid impact to the overall program schedule, is recommending overtime and/or additional resources to make up the schedule. This Phase I increase will not impact the negotiated cost of the overall program. A detailed explanation is provided below.

b3
b7E

The following paragraphs document the reason for the slip, actions taken to date, and suggested actions going forward.

5/13/11
mtgw/

b3
b6
b7C
b7E

Schedule Slip explanation

During the first iteration of two weeks cumulative team hours were devoted by most of the team to work through the following issues:

1.
2. The result led to a larger sampling than originally budgeted thus costing about 20 man days more effort than planned.
3. The required unanticipated prototyping to choose a suitable that worked within the system. were evaluated and were prototyped. This took about more effort than planned.
4. Installation of the new took a to complete than planned. The and were to take advantage of three key features of
   a.
   b.
   c.

b3
b7E

possible ik

Actions Taken To Date

In order to reduce the impact of the above issues, the program team has analyzed the Phase I objectives and the requirements assigned to meet those objectives. The results of that analysis showed that some of the requirements were excessive in meeting the objectives and some were really Phase II requirements. Those requirements not specifically needed to meet Phase I objectives were either moved to Phase II or, as applicable, put on a list for future consideration. The remaining requirements meet all the objectives for the Phase I deliverable [ ] system. More details follow.

Phase I functionality requires [ ] was also not required to meet Phase I objectives. These requirements were moved to Phase II.

The [ ] was always intended to be simple. During requirements allocation, the [ ] took on more features than necessary to [ ] system. The [ ] scope has been clarified thus reducing the hours required for implementation.

The ability to [ ] was not required though it would be a nice feature. The capability to [ ] as previously demonstrated in the prototype.

[ ] was moved to Phase II as it was not part of the prototype and did not contribute to meeting Phase I objectives.

Updated versions of the Phase I requirement documents have been submitted to the customer for review. These documents include the [ ] System Requirements and [ ] System Requirements.

Suggested Actions Going Forward

The projected shortfall for Phase I is approximately [ ] Several options are available to fund this shortfall without impacting the overall program.

Phase I still has management reserve in the amount of [ ] There is a about two months left so that money could be allocated to the [ ] effort. However, system test and demonstration are still looming and the potential challenges are still unknown. Recommend leaving the [ ] in MR for now.

[ ] was allocated to purchase [ ] equipment. All of that equipment has now been provided as GFE. These funds could be allocated to the development effort.

Recommend the Government permit [ ] to move the [ ] allocated to [ ] product procurement to the Phase I and II development efforts. [ ] would be allocated to Phase I [ ] The remaining [ ] would be allocated to Phase II management reserve as a contingency for future risks.

[ ]

Contract: [redacted]
Subject: Postponement of [redacted] Testing

Good Afternoon [redacted]

As a result of internal discussions and collaboration at the Federal Bureau of Investigation (FBI), it has been determined that the strategies and testing of [redacted] As a result [redacted] is hereby informed and directed to postpone any and all testing of the [redacted] It is the intention of the FBI to continue with these efforts at the earliest possible date; however, strategies must first be updated internally to ensure clear direction can be provided to all projects affected.

b3
b7E

To assist the FBI in completing these discussions and determinations more efficiently, [redacted] is requested to provide the following information. This information is for research and strategic discussions only and shall not be interpreted as a rough order of magnitude or request for engineering change proposal. All efforts shall be taken to minimize time spent to generate this information.

- For the following, please provide the potential cost and schedule impacts. This assessment is meant to be informal and approximate in nature.
  - [redacted]
  - Impact to [redacted] Task Order of rescheduling Phase 2 testing until mid-February 2012
- Provide a systematic description of the process by which [redacted] intends to conduct testing for [redacted] Phase 2, including [redacted] Process must be repeatable and verifiable. For each test iteration, please describe the following:
  - [redacted]
  - [redacted] examples include: [redacted]

b3
b7E

- [redacted]
- [redacted]
- [redacted]
- What is the plan to process the test data after the tests have been concluded?

b3
b7E

The request for information above and the immediate postponement of testing are intended to aid the FBI in providing concise guidance with sufficient detail. By making these inquiries and determinations during this Phase of testing the FBI intends to minimize revisions and alterations required prior to Phase 3 or Acceptance Testing. Your assistance is greatly appreciated. The FBI will provide additional background and direction as soon as possible.

To minimize the amount time required to fulfill the above effort, please do not hesitate to contact my office with any questions or concerns.

Contract: [redacted]
Subject: Request for Clarification on [redacted]
Task Order Proposals

Enclosed please find the FBI's responses to [redacted] Technical and/or Cost proposals for the [redacted] Task Orders to be performed under the above Contract. Please review and prepare responds or for discussion to any questions or requests for clarifications regarding the Cost and Technical Proposals for next week.

b3
b7E

This proposed tasking is intended as a Cost-Plus Fixed Fee requirement and as such, in accordance with the previously agreed upon terms and conditions of this contract, revise the Cost documentation to reflect a 10% fee structure. All Terms and Conditions under the Contract [redacted] are unchanged and binding for all subsequent actions, including this intended Tasking.

To reduce administrative burdens, please make necessary changes to those affected pages and provide them for replacement in original documentation.

If I can be of further assistance with this effort you may contact me at [redacted]

Subject: Contract [redacted]

Dear [redacted]

Please find enclosed a copy of the Statements of Work (SOW) for engineering services developed by the Federal Bureau of Investigation (FBI).

The FBI is interested in obtaining a proposal for this task to be performed in accordance with the subject Contract. Contractor shall provide technical and cost proposals to support tasking as set forth in the Statement of Work.

If there are any question regarding this SOW please submit them to my office within the next five (5) business days.

It is therefore requested that your company review the enclosed SOW and if the proposed contract vehicle is appropriate, Cost-Plus Fixed Fee (CPFF), a cost and technical proposal should be submitted in accordance with the terms and conditions of the FBI's Contract prior to but no later than August 2, 2010 1:00 PM EST. Unclassified proposals maybe email to [redacted]

Should you have any questions concerning this matter, please contact me at [redacted] [redacted] response may be faxed to [redacted] secure fax [redacted]

STATEMENT OF WORK

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 12-01-2012 BY 65179 DMH/SIW

8/26/11 @ 2 pm D

[redacted] Program

Task Order 1

b3
b6
b7C
b7E

1 (U//LES) SCOPE

1.1 (U//LES) Task Overview

[redacted]

1.2 (U) Task Deliverables

- (U) Weekly Status Report (See Section 3.3)
- (U) System Demonstration at contractor facility (See Section 3.2)
- (U) Final Technical Summary Report (See Section 3.2)
- (U) [redacted]

1.3 (U//LES) Sub Task 1

(U) The vendor shall perform analysis, modeling, and testing to verify the capability of [redacted] This requirement shall include the following:

b3
b6
b7C
b7E

[redacted]

d) **(U)** The work performed in this task shall include engineering and prototyping mechanical housings to result in the integration of electrical and mechanical improvements into a single package.

[redacted]

Revisions done out 8/29/11

1.4 (U//LES) Sub Task 2

(U//LES) The vendor shall produce a prototype [redacted] that demonstrates [redacted] This requirement shall include:

a) [redacted]

b) [redacted]

c) **(U)** The performance specifications of developments under this task shall be in accordance with [redacted] standards. b3 b7E

1.5 (U//LES) Sub Task 3

(U//LES) [redacted]

a) [redacted]

b) [redacted]

c) [redacted]

2 (U//LES) Sub Task Milestones and Requirements

2.1 (U//LES) Sub Task Milestones

- (U) The initial kick off meeting shall be held no later than 30 days after contract award.
- (U//LES) The vendor shall conduct a demonstration of the [redacted] to the COTR and approved government attendees. The vendor shall deliver a full report of the conduct of the test with a future mitigation/milestone plan based on the test results and follow on work to productize. Testing shall be conducted no later than 2 weeks prior to the end of the period of performance. b3 b7E
- (U//LES) The vendor shall deliver to the COTR a report of analysis, modeling and testing that verifies the capability of the [redacted] to support [redacted] This report shall not be an assemblage of power point slides, although their use in support of written narrative is acceptable. This report shall be due at the end of the period of performance.
- (U) Transition of deliverables shall be coordinated with the COTR at the end of the period of performance.

CELLSITE-20050

2.2 (U) Sub Task Requirements

- (U) The vendor shall provide personnel with the requisite knowledge, technical background and skills to successfully complete the tasks described in this SOW. These qualities shall include but are not limited to:
  - [redacted]

3 (U) Requirements

3.1 Security Standards and Regulations

(U) Refer to [redacted] Statement of Work section 2.3 for guidance. b3 b7E

(U) SECURITY STATEMENT: This program, all documentation, all associations, all stated and implied requirements and all personnel must adhere to and meet security requirements. Any breech of security will result in immediate termination of the program and possible repercussions, both contractual and criminal. All dissemination of the program and contract information must be approved in writing by the COTR, to include, but not limited to, partners, technical and contract information and personnel. The contractor shall set up procedures to insulate the program procurement or parts and protection of program information as agreed upon by the COTR.

3.2 (U) Contractor Furnished Documentation

(U) Final report of analysis, modeling and testing (as described in Section 2)
(U) Refer to [redacted] Statement of Work section 2.6 for any additional documentation not explicitly stated in this SOW.

3.3 (U) Status Reporting

(U) Refer to [redacted] Statement of Work Section 3.3 for guidance

3.4 (U) Formal Meetings

(U) Refer to [redacted] Statement of Work Section 3.4 for guidance

CELLSITE-20051

3.5 (U) Government Furnished Equipment

(U) The government does not anticipate the need for any Government Furnished Equipment on this task. However, if the additional purchase of equipment is required the vendor shall obtain written authorization from the government Contracting Officer prior to any individual purchase equal to or exceeding $50,000.00. The Contracting Officer may lower or raise the $50,000.00 threshold at his/her discretion. If the CO and COTR approve such a purchase the item shall become property of the government, and as such will be maintained in accordance to currently existing property accountability procedures. The COTR will determine final disposition of any such items at the end of the period of performance of this task.

3.6 (U) Period of Performance

(U) The vendor shall propose the most efficient and cost effective schedule to complete this requirement for government consideration. All deliverables and milestones are expected to be proposed at their specified date in the above deliverable / milestone schedule or otherwise adjusted by the vendor and justified. Based on the needs of the government and complexity of the requirement, the government recommends a period no longer than 12 months. This recommended period includes 90 days to allow for review, preparation and submission of deliverables and closeout activities by government personnel.

3.7 (U) Place of Performance

(U) The vendor shall perform all work under this task at the vendor's facilities. Therefore the government expects no travel charges.

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☐ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
☐	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
☐	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
☐	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
☒	D. OTHER (Specify type of modification and authority) FAR 43.103 "Bilateral"

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

(S) [redacted]

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) This contract action is authorized by 41 U.S.C. 253(c)(1), as set forth in the Federal Acquisition Regulation (FAR) 6.302-1, "Only one responsible source and no other supplies or services will satisfy agency requirements. Also, based on the foregoing findings, it is hereby determined, within the meaning of FAR 6.302-6, 41 U.S.C. 253(c)(6) disclosure of the agency's needs would compromise national security.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S/NF [redacted]

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) WITT personnel have done a market survey for this requirement through technology conferences and available technical and agency sources. No resellers were found that could provide the required list of items.

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The Contracting Officer will ensure that the anticipated cost to the Government will be fair and reasonable. Techniques may include an analysis of proposed direct costs, audit or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, comparison of proposed rates to published rates, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(S/NF)

b5
b7E

(S/NF

(S)

(U) Based on the foregoing findings, it is hereby determined, within the meaning of FAR 6.302-6, 41 U.S.C. 253(c)(6) disclosure of the agency's needs would compromise national security.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not publicized pursuant to FAR 6.302-1, "Only one responsible source and no other supplies or services will satisfy agency requirements". As well as FAR 6.302-6, 41 U.S.C. 253(c)(6) "disclosure of the agency's needs would compromise national security", no other commercial sources were given the opportunity to express written interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will continue to scan the market to identify potential sources on subsequent acquisitions.

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Finance Division, Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(S) ~~(X)~~

(S)

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

(S//NF)

(S)

b1
b3
b7E

(S//NF)

(S)

(S//NF)

(S)

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE

NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S//NF)

(S)

(S//NF)

(S)

b1
b3
b5
b7E

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) FBI, TTU [redacted] continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. TTU [redacted] routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. TTU [redacted] assessed available capabilities and have determined that other vendor technologies [redacted]

b3
b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Justification and Approval
For
Other than Full and Open Competition
In accordance With 41 U.S.C. 253 (c) (1)

1. **Identification of the agency and the contracting activity, and specific identification of the document as a "Justification for Other Then Full and Open Competition."**

   The Federal Bureau of Investigation's Quantico Contracts Unit (QCU) has prepared this justification for Other than Full and Open Competition in response to a requirement from the Tracking Technology Unit (TTU) to establish a fixed price contract for the acquisition for equipment.

2. **Nature and/or description of the action being approved.**

   This Justification for Other Than Full and Open Competition is being prepared in accordance with the authority of FAR 6.302-1 "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements."

3. **A description of the supplies or services required to meet the agency's needs (including the estimated value).**

   [redacted]

   b3
   b7E

4. **An identification of the statutory authority permitting other than full and open competition.**

   FAR 6.302-1 Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements.

5. **A demonstration that the proposed contractor's unique qualifications or the nature of the acquisition requires use of the authority cited.**

   [redacted]

6. **A description of efforts made to ensure that offers are solicited from as many potential sources as is practicable, including whether a notice was or will be publicized as required by Subpart 5.2 and, if not, which exception under 5.202 applies.**

7. **A determination by the contracting officer that the anticipated cost to the Government will be fair and reasonable.**

   The Contracting Officer will ensure that the anticipated cost to the government will be fair and reasonable. Techniques may include an analysis of proposed direct costs, audit or comparison of proposed indirect factors with audited factors in use elsewhere in the Government and comparison of proposed rates to published rates. b3 b7E

8. **A description of the market research conducted and the results or a statement of the reason market research was not conducted.**

   FBI representatives from the TTU will continue to do market research and meet with vendor representatives to further research.

9. **Any other facts supporting the use of other than full and open competition**

10. **A listing of the sources, if any, that expressed, in writing, an interest in the acquisition.**

    None

11. **A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisition for the supplies or services required.**

    The FBI will continue to do market surveys to identify potential sources on subsequent acquisitions.

TECHNICAL REPRESENTATIVE CERTIFICATION:

~~SECRET~~

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED EXCEPT
WHERE SHOWN OTHERWISE

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), Tracking Technology Unit Unit (TTU), Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(S

(S)

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b1
b3
b7E

(S

(S)

(S

(S)

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE

NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

(S)

(S)

b1
b3
b7E

(S)

(S)

6. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

7. DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) X

b3
b7E

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

b6
b7C
b7E

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

Statement of Work for [redacted]

Directorate of Science and Technology
U.S. Department of Homeland Security
Cyber Security Division (CSD)

I. Background

The U.S. Department of Homeland Security (DHS) is committed to using cutting-edge technologies and scientific talent in its quest to make America safer. The DHS Directorate of Science and Technology (S&T) is tasked with researching and organizing the scientific, engineering, and technological resources of the United States and leveraging these existing resources into technological tools to help protect the homeland. The DHS S&T Cyber Security Division intends to enhance the capabilities of DHS Law Enforcement Officers (LEOs) by developing technology that increases operational efficiency and creates new capabilities.

[redacted] Law enforcement investigators must have [redacted]

b3
b7E

[redacted]

[redacted]

II. Scope of Work

Task 1. The performer will perform analysis, modeling, and testing to verify the capability of the [redacted]

- The developed [redacted] should also continue to [redacted]

Distribution is authorized to U.S. government agencies only. Contains information that may be exempt from public release under the Freedom of Information Act. Before this SOW is released to the public, approval is required by the Department of Homeland Security Directorate of Science and Technology.

CELL/OTD 030395

CELLSITE-19619

- The work in this task should also address need for [redacted] support for
- [redacted]
- [redacted]

Task 2. The performer will produce [redacted]

Deliverables:

b3
b7E

[redacted]

[redacted]

3. Report of analysis, modeling and testing that verifies the capability of [redacted]

Milestones:

- Kick-off meeting will be held no later than 30 days after contract award.
- Preliminary design review shall be held 2 months after contract award. The performer shall provide a PDR report to the DHS S&T Technical Representative no later than 2 weeks after the completion of the meeting.
- A Critical design review shall be conducted 6 months after contract award. The performer shall deliver a CDR report to the DHS S&T Technical Representative 2 weeks after the completion of the meeting.
- The performer shall conduct a demonstration/user acceptance test of the [redacted] with DHS law enforcement and S&T representatives and shall produce a full report of the conduct of the test and User acceptance/rejection with a mitigation plan in case of user

Distribution is authorized to U.S. government agencies only. Contains information that may be exempt from public release under the Freedom of Information Act. Before this SOW is released to the public, approval is required by the Department of Homeland Security Directorate of Science and Technology.

CELL/OTD 030396

CELLSITE-19620

rejection. Testing shall be conducted no later than 2 weeks prior to the end of the period of performance.

- Transition of deliverables to a designee of DHS S&T at the end of the period of performance.

Personnel provided by [redacted] will have the skills and technical background necessary to successfully complete the tasks described in this SOW, including but not limited to the following: [redacted]

III. Other Contract Details

1. **Period of Performance.** The period of performance for this SOW is through August 2012. All deliverables/milestones are expected at their specified date in the above deliverable /milestone schedule. An additional 90 days has been added to the performance period to allow for the review, preparation and submission of deliverables and closeout activities by DHS personnel. DHS may give subsequent extension notices to [redacted] in writing for further performance in accordance with the terms if this SOW. b3 b7E

2. **Travel.** Travel to Washington, DC is required in performance of these duties. The number of personnel and frequency/number of trips shall be proposed by the performer in support of the project.

3. **DHS-Furnished Information.** No DHS-furnished information is required for the performance of the duties outlined in this SOW.

4. **DHS-Furnished Facilities, Supplies, and Services.** No DHS-furnished facilities, supplies, and services are required for the performance of the duties outlined in the SOW.

5. **Place of Performance.** [redacted] will perform the work under this SOW at [redacted] and contractor facilities.

6. **DHS-Furnished Property.** Before purchasing any individual item equal to or exceeding [redacted] that is required to support technical tasks performed pursuant to this SOW, [redacted] shall obtain the DHS S&T Technical Representative's prior written consent. The DHS S&T Technical Representative may lower or raise the aforementioned [redacted] threshold at his/her discretion and on written notice to [redacted] If the DHS S&T Technical Representative consents to such purchase, such item shall become the property of DHS. [redacted] will maintain any such items according to currently existing property accountability procedures. The DHS S&T Technical Representative will determine the final disposition of any such items.

Distribution is authorized to U.S. government agencies only. Contains information that may be exempt from public release under the Freedom of Information Act. Before this SOW is released to the public, approval is required by the Department of Homeland Security Directorate of Science and Technology.

CELL/OTD 030397 CELLSITE-19621

7. **Deliverables.** [redacted] will provide all deliverables identified in this SOW directly to the DHS S&T Technical Representative.

8. **Funding Requirements.** DHS will provide funding to [redacted] in accordance with DHS appropriations and available funds pursuant to the budget outlined below. Amounts will be deobligated to the extent that the servicing agency has not incurred obligations before the end of the period of availability of that appropriation. In accordance with the Anti-Deficiency Act, 31 U.S.C. §1341, all payments will be made in advance. ***Under no circumstances will the amount paid be more than the actual costs of the goods or services.*** At least quarterly, the parties will reconcile balances related to revenue and expenses for work performed under the agreement.

Category	Amount
Labor	[redacted]
Equipment	
Travel	
Total	

b6
b7C
b7E

9. **Security Requirements.** All work performed under this SOW is unclassified and the results will be publicly distributed, unless otherwise specified by DHS.

10. **Dispute Resolution.** Should disagreement arise on the interpretation of the provisions of this agreement, the dispute shall be resolved pursuant to the Business Rules for intragovernmental Transactions delineated in the Treasury Financial Manual, Vol. 1, Bulletin 2007-03, Section VII (Resolving Intragovernmental Disputes and Major Differences.)

11. **Modification, Cancellation, and Termination.** Either party may terminate this agreement with 60 days written notice. If the requesting agency cancels the order, the providing agency is authorized to collect costs incurred prior to cancellation of the order plus any termination costs. This agreement may be amended at any time prior to the termination of this Agreement upon written agreement by both parties.

Justification for Other Than Full and Open Competition
In Accordance With 41 U.S.C. 253 (c)(6)

1. IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

(U) The agency is the U.S. Department of Justice, Federal Bureau of Investigation (FBI), [redacted] Operational Technology Division (OTD). The contracting activity is the Engineering Contracts Unit (ECU).

2. NATURE AND/OR DESCRIPTION OF THE ACTION APPROVED

(U) The proposed acquisition strategy is to award a non-competitive contract effort for highly-specialized [redacted] to [redacted]

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET AGENCY'S NEEDS

b3
b7E

(U) [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) [redacted]

(S) [redacted]

b1
b3
b7E

(U [redacted] is requesting this sole source procurement with [redacted] The proposed procurement is [redacted] Requisition [redacted] in the amount of [redacted] has been submitted to fund the requirement.

b3
b4
b7E

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

CELL/OTD 018516

~~SECRET~~

5. **DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED**

(S)

(S)

(S)

b1
b3
b7E

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b3
b7E

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A**

STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED

(U) [redacted] continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. [redacted] routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI. [redacted]

b3
b7E

[redacted]

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U). Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.

(U) TTU is responsible for providing the FBI with [redacted] The FBI's Wireless Intercept and Tracking Team (WITT) plays a critical role in [redacted]

(S) [redacted]

b1
b3
b7E

(U) TTU is requesting this sole source procurement with Harris - WPG . A requisition has been submitted as described on the attached FD-369 form.

4. IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). Full and Open competition need not be provided for when the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

5. **DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED**

(S)

(S)

b1
b3
b7E

6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when "the synopsis cannot be worded to preclude disclosure of an agency's needs and such disclosure would compromise the national security", (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

b3
b7E

7. **DETERMINATION OF THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE**

(U) The contracting officer has adequate information to ensure that the cost to the government for this acquisition will be fair and reasonable. Techniques may include a technical analysis of proposed direct costs, audit, or comparison of proposed indirect factors with audited factors in use elsewhere in the Government, and rigorous negotiation.

8. **A DESCRIPTION OF THE MARKET SURVEY CONDUCTED AND THE RESULTS OR A STATEMENT OF THE REASONS A MARKET SURVEY WAS NOT CONDUCTED**

(U) TTU continuously conducts market surveys to determine state-of-the-art technologies. The engineers, technicians, and technical personnel are in constant contact with equipment vendors, other technical members of the intelligence community, as well as visiting trade shows, reviewing trade journals, and browsing the Internet. TTU routinely conducts and attends working group (WG) meetings with vendors to assess the capabilities, performance, and quality of equipment that meets the needs of the FBI.

Harris WPG

b7E

9. **ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN**

COMPETITION

(U) [redacted] See paragraph (5) above for facts supporting the use of other then full and open competition.

b3
b7E

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

(U) As the Contracting Officer Technical Representative (COTR) of record, I hereby certify to the best of my knowledge that all information contained herein is complete and accurate to the best of my knowledge.
